335762	Complete flexible cord sets		(X)	.9	(X)	[10]
970099	All other materials and components, parts, containers, and supplies		(X)	206.7	(X)	[10]76.5
971000	Materials, parts, containers, and supplies, n.s.k.[4]		(X)	22.4	(X)	47.3

Footnotes are on next page.

Table 7. **Materials Consumed by Kind: 1977 and 1972**—Con.

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. N.E.C. Not elsewhere classified. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than $50,000 or less than half the unit of measure specified by quantities.

[1]For some establishments, data have been estimated from central unit values, which are based on quantity-cost relationships of reported data. The following symbols are used when percentage of each quantity figure estimated in this manner equals or exceeds 10 percent of published figure: * indicates 10 to 19 percent estimated, ** indicates 20 to 29 percent estimated. If 30 percent or more is estimated, figure is replaced by (S).

[2]From 1972 Census of Manufactures Supplemental Inquiry: Consumption of Materials, Parts, Containers, and Supplies During 1972 (Form MA-131).

[3]For 1972, material code 360101 and 339915 were included with material code 970099.

[4]Total cost of materials of establishments that did not report detailed materials data, including establishments that were not mailed a form.

[5]For 1972, material codes 332045, 244021, 282104, 307903, 349402, 360101, 364300, and 382201 were included in material code 970099.

[6]For 1977 and 1972, material codes 331011, 331013, 331015, 331017, and 331019 were combined to avoid disclosing operations of individual companies.

[7]For 1972, material codes 320101, 354011, 360101, 364300, 329300, 282104, 339915, 335762, and 97100 were included in material code 970099.

[8]For 1972, material codes 336910, 320101, 345001, 349013, 354011, 360101, 364300, 382201, 285101, 329300, 306902, 307903, 282104, 339915, and 335762 were included in material code 970099.

[9]For 1972, material codes 331011, 331013, 331015, 331017, and 331019 were combined.

[10]For 1972, material codes 336910, 354011, 360101, 339915, and 335762 were included with material code 970099.

PRODUCT STATISTICS

5b. Industry-Product Analysis—Value of Shipments for an Industry and Primary Product Shipments, and Specialization and Coverage Ratios: 1977, 1972, and 1967 20
5c. Industry-Product Analysis—Shipments by Product Class and Industry: 1977 21
6a. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1977 and 1972 23
6b. Product Classes—Value of Shipments by All Producers by Geographic Area: 1977 and 1972 32
6c. Product Classes—Value Shipped by All Producers: 1963, 1967, 1972 to 1977 33

MATERIAL STATISTICS

7. Materials Consumed by Kind: 1977 and 1972 34

DESCRIPTION OF INDUSTRIES

ELECTRIC LIGHTING AND WIRING EQUIPMENT

This report shows 1977 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

3641 Electric Lamps
3643 Current-Carrying Wiring Devices
3644 Noncurrent-Carrying Wiring Devices
3645 Residential Lighting Fixtures
3646 Commercial Lighting Fixtures
3647 Vehicular Lighting Equipment
3648 Lighting Equipment, N.E.C.

The industry statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments, but also their activities in the manufacture of secondary products as well as their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1a-5a) with product statistics (table 6a) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5b, which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

Small single-unit companies with up to 20 employees (the cutoff varied by industry), were excluded from the mail portion of the census. For these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated), data on payrolls and receipts were obtained from administrative records of other government agencies. The remaining statistics were developed from industry averages.

Establishment data were tabulated based on industry definitions contained in the 1972 Standard Industrial Classification Manual and its 1977 supplement.

INDUSTRY 3641, ELECTRIC LAMPS

This industry comprises establishments primarily engaged in the manufacture of electric lamp bulbs.

The total value of shipments for establishments classified in the Electric Lamps industry amounted to $1,651 million in 1977, an increase of 51 percent from 1972. The value of shipments of products classified as primary to the industry was $1,630 million, an increase of 48 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $1,089 million in 1977, was 35 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 28.7 thousand employees, a decrease of 10 percent from 1972. The leading States in employment were Ohio, Pennsylvania, Massachusetts, and Kentucky, accounting for approximately 50 percent of the industry's 1977 employment. Data for Ohio and Massachusetts have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

The 1977 census obtained data on shipments of electric lamp bulbs only at product class levels. This is the source of the data in table 6a described "As reported in census of manufactures." Detailed figures on the shipments of electric lamp bulbs are reported quarterly in the Census Bureau's Current Industrial Reports (CIR) MQ-36B, Electric Lamps. Some of these data are also shown in table 6a.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 2 percent of total value of shipments.

INDUSTRY 3643, CURRENT-CARRYING WIRING DEVICES

This industry comprises establishments primarily engaged in the manufacture of such devices as electrical outlets, lamp sockets, connectors, receptacles, and snap switches. Establishments primarily engaged in the manufacture of noncurrent-carrying wiring devices are classified in industry 3644, and electric power wire and cable in industry 3357.

The total value of shipments for establishments classified in the Current-Carrying Wiring Devices industry amounted to $1,795 million in 1977, an increase of 43 percent from 1972. The value of shipments of products classified as primary to the industry was $1,825 million, an increase of 50 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $1,100 million in 1977, was 43 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for

changes in price levels.

In 1977 the industry had 43.9 thousand employees, a decrease of 9 percent from 1972. The leading States in employment were Illinois, New York, Connecticut, and Rhode Island, accounting for approximately 50 percent of the industry's 1977 employment. Data for Rhode Island have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

The 1977 census obtained data on shipments of current-carrying wiring devices only at product class levels. This is the source of the data in table 6a described "as reported in census of manufactures." Detailed figures on the shipments of current-carrying wiring devices are reported annually in the Census Bureau's Current Industrial Reports (CIR) MA-36K, Wiring Devices and Supplies. Some of these data are also shown in table 6a.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 5 percent of total value of shipments.

INDUSTRY 3644, NONCURRENT-CARRYING WIRING DEVICES

This industry comprises establishments primarily engaged in the manufacture of noncurrent-carrying wiring devices. Establishments primarily engaged in the manufacture of current-carrying wiring devices are classified in industry 3643.

The total value of shipments for establishments classified in the Noncurrent-Carrying Wiring Devices industry amounted to $1,422 million in 1977, an increase of 60 percent from 1972. The value of shipments of products classified as primary to the industry was $1,316 million, an increase of 58 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) Value added by manufacture, at $744 million in 1977, was 51 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 25.8 thousand employees, approximately the same as 1972. The leading States in employment were Illinois, New York, Ohio, and Pennsylvania, accounting for approximately 50 percent of the industry's 1977 employment.

The 1977 census obtained data on shipments of noncurrent-carrying wiring devices only at product class levels. This is the source of the data in table 6a described "As reported in census of manufactures." Detailed figures on the shipments of noncurrent-carrying wiring devices are reported annually in the Census Bureau's Current Industrial Reports (CIR) MA-36K, Wiring Devices and Supplies. Some of these data are also shown in table 6a.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 3 percent of total value of shipments.

INDUSTRY 3645, RESIDENTIAL LIGHTING FIXTURES

This industry comprises establishments primarily engaged in the manufacture of residential lighting fixtures. Establishments primarily engaged in the manufacture of commercial and industrial lighting fixtures are classified in industry 3646, vehicular lighting equipment in industry 3647, and lamp bulbs in industry 3641.

The total value of shipments for establishments classified in the Residential Lighting Fixtures industry amounted to $987 million in 1977, an increase of 29 percent from 1972. The value of shipments of products classified as primary to the industry was $975 million, an increase of 31 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were incandescent ceiling or pendant lighting fixtures, for which shipments increased 58 percent. Value added by manufacture, at $494 million in 1977, was 27 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are not therefore adjusted for changes in price levels.

In 1977 the industry had 23.7 thousand employees, a decrease of 11 percent from 1972. The leading States in employment were New York, Pennsylvania, Illinois, and Ohio, accounting for approximately 50 percent of the industry's 1977 employment. Data for Ohio have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

The 1977 census obtained data on shipments of residential lighting fixtures only at product class levels. This is the source of the data in table 6a described "As reported in census of manufactures." Detailed figures on the shipments of residential lighting fixtures are reported annually in the Census Bureau's Current Industrial Reports (CIR) MA-36L Electric Lighting Fixtures. Some of these data are also shown in table 6a.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 11 percent of total value of shipments.

INDUSTRY 3646, COMMERCIAL LIGHTING FIXTURES

This industry comprises establishments primarily engaged in the manufacture of commercial lighting fixtures. Establishments

primarily engaged in the manufacture of residential lighting fixtures are classified in industry 3645.

The total value of shipments for establishments classified in the Commercial Lighting Fixtures industry amounted to $923 million in 1977, an increase of 28 percent from 1972. The value of shipments of products classified as primary to the industry was $935 million, an increase of 33 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $435 million in 1977, was 24 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 15.6 thousand employees, a decrease of 17 percent from 1972. The leading States in employment were California, Georgia, New York, and New Jersey, accounting for approximately 40 percent of the industry's 1977 employment. Data for Georgia have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

The 1977 census obtained data on shipments of commercial lighting fixtures only at product class levels. This is the source of the data in table 6a described "As reported in census of manufactures." Detailed figures on the shipments of commercial lighting fixtures are reported annually in the Census Bureau's Current Industrial Reports (CIR) MA-36L, Electric Lighting Fixtures. Some of these data are also shown in table 6a.

Establishments of single-unit companies in this industry with up to 20 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 5 percent of total value of shipments.

INDUSTRY 3647, VEHICULAR LIGHTING EQUIPMENT

This industry comprises establishments primarily engaged in the manufacture of vehicular lighting equipment.

The total value of shipments for establishments classified in the Vehicular Lighting Equipment industry amounted to $909 million in 1977, an increase of 82 percent from 1972. The value of shipments of products classified as primary to the industry was $646 million, an increase of 80 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $536 million in 1977, was 79 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 14.5 thousand employees, an increase of 6 percent from 1972. The leading States in employment were Indiana, Ohio, New York, and Illinois, accounting for approximately 75 percent of the industry's 1977 employment. Data for Indiana, Ohio, and Illinois have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

The 1977 census obtained data on shipments of vehicular lighting equipment only at product class levels. This is the source of the data in table 6a described "As reported in census of manufactures." Detailed figures on the shipments of vehicular lighting equipment are reported annually in the Census Bureau's Current Industrial Report (CIR) MA-36L, Electric Lighting Fixtures.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 1 percent of total value of shipments.

INDUSTRY 3648, LIGHTING EQUIPMENT, N.E.C.

This industry comprises establishments primarily engaged in the manufacture of outdoor lighting equipment, flashlights and lanterns, and miscellaneous lighting equipment, not elsewhere classified.

The total value of shipments for establishments classified in the Lighting Equipment, N.E.C. industry amounted to $671 million in 1977, an increase of 38 percent from 1972. The value of shipments of products classified as primary to the industry was $675 million, an increase of 41 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $343 million in 1977, was 35 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 12.8 thousand employees, an increase of 1 percent from 1972. The leading States in employment were California, Ohio, Massachusetts, and Illinois, accounting for approximately 40 percent of the industry's 1977 employment.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 7 percent of total value of shipments.

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. r Revised. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]In annual survey of manufactures (ASM) years, data are estimates based on a representative sample of establishments canvassed annually and may differ from results of a complete canvass of all establishments. ASM publication shows percentage standard errors. Unless otherwise noted, for data prior to 1963, see 1963 Census of Manufactures, vol. II, table 1 of the Industry chapter.

[2]For the census, a company is defined as a business organization consisting of one establishment or more under common ownership or control.

[3]Industry was defined or redefined for 1972 Census of Manufactures, so data are available only for years shown.

[4]Data for 1967 and 1963 were derived from Table 8, General Statistics for Establishments by Industry Specialization and Primary Product Class Specialization, in vol. II of the 1967 and 1963 Censuses of Manufactures. Separate data for other years are not available.

[5]Data either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data; thus these estimates may be of limited reliability.

[6]Estimate for new capital expenditures has associated standard error of 15 percent or more and may be of limited reliability. Estimates for other data items are of acceptable reliability.

[7]Minimum percentage; exact percentage withheld to avoid disclosing operations of individual companies.

[8]Relationships are not meaningful because of predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

[9]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[10]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

Table 1b. Selected Operating Ratios for the Industry: 1977 and Earlier Years

[For explanation of terms, see appendix A]

Year	Payroll per employee (dollars)	Assets per employee (dollars)	Production workers as percent of total employment (percent)	Annual hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials as percent of value of shipments (percent)	Cost of materials and payroll as percent of value of shipments (percent)	Assets as percent of value of shipments (percent)	Value added per employee (dollars)	Payroll as percent of value added (percent)	Value added per production worker hour (dollars)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown for those States where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2]Statistics for some producing States are withheld to avoid disclosing figures for individual companies. However, for such States with 150 employees or more, number of establishments is shown and employment size range is indicated by one of the following symbols: AA—150 to 249 employees; BB—250 to 499 employees; CC—500 to 999 employees; EE—1,000 to 2,499 employees; FF—2,500 employees or more.

[3]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[4]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[5]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 3a. Summary Statistics for the Industry: 1977

[For explanation of terms, see appendix A]

Item	Unit of measure	Electric lamps (SIC 3641)	Current-carrying wiring devices (SIC 3643)	Noncurrent-carrying wiring devices (SIC 3644)	Residential lighting fixtures (SIC 3645)	Commercial lighting fixtures (SIC 3646)	Vehicular lighting equipment (SIC 3647)	Lighting equipment, n.e.c. (SIC 3648)
Primary product specialization ratio[1]	percent	97	84	82	95	90	68	85
Coverage ratio[2]	do	98	79	83	92	86	94	81

New machinery and equipment	do	30.7	45.5	23.4	9.2	14.6	43.8	13.0
Used capital expenditures	do	6.8	2.6	2.8	2.3	0.8	1.2	2.1

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Represents ratio of primary product shipments to total product shipments (primary and secondary, excluding miscellaneous receipts) for establishments classified in industry.

[2]Represents ratio of primary products shipped by establishments classified in industry to total shipments of such products by all manufacturing establishments, wherever classified.

[3]Relationships are not meaningful because of predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

[4]Minimum percentage; exact percentage withheld to avoid disclosing operations of individual companies.

[5]Data for value of shipments represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[6]Data for value of shipments represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[7]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 3b. Supplemental Industry Statistics Based on Sample Estimates: 1977

(For explanation of terms, see appendix A. For description of annual survey of manufactures (ASM), see appendix B)

Item	Electric lamps (SIC 3641)		Current-carrying wiring devices (SIC 3643)		Noncurrent-carrying wiring devices (SIC 3644)		Residential lighting fixtures (SIC 3645)

End of year	176.4	3	315.4	3	189.5	3
Depreciation charges during 1977	11.6	3	22.0	2	13.2	3
Buildings and other structures	1.8	5	3.0	4	2.9	6
Machinery and equipment	9.7	3	19.0	2	10.3	3

Note: Data for total new capital expenditures, new building expenditures, new machinery expenditures, and total used expenditures are shown in table 3a, as well as in this table. The figures in table 3a are census universe totals and may differ from the annual survey of manufactures (ASM) sample estimates shown in this table. The figures in this table represent the best estimates of year-to-year change as measured by the continuing ASM sample. However, they are subject to sampling error and, hence, as estimates of level, are not as reliable as the universe figures shown in table 3a.

- Represents zero. (A) Indicates standard errors of 100 percent or more. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. (X) Not applicable. (Z) Less than 50 thousand dollars.

[1]For a description of the standard error of estimate, see the section "Qualifications of the Data" in appendix B. Figures in parentheses have standard errors of 15 percent or more.

[2]This is a measure of the extent to which respondents reported for each item. It is derived for each item by calculating the ratio of the weighted employment (establishment data multiplied by sample weight; see appendix B) for those sample establishments that reported the specific inquiry to the weighted total employment for all sample establishments classified in the industry.

[3]The standard errors for the detailed categories of new machinery and equipment expenditures were not directly calculated. However, the actual figure is not expected to exceed the estimated figure shown.

[4]This category represents the total machinery and equipment expenditures for establishments that did not break down their expenditures for the three specific categories.

Table 4. Industry Statistics by Employment Size of Establishment: 1977

[For explanation of terms, see appendix A]

Industry and employment size class	E[1]	All establishments (no.)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	New capital expenditures (million dollars)	End-of-year inventories (million dollars)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. Data for this item are included in figures in parentheses above. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2]Report forms were not mailed to small single-unit companies with up to 20 employees (cutoff varied by industry). Payroll and sales data for 1977 were obtained from administrative records supplied by other agencies of the Federal Government. These data were then used in conjunction with industry averages to estimate the balance of items shown. Data are also included in respective size classes shown.

[3]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[4]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[5]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 5a. Industry Statistics by Industry and Primary Product Class Specialization: 1977

[Table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. Measures of plant specialization shown are (1) industry specialization: ratio of primary product shipments to total product shipments (primary plus secondary, excluding miscellaneous receipts) for the establishment; and (2) product class specialization: ratio of largest primary product class shipments to total product shipments (primary plus secondary, excluding miscellaneous receipts) for the establishment. See appendix for method of computing ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for various reasons; e.g., to avoid disclosing operations of individual companies. For explanation of terms, see appendix A]

Industry or product class code	Industry or product class by percent of specialization	All establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	New capital expenditures (million dollars)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[2]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

Table 5b. Industry-Product Analysis — Value of Shipments for an Industry and Primary Product Shipments, and Specialization and Coverage Ratios: 1977, 1972, and 1967

(An establishment is assigned to an industry based on shipment values of products representing largest amount considered primary to an industry. Frequently, establishment shipments comprise mixtures of products assigned to an industry (primary), those considered primary to other industries (secondary), and receipts for activities such as merchandising or contract work. Columns A-D show this product pattern for an industry, and column E shows primary product specialization ratio. The extent to which an industry's primary products are shipped by establishments classified in and out of an industry is shown in columns F-H and coverage ratio is shown in column I. For explanation of terms, see appendix A)

1977 product code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total (million dollars)	Primary products (million dollars)	Secondary products (million dollars)	Miscellaneous receipts (million dollars)	Primary product specialization ratio Col. B / Col. n.e.c. Not elsewhere classified.
[1]For 1972, industries 3645, 3646, 3647, and 3648 were established as separate industries. For 1967, data are not available.

Table 5c. Industry-Product Analysis — Shipments by Product Class and Industry: 1977

(Millions of dollars. Table shows where products of an industry (referred to as primary and listed in table 6a) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Only those product groups that have at least $2 million in shipments from establishments classified in one of industries included in this chapter are shown. Read across to determine where products of industries in this chapter are produced. To extent that some of primary products are made in industries not included in this chapter, value of such shipments is shown in "Other industries" column. Specified "Other industries" are listed at end of table if they account for more than $5 million of products primary to this chapter. For explanation of terms, see appendix A)

36489 85	Parts and accessories for nonelectric lighting equipment, including reflectors and fittings, incandescent mantles, etc.	.....	6	(X)	6.3	(X)	7.5
36489 00	Other electric and nonelectric lighting equipment, including hand portable equipment, and parts and accessories, n.s.k.	.....	(NA)	(X)	12.1	(X)	19.0
36480 00	Lighting equipment, n.e.c., n.s.k., typically for establishments with 5 employees or more	.....	(NA)	(X)	42.9	(X)	1.6
36480 02	Lighting equipment, n.e.c., n.s.k., typically for establishments with less than 5 employees	.....	(NA)	(X)	17.4	(X)	5.2

Note: In 1977 Census of Manufactures, shipments data for establishments of small companies, typically those with less than 5 employees, were estimated from administrative records data rather than collected from respondents. These shipments figures (discussed in the introduction) are included in code ending with "002." In both 1977 and 1972 Censuses of Manufactures, products not completely identified on standard forms were coded to appropriate product class (5 digits) followed by "00," or in some cases to appropriate industry (4 digits) followed by "0 00."

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. N.E.C. Not elsewhere classified. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards. (X) Not applicable.

[1]Total data for 1977 and 1972 are from 1977 Census of Manufactures as well as Current Industrial Report MQ-36B. Product detail was collected on CIR form MA-36B.

[2]For 1972, product code 36410 00 was included with product code 36410 10.

[3]Excludes christmas tree lamps.

[4]For 1977, product codes 36410 63 and 36410 00 were combined to avoid disclosing operations of individual companies.

[5]Over 50 percent estimated.

[6]25 to 50 percent estimated.

[7]10 to 25 percent estimated.

[8]Included with 36430 38 in 1972.

[9]Product code 36430 59 was included with 36430 34, 36430 35, and 36430 38.

[10]For 1972, product codes 36451 69 and 36457 73 were combined to avoid disclosing operations of individual companies.

[11]For 1972, data for product codes 36462 69 and 36463 29 was not collected separately.

[12]For 1972, data for product codes 36463 16 and 36463 29 were combined to avoid disclosing operations of individual companies.

[13]For 1972, product code 36470 24 was combined with 36470 22 to avoid disclosing operations of individual companies.

[14]For 1972, product codes 36485 16 and 36485 45 were combined to avoid disclosing operations of individual companies.

[15]For 1977, product codes 36489 91, 36489 83, and 36489 87 were combined to avoid disclosing operations of indivdual companies.

Table 6b. Product Classes — Value of Shipments by All Producers by Geographic Area: 1977 and 1972

(Millions of dollars. Product classes covered are those that are economically significant and whose production is geographically dispersed, provided dispersion is not approximated by data in table 2. Also, product classes are not shown if they are miscellaneous or "not specified by type" classes. Statistics for some States are withheld because they are either less than $2 million in product class shipments or they disclose operations of individual companies in 1977)

Product class and geographic area	Value of product shipments	
	1977	1972
36441, ELECTRICAL TRANSMISSION LINE AND POLE HARDWARE		
United States	276.2	222.3

n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. (X) Not applicable.

[1]Figures are estimates derived from a representative sample of manufacturing establishments canvassed in annual survey of manufactures and, therefore, may differ from results that would be obtained from a complete canvass of all manufacturing establishments. Standard errors associated with estimates are published in annual survey of manufactures volumes for this period. Figures in parentheses either have associated standard errors, exceeding 15 percent or are not consistent with other census series and related data. Thus, at individual product class level, estimates may be of limited reliability; however, they may be combined with other product class totals into broader aggregates which are of acceptable reliability.

[2]Prior to 1972, value of products not specified by kind (n.s.k.) for industries 3646 and 3648 were included in industry 3645.

[3]Withheld because estimated figure is negative. This is consequence of using difference method of estimation (see Estimating Procedures in appendix B) and of improved establishment reporting that resulted in changing classification of shipments from n.s.k. code for 1972 Census to specified 5-digit product classes for this year. Four-digit total is best estimate, even though smaller than sum of 5-digit values.

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. N.E.C. Not elsewhere classified. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards. (X) Not applicable.

[1]For some establishments, data have been estimated from central unit values, which are based on quantity-cost relationships of reported data. The following symbols are used when percentage of each quantity figure estimated in this manner equals or exceeds 10 percent of published figure: * indicates 10 to 19 percent estimated, ** indicates 20 to 29 percent estimated. If 30 percent or more is estimated, figure is replaced by (S).

[2]From 1972 Census of Manufactures Supplemental Inquiry: Consumption of Materials, Parts, Containers, and Supplies During 1972 (Form MA-131).

[3]Total cost of materials of establishments that did not report detailed materials data, including establishments that were not mailed a form.

[4]For 1972, material code 307903 was included with material code 970099.

[5]For 1972, material codes 367408 and 307903 were included with material code 970099.

[6]For 1977, material codes 331011, 331013, and 331019 were combined to avoid disclosing operations of individual companies.

[7]For 1972, material codes 331013, 331015, and 331019 were combined to avoid disclosing operations of individual companies.

[8]For 1972, material codes 307903, 265001, 307902, 345001, 361201, 364300, and 970099 were combined.

[9]For 1972, material codes 331013 and 331015 were included with material code 331019 to avoid disclosing operations of individual companies.

[10]For 1977, material code 331015 was combined with material code 331019 to avoid disclosing operations of individual companies.

[11]For 1972, material code 307903 was combined with material codes 265001, 307902, 345001, 361201, 364300, and 970099.

Communication Equipment, Including Radio and TV

INDUSTRY STATISTICS

1a. Historical Statistics: 1977 and Earlier Years 5
1b. Selected Operating Ratios: 1977 and Earlier Years 7
2. Geographic Area: 1977 and 1972 8
3a. Summary Statistics: 1977 11
3b. Supplemental Statistics Based on Sample Estimates: 1977 12
4. Employment Size of Establishment: 1977 13
5a. Industry and Primary Product Class Specialization: 1977 14

PRODUCT STATISTICS

5b. Industry-Product Analysis—Value of Shipments for an Industry and Primary Product Shipments, and Specialization and Coverage Ratios: 1977, 1972, and 1967 15
5c. Industry-Product Analysis—Shipments by Product Class and Industry: 1977 16
6a. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1977 and 1972 18
6b. Product Classes—Value of Shipments by All Producers by Geographic Area: 1977 and 1972 30
6c. Product Classes—Value Shipped by All Producers: 1962, 1967, 1972 to 1977 32

MATERIAL STATISTICS

7. Materials Consumed by Kind: 1977 and 1972 33

DESCRIPTION OF INDUSTRIES

COMMUNICATION EQUIPMENT, INCLUDING RADIO AND TV

This report shows 1977 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

3651 Radio and TV Receiving Sets
3652 Phonograph Records and Prerecorded Tape
3661 Telephone and Telegraph Apparatus
3662 Radio and TV Communication Equipment

The industry statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments, but also their activities in the manufacture of secondary products as well as their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1a-5a) with product statistics (table 6a) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5b, which shows the value of primary and secondary products shipped by establishments classified in the specified industry, and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

Small single-unit companies with up to 20 employees (the cutoff varied by industry), were excluded from the mail portion of the census. For these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated), data on payrolls and receipts were obtained from administrative records of other government agencies. The remaining statistics were developed from industry averages.

Establishment data were tabulated based on industry definitions contained in the 1972 Standard Industrial Classification Manual and its 1977 supplement.

INDUSTRY 3651, RADIO AND TV RECEIVING SETS

This industry comprises establishments primarily engaged in the manufacture of electronic equipment for home entertainment. This industry also includes establishments primarily engaged in the manufacture of public address systems and music distribution apparatus. Establishments primarily engaged in the manufacture of records are classified in industry 3652, radio and television receiving-type tubes in industry 3671, and television receiving-type cathode-ray tubes in industry 3672.

The total value of shipments for establishments classified in the Radio and TV Receiving Sets industry amounted to $5,733 million in 1977, an increase of 29 percent from 1972. The value of shipments of products classified as primary to the industry was $4,731 million, an increase of 31 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were consumer high fidelity components, for which shipments increased 50 percent, and loudspeakers and speaker systems sold separately, for which shipments increased 203 percent. Value added by manufacture, at $2,352 million in 1977, was 30 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 74.6 thousand employees, a decrease of 14 percent from 1972. The leading States in employment were Indiana, Illinois, Tennessee, and California, accounting for approximately 60 percent of the industry's 1977 employment. Data for Indiana and Tennessee have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

The 1977 census obtained data on shipments of radio and television receiving sets only at product class levels. This is the source of the data in table 6a described "As reported in census of manufactures." Detailed figures on the shipments of radio and television receiving sets are reported annually in the Census Bureau's Current Industrial Reports (CIR) MA-36M, Radio Receivers and Television Sets; Phonographs and Record Players, Speakers and Related Equipment. Some of these data are also shown in table 6a.

The establishments in this industry with less than 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 3 percent of total value of shipments.

INDUSTRY 3652, PHONOGRAPH RECORDS AND PRERECORDED TAPE

This industry comprises establishments primarily engaged in the manufacture of phonograph records and prerecorded magnetic tape. Establishments primarily engaged in the manufacture of electronic equipment for home entertainment, except records are classified in industry 3651. Establishments primarily engaged in the manufacture of blank magnetic recording tape are classified in industry 3679.

The total value of shipments for establishments classified in the Phonograph Records and Prerecorded Tape industry amounted to $1,182 million in 1977, an increase of 108 percent from 1972. The value of shipments of products classified as

primary to the industry was $1,139 million, an increase of 112 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were prerecorded audio tapes, for which shipments increased 106 percent. The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $727 million in 1977, was 94 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 23.1 thousand employees, an increase of 14 percent from 1972. The leading States in employment were New York, New Jersey, Indiana, and California. Data for Indiana have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

The establishments in this industry with less than 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 7 percent of total value of shipments.

INDUSTRY 3661, TELEPHONE AND TELEGRAPH APPARATUS

This industry comprises establishments primarily engaged in the manufacture of wire telephone and telegraph equipment and parts especially designed for telephone and telegraph use.

The total value of shipments for establishments classified in the Telephone and Telegraph Apparatus industry amounted to $7,858 million in 1977, an increase of 74 percent from 1972. The value of shipments of products classified as primary to the industry was $7,119 million, an increase of 79 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were telephone switching and switchboard equipment, for which shipments increased 80 percent. The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $4,192 million in 1977, was 58 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 124.4 thousand employees, a decrease of 8 percent from 1972. The leading States in employment were Massachusetts, Indiana, Illinois, and California, accounting for approximately 45 percent of the industry's 1977 employment. Data for Massachusetts and Indiana have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

The 1977 census obtained data on shipments of telephone and telegraph apparatus only at product class levels. This is the source of the data in table 6a described "As reported in census of manufactures." Detailed figures on the shipments of telephone and telegraph apparatus are reported annually in the Census Bureau's Current Industrial Reports (CIR) MA-36N, Selected Electronic and Associated Products. Some of these data are also shown in table 6a.

The establishments in this industry with less than 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 2 percent of total value of shipments.

INDUSTRY 3662, RADIO AND TELEVISION COMMUNICATION EQUIPMENT.

This industry comprises establishments primarily engaged in the manufacture of (1) radio and television broadcasting equipment; (2) electric communication equipment and parts, except telephone and telegraph; (3) electronic field detection apparatus, light and heat emission operating apparatus, object detection apparatus and navigational electronic equipment, and aircraft and missile control systems; (4) high-energy particle accelerator systems and equipment designed and sold as a complete package for radiation therapy, irradiation, radio-graphic inspection, and research (linear accelerators, betatrons, dynamotrons, Vandergraff generators, resonant transformers, insulating core transformers, etc.); (5) high-energy particle electronic equipment and accessories sold separately for the construction of linear accelerators, cyclotrons, synchrotrons, and other high-energy research installations (transmitters/modulators, accelerating waveguide structures, pulsed electron guns, vacuum systems, cooling systems, etc.); and (6) other electric and electronic communication and signaling products, not elsewhere classified. Establishments primarily engaged in the manufacture of transmitting tubes are classified in industry 3673.

The total value of shipments for establishments classified in the Radio and Television Communication Equipment industry amounted to $14,901 million in 1977, an increase of 63 percent from 1972. The value of shipments of products classified as primary to the industry was $14,051 million, an increase of 68 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were intercommunication equipment, for which shipments increased 153 percent. Value added by manufacture, at $9,950 million in 1977, was 72 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 334.6 thousand employees, an increase of 5 percent from 1972. The leading States in employment were Massachusetts, New York, Texas, and California. Data for Massachusetts have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided. These same States were in the forefront for 1972, although

there has been some shift in the relative importance of individual States.

The 1977 census obtained data on shipments of radio and television communication equipment only at product class levels. This is the source of the data in table 6a described "As reported in census of manufactures." Detailed figures on the shipments of radio and television communication equipment are reported annually in the Census Bureau's Current Industrial Reports (CIR) MA-36N, Selected Electronic and Associated Products. Some of these data are also shown in table 6a.

The establishments in this industry with less than 10 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 4 percent of total value of shipments.

Table 1a. Historical Statistics for the Industry: 1977 and Earlier Years

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. r Revised. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]In annual survey of manufactures (ASM) years, data are estimates based on a representative sample of establishments canvassed annually and may differ from results of a complete canvass of all establishments. ASM publication shows percentage standard errors. Unless otherwise noted, for data prior to 1963, see 1963 Census of Manufactures, vol. II, table 1 of the Industry chapter.

[2]For the census, a company is defined as a business organization consisting of one establishment or more under common ownership or control.

[3]Industry was defined or redefined for 1972 Census of Manufactures, so data are available only for years shown.

[4]Data for 1967 and 1963 were derived from Table 8, General Statistics for Establishments by Industry Specialization and Primary Product Class Specialization, in vol. II of the 1967 and 1963 Censuses of Manufactures. Separate data for other years are not available.

[5]Data either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data; thus these estimates may be of limited reliability.

[6]Estimate for new capital expenditures has associated standard error of 15 percent or more and may be of limited reliability. Estimates for other data items are of acceptable reliability.

[7]Minimum percentage; exact percentage withheld to avoid disclosing operations of individual companies.

[8]Relationships are not meaningful because of predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

[9]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[10]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

Table 1b. Selected Operating Ratios for the Industry: 1977 and Earlier Years

[For explanation of terms, see appendix A]

Year	Payroll per employee (dollars)	Assets per employee (dollars)	Production workers as percent of total employment (percent)	Annual hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials as percent of value of shipments (percent)	Cost of materials and payroll as percent of value of shipments (percent)	Assets as percent of value of shipments (percent)	Value added per employee (dollars)	Payroll as percent of value added (percent)	Value added per production worker hour (dollars)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown for those States where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2]Statistics for some producing States are withheld to avoid disclosing figures for individual companies. However, for such States with 150 employees or more, number of establishments is shown and employment size range is indicated by one of the following symbols: AA—150 to 249 employees; BB—250 to 499 employees; CC—500 to 999 employees; EE—1,000 to 2,499 employees; FF—2,500 employees or more.

[3]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[4]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[5]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 3a. Summary Statistics for the Industry: 1977

[For explanation of terms, see appendix A]

Item	Unit of measure	Radio and TV receiving sets (SIC 3651)	Phonograph records and prerecorded tape (SIC 3652)	Telephone and telegraph apparatus (SIC 3661)	Radio and TV communication equipment (SIC 3662)
Primary product specialization ratio[1]	percent	94	99	94	92
Coverage ratio[2]	do	98	99	97	92
All establishments	number	581	709	264	2 122
With 1 to 19 employees	do	389	576	110	1 149
With 20 to 99 employees	do	92	95	59	529
With 100 employees or more	do	100	38	95	444
All employees, average for year	1,000	74.6	23.1	124.4	334.6
Payroll for year, all employees	mil. dol.	852.4	244.6	1 818.0	5 181.0
Production workers:					
Average for year	1,000	57.6	17.8	87.1	172.8
March	do	54.6	16.3	84.3	171.1
May	do	57.2	17.1	85.5	170.4
August	do	58.5	17.6	88.0	172.5
November	do	60.0	20.5	90.7	176.9
Hours	millions	106.6	37.2	164.2	336.0
January to March	do	25.0	8.6	41.4	84.3
April to June	do	27.1	8.9	41.9	84.4
July to September	do	26.6	9.5	39.4	81.5
October to December	do	27.8	10.3	41.5	85.8
Wages	mil. dol.	570.0	170.0	1 125.9	2 104.5
Cost of materials, etc.	do	3 393.9	461.5	3 858.6	5 180.2
Materials, parts, containers, etc., consumed	do	2 861.4	340.1	3 444.1	4 572.6
Resales	do	501.0	15.5	(D)	(D)
Fuels consumed	do	6.8	9.5	19.3	23.0
Purchased electric energy	do	17.5	8.4	31.5	101.1
Contract work	do	7.3	87.9	(D)	(D)
Value of shipments, including resales	do	5 732.6	1 181.7	7 858.3	14 900.5
Value of resales	do	779.5	18.4	(D)	(D)
Value added by manufacture	do	2 351.8	727.3	4 192.0	9 950.0
Manufacturers' inventories:					
Beginning of year	do	794.8	108.8	1 220.2	2 893.6
Finished products	do	289.1	58.4	113.0	434.5
Work in process	do	264.5	7.9	727.6	1 845.7
Materials, supplies, fuel, etc.	do	241.2	42.6	379.6	613.4
End of year	do	835.0	121.3	1 503.3	3 162.5
Finished products	do	305.4	62.7	125.0	442.6
Work in process	do	261.3	10.6	907.9	2 067.4
Materials, supplies, fuel, etc.	do	268.3	47.9	470.5	652.5
Capital expenditures for plant and equipment	do	128.6	30.2	234.2	501.7
New capital expenditures	do	105.8	29.8	217.3	471.8
New buildings and other structures	do	26.4	5.0	17.1	101.5
New machinery and equipment	do	79.4	24.8	200.2	370.2
Used capital expenditures	do	22.8	0.4	17.0	30.0

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Represents ratio of primary product shipments to total product shipments (primary and secondary, excluding miscellaneous receipts) for establishments classified in industry.

[2]Represents ratio of primary products shipped by establishments classified in industry to total shipments of such products by all manufacturing establishments, wherever classified.

[3]Relationships are not meaningful because of predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

[4]Minimum percentage; exact percentage withheld to avoid disclosing operations of individual companies.

[5]Data for value of shipments represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[6]Data for value of shipments represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[7]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 3b. Supplemental Industry Statistics Based on Sample Estimates: 1977

(For explanation of terms, see appendix A. For description of annual survey of manufactures (ASM), see appendix B)

Item	Radio and TV receiving sets (SIC 3651)		Phonograph records and prerecorded tape (SIC 3652)		Telephone and telegraph apparatus (SIC 3661)		Radio and TV communication equipment (SIC 3662)	
	Amount (million dollars)	Standard error of estimate[1] (percent)	Amount (million dollars)	Standard error of estimate[1] (percent)	Amount (million dollars)	Standard error of estimate[1] (percent)	Amount (million dollars)	Standard error of estimate[1] (percent)
Purchased services:								
Cost of purchased services for repair of--								
Buildings and other structures	(2.1)	27	(1.1)	29	12.6	1	25.3	3

Retirements	(2.8)	24	(1.1)	19	7.7	2	30.2	6
End of year	328.3	2	62.2	4	610.2	1	1,082.6	2
Machinery and equipment:								
Beginning of year	410.9	1	137.4	4	1,383.6	1	2,009.9	1
New capital expenditures	78.2	2	22.9	10	194.9	1	369.6	2
Automobiles, trucks, etc., for highway use[3]	(3.3)	(A)	(0.1)	(A)	(0.6)	(A)	(8.9)	(A)
Computers and peripheral data processing equipment[3]	(1.8)	(A)	(0.2)	(A)	(7.0)	(A)	(23.9)	84
All other[3]	(68.8)	29	(17.3)	(A)	175.9	12	292.9	7
New machinery and equipment, n.s.k.[4]	(4.3)	(A)	(5.2)	(A)	(11.3)	(A)	(43.8)	46
Used capital expenditures	13.7	1	-	(X)	12.6	1	19.0	4
Retirements	28.3	6	9.7	10	101.8	1	149.7	3
End of year	474.5	1	150.6	5	1,489.3	1	2,248.8	1
Total gross value of depreciable assets:								
Beginning of year	706.4	1	197.2	4	1,983.7	1	3,017.5	1
New capital expenditures	104.6	3	26.3	9	208.2	1	465.8	2
Used capital expenditures	22.8	1	(0.1)	73	17.0	1	28.0	4
Retirements	31.1	7	10.8	10	109.5	1	180.0	3
End of year	802.8	1	212.8	4	2,099.4	1	3,331.3	1
Depreciation charges during 1977	56.3	1	16.7	8	142.1	1	265.3	3
Buildings and other structures	12.6	2	2.6	9	18.3	1	50.4	3
Machinery and equipment	43.7	2	14.1	9	123.8	1	214.9	3

Note: Data for total new capital expenditures, new building expenditures, new machinery expenditures, and total used expenditures are shown in table 3a, as well as in this table. The figures in table 3a are census universe totals and may differ from the annual survey of manufactures (ASM) sample estimates shown in this table. The figures in this table represent the best estimates of year-to-year change as measured by the continuing ASM sample. However, they are subject to sampling error and, hence, as estimates of level, are not as reliable as the universe figures shown in table 3a.

- Represents zero. (A) Indicates standard errors of 100 percent or more. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.s.k. Not specified by kind. (X) Not applicable. (Z) Less than 50 thousand dollars.

[1]For a description of the standard error of estimate, see the section "Qualifications of the Data" in appendix B. Figures in parentheses have standard errors of 15 percent or more.

[2]This is a measure of the extent to which respondents reported for each item. It is derived for each item by calculating the ratio of the weighted employment (establishment data multiplied by sample weight; see appendix B) for those sample establishments that reported the specific inquiry to the weighted total employment for all sample establishments classified in the industry.

[3]The standard errors for the detailed categories of new machinery and equipment expenditures were not directly calculated. However, the actual figure is not expected to exceed the estimated figure shown.

[4]This category represents the total machinery and equipment expenditures for establishments that did not break down their expenditures for the three specific categories.

Table 4. Industry Statistics by Employment Size of Establishment: 1977

[For explanation of terms, see appendix A]

Industry and employment size class	E[1]	All establishments (no.) Covered by administrative records[2]	E0	851	4.4	63.8	2.4	4.4	24.8	129.8	67.3	197.0	5.1	41.2

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. Data for this item are included in figures in parentheses above. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2]Report forms were not mailed to small single-unit companies with up to 20 employees (cutoff varied by industry). Payroll and sales data for 1977 were obtained from administrative records supplied by other agencies of the Federal Government. These data were then used in conjunction with industry averages to estimate the balance of items shown. Data are also included in respective size classes shown.

[3]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[4]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[5]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 5a. Industry Statistics by Industry and Primary Product Class Specialization: 1977

[Table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. Measures of plant specialization shown are (1) industry specialization: ratio of primary product shipments to total product shipments (primary plus secondary, excluding miscellaneous receipts) for the establishment; and (2) product class specialization: ratio of largest primary product class shipments to total product shipments (primary plus secondary, excluding miscellaneous receipts) for the establishment. See appendix for method of computing ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for various reasons; e.g., to avoid disclosing operations of individual companies. For explanation of terms, see appendix A]

Industry or product class code	Industry or product class by percent of specialization	All establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	New capital expenditures (million dollars)
			Number (1,000)	Payroll (million dollars)	Number (1,000)	Hours (millions)	Wages (million dollars)				
3651	**Radio and TV receiving sets:**										
	Entire industry	581	74.6	852.4	57.6	106.6	570.0	2 351.8	3 393.9	5 732.6	105.8

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[2]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

Table 5b. Industry-Product Analysis — Value of Shipments for an Industry and Primary Product Shipments, and Specialization and Coverage Ratios: 1977, 1972, and 1967

(An establishment is assigned to an industry based on shipment values of products representing largest amount considered primary to an industry. Frequently, establishment shipments comprise mixtures of products assigned to an industry (primary), those considered primary to other industries (secondary), and receipts for activities such as merchandising or contract work. Columns A-D show this product pattern for an industry, and column E shows primary product specialization ratio. The extent to which an industry's primary products are shipped by establishments classified in and out of an industry is shown in columns F-H and coverage ratio is shown in column I. For explanation of terms, see appendix A)

1977 product code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total (million dollars)	Primary products (million dollars)	Secondary products (million dollars)	Miscellaneous receipts (million dollars)	Primary product specialization ratio Col. B / Col. Table 5c. Industry-Product Analysis — Shipments by Product Class and Industry: 1977

(Million of dollars. Table shows where products of an industry (referred to as primary and listed in table 6a) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Only those product groups that have at least $2 million in shipments from establishments classified in one of industries included in this chapter are shown. Read across to determine where products of industries in this chapter are produced. To extent that some of primary products are made in industries not included in this chapter, value of such shipments is shown in "Other industries" column. Specified "Other industries" are listed at end of table if they account for more than $5 million of products primary to this chapter. For explanation of terms, see appendix A)

1977 product code	Product group, product class, and miscellaneous receipts	All industries	Radio and TV receiving sets (SIC 3651)	Phonograph records and prerecorded tape (SIC 3652)	Telephone and telegraph apparatus (SIC 3661)	Radio and TV communication equipment (SIC 3662)	Other industries

36612 57	101 to 200 c.p.s		1	(S)	177.4	(D)	(D)
36612 59	Over 200 c.p.s		4				
36612 62	Tape senders and receivers		3	(X)	([10])	(D)	(D)
36613 63	Alphanumeric display terminals based on CRT displays; typically, including a keyboard and sometimes including a serial printer or tape cassette		9	58	124.4	(D)	(D)
	Modems (data sets) including auxiliary sets:						
36612 72	Up to 300 b/s		12	118	34.1		
36612 74	301 to 2000 b/s		8	61	25.0		
36612 76	2001 to 4800 b/s		6	57	112.2	(S)	34.5
36612 78	Over 4800 b/s	Thousand sets	6				
	Voice frequency equipment:						
36612 82	V.F. carrier telegraph		6	(X)	([10])		
36612 84	Signaling		13	(X)	44.0	(X)	(D)
36612 86	Facility equipment, including subscriber loop and repeaters		9	(X)	102.0		
36612 88	Telephone key systems		3	(X)	[10]2,167.7	(X)	[9]1,329.1
36612 91	Other telephone and telegraph equipment		72				
36610 00	Telephone and telegraph apparatus, n.s.k., typically for establishments with 5 employees or more (see note)		(NA)	(X)	94.9	(X)	25.1
36610 02	Telephone and telegraph apparatus, n.s.k., typically for establishments with less than 5 employees (see note)		(NA)	(X)	22.3	(X)	4.1

See footnotes at end of table.

Table 6a. **Products and Product Classes — Quantity and Value of Shipments by All Producers: 1977 and 1972** – Con.

(Includes quantity and value of products of this industry produced by (1) establishments classified in this industry (primary) and (2) establishments classified in other industries (secondary). Transfers of the products of this industry from one establishment of a company to another establishment of the same company (interplant transfers) are also included. For further explanation, see appendix A, Value of shipments)

1977 product code	Product	Unit of measure	Number of companies	Quantity	Value (million dollars)
			1977		
	RADIO AND TV COMMUNICATION EQUIPMENT				
3662- --	Total	.....	(NA)	(X)	14,051.0
36621 --	Communication systems and equipment, except broadcast, including microwave and mobile communication equipment:				
	As reported in census of manufactures	.....	349	(X)	3,344.4
	As reported in Current Industrial Reports MA-36N, Selected Electronic and Associated Products, Including Telephone and Telegraph Apparatus	.....	246	(X)	3,217.5
	Light communication systems and equipment, electronic:				
36621 13	Fiber optics system and equipment	.....	5	(X)	55.6
36621 14	Other light communication systems and equipment, including laser and infrared communication systems and equipment	.....	9		
	Transmitters, receivers, RF power amplifiers, radio communication (point-to-point), except amateur and citizens radio; all components whether shipped as a complete package or shipped separately:				
36621 01	Very low frequency and low frequency (below 300 kHz)	.....	11	(X)	46.9
36621 02	Medium and high frequency (300 kHz to 30 MHz)	.....	21	(X)	91.1
36621 03	VHF and UHF (to 890 MHz)	.....	47	(X)	339.2
36621 04	Microwave 890 MHz to 1849 MHz	.....	13	(X)	12.1
36621 05	Microwave 1850 MHz to 3699 MHz	.....	14	(X)	38.5
36621 06	Microwave 3700 MHz to 6424 MHz	.....	9	(X)	17.8
36621 07	Microwave 6425 MHz to 7899 MHz	.....	6		
36621 08	Microwave 7900 MHz to 12.20 GHz	.....	12		
36621 09	Microwave 13.25 GHz to 19.60 GHz	.....	5	(X)	88.3
36621 10	Microwave 19.60 GHz to 56.00 GHz	.....	1		
	Carrier equipment, n.e.c.:				
36621 36	Voice channel multiplex for radio systems	.....	9	(X)	46.5
36621 37	Power line carrier equipment	.....	4		
36621 40	Space satellite communication systems	.....	27	(X)	311.2
36621 31	Telemetering systems and equipment, n.e.c., sold separately, including data link (receivers and transmitters), pickup equipment, recording equipment, and special synchronization equipment	.....	30	(X)	177.0
	Mobile radio systems, sold as complete package, including transceivers, power amplifiers, antennas, repeaters, transmitters, receivers, etc., except amateur and citizens radio:				
36621 50	Airborne and marine	Thousands.....	13	(S)	63.8
36621 55	Ground	↕	12	(S)	137.2
	Mobile base stations, transmit/receive, except amateur and citizens band:				
36621 52	Airborne	↕	1	(S)	180.3
36621 54	Marine	↕	2		
36621 56	Ground	Thousands.....	12		
	Mobile vehicular, transmit/receive package, except amateur and citizens band:				
36621 62	Airborne	.....	4	(X)	31.9
36621 64	Marine	.....	8	(X)	24.1
	Ground:				
36621 65	300 kHz to 30 MHz	.....	6	(X)	258.0
36621 67	30.00 to 72.98 MHz	.....	6		
36621 66	72.99 to 150.7 MHz	.....	3		
36621 68	150.8 to 174.0 MHz	.....	7		
36621 71	406.0 to 512.0 MHz	.....	6		
36621 70	806 MHz and higher frequencies	.....	2		
	Portable receivers, transceivers, and transmitter/receivers, except amateur and citizens band:				
36621 82	Portable, including pocket size	Thousands.....	15	188,744	181.6
36621 84	Pager (one way)	↕	5	(X)	104.0
36621 86	Parts and subassemblies for mobile, portable, and base station radios	Thousands.....	5		
36621 88	Amateur radio communication equipment, fixed, mobile and portable	.....	14	(X)	54.4
	Citizens radio communication equipment:				
36621 21	CB transceivers, hand-held	.....	4	(X)	55.8
	CB transceivers, a.c. only:				
36621 23	Single sideband	.....	4		
36621 25	Other	.....	3		
	CB transceivers, d.c. and d.c./a.c.:				
36621 27	Single sideband	.....	5	(X)	12.3
36621 29	Other	.....	8	(X)	35.8
36621 52	Facsmile communication equipment	.....	7	(X)	56.7
36621 93	Electronic checkout, monitoring, evaluation, and other electronic support equipment for communication systems	.....	24	(X)	66.0
	Antenna systems, except structural towers sold separately:				
36621 92	Communication antennas, below 890 MHz	Thousands.....	39	(S)	124.0
36621 94	Microwave, 890 MHz and above (horns, parabolas, etc.) sold separately	Thousands.....	25	(S)	33.3
36621 95	Antenna accessories, sold separately	.....	34	(X)	62.9
36621 98	Other communication equipment, sold separately	.....	77	(X)	511.2

See footnotes at end of table.

			1977--Con.		
3662- --	RADIO AND TV COMMUNICATION EQUIPMENT--Con.				
36622 --	Broadcast, studio, and related electronic equipment:				
	As reported in census of manufactures	.....	116	(X)	568.4
	As reported in Current Industrial Reports MA-36N, Selected Electronic and Associated Products, Including Telephone and Telegraph Apparatus	.....	133	(X)	560.3
	Audio equipment, excluding consumer and PA types:				
36622 12	Amplifiers and preamplifiers	Thousands	31	167.2	25.1
36622 13	Control consoles and switchers	Thousands	16	6,211.0	12.8
36622 17	Other (power supplies, terminal equipment, broadcast recorders, etc.)	.....	28	(X)	54.8
	Video equipment, excluding consumer and PA types:				
36622 22	Amplifiers	Thousands	12	7,357.0	4.5
36622 19	Television cameras and telecine chains	Thousands	7	586.0	12.5
36622 29	Other (power supplies, synchronization equipment, terminal equipment monitors, video tape recorders and parts and accessories thereof, live cameras, control consoles and switchers, film equipment, TV outside vans	.....	26	(X)	205.8
	Transmitters, translators, RF power amplifiers, and related equipment:				
36622 31	AM and FM transmitters	.....	11	(X)	35.4
36622 34	TV transmitters	.....	4	(X)	16.5
36622 37	Other (broadcast transmission line equipment, phasing equipment, TV boosters and repeaters (translators), etc.)	.....	14	(X)	21.4
36622 51	Studio transmission links (STL) and remote pickup equipment	.....	6	(X)	21.8
	Cable TV (master antennae) and CATV equipment, excluding construction cost:				
36622 55	Head end equipment (antenna baluns, carrier generators, head and control units, single and broadband preamplifiers and strip amplifiers, converters, modulators and demodulators, splitting and mixing networks, FM processing equipment, filters and traps, power suppliers, switches, etc.)	.....	13	(X)	16.3
36622 57	Subscriber equipment (decoders, converters, and switchers; wall outlet taps; distribution amplifiers; power suppliers; directional couplers, splitters, alternators, and equalizers)	.....	10	(X)	41.3
36622 30	Broadcasting transmitting antennas and community antenna systems	.....	15	(X)	27.3
36622 41	Closed circuit television systems and equipment, excluding broadcast and consumer products	.....	12	(X)	32.3
36622 40	Other broadcast, studio, theatre, and commercial sound equipment, sold separately, excluding studio lighting equipment, radiating and supporting towers	.....	22	(X)	32.5
36623 --	Intercommunication equipment, alarm systems, and traffic control equipment:				
	As reported in census of manufactures	.....	153	(X)	851.9
	As reported in Current Industrial Reports MA-36N, Selected Electronic and Associated Products, Including Telephone and Telegraph Apparatus	.....	128	(X)	847.4
	Intercommunication systems, including inductive paging systems (selective calling):				
36623 12	Wired	.....	33	(X)	90.3
36623 13	Nonwired	.....	5	(X)	34.3
36623 14	AM/FM home radio intercom systems	.....	6		
	Alarm systems:				
	Intrusion detection:				
36623 48	Local	.....	34	(X)	101.1
36623 49	Central station	.....	23	(X)	24.7
36623 50	Direct connect	.....	13	(X)	46.3
36623 51	Hold-up systems (commercial and industrial)	.....	7	(X)	15.9
	Fire detection and prevention:				
	Smoke and heat detection alarms:				
36623 53	Ionization chamber type	.....	15	(X)	149.5
36623 54	Other, including photo cell type	.....	20	(X)	63.1
36623 56	Central station	.....	18	(X)	51.2
36623 57	Direct connect	.....	7	(X)	6.8
	Vehicular and pedestrian traffic control equipment:				
36623 42	Signal heads, including parts and accessories	.....	14	(X)	21.9
36623 43	Electronic and electromechanical controllers, detectors, and sensors, including parts and accessories	.....	27	(X)	75.0
	Railway signals and attachments, electric:				
36623 21	Railway highway grade crossing signals, excluding relays and other control apparatus	.....	4	(X)	89.7
36623 29	Other railway signal systems and safety control equipment	.....	6	(X)	77.6
36625 --	Search and detection and navigation and guidance systems and equipment:				
	As reported in census of manufactures	.....	226	(X)	7,428.1
	As reported in Current Industrial Reports MA-36N, Selected Electronic and Associated Products, Including Telephone and Telegraph Apparatus	.....	218	(X)	7,425.5
36625 09	Light reconnaissance and surveillance electronic systems and equipment (infrared, ultraviolet, and visible light)	.....	35	(X)	403.8
36625 22	IFF equipment	.....	10	(X)	87.4
36625 32	Proximity fuses	.....	4	(X)	42.9

1977 product code	Product	Unit of measure	Number of companies	Quantity	Value (million dollars)
			1977--Con.		
3662- --	RADIO AND TV COMMUNICATION EQUIPMENT--Con.				
36625 --	Search and detection and navigation and guidance systems and equipment--Con.				
	As reported in Current Industrial Reports MA-36N--Con.				
	Radar systems and equipment:				
	Search, detection, and acquisition radar systems and equipment (BMEWS, airborne and other early warning radar, air traffic control radar, air defense and fighter control radar, ship radar, harbor control radar, meteorological radar, etc.):				
36625 42	Airborne and missile/space radar	.....	16	(X)	345.0
36625 44	Ship (marine) radar	.....	14	(X)	147.0
36625 46	Ground radar	.....	23	(X)	252.9
	Tracking radar systems and equipment (fire control, bombing, bombing-navigational radar, aircraft and missile tracking radar, etc.):				
36625 62	Airborne and missile/space radar	.....	15	(X)	440.5
36625 64	Ship (marine) radar	.....	10	(X)	127.2
36625 66	Ground radar	.....	14	(X)	213.4
	Instrumentation radar systems and equipment (altimeters, highway speed control radar, missile and space satellite tracking range radar, GCA and other precision approach radar, etc.):				
36625 70	Airborne, missile/space, and ship (marine) radars	.....	6	(X)	30.1
36625 76	Ground radar	.....	11	(X)	49.2
36625 82	Electronic checkout, monitoring, evaluation, and other electronic support equipment for radar systems	.....	27	(X)	151.2
	Sonar search, detection, tracking, and communication systems and equipment, including ASW (sonar telephone, communication equipment, depth finding, fire control, fusing, guidance, hydrophones, mapping, sonabuoys, navigation, sonar fish finders, sonar range instrumentation, and other):				
36625 52	Surface ship applications (destroyers, destroyer escorts, etc.)	.....	21	(X)	149.2
36625 53	Submarine applications	.....	27	(X)	234.2
36625 55	Airborne	.....	20	(X)	155.5
36625 58	Electronic checkout, monitoring, evaluation, and other electronic support equipment for sonar systems and submerged fixed systems	.....	27	(X)	100.0
36625 91	Specialized command and control data processing and display equipment sold separately from complete systems	.....	22	(X)	294.5
36625 98	Search, detection, identification, and tracking systems and equipment, n.e.c.	.....	33	(X)	385.8
36625 51	Meteorological electronics equipment and radio astronomy equipment (automatic weather stations and weather tracking equipment, ceilometers, transitometers, space satellite meteorological systems, and specialized meterological telemetering equipment)	.....	16	(X)	23.3
36625 59	Geophysical electronic equipment (exploration and other specialized geophysical equipment)	.....	23	(X)	101.5
	Electronic warfare systems and equipment:				
	Countermeasures equipment:				
36625 11	Jamming equipment, communications, and radar	.....	23	(X)	280.2
36625 13	Underwater countermeasures equipment	.....	5	(X)	223.0
36625 15	Other active countermeasure equipment, excluding passive materials such as "chaff," "window," "needles," "rope," etc	.....	19		
36625 41	Specialized electronic and communication intelligence equipment	.....	37	(X)	519.1
	Missile and space vehicle systems and equipment (beam riders, command guidance, inertial systems, infrared homing systems, radar systems, stellar trackers, television systems, combination systems, etc.):				
36625 12	Missile-borne and space vehicle-borne equipment	.....	44	(X)	1,080.4
36625 10	Nonmissile and space vehicle guidance equipment (ground, ship, or airborne command guidance systems, etc.)	.....	8	(X)	214.3
36625 14	Electronic checkout, launching, and other missile and space vehicle support systems (ground, ship, and air)	.....	26	(X)	169.9
	Navigation systems and equipment (NAV AIDS) for aircraft, ship, and ground navigation (autopilots, beacons, transponders, collision warning devices, DECCA, DME, ILS, Doppler navigation systems, inertial navigation systems, optical/laser LORAN, radio compasses and direction finders, SHORAN, TACAN, VOR, VORTAC equipment, etc.):				
	Airborne navigational systems:				
36625 83	Radio navigation receivers and displays, including omni, radio magnetic, glide slope/localizer, DME, etc	.....	17	(X)	165.1
36625 84	Airborne integrated data systems/flight recorders	.....	3	(X)	(11)
36625 85	Distance measuring equipment (DME)	.....	10	(X)	11.8
36625 86	Flight directors/situation display	.....	8	(X)	10.8
36625 87	Heads-up display (HUD) systems	.....	4	(X)	(11)
36625 88	Inertial navigation systems	.....	7	(X)	(11)
36625 89	Proximity warning/collision avoidance equipment	.....	3	(X)	(11)
36625 90	Complete automatic pilots (both gyroscopic and non-gyroscopic)	.....	8	(X)	76.2
36625 92	Other airborne navigational systems	.....	24	(X)	11510.2
36625 16	Surface (ship and ground) navigational systems	.....	40	(X)	187.0
36625 17	Underwater navigational systems	.....	12	(X)	242.9
36625 18	Electronic checkout, monitoring, evaluation, and other electronic support equipment for navigational systems and equipment	.....	45		
36627 --	Electronic systems and equipment, n.e.c.:				
	As reported in census of manufactures	.....	400	(X)	1,348.6
	As reported in Current Industrial Reports MA-36N, Selected Electronic and Associated Products, Including Telephone and Telegraph Apparatus	.....	229	(X)	1,286.5

36621 33	Medium and high frequency (300 kHz to 30 MHz)	.....			
36621 34	Very high frequency and ultra high frequency (to 890 MHz)	.....			
36621 35	Microwave line-of-sight; microwave scatter; and microwave video relay, except studio television link	.....			

See footnotes at end of table.

Table 6a. **Products and Product Classes — Quantity and Value of Shipments by All Producers: 1977 and 1972**—Con.

(Includes quantity and value of products of this industry produced by (1) establishments classified in this industry (primary) and (2) establishments classified in other industries (secondary). Transfers of the products of this industry from one establishment of a company to another establishment of the same company (interplant transfers) are also included. For further explanation, see appendix A, Value of shipments)

1977 product code	Product	Unit of measure	Number of companies	Quantity	Value (million dollars)
			1972--Con.		
3662- --	RADIO AND TV COMMUNICATION EQUIPMENT--Con.				
36621 --	Commercial, industrial, and military communication equipment, except telephone communication equipment--Con.				
	As reported in Current Industrial Reports MA-36N--Con.				
	Space satellite communication systems:				
36621 43	Associated ground equipment, including telemetering, synchronization, relay, and command and control equipment	.....	(NA)	(X)	102.1
36621 45	Sonar communication systems and equipment	.....	(NA)	(X)	46.3
36621 47	Carrier current communication systems and equipment, n.e.c.	.....			
	Mobile radio systems, sold as complete packages, including transceivers, base stations, power amplifiers, antennas, repeaters, transmitters, receivers, etc., except amateur and citizens radio:				
36621 51	Airborne	.....	(NA)	(X)	53.1
36621 53	Marine	.....			
36621 55	Ground	.....	(NA)	(X)	263.9
	Mobile transceivers and transmitters, except amateur and citizens radio, sold separately:				
36621 61	Airborne	Thousands			
36621 63	Marine	Thousands			
36621 65	Ground	Thousands			
	Mobile receivers, except amateur and citizens radio, sold separately:		(NA)	(S)	90.6
36622 71	Airborne	.....			
36622 73	Marine	.....			
36622 75	Ground	.....			
36622 81	Portable receivers, transceivers, and transmitter-receivers, except amateur and citizens radio	Thousands	(NA)	(S)	143.2
	Amateur radio communication equipment, fixed, mobile, and portable:				
36621 83	Transmitters and RF power amplifiers	.....			
36621 85	Receivers	Thousands	(NA)	(S)	11.9
36621 87	Other (transceivers, transmitter-receivers, etc.)	.....			
36621 89	Citizens radio communication equipment	Thousands	(NA)	131.1	13.4
36621 93	Electronic checkout, monitoring, evaluation, and other electronic support equipment for communication systems	.....	(NA)	(X)	97.9
36621 98	Other communication equipment, sold separately	.....	(NA)	(X)	176.7
	Antenna systems, except structural towers, sold separately:				
36621 92	Communication antennas (below 890 MHz)	.....	(NA)	(X)	29.0
36621 94	Microwave, above 890 MHz (horns, parabolas, etc.)	.....	(NA)	(X)	15.7
36622 --	Radio and television broadcast equipment and closed circuit systems:				
	As reported in census of manufactures	.....	(NA)	(X)	429.6
	As reported in Current Industrial Reports MA-36N, Selected Electronic and Associated Products, Including Telephone and Telegraph Apparatus	.....	(NA)	(X)	393.8
	Audio equipment:				
36622 12	Amplifiers	Thousands	(NA)	190.4	20.9
36622 13	Control consoles and switchers	↕	(NA)	(S)	3.4
36622 14	Broadcast recorders				
36622 15	Turntables	Thousands			
36622 16	Other (power supplies, terminal equipment, etc.)	.....	(NA)	(S)	24.2
36622 37	Broadcast and studio sound effects equipment	.....			
36622 38	Theatre sound equipment	.....			
	Video equipment:				
36622 22	Amplifiers	Thousands	(NA)	14.9	4.2
36622 23	Cameras (TV and TV camera chains)	.....			
36622 24	Control consoles and switchers	Thousands			
36622 25	Film equipment (broadcast film cameras, multiplexers, projectors, etc.)	.....			
36622 26	Monitors	Thousands	(NA)	(X)	111.1
36622 27	Video tape recorders	.....			
36622 28	Other (power supplies, synchronization equipment, terminal equipment, etc.)	.....			
	Transmitters, RF power amplifiers, and related equipment:				
36622 32	AM	.....			
36622 33	FM	.....			
36622 34	TV	.....	(NA)	(X)	48.4
36622 35	TV boosters and repeaters	.....			
36622 36	Other (broadcast transmission line equipment, phasing equipment, etc.)	.....			
36622 51	Studio transmitter links (STL) and remote pickup equipment	.....	(NA)	(X)	7.7
36622 41	Closed circuit television systems and equipment	.....	(NA)	(X)	63.4
	Electronic kits to be assembled by purchaser:				
36622 92	Amateur equipment kits	.....			
36622 93	Test and measuring equipment kits	.....	(NA)	(X)	45.8
36622 94	Other kits	.....			
	Antenna systems, except structural towers, sold separately:				
36622 30	Broadcasting transmitting antennas	.....	(NA)	(X)	64.7
36622 31	Community antenna systems	.....			

See footnotes at end of table.

Table 6a. Products and Product Classes — Quantity and Value of Shipments by All Producers: 1977 and 1972 — Con.

(Includes quantity and value of products of this industry produced by (1) establishments classified in this industry (primary) and (2) establishments classified in other industries (secondary). Transfers of the products of this industry from one establishment of a company to another establishment of the same company (interplant transfers) are also included. 1977 product code	Product	Unit of measure	Number of companies	Quantity	Value (million dollars)
			1972--Con.		
3662- --	RADIO AND TV COMMUNICATION EQUIPMENT--Con.				
36623 --	Intercommunication equipment, except telephone and telegraph, and electric alarm and signal systems and devices	.....	NA	(X)	336.2
	Intercommunication equipment, except telephone and telegraph:				
36623 10	As reported in census of manufactures	.....	NA	(X)	298.5
	As reported in Current Industrial Reports MA-36N, Selected Electronic and Associated Products, Including Telephone and Telegraph Apparatus	.....	NA	(X)	287.3
36623 11	Intercommunication equipment, electronically amplified, except intercommunication equipment designed primarily for use in telephone and telegraph networks	.....	NA	(X)	103.9
	Vehicular and pedestrian traffic control equipment:				
36623 42	Signal heads, including parts and accessories	.....	NA	(X)	18.5
36623 43	Electronic and electromechanical controllers, detectors, and sensors, including parts and accessories	.....	NA	(X)	68.9
36623 47	Alarm systems, electronic	.....	NA	(X)	96.1
	Railway signals and attachments, electric:				
36623 21	Railway highway grade-crossing signals, exclusive of relays and other control apparatus	.....	NA	(X)	16.5
36623 29	Other railway signal systems and safety control equipment	.....			
36623 00	Intercommunication equipment, except telephone and telegraph, and electric alarm and signal systems, n.s.k	.....	NA	(X)	21.4
36624 --	Electronic navigational aids, except missile-borne and space vehicle-borne equipment:				
	As reported in census of manufactures	.....	NA	(X)	1,073.9
	As reported in Current Industrial Reports MA-36N, Selected Electronic and Associated Products, Including Telephone and Telegraph Apparatus	.....	NA	(X)	1,090.3
	Missile and space vehicle systems and equipment (beam riders, command guidance, inertial systems, infrared homing systems, radar systems, stellar trackers, television systems, combination systems, etc.):				
36624 13	Nonmissile and space vehicle guidance equipment (ground, ship, or airborne command guidance systems, etc.)	.....	NA	(X)	140.0
36624 14	Electronic checkout, launching, and other missile and space vehicle support systems (ground, ship, and airborne)	.....	NA	(X)	99.2
	Navigation systems and equipment (NAV AIDS) for aircraft, ship, and ground navigation (autopilots, beacons, transponders, collision warning devices, DECCA, DME, ILS, Doppler navigation systems, inertial navigation systems, optical-laser, LORAN, radio compasses and direction finders, SHORAN, TACAN, VOR, VORTAC equipment, etc.):				
36624 15	Airborne navigational systems	.....	NA	(X)	666.4
36624 16	Surface (ship and ground) navigational systems	.....	NA	(X)	60.7
36624 17	Underwater navigational systems	.....	NA	(X)	43.8
36624 18	Electronic checkout, monitoring, evaluation, and other electronic support equipment for navigational systems and equipment	.....	NA	(X)	80.2
36625 --	Electronic search and detection apparatus, including radar, infrared, and sonar:				
	As reported in census of manufactures	.....	NA	(X)	2,264.0
	As reported in Current Industrial Reports MA-36N, Selected Electronic and Associated Products, Including Telephone and Telegraph Apparatus	.....	NA	(X)	2,102.4
36625 12	Light reconnaissance and surveillance electronic systems and equipment (infrared, ultraviolet, and visible light)	.....	NA	(X)	350.3
36625 25	Miscellaneous search, detection, identification, and tracking system equipment	.....			
	Radar systems and equipment:				
	Search, detection, and acquisition radar systems and equipment (BMEWS, airborne, and other early warning radar, air traffic control radar, air defense and fighter control radar, ship radar, harbor control radar, meterological radar, etc.):				
36625 42	Airborne and missile/space radar	.....	NA	(X)	171.2
36625 44	Ship (marine) radar	.....	NA	(X)	119.3
36625 46	Ground radar	.....	NA	(X)	260.5
	Radar tracking systems and equipment (fire control, bombing, bombing-navigational radar, aircraft and missile tracking radar, etc.):				
36625 62	Airborne and missile/space radar	.....	NA	(X)	307.3
36625 64	Ship (marine) radar	.....	NA	(X)	88.9
36625 66	Ground radar	.....	NA	(X)	110.9
	Radar instrumentation systems and equipment (altimeters, highway speed control radar, missile and space satellite tracking range radar, GCA and other precision approach radar, etc.):				
36625 72	Airborne and missile/space radar	.....	NA	(X)	16.4
36625 74	Ship (marine) radar	.....			
36625 76	Ground radar	.....	NA	(X)	47.7
36625 82	Electronic checkout, monitoring, evaluation, and other electronic support equipment for radar systems	.....	NA	(X)	112.5

See footnotes at end of table.

Table 6a. **Products and Product Classes — Quantity and Value of Shipments by All Producers: 1977 and 1972**—Con.

(Includes quantity and value of products of this industry produced by (1) establishments classified in this industry (primary) and (2) establishments classified in other industries (secondary). Transfers of the products of this industry from one establishment of a company to another establishment of the same company (interplant transfers) are also included. For further explanation, see appendix A, Value of shipments)

	Ultrasonic equipment:				
36626 22	Cleaners	.....	NA	(X)	6.4
36626 24	Drills, solders, and welders	.....			
36626 26	Other	.....	(NA)	(X)	12.0
36626 96	Other electronic industrial processing equipment	.....	(NA)	(X)	14.5
36626 31	Telemetering systems and equipment, n.e.c., sold separately	.....	NA	(X)	77.6
	Amplifiers, except audio, RF power, and video, sold separately:				
36626 61	Magnetic	.....	(NA)	(X)	2.3
36626 65	Pulse	.....			
36626 67	DC	.....	(NA)	(X)	11.4
36626 69	Other (differential, facsimile, etc.)	.....	(NA)	(X)	20.0
36626 71	Automotive equipment, electronic	.....	(NA)	(X)	265.3
36626 81	Consumer electronic equipment, n.e.c	.....			
36626 91	Electronic trainers and simulators	.....	(NA)	(X)	103.2
36626 92	Electronic teaching machines and teaching aids	.....	(NA)	(X)	7.1
36626 97	Other electronic systems, equipment, and subassemblies, n.e.c	.....	(NA)	(X)	[15]677.7
36626 59	Geophysical electronic equipment (exploration and other specialized geophysical equipment)	.....	NA	(X)	35.3
36626 51	Meteorological electronics equipment and radio astronomy equipment (automatic weather stations and weather tracking equipment, ceilometers, transitometers, space satellite meteorological systems, and specialized meteorological telemetering equipment)	.....	NA	(X)	43.9
36626 57	Particle accelerator electronics equipment and subassemblies for betatrons, cyclotrons, synchrotrons, etc.; linear accelerators (dynamotorons, Vandergraff, traveling wave, etc.)	.....	(NA)	(X)	13.8
36626 98	Scientific electronic equipment, n.e.c	.....	(NA)	(X)	14.9
36627 --	Space satellite-borne communication systems (complete package):				
	As reported in census of manufactures	.....	(NA)	(X)	124.7
	As reported in Current Industrial Reports MA-36N, Selected Electronic and Associated Products, Including Telephone and Telegraph Apparatus	.....	(NA)	(X)	112.2
36627 41	Space satellite-borne communication stations (complete package)	.....	(NA)	(X)	112.2
36628 --	Missile-borne and space vehicle-borne navigation and guidance systems and equipment:				
	As reported in census of manufactures	.....	NA	(X)	777.8
	As reported in Current Industrial Reports MA-36N, Selected Electronic and Associated Products, Including Telephone and Telegraph Apparatus	.....	(NA)	(X)	698.5
36628 12	Missile-borne and space vehicle-borne equipment	.....	(NA)	(X)	698.5
36629 --	Microwave and mobile telephone (communication) equipment	.....	(NA)	(X)	148.3
36629 77	Microwave telephone (communication) equipment	.....	(NA)	(X)	125.2
36629 79	Mobile telephone (communication) equipment	.....	NA	(X)	16.7
36629 00	Microwave and mobile telephone (communication) equipment, n.s.k	.....	(NA)	(X)	6.4
36620 00	Radio and TV communication equipment, n.s.k., typically for establishments with 10 employees or more (see note)	.....	(NA)	(X)	172.7
36620 02	Radio and TV communication equipment, n.s.k., typically for establishments with less than 10 employees (see note)	.....	(NA)	(X)	34.5

Footnotes are on next page.

Table 6a. **Products and Product Classes — Quantity and Value of Shipments by All Producers: 1977 and 1972** – Con.

Note: In 1977 Census of Manufactures, shipments data for establishments of small single-unit companies with up to 20 employees were estimated from administrative records data rather than data actually collected from respondents. Employment cutoff used for administrative records for each industry and shipments figures are included in code ending with "002." In both 1977 and 1972 Censuses of Manufactures, products not completely identified on standard forms were coded in appropriate product class (5 digits) followed by "00" or, in some cases, to appropriate product group code (4 digits) followed by "0 00."

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available.
n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards. (X) Not applicable.

[1]For 1977, product codes 36511 02, 36511 24, and 36511 25 were combined to avoid disclosing operations of individual companies.

[2]For 1977, product codes 36514 01, 36514 07, 36514 09, 36514 86, and 36514 68 were combined to avoid disclosing operations of individual companies.

[3]For 1972, product codes 36514 01, 36514 07, 36514 08, 36514 09, 36514 41, 36514 42, and 36514 86 were combined with product code 36514 68.

[4]Quantity and value reported by all producers of product, not just those with shipments of $100,000 or more.

[5]For some establishments, data have been estimated from central unit values, which are based on quantity-value relationships of reported data. The following symbols are used when percentage of each quantity figure estimated in this manner equals or exceeds 10 percent of published figure: * indicates 10 to 19 percent estimated, ** indicates 20 to 29 percent estimated. If 30 percent or more is estimated, figure is replaced by (S).

[6]For 1977, product codes 36520 86 and 36520 89 were combined to avoid disclosing operations of individual companies.

[7]For 1977, product codes 36520 91 and 36520 00 were combined to avoid disclosing operations of individual companies.

[8]For 1977, product codes 36612 21, 36612 22, 36612 25, and 36612 26 were combined to avoid disclosing operations of individual companies.

[9]For 1972, product codes 36612 30, 36612 32, and 36612 88 were included with product code 36612 91.

[10]For 1977, product codes 36612 62, 36612 88, and 36612 91 were combined to avoid disclosing operations of individual companies.

[11]For 1977, product codes 36625 84, 36625 87, 36625 88, and 36625 92 were combined to avoid disclosing operations of individual companies.

[12]For 1977, product codes 36627 91 and 36627 97 were combined to avoid disclosing operations of individual companies.

[13]For 1977, product codes 36627 12, 36627 14, and 36627 16 were combined to avoid disclosing operations for individual companies.

[14]For 1972, product codes 36625 54 and 36625 56 were combined to avoid disclosing operations of individual companies.

[15]For 1972, product codes 36626 11, 36626 13, 36626 15, 36626 41, and 36626 97 were combined to avoid disclosing operations of individual companies.

Table 6b. Product Classes—Value of Shipments by All Producers by Geographic Area: 1977 and 1972

(Millions of dollars. Product classes covered are those that are economically significant and whose production is geographically dispersed, provided dispersion is not approximated by data in table 2. Also, product classes are not shown if they are miscellaneous or "not specified by type" classes. Statistics for some States are withheld because they are either less than $2 million in product class shipments or they disclose operations of individual companies in 1977)

Product class and geographic area	Value of product shipments	
	1977	1972
36511, HOME, PORTABLE, AND AUTOMOTIVE RADIOS

(NA) Not available. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards.

[1]Figures are estimates derived from a representative sample of manufacturing establishments canvassed in annual survey of manufactures and, therefore, may differ from results that would be obtained from a complete canvass of all manufacturing establishments. Standard errors associated with estimates are published in annual survey of manufactures volumes for this period. Figures in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data. Thus, at individual product class level, estimates may be of limited reliability; however, they may be combined with other product class totals into broader aggregates which are of acceptable reliability.

Table 7. **Materials Consumed by Kind: 1977 and 1972**

Footnotes are on next page.

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than $50,000 or less than half the unit of measure specified for quantities.

[1]For some establishments, data have been estimated from central unit values, which are based on quantity-cost relationships of reported data. The following symbols are used when percentage of each quantity figure estimated in this manner equals or exceeds 10 percent of published figure: * indicates 10 to 19 percent estimated, ** indicates 20 to 29 percent estimated. If 30 percent or more is estimated, figure is replaced by (S).

[2]From 1972 Census of Manufactures Supplemental Inquiry: Consumption of Materials, Parts, Containers, and Supplies During 1972 (Form MA-131).

[3]Total cost of materials of establishments that did not report detailed materials data, including establishments that were not mailed a form.

[4]Materials consumed data were not collected for this industry for 1972.

[5]For 1977, material codes 367902 and 970099 were combined to avoid disclosing operations of individual companies.

[6]For 1977, material codes 335609, 333970, 333903, 282104, 307903, 367010, 367408, and 367500 were included with material code 970099 to avoid disclosing operations of individual companies.

[7]For 1972, material codes 335609, 333970, 333903, 367500, 367600, and 367900 were included with material code 970099.

[8]For 1972, material code 344401 was included with material code 970099.

INDUSTRY STATISTICS

1a. Historical Statistics: 1977 and Earlier Years 7
1b. Selected Operating Ratios: 1977 and Earlier Years. 9
2. Geographic Area: 1977 and 1972 11
3a. Summary Statistics: 1977 15
3b. Supplemental Statistics Based on Sample Estimates: 1977. . . . . 16A
4. Employment Size of Establishment: 1977 17
5a. Industry and Primary Product Class Specialization: 1977 19

PRODUCT STATISTICS

5b. Industry-Product Analysis—Value of Shipments for an Industry and Primary Product Shipments, and Specialization and Coverage Ratios: 1977, 1972, and 1967 20
5c. Industry-Product Analysis—Shipments by Product Class and Industry: 1977. 21
6a. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1977 and 1972. 23
6b. Product Classes—Value of Shipments by All Producers by Geographic Area: 1977 and 1972 30
6c. Product Classes—Value Shipped by All Producers: 1962, 1967, 1972 to 1977. 31

MATERIAL STATISTICS

7. Materials Consumed by Kind: 1977 and 1972. 32

DESCRIPTION OF INDUSTRIES

ELECTRONIC COMPONENTS AND ACCESSORIES

This report shows 1977 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

3671 Electron Tubes, All Types
3674 Semiconductors and Related Devices
3675 Electronic Capacitors
3676 Electronic Resistors
3677 Electronic Coils and Transformers
3678 Electronic Connectors
3679 Electronic Components, N.E.C.

The industry statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments, but also their activities in the manufacture of secondary products as well as their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1a-5a) with product statistics (table 6a) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5b, which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

Small single-unit companies with up to 20 employees (the cutoff varied by industry) were excluded from the mail portion of the census. For these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated), data on payrolls and receipts were obtained from administrative records of other government agencies. The remaining statistics were developed from industry averages.

Establishment data were tabulated based on industry definitions contained in the 1972 Standard Industrial Classification Manual and its 1977 supplement.

INDUSTRY 3671, ELECTRON TUBES, ALL TYPES

This industry comprises establishments primarily engaged in the manufacture of receiving type electron tubes for radio and television use, including cathode ray tubes; and transmitting, industrial, and special purpose electron tubes. Establishments primarily engaged in the manufacture of X-ray tubes are classified in industry 3693.

For 1977 this industry includes all establishments previously classified in Industries 3671, Electron Tubes, All Types; 3672, Cathode Ray Picture Tubes; and 3673, Electron Tubes, Transmitting Types. The industries have been combined because of declining size. All statistics in this publication are based on the revised industry and are comparable with statistics for prior years.

The total value of shipments for establishments classified in the Electron Tubes, All Types industry amounted to $1,582 million in 1977, an increase of 12 percent from 1972. The value of shipments of products classified as primary to the industry was $1,257 million, an increase of 6 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were transmitting and special purpose tubes, for which shipments increased 49 percent, and receiving tubes, for which shipments decreased 57 percent. Value added by manufacture, at $910 million in 1977, was 6 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 36.7 thousand employees, a decrease of 12 percent from 1972. The leading States in employment were New York, Pennsylvania, and California, accounting for approximately 55 percent of the industry's 1977 employment.

The 1977 census obtained data on shipments of electron tubes only at product class levels. This is the source of the data in table 6a described "As reported in census of manufactures." Detailed figures on the shipments of electron tubes are reported annually in the Census Bureau's Current Industrial Reports (CIR) MA-36N, Selected Electronic and Associated Products.

The establishments in this industry with less than 10 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 1 percent of total value of shipments.

INDUSTRY 3674, SEMICONDUCTORS AND RELATED DEVICES

This industry comprises establishments primarily engaged in the manufacture of semiconductors and related solid-state devices, such as semiconductor diodes and stacks, including rectifiers, integrated microcircuits (semiconductor networks), transistors, solar cells, light sensing and emitting semiconductor (solid-state) devices, micro-processors, and solid-state memory devices.

The total value of shipments for establishments classified in the Semiconductors and Related Devices industry amounted to $5,323 million in 1977, an increase of 98 percent from 1972.

The value of shipments of products classified as primary to the industry was $4,532 million, an increase of 92 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were integrated microcircuits and semiconductor networks, for which shipments increased 113 percent. Value added by manufacture, at $3,410 million in 1977, was 97 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 114.0 thousand employees, an increase of 17 percent from 1972. The leading States in employment were New York, Texas, Arizona, and California, accounting for approximately 70 percent of the industry's 1977 employment. These same States were in the forefront for 1972.

The 1977 census obtained data on shipments of semiconductors and related devices only at product class levels. This is the source of the data in table 6a described "As reported in census of manufactures." Detailed figures on the shipments of semiconductors and related devices are reported annually in the Census Bureau's Current Industrial Reports (CIR) MA-36N, Selected Electronic and Associated Products. Some of these data are also shown in table 6a.

The establishments in this industry with less than 20 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 3 percent of total value of shipments.

INDUSTRY 3675, ELECTRONIC CAPACITORS

This industry comprises establishments primarily engaged in the manufacture of capacitors for electronic end uses. Establishments primarily engaged in the manufacture of capacitors for electrical end uses are classified in industry 3629.

The total value of shipments for establishments classified in the Electronic Capacitors industry amounted to $742 million in 1977, an increase of 66 percent from 1972. The value of shipments of products classified as primary to the industry was $736 million, an increase of 62 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) Value added by manufacture, at $486 million in 1977, was 63 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 28.9 thousand employees, an increase of 5 percent from 1972. The leading States in employment were Pennsylvania, North Carolina, South Carolina, and California, accounting for approximately 50 percent of the industry's 1977 employment. These same States were in the forefront for 1972, although there has been some shift in the relative importance of individual States.

The 1977 census obtained data on shipments of electronic capacitors only at product class levels. This is the source of the data in table 6a described "As reported in census of manufactures." Detailed figures on the shipments of electronic capacitors are reported annually in the Census Bureau's Current Industrial Reports (CIR) MA-36N, Selected Electronic and Associated Products. Some of these data are also shown in table 6a.

The establishments in this industry with less than 20 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 2 percent of total value of shipments.

INDUSTRY 3676, ELECTRONIC RESISTORS

This industry comprises establishments primarily engaged in the manufacture of resistors for electronic end products. Establishments primarily engaged in the manufacture of resistors for telephone and telegraph apparatus are classified in industry 3661, and for electrical end uses in industry 3629.

The total value of shipments for establishments classified in the Electronic Resistors industry amounted to $578 million in 1977, an increase of 55 percent from 1972. The value of shipments of products classified as primary to the industry was $583 million, an increase of 33 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) Value added by manufacture, at $401 million in 1977, was 52 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 21.3 thousand employees, an increase of 4 percent from 1972. The leading States in employment were Pennsylvania, Indiana, and California, accounting for approximately 50 percent of the industry's 1977 employment. These same States were in the forefront for 1972, although there has been some shift in the relative importance of individual States.

The 1977 census obtained data on shipments of electronic resistors only at product class levels. This is the source of the data in table 6a described "As reported in census of manufactures." Detailed figures on the shipments of electronic resistors are reported annually in the Census Bureau's Current Industrial Reports (CIR) MA-36N, Selected Electronic and Associated Products. Some of these data are also shown in table 6a.

The establishments in this industry with less than 20 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 1 percent of total value of shipments.

INDUSTRY 3677, ELECTRONIC COILS AND TRANSFORMERS

This industry comprises establishments primarily engaged in the manufacture of electronic coils, transformers, and inductors. Establishments primarily engaged in the manufacture of transformers and inductors for telephone and telegraph apparatus are classified in industry 3661; electric lamps in industry 3641; semiconductor (solid state) and related devices in industry 3674; coils for electrical end uses in industry 3629; and electrical transformers in industry 3612.

The total value of shipments for establishments classified in the Electronic Coils and Transformers industry amounted to $506 million in 1977, an increase of 43 percent from 1972. The value of shipments of products classified as primary to the industry was $606 million, an increase of 57 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were plate and filament transformers, for which shipments increased 111 percent. Value added by manufacture, at $289 million in 1977, was 35 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 20.7 thousand employees, a decrease of 13 percent from 1972. The leading States in employment were New York, Illinois, and California, accounting for approximately 40 percent of the industry's 1977 employment.

The 1977 census obtained data on shipments of electronic coils and transformers only at product class levels. This is the source of the data in table 6a described "As reported in census of manufactures." Detailed figures on the shipments of electronic coils and transformers are reported annually in the Census Bureau's Current Industrial Reports (CIR) MA-36N, Selected Electronic and Associated Products. Some of these data are also shown in table 6a.

The establishments in this industry with less than 20 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 10 percent of total value of shipments.

INDUSTRY 3678, ELECTRONIC CONNECTORS

This industry comprises establishments primarily engaged in the manufacture of electronic connectors. Establishments primarily engaged in the manufacture of electronic capacitors are classified in industry 3675; electronic coils, transformers, and other inductors in industry 3677; and electrical connectors in industry 3643.

The total value of shipments for establishments classified in the Electronic Connectors industry amounted to $1,105 million in 1977, an increase of 125 percent from 1972. The value of shipments of products classified as primary to the industry was $986 million, an increase of 88 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were coaxial (radio frequency) connectors for which shipments increased 113 percent. Value added by manufacture, at $754 million in 1977, was 118 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 26.0 thousand employees, an increase of 44 percent from 1972. The leading States in employment were New York, Pennsylvania, Illinois, and California, accounting for approximately 70 percent of the industry's 1977 employment. These same States were in the forefront for 1972, although there has been some shift in the relative importance of individual States.

The 1977 census obtained data on shipments of electronic connectors only at product class levels. This is the source of the data in table 6a described "As reported in census of manufactures." Detailed figures on the shipments of electronic connectors are reported annually in the Census Bureau's Current Industrial Reports (CIR) MA-36N, Selected Electronic and Associated Products. Some of these data are also shown in table 6a.

The establishments in this industry with less than 20 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 1 percent of total value of shipments.

INDUSTRY 3679, ELECTRONIC COMPONENTS, N.E.C.

This industry comprises establishments primarily engaged in the manufacture of electronic components, not elsewhere classified, such as printed circuits, receiving antennas, switches, transducers, microwave devices, and electronic recording media.

The total value of shipments for establishments classified in the Electronic Components, N.E.C. industry amounted to $5,551 million in 1977, an increase of 83 percent from 1972. The value of shipments of products classified as primary to the industry was $5,574 million, an increase of 74 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were printed circuit boards, cables, and forms ready for component insertion for which shipments increased 323 percent, from $184 million to $780 million. Value added by manufacture, at $3,000 million in 1977, was 89 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 126.0 thousand employees, an increase of 25 percent from 1972. The leading States in

employment were Massachusetts, New York, Illinois, and California, accounting for approximately 40 percent of the industry's 1977 employment. These same States were in the forefront for 1972 when they accounted for approximately 55 percent of the industry's employment, although there has been some shift in the relative importance of individual States.

The 1977 census obtained data on shipments of electronic components, n.e.c. only at product class levels. This is the source of the data in table 6a described "As reported in census of manufactures." Detailed figures on the shipments of electronic components, n.e.c. are reported annually in the Census Bureau's Current Industrial Reports (CIR) MA-36N, Selected Electronic and Associated Products. Some of these data are also shown in table 6a.

The establishments in this industry with less than 20 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 13 percent of total value of shipments.

Table 1a. Historical Statistics for the Industry: 1977 and Earlier Years

(For explanation of terms, see appendix A)

Year[1]	Companies[2] (no.)	All establishments: Total (no.)	All establishments: With 20 employees or more (no.)	All employees: Number (1,000)	All employees: Payroll (mil. dol.) (NA) Not available. N.E.C. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards.

[1]In annual survey of manufactures (ASM) years, data are estimates based on a representative sample of establishments canvassed annually and may differ from results of a complete canvass of all establishments. ASM publication shows percentage standard errors. Unless otherwise noted, for data prior to 1963, see 1963 Census of Manufactures, vol. II, table 1 of industry chapter.

[2]For the census, a company is defined as a business organization consisting of one establishment or more under common ownership or control.

[3]Industry was defined or redefined for 1972 Census of Manufactures, so data are available only for years shown.

[4]Data for 1967 and 1963 were derived from Table 8, General Statistics for Establishments by Industry Specialization and Primary Product Class Specialization, in vol. II of the 1967 and 1963 Censuses of Manufactures. Separate data for other years are not available.

[5]Data either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data; thus these estimates may be of limited reliability.

[6]Estimate for new capital expenditures has associated standard error of 15 percent or more and may be of limited reliability. Estimates for other data items are of acceptable reliability.

[7]Minimum percentage; exact percentage withheld to avoid disclosing operations of individual companies.

[8]Relationships are not meaningful because of predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

[9]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[10]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

Table 1b. Selected Operating Ratios for the Industry: 1977 and Earlier Years

(For explanation of terms, see appendix A)

Year	Payroll per employee (dollars)	Assets per employee (dollars)	Production workers as percent of total employment (percent)	Annual hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials as percent of value of shipments (percent)	Cost of materials and payroll as percent of value of shipments (percent)	Assets as percent of value of shipments (percent)	Value added per employee (dollars)	Payroll as percent of value added (percent)	Value added per production worker hour (dollars)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown for those States where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2]Statistics for some producing States are withheld to avoid disclosing figures for individual companies. However, for such States with 150 employees or more, number of establishments is shown and employment size range is indicated by one of the following symbols: AA—150 to 249 employees; BB—250 to 499 employees; CC—500 to 999 employees; EE—1,000 to 2,499 employees; FF—2,500 employees or more.

[3]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[4]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[5]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 3a. Summary Statistics for the Industry: 1977

[For explanation of terms, see appendix A]

Item	Unit of measure	Electron tubes (SIC 3671)	Semiconductors and related devices (SIC 3674)	Electronic capacitors (SIC 3675)	Electronic resistors (SIC 3676)	Electronic coils and transformers (SIC 3677)	Electronic connectors (SIC 3678)	Electronic components, n.e.c. (SIC 3679)
Primary product specialization ratio[1]	percent	78	93	92	87	91	78	80

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Represents ratio of primary product shipments to total product shipments (primary and secondary, excluding miscellaneous receipts) for establishments classified in industry.

[2]Represents ratio of primary products shipped by establishments classified in industry to total shipments of such products by all manufacturing establishments, wherever classified.

[3]Relationships are not meaningful because of predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

[4]Minimum percentage; exact percentage withheld to avoid disclosing operations of individual companies.

[5]Data for value of shipments represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[6]Data for value of shipments represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[7]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Used capital expenditures	(0.9)	24	2.3	8	27.2	8
Retirements	(3.5)	15	13.2	4	76.0	3
End of year	94.1	8	332.4	1	1,758.8	2
Depreciation charges during 1977	9.9	6	26.6	1	138.7	2
Buildings and other structures	(1.2)	16	3.8	2	20.3	2
Machinery and equipment	8.7	8	22.8	1	118.4	2

Note: Data for total new capital expenditures, new building expenditures, new machinery expenditures, and total used expenditures are shown in table 3a, as well as in this table. The figures in table 3a are census universe totals and may differ from the annual survey of manufactures (ASM) sample estimates shown in this table. The figures in this table represent the best estimates of year-to-year change as measured by the continuing ASM sample. However, they are subject to sampling error and, hence, as estimates of level, are not as reliable as the universe figures shown in table 3a.

- Represents zero. (A) Indicates standard errors of 100 percent or more. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. (X) Not applicable. (Z) Less than 50 thousand dollars.

[1]For a description of the standard error of estimate, see the section "Qualifications of the Data" in appendix B. Figures in parentheses have standard errors of 15 percent or more.

[2]This is a measure of the extent to which respondents reported for each item. It is derived for each item by calculating the ratio of the weighted employment (establishment data multiplied by sample weight; see appendix B) for those sample establishments that reported the specific inquiry to the weighted total employment for all sample establishments classified in the industry.

[3]The standard errors for the detailed categories of new machinery and equipment expenditures were not directly calculated. However, the actual figure is not expected to exceed the estimated figure shown.

[4]This category represents the total machinery and equipment expenditures for establishments that did not break down their expenditures for the three specific categories.

Table 4. Industry Statistics by Employment Size of Establishment: 1977

[For explanation of terms, see appendix A]

Industry and employment size class	E[1]	All establishments (no.)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	New capital expenditures (million dollars)	End-of-year inventories (million dollars)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. Data for this item are included in figures in parentheses above. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2]Report forms were not mailed to small single-unit companies with up to 20 employees (cutoff varied by industry). Payroll and sales data for 1977 were obtained from administrative records supplied by other agencies of the Federal Government. These data were then used in conjunction with industry averages to estimate the balance of items shown. Data are also included in respective size classes shown.

[3]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[4]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[5]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 5a. Industry Statistics by Industry and Primary Product Class Specialization: 1977

[Table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. Measures of plant specialization shown are (1) industry specialization: ratio of primary product shipments to total product shipments (primary plus secondary, excluding miscellaneous receipts) for the establishment; and (2) product class specialization: ratio of largest primary product class shipments to total product shipments (primary plus secondary, excluding miscellaneous receipts) for the establishment. See appendix for method of computing ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for various reasons; e.g., to avoid disclosing operations of individual companies. For explanation of terms, see appendix A]

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[2]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

Table 5b. Industry-Product Analysis—Value of Shipments for an Industry and Primary Product Shipments, and Specialization and Coverage Ratios: 1977, 1972, and 1967

(An establishment is assigned to an industry based on shipment values of products representing largest amount considered primary to an industry. Frequently, establishment shipments comprise mixtures of products assigned to an industry (primary), those considered primary to other industries (secondary), and receipts for activities such as merchandising or contract work. Columns A-D show this product pattern for an industry, and column E shows primary product specialization ratio. The extent to which an industry's primary products are shipped by establishments classified in and out of an industry is shown in columns F-H and coverage ratio is shown in column I. For explanation of terms, see appendix A)

1977 product code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total (million dollars)	Primary products (million dollars)	Secondary products (million dollars)	Miscellaneous receipts (million dollars)	Primary product specialization ratio Col. B / Col. B&C (percent)	Total made in all industries (million dollars)	Made in this industry (million dollars)	Made in other industries (million dollars)	Coverage ratio Col. B / Col. F (percent)

n.e.c. Not elsewhere classified.

[1]For 1977, data for industries 3671, 3672, and 3673 were combined to avoid disclosing operations of individual companies. Data for 1972 and 1967 are also shown on a combined basis but include some estimation in determining primary versus secondary products.

[2]Industries 3675, 3676, 3677, and 3678 were established as separate industries in 1972. Industry 3679 was redefined in 1972. Data for 1967 are not available.

Table 5c. Industry-Product Analysis — Shipments by Product Class and Industry: 1977

(Millions of dollars. Table shows where products of an industry (referred to as primary and listed in table 6a) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Only those product groups that have at least $2 million in shipments from establishments classified in one of industries included in this chapter are shown. Read across to determine where products of industries in this chapter are produced. To extent that some of primary products are made in industries not included in this chapter, value of such shipments is shown in "Other industries" column. Specified "Other industries" are listed at end of table if they account for more than $5 million of products primary to this chapter. For explanation of terms, see appendix A)

3679- --	ELECTRONIC COMPONENTS, N.E.C.--Con.						
36790 --	Electronic components and subassemblies, n.e.c.--Con.						
	As reported in Current Industrial Reports MA-36N, Selected Electronic and Associated Products, Including Telephone and Telegraph Apparatus--Con.						
	Relays for electronic applications:						
	General purpose relays over 100 MW actuating power, including rotary plunger, or solenoid types, sealed and unsealed, except telephone:						
36790 80	Through 2.0 amperes contact rating	Millions	6	1.2	16.8		
36790 81	Through 10.0 amperes contact rating		6	(S)	6.5		
36790 82	Over 10.0 amperes contact rating		5				
36790 83	Sensitive relays through 100 MW actuating power, sealed and unsealed, except can types		4	3.1	14.9		
	Crystal can types, sealed:						
36790 84	Larger than full size		2				
36790 85	Full size		4	.3	4.1	(S)	40.6
36790 86	Half size		3				
36790 87	Smaller than half size		1	.2	1.6		
	Reed relays:						
36790 88	Dry		18	10.6	17.8		
36790 78	Mercury wetted		7	1.0	3.4		
36790 89	Other relays, n.e.c., including RF relays, hybrid, telephone, motor-driven pure solid-state, thermal, etc	Millions	22	(S)	109.0		
	Magnetic recording and reproducing heads:						
36790 91	Audio	Thousands	2				
36790 93	Video		1				
36790 99	Digital		1	(S)	19.0	(X)	(5)
36790 04	Instrumentation		1				
	Transducers, electrical/electronic input or output, n.e.c.:						
36790 10	Accoustical		19	(S)	38.7	(X)	7.4
	Mechanical:						
36790 14	Accelerometers		13	(S)	22.8	(X)	6.6
36790 15	Pressure		24	(S)	34.7	(X)	12.5
36790 16	Strain gauges and other mechanical		17	.1	29.5	(X)	10.9
36790 18	Thermal (pyrometers, thermo-couples, etc.)		7	(S)	6.1	(X)	9.1
36790 19	Other, optical (excluding those covered under crystal, etc.), chemical. magnetic, nuclear, etc	Thousands	16	(S)	19.0	(X)	16.4
36790 47	Phonograph needles and cutting styli	Millions	6	4.0	22.2	(X)	33.0
36790 31	Phonograph cartridges and pickups		4	4.7	41.7	(NA)	38.7
36790 29	Earphones and headsets, except telephone		39	(X)	94.6	2.1	26.0
36790 41	Home antennas		24	7.7	78.9	25.4	54.5
36790 42	Auto antennas		9	13.3	40.7	12.8	18.1
	Static power supply convertors for electronic applications, sold separately:						
36790 43	Regulated	Thousands	67	(S)	193.5	(X)	82.6
36790 44	Unregulated		24	(S)	8.3	(X)	7.4
36790 45	Variable frequency	Thousands	7	(S)	2.7		
36790 46	Other (a.c., d.c., convertors and inverters, klystron, vibrator, etc.)		29	(X)	28.8	(X)	8.1
	Switches, mechanical types for electronic circuitry:						
36790 05	Toggle, including miniature and subminiature		10	(X)	9.8		
36790 06	Slide, including rocker miniature and subminiature		15	(X)	34.5		
36790 07	Rotary selector, including lever and jog-lever, miniature and subminiature		15	(X)	30.6		
36790 08	Keyboard		5	(X)	3.1	(X)	77.9
36790 09	Push button		17	(X)	19.0		
36790 10	Snap action		6	(X)	4.1		
36790 11	Thumbwheel		10	(X)	2.8		
36790 12	Other switches, n.e.c		24	(X)	77.9		
	Complex components (two or more components packaged and shipped as a single unit), except filters:						
36790 21	Passive component packages or "modules" assembled from discrete components (RC networks, tone control packages, inter-stage coupling packages)		19	(X)	29.6	(X)	22.8

See footnotes at end of table.

Table 6a. Products and Product Classes — Quantity and Value of Shipments by All Producers: 1977 and 1972 — Con.

(Includes quantity and value of products of this industry produced by (1) establishments classified in this industry (primary) and (2) establishments classified in other industries (secondary). Transfers of the products of this industry from one establishment of a company to another establishment of the same company (interplant transfers) are also included. For further explanation see appendix A, Value of shipments)

1977 product code	Product	Unit of measure	1977			1972	
			Number of companies	Product shipments		Product shipments	
				Quantity	Value (million dollars)	Quantity	Value (million dollars)
3679- --	ELECTRONIC COMPONENTS, N.E.C.--Con.						
36790 --	Electronic components and subassemblies, n.e.c.--Con.						
	As reported in Current Industrial Reports MA-36N, Selected Electronic and Associated Products, Including Telephone and Telegraph Apparatus--Con.						
	Complex components (two or more components packaged and shipped as a single unit), except filters-Con.						
36790 30	Active component packages or "modules" assembled from discrete, miniature components designed only for use in modules or assembled from conventional components	.....	69	(X)	1,107.3		
36790 29	Electronic cable harness assemblies	.....	39	(X)	94.6		
36790 24	Crygenic cooling devices, (crysostats, etc.) for infrared detectors, masers	.....	1	(X)	([6])		
	Ferrite devices other than microwave:						
36790 25	Hard ferrites for permanent magnets	.....	5	(X)	22.0		
36790 26	Soft ferrites for transformers, inductors, deflection yokes, and slugs for TV tuners and fractional hp motors.	.....	11	(X)	28.0	(X)	([5])
36790 27	Square-loop ferrites for memory cores for computers	.....	-	-	-		
36790 58	Liquid crystal displays and other liquid devices	.....	5	(X)	24.7		
36790 59	Magnetic bubble memories	.....	4	(X)	([6])		
36790 60	Magnetic cores	.....	15	(X)	64.3		
36790 79	Component assemblies of discrete active and/or passive components, not solid-state	.....	32	(X)	235.0		
36790 13	Electron tube parts, except glass blanks	.....	25	(X)	81.1	(X)	98.3
	Electronic parts, n.e.c., and specialized electronic hardware:						
	Sockets for electronic component insertion:						
36790 22	Tube sockets	.....	7				
36790 23	Relay sockets	.....	1	(X)	4.4		
36790 33	Discrete semiconductor sockets	.....	2				
36790 34	Integrated circuit sockets	.....	7	(X)	19.3		
36790 35	Other, including sockets for crystals and switches, etc.	.....	8	(X)	9.0	(X)	([5])
	Enclosures for electronic equipment:						
36790 37	Metal enclosures, assembled (welded, etc.)	.....	6				
36790 39	Metal enclosures, modular assembled, including card insertion, rack and panel, etc	.....	11	(X)	11.5		
36790 38	Other enclosures, n.e.c	.....	2				
36790 40	All other electronic parts, n.e.c., and specialized electronic hardware	.....	141	(X)	[6]687.3	(X)	[5]1,256.6
36790 02	Electronic components, n.e.c., n.s.k., typically for establishments with less than 20 employees (see note)	.....	(NA)	(X)	357.6	(X)	61.0

Note: In 1977 Census of Manufactures, shipments data for establishments of small single-unit companies with up to 20 employees were estimated from administrative records data rather than data actually collected from respondents. Employment cutoff used for administrative records for each industry and shipments figures are included in code ending with "002." In both 1977 and 1972 Censuses of Manufactures, products not completely identified on standard forms were coded in appropriate product class (5 digits) followed by "00" or, in some cases, to appropriate product group code (4 digits) followed by "0 00."

- Represents zero. (NA) Not available. N.E.C. Not elsewhere classified. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards. (X) Not applicable.

[1]For 1977, including 3671, 3672, and 3673 were merged into industry 3671. Products previously published with codes 36710, 36720, and 36730 are shown here with codes 36711, 36712, and 36713, respectively.

[2]For 1977, data for products codes 36712 17, 36712 18, and 36712 20 were combined to avoid disclosing operations of individual companies.

[3]Reclassified from product code 36749 94 for 1972.

[4]Product codes 36780 41, 36780 51, 36780 54, and 36780 56 were originated since 1972.

[5]For 1972, product codes 36790 36, 36790 91, 36790 93, 36790 99, 36790 04, 36790 30, 36790 29, 36790 24, 36790 25, 36790 26, 36790 27, 36790 58, 36790 59, 36790 60, 36790 79, 36790 13, 36790 22, 36790 23, 36790 33, 36790 34, 36790 35, 36790 37, 36790 39, and 36790 38 were included with product code 36790 40.

[6]For 1977, product codes 36790 55, 36790 24, and 36790 59 were included with product code 36790 40.

Table 6b. Product Classes—Value of Shipments by All Producers by Geographic Area: 1977 and 1972

(Millions of dollars. Product classes covered are those that are economically significant and whose production is geographically dispersed, provided dispersion is not approximated by data in table 2. Also, product classes are not shown if they are miscellaneous or "not specified by type" classes. Statistics for some States are withheld because they are either less than $2 million in product class shipments or they disclose operations of individual companies in 1977)

Product class and geographic area	Value of product shipments	
	1977	1972
36741, INTEGRATED MICROCIRCUITS (SEMICONDUCTOR NETWORKS)		
United States	2,697.1	1,267.8
New England Division:		
Massachusetts	52.4	21.4
Middle Atlantic Division:		
New Jersey	39.1	CC
Pennsylvania	177.4	7.4
East North Central Division:		
Indiana	12.3	AA
South Atlantic Division:		
Florida	88.4	FF
West South Central Division:		
Texas	450.7	GG
Pacific Division:		
California	937.3	GG
36742, TRANSISTORS		
United States	462.6	413.6
New England Division:		
Massachusetts	15.0	EE
Middle Atlantic Division:		
New York	6.0	17.6
Pacific Division:		
California	76.9	GG
36743, DIODES AND RECTIFIERS, EXCEPT LIGHT EMITTING		
United States	414.9	300.8
New England Division:		
Massachusetts	61.6	30.8
Middle Atlantic Division:		
New York	14.5	29.1
Pacific Division:		
California	110.3	GG
36749, SEMICONDUCTOR DEVICES AND PARTS FOR ALL DEVICES		
United States	835.8	337.2
New England Division:		
Massachusetts	34.2	37.4
Middle Atlantic Division:		
New York	167.5	34.7
New Jersey	5.3	1.9
Pennsylvania	124.4	68.1
East North Central Division:		
Ohio	14.0	(NA)
Mountain Division:		
Arizona	74.9	FF
Pacific Division:		
California	205.5	GG

Note: For 1972, the following value ranges (in million dollars) substitute for actual figures withheld to avoid disclosing operations of individual companies: AA--$1.0 to $1.9; BB--$2.0 to $4.9; CC--$5.0 to $9.9; EE--$10.0 to $19.9; FF--$20.0 to $49.9; GG--$50.0 or more.
(NA) Not available. N.E.C. Not elsewhere classified.

Table 6c. Product Classes—Value Shipped by All Producers: 1963, 1967, and 1972 to 1977

(Millions of dollars)

1977 product code	Product class	1977	1976[1]	1975[1]	1974[1]	1973[1]	1972	1967	1963
3671-	Electron tubes, all types	1,257.4	1,163.5	1,060.6	1,165.2	1,302.0	1,189.4	1,380.3	823.1
36711	Receiving tubes, except cathode ray	104.0	112.9	129.6	150.4	177.1	189.6	253.1	287.9
36712	Cathode ray picture tubes	603.5	604.9	514.0	599.8	697.0	633.6	765.6	248.5
36713	Transmitting and special purpose tubes	544.6	445.7	417.0	415.0	427.9	366.2	361.6	286.7
36710	Electron tubes, n.s.k.	5.3	-	-	-	-	-	-	-
3674-	Semiconductors and related devices	4,532.3	4,291.8	3,038.5	3,575.3	3,178.3	2,360.8	1,162.0	(NA)
36741	Integrated microcircuits (semiconductor networks)	2,697.1	2,597.9	1,717.8	2,055.5	1,708.7	1,267.8	247.5	(NA)

36743	Diodes and rectifiers, except light emitting	414.9	435.4	404.7	499.1	344.2	300.8	287.5	(NA)
36749	Semiconductor devices and parts for all devices	835.8	825.1	474.2	460.6	512.8	337.2	176.0	(NA)
36740	Semiconductors and related devices, n.s.k.	122.0	(S)	(27.9)	(18.4)	40.4	41.4	4.0	(NA)
36750	Capacitors for electronic applications	736.1	654.7	535.1	685.9	618.9	454.4	430.7	318.8
36760	Resistors for electronic applications	583.0	481.0	466.3	518.2	557.4	438.1	442.4	312.6
36770	Coils, transformers, reactors, and chokes	605.8	538.7	488.5	527.6	460.9	385.3	446.5	274.4
36780	Connectors for electronic applications	986.0	838.3	839.2	793.4	658.0	523.6	(NA)	(NA)
36790	Electronic components and subassemblies, n.e.c.	5,574.1	4,261.6	3,445.2	3,569.4	3,724.5	3,209.8	(NA)	(NA)

(NA) Not available. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards.

[1]Figures are estimates derived from a representative sample of manufacturing establishments canvassed in annual survey of manufactures and, therefore, may differ from results that would be obtained from a complete canvass of all manufacturing establishments. Standard errors associated with estimates are published in annual survey of manufactures volumes for this period. Figures in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data. Thus, at individual product class level, estimates may be of limited reliability; however, they may be combined with other product class totals into broader aggregates which are of acceptable reliability.

Table 7. Materials Consumed by Kind: 1977 and 1972

(Includes quantity and cost of materials consumed or put into production by establishments classified only in this industry. For further explanation, see appendix A, Cost of materials)

1977 material code	Material	Unit of measure	1977 Quantity[1]	1977 Delivered cost (million dollars)
	INDUSTRY 3671, ELECTRON TUBES, ALL TYPES[2]			
	Materials, parts, containers, and supplies	.....	(X)	618.8
	Mill shapes and forms, except castings:			
	Carbon steel:			
331012	Sheet and strip	1,000 s. tons..	(D)	(D)
331011	Bars and bar shapes		(D)	(D)
331015	Structural shapes		(Z)	(Z)
331017	Wire and wire products		(Z)	(Z)
331019	All other carbon steel mill shapes and forms		(Z)	(Z)
	Alloy steel, except stainless:			
331021	Bars and bar shapes		(D)	(D)
331029	All other alloy steel mill shapes and forms		(D)	(D)
	Stainless steel:			
331033	Sheet and strip		.3	.7
331050	All other stainless steel mill shapes and forms	1,000 s. tons..	(D)	(D)
	Insulated wire and cable, except magnet wire:			
335792	Copper content	Mil. lb. (copper content)	(S)	.3
335793	Aluminum content	Mil. lb. (Aluminum content)	-	-
335770	Magnet wire	Million lb.....	(D)	(D)
	Copper and copper-base alloy:			
335728	Bare wire for electrical conduction only		(Z)	(Z)
335102	Rod, bar, and mechanical wire, including extruded and/or drawn shapes		2.0	2.7
335143	Plate, sheet, and strip, including military cups and discs		.9	1.3
335152	Pipe and tube		.3	.8
	Aluminum and aluminum-base alloy:			
335301	Sheet, plate, and foil		(Z)	(Z)
335405	Extruded shapes, including extruded rod, bar, pipe, tube, etc		.1	.4
335008	All other aluminum mill shapes and forms	Million lb.....		
	Castings (rough and semifinished):			
332045	Steel:			
	Purchased	1,000 s. tons..	(D)	(D)
336100	Aluminum and aluminum-base alloy:			
	Purchased	Million lb.....	(S)	.3
336200	Copper and copper-base alloy:			
	Purchased	Million lb.....	(D)	(D)
339915	Metal powders			
333903	Precious metals, all forms, including ingot, sheet, strip, solder, plating, electrodes, etc	1,000 troy oz..	160.7	5.2
	Fractional horsepower electric motors (under 1 hp):			
362110	Timing motors, synchronous and subsynchronous:			
	Purchased	Thousands.....	(D)	(D)
362115	Other fractional horsepower electric motors, excluding timing motors:			
	Purchased	Thousands.....	(D)	(D)
367010	Electron tubes, except X-ray:			
	Purchased	Millions.....	(S)	9.0
367400	Transistors, diodes, and rectifiers:			
	Purchased		(S)	3.1
367411	Integrated circuits:			
	Purchased	Millions.....	1.9	2.7
333977	Germanium	1,000 lb.....	(S)	.2
260091	Paper and paperboard containers	.....	(X)	8.9
329905	Mica	1,000 lb.....	(D)	(D)
335616	Nickel and nickel-base alloy mill shapes and forms	Million lb.....	(S)	2.6
339913	Ferrites (powder and paste)	.....	(D)	(D)
	Glass and glass products:			
322921	Tube blanks	Millions.....	(S)	186.7
320311	Other than tube blanks	.....	(X)	32.9
335691	Tantalum mill products	1,000 lb.....	(Z)	(Z)
335693	Molybdenum, rolled, drawn, or extruded	Million lb.....	(S)	3.6
335733	Tungsten wire	Million meters.	(S)	4.9
367901	Fabricated electron tube parts, except blanks	.....	(X)	84.6
367500	Capacitors for electronic applications	.....	(X)	6.0
367600	Resistors for electronic applications	.....	(X)	1.1
367700	Coils, transformers, reactors, and chokes for electronic applications	.....	(X)	11.8
367903	Electronic components and accessories, except electron tube parts, including slide switches, printed circuit boards, antennas, modules, dial assemblies, etc	.....	(X)	35.2
364300	Current-carrying wiring devices	.....	(X)	(D)
	Electrical instrument mechanisms and meter movements, including instrument relays	.....	(X)	1.4
282104	Plastics resins consumed in the form of granules, pellets, powders, liquids, etc., but excluding sheets, rods, tubes, and shapes	.....	(X)	2.2
344401	Sheet metal products, except stampings	.....	(X)	3.0
345001	Bolts, nuts, screws, rivets, and screw machine products	.....	(X)	2.1
354401	Special dies, tools, die sets, jigs, and fixtures, except cutting tools for machine tools	.....	(X)	3.9
346901	Metal stampings	.....	(X)	15.5
970099	All other materials and components, parts, containers, and supplies	.....	(X)	166.5
971000	Materials, parts, containers, and supplies, n.s.k.[3]	.....	(X)	14.0

See footnotes at end of table.

Table 7. **Materials Consumed by Kind: 1977 and 1972**—Con.

(Includes quantity and cost of materials consumed or put into production by establishments classified only in this industry. For further explanation, see appendix A, Cost of materials)

344401	Sheet metal products, except stampings	.....	(X)	14.3	(X)	([12])

See footnotes at end of table.

Table 7. **Materials Consumed by Kind: 1977 and 1972**—Con.

(Includes quantity and cost of materials consumed or put into production by establishments classified only in this industry. For further explanation, see appendix A, Cost of materials)

1977 material code	Material	Unit of measure	1977		1972	
			Quantity[1]	Delivered cost (million dollars)	Quantity	Delivered cost (million dollars)
	INDUSTRY 3679, ELECTRONIC COMPONENTS, N.E.C.--Con.					
345001	Bolts, nuts, screws, rivets, and screw machine products		(X)	23.2	(X)	[6]11.0
354401	Special dies, tools, die sets, jigs, and fixtures, except cutting tools for machine tools		(X)	8.9	(X)	[6]6.0
346901	Metal stampings		(X)	27.4	(X)	[6]33.0
970099	All other materials and components, parts, containers, and supplies		(X)	1,148.3	(X)	[12]297.2
971000	Materials, parts, containers, and supplies, n.s.k.[3]		(X)	511.0	(X)	184.1

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. N.E.C. Not elsewhere classified. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than $50,000 or less than half the unit of measure specified for quantities.

[1]For some establishments, data have been estimated from central unit values, which are based on quantity-cost relationships of reported data. The following symbols are used when percentage of each quantity figure estimated in this manner equals or exceeds 10 percent of published figure: * indicates 10 to 19 percent estimated, ** indicates 20 to 29 percent estimated. If 30 percent or more is estimated, figure is replaced by (S).

[2]For 1977, this industry is a combination of former industries 3671, 3672, and 3673, done because of declining size in electron tubes industries. No comparable materials consumed data are available for 1972.

[3]Total cost of materials of establishments that did not report detailed materials data, including establishments that were not mailed a form.

[4]For 1972, material codes 333903, 367500, 367600, 367700, 367903, 364300, and 382501 were included with material code 970099.

[5]For 1972, material codes 362110 and 362115 were combined to avoid disclosing operations of individual companies.

[6]From 1972 Census of Manufactures Supplemental Inquiry: Consumption of Materials, Parts, Containers, and Supplies During 1972 (Form MA-131).

[7]For 1972, material codes 333903, 367500, 361600, 367700, 367903 and 344401 were included with material code 970099.

[8]For 1977, material codes 335143 and 335152 were included with material code 335728.

[9]For 1972, material codes 333903, 382501, and 344401 were included with material code 970099.

[10]For 1972, material codes 333903, 382501, and 344401 were included with material code 970099.

[11]For 1972, material codes 333903, 364300, 382501, and 344401 were included with material code 970099.

[12]For 1972, material codes 333903, 364300, 382501, and 344401 were included with material code 970099.

DESCRIPTION OF INDUSTRIES

MISCELLANEOUS ELECTRICAL EQUIPMENT AND SUPPLIES

This report shows 1977 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code	Title
3691	Storage Batteries
3692	Primary Batteries, Dry and Wet
3693	X-ray, Electromedical, and Electrotherapeutic Apparatus
3694	Engine Electrical Equipment
3699	Electrical Equipment and Supplies, N.E.C.

The industry statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments, but also their activities in the manufacture of secondary products as well as their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1a-5a) with product statistics (table 6a) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5b, which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

Small single-unit companies with up to 20 employees (the cutoff varied by industry), were excluded from the mail portion of the census. For these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated), data on payrolls and receipts were obtained from administrative records of other government agencies. The remaining statistics were developed from industry averages.

Establishment data were tabulated based on industry definitions contained in the 1972 Standard Industrial Classification Manual and its 1977 supplement.

INDUSTRY 3691, STORAGE BATTERIES

This industry comprises establishments primarily engaged in the manufacture of storage batteries. Establishments primarily engaged in the manufacture of primary batteries are classified in industry 3692.

The total value of shipments for establishments classified in the Storage Batteries industry amounted to $1,983 million in 1977, an increase of 105 percent from 1972. The value of shipments of products classified as primary to the industry was $1,911 million, an increase of 101 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $928 million in 1977, was 94 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 25.9 thousand employees, an increase of 17 percent from 1972. The leading States in employment were Pennsylvania, California, Florida, and Indiana, accounting for approximately 40 percent of the industry's 1977 employment.

The establishments in this industry with less than 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 2 percent of total value of shipments.

INDUSTRY 3692, PRIMARY BATTERIES, DRY AND WET

This industry comprises establishments primarily engaged in the manufacture of primary batteries. Establishments primarily engaged in the manufacture of storage batteries are classified in industry 3691.

The total value of shipments for establishments classified in the Primary Batteries, Dry and Wet industry amounted to $666 million in 1977, an increase of 91 percent from 1972. The value of shipments of products classified as primary to the industry was $624 million, an increase of 97 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $343 million in 1977, was 55 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 11.0 thousand employees, an increase of 31 percent from 1972. The leading States in employment were North Carolina, Ohio, Wisconsin, and Tennessee, accounting for approximately 60 percent of the industry's 1977 employment. Data for these States have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

The establishments in this industry with less than 5 employees were excluded from the mail portion of the census. The

data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 1 percent of total value of shipments.

INDUSTRY 3693, X-RAY, ELECTROMEDICAL, AND ELECTROTHERAPEUTIC APPARATUS

This industry comprises establishments primarily engaged in the manufacture of radiographic X-ray, fluoroscopic X-ray, and therapeutic X-ray apparatus and tubes for medical, industrial, research, and control applications. This industry also includes establishments primarily engaged in the manufacture of electromedical and electrotherapeutic apparatus except electrotherapeutic lamp units for ultraviolet and infrared radiations (industry 3641). Establishments primary engaged in the manufacture of radio receiving tubes are classified in industry 3671, television receiving cathode-ray tubes in industry 3672, and transmitting tubes in industry 3673.

The total value of shipments for establishments classified in the X-ray Electromedical and Electrotherapeutic Apparatus industry amounted to $1,885 million in 1977. The value of shipments of products classified as primary to the industry was $1,838 million. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) Value added by manufacture, at $1,232 million in 1977. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 30.9 thousand employees. The leading States in employment were Ohio, New York, Massachusetts, and Connecticut, accounting for approximately 40 percent of the industry's 1977 employment.

The establishments in this industry with less than 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 3 percent of total value of shipments.

INDUSTRY 3694, ENGINE ELECTRICAL EQUIPMENT

This industry comprises establishments primarily engaged in the manufacture of electrical equipment for internal combustion engines. Important products of this industry include armatures, starting motors, alternators, and generators for automobiles and aircraft; and ignition apparatus for internal combustion engines, including spark plugs, magnetos, coils, and distributors.

The total value of shipments for establishments classified in the Engine Electrical Equipment industry amounted to $3,647 million in 1977, an increase of 79 percent from 1972. The value of shipments of products classified as primary to the industry was $3,049 million, an increase of 71 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were spark plugs, for which shipments increased 45 percent, and passenger car cranking motors, for which shipments increased 52 percent. Value added by manufacture, at $2,041 million in 1977, was 68 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 63.8 thousand employees, an increase of 10 percent from 1972. The leading States in employment were Indiana, Michigan, Ohio, and Illinois, accounting for approximately 70 percent of the industry's 1977 employment. Data for Indiana and Michigan have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

The establishments in this industry with less than 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 2 percent of total value of shipments.

INDUSTRY 3699, ELECTRICAL EQUIPMENT AND SUPPLIES, N.E.C.

This industry comprises establishments primarily engaged in the manufacture of electrical machinery, equipment, and supplies, not elsewhere classified, such as appliance and extension cords, electric comfort heating equipment, electric bells and chimes, and Christmas tree lighting outfits.

The total value of shipments for establishments classified in the Electrical Equipment and Supplies, N.E.C. industry amounted to $749 million in 1977, an increase of 44 percent from 1972. The value of shipments of products classified as primary to the industry was $879 million, an increase of 51 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were lamp bulb components, for which shipments increased 56 percent. Value added by manufacture, at $387 million in 1977, was 59 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 20.7 thousand employees, an increase of 5 percent from 1972. The leading States in employment were New Jersey, Ohio, New York, and Indiana, accounting for approximately 40 percent of the industry's 1977 employment. Data for Indiana have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

The 1977 census obtained data on shipments of electric comfort heating equipment only at product class levels. This is the source of the data in table 6a described "As reported in census of manufactures." Detailed figures on the shipments of electric comfort heating equipment are reported annually in the Census Bureau's Current Industrial Reports (CIR) MA-34N, Selected Heating Equipment. Some of these data are also shown in table 6a.

The establishments in this industry with less than 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 16 percent of total value of shipments.

Table 1a. Historical Statistics for the Industry: 1977 and Earlier Years

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. r Revised. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]In annual survey of manufactures (ASM) years, data are estimates based on a representative sample of establishments canvassed annually and may differ from results of a complete canvass of all establishments. ASM publication shows percentage standard errors. Unless otherwise noted, for data prior to 1963, see 1963 Census of Manufactures, vol. II, table 1 of the Industry chapter.

[2]For the census, a company is defined as a business organization consisting of one establishment or more under common ownership or control.

[3]Industry was defined or redefined for 1972 Census of Manufactures, so data are available only for years shown.

[4]Data for 1967 and 1963 were derived from Table 8, General Statistics for Establishments by Industry Specialization and Primary Product Class Specialization, in vol. II of the 1967 and 1963 Censuses of Manufactures. Separate data for other years are not available.

[5]Data either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data; thus these estimates may be of limited reliability.

[6]Estimate for new capital expenditures has associated standard error of 15 percent or more and may be of limited reliability. Estimates for other data items are of acceptable reliability.

[7]Minimum percentage; exact percentage withheld to avoid disclosing operations of individual companies.

[8]Relationships are not meaningful because of predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

[9]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[10]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

Table 1b. Selected Operating Ratios for the Industry: 1977 and Earlier Years

[For explanation of terms, see appendix A]

Year	Payroll per employee (dollars)	Assets per employee (dollars)	Production workers as percent of total employment (percent)	Annual hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials as percent of value of shipments (percent)	Cost of materials and payroll as percent of value of shipments (percent)	Assets as percent of value of shipments (percent)	Value added per employee (dollars)	Payroll as percent of value added (percent)	Value added per production worker hour (dollars)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown for those States where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2]Statistics for some producing States are withheld to avoid disclosing figures for individual companies. However, for such States with 150 employees or more, number of establishments is shown and employment size range is indicated by one of the following symbols: AA—150 to 249 employees; BB—250 to 499 employees; CC—500 to 999 employees; EE—1,000 to 2,499 employees; FF—2,500 employees or more.

[3]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[4]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[5]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 3a. **Summary Statistics for the Industry: 1977**

[For explanation of terms, see appendix A]

Item	Unit of measure	Storage batteries (SIC 3691)	Primary batteries, dry and wet (SIC 3692)	X-ray and electro-medical equipment (SIC 3693)	Engine electrical equipment (SIC 3694)	Electrical equipment and supplies, n.e.c. (SIC 3699)
Primary product specialization ratio[1]	percent	97	96	98	81	94
Coverage ratio[2]	do	99	97	92	89	77
All establishments	number	218	58	243	409	547
With 1 to 19 employees	do	84	25	117	228	438
With 20 to 99 employees	do	49	7	55	98	153
With 100 employees or more	do	85	26	71	83	56

Materials, supplies, fuel, etc.	do	60.8	47.3	146.9	118.7	50.3
End of year	do	292.9	100.1	542.3	488.3	112.2
Finished products	do	103.2	11.1	158.4	150.6	31.7
Work in process	do	124.2	38.2	181.2	214.2	26.5
Materials, supplies, fuel, etc.	do	65.5	50.8	202.7	123.5	54.0
Capital expenditures for plant and equipment	do	123.5	36.0	65.4	150.9	19.4
New capital expenditures	do	122.2	35.4	63.4	146.0	16.3
New buildings and other structures	do	31.6	5.8	13.1	21.6	3.1
New machinery and equipment	do	90.7	29.6	50.3	124.3	13.1
Used capital expenditures	do	1.2	0.6	2.0	4.9	3.1

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Represents ratio of primary product shipments to total product shipments (primary and secondary, excluding miscellaneous receipts) for establishments classified in industry.

[2]Represents ratio of primary products shipped by establishments classified in industry to total shipments of such products by all manufacturing establishments, wherever classified.

[3]Relationships are not meaningful because of predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

[4]Minimum percentage; exact percentage withheld to avoid disclosing operations of individual companies.

[5]Data for value of shipments represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[6]Data for value of shipments represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[7]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 3b. Supplemental Industry Statistics Based on Sample Estimates: 1977

(For explanation of terms, see appendix A. For description of annual survey of manufactures (ASM), see appendix B)

Item	Storage batteries (SIC 3691)		Primary batteries, dry and wet (SIC 3692)		X-ray and electro-medical equipment (SIC 3693)		Engine electrical equipment (SIC 3694)		Electrical equipment and supplies, n.e.c. (SIC 3699)	
	Amount (million dollars)	Standard error of estimate[1] (percent)	Amount (million dollars)	Standard error of estimate[1] (percent)	Amount (million dollars)	Standard error of estimate[1] (percent)	Amount (million dollars)	Standard error of estimate[1] (percent)	Amount (million dollars)	Standard error of estimate[1] (percent)
Purchased services:										
Cost of purchased services for repair of--										
Buildings and other structures	3.1	9	0.5	1	(2.1)	25	2.9	7	(0.8)	40

New machinery and equipment, n.s.k.[4]	(7.9)	(A)	(0.8)	(A)	(12.6)	(A)	(12.5)	(A)	(7.5)	(A)
Used capital expenditures	0.3	7	0.2	1	1.3	1	4.6	1	2.7	2
Retirements	11.1	8	9.2	1	8.4	3	18.1	3	9.2	5
End of year	429.6	3	139.7	1	210.8	3	847.9	1	165.1	4
Total gross value of depreciable assets:										
Beginning of year	489.0	2	162.9	1	342.0	2	924.7	1	210.2	4
New capital expenditures	138.0	13	33.0	2	55.8	4	149.2	4	(17.7)	19
Used capital expenditures	1.0	6	0.3	1	(2.3)	24	4.8	2	2.7	2
Retirements	12.0	9	9.6	1	10.4	7	19.8	4	10.9	5
End of year	616.0	3	186.6	1	389.7	2	1,058.9	1	219.8	4
Depreciation charges during 1977	43.3	2	11.8	1	31.1	6	60.2	1	14.0	5
Buildings and other structures	7.9	2	1.9	3	9.0	3	6.3	2	2.1	8
Machinery and equipment	35.4	2	9.9	1	22.1	8	53.9	1	11.9	5

Note: Data for total new capital expenditures, new building expenditures, new machinery expenditures, and total used expenditures are shown in table 3a, as well as in this table. The figures in table 3a are census universe totals and may differ from the annual survey of manufactures (ASM) sample estimates shown in this table. The figures in this table represent the best estimates of year-to-year change as measured by the continuing ASM sample. However, they are subject to sampling error and, hence, as estimates of level, are not as reliable as the universe figures shown in table 3a.

- Represents zero. (A) Indicates standard errors of 100 percent or more. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. (X) Not applicable. (Z) Less than 50 thousand dollars.

[1]For a description of the standard error of estimate, see the section "Qualifications of the Data" in appendix B. Figures in parentheses have standard errors of 15 percent or more.

[2]This is a measure of the extent to which respondents reported for each item. It is derived for each item by calculating the ratio of the weighted employment (establishment data multiplied by sample weight; see appendix B) for those sample establishments that reported the specific inquiry to the weighted total employment for all sample establishments classified in the industry.

[3]The standard errors for the detailed categories of new machinery and equipment expenditures were not directly calculated. However, the actual figure is not expected to exceed the estimated figure shown.

[4]This category represents the total machinery and equipment expenditures for establishments that did not break down their expenditures for the three specific categories.

Table 4. Industry Statistics by Employment Size of Establishment: 1977

[For explanation of terms, see appendix A]

Industry and employment size class	E[1]	All establishments (no.) - Represents zero. (D) Withheld to avoid disclosing operations of individual companies. Data for this item are included in figures in parentheses above. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2]Report forms were not mailed to small single-unit companies with up to 20 employees (cutoff varied by industry). Payroll and sales data for 1977 were obtained from administrative records supplied by other agencies of the Federal Government. These data were then used in conjunction with industry averages to estimate the balance of items shown. Data are also included in respective size classes shown.

[3]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[4]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[5]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 5a. Industry Statistics by Industry and Primary Product Class Specialization: 1977

[Table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. Measures of plant specialization shown are (1) industry specialization: ratio of primary product shipments to total product shipments (primary plus secondary, excluding miscellaneous receipts) for the establishment; and (2) product class specialization: ratio of largest primary product class shipments to total product shipments (primary plus secondary, excluding miscellaneous receipts) for the establishment. See appendix for method of computing ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for various reasons; e.g., to avoid disclosing operations of individual companies. For explanation of terms, see appendix A]

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[2]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

Table 5b. Industry-Product Analysis — Value of Shipments for an Industry and Primary Product Shipments, and Specialization and Coverage Ratios: 1977, 1972, and 1967

(An establishment is assigned to an industry based on shipment values of products representing largest amount considered primary to an industry. Frequently, establishment shipments comprise mixtures of products assigned to an industry (primary), those considered primary to other industries (secondary), and receipts for activities such as merchandising or contract work. Columns A-D show this product pattern for an industry, and column E shows primary product specialization ratio. The extent to which an industry's primary products are shipped by establishments classified in and out of an industry is shown in columns F-H and coverage ratio is shown in column I. For explanation of terms, see appendix A)

1977 product code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total (million dollars)	Primary products (million dollars)	Secondary products (million dollars)	Miscellaneous receipts (million dollars)	Primary product specialization ratio Col. B / Col. Table 5c. Industry-Product Analysis — Shipments by Product Class and Industry: 1977

(Millions of dollars. Table shows where products of an industry (referred to as primary and listed in table 6a) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Only those product groups that have at least $2 million in shipments from establishments classified in one of industries included in this chapter are shown. Read across to determine where products of industries in this chapter are produced. To extent that some of primary products are made in industries not included in this chapter, value of such shipments is shown in "Other industries" column. Specified "Other industries" are listed at end of table if they account for more than $5 million of products primary to this chapter. For explanation of terms, see appendix A)

36930 71	X-ray equipment accessories	.....	(NA)	(X)	21.4
36930 49	X-ray tubes and valves, sold separately	Thousands	(NA)	39.2	19.7

See footnotes at end of table.

Table 6a. **Products and Product Classes — Quantity and Value of Shipments by All Producers: 1977 and 1972** - Con.

(Includes quantity and value of products of this industry produced by (1) establishments classified in this industry (primary) and (2) establishments classified in other industries (secondary). Transfers of the products of this industry from one establishment of a company to another establishment of the same company (interplant transfers) are also included. For further explanation, see appendix A, Value of shipments)

1977 product code	Product	Unit of measure	1977			1972	
			Number of companies with shipments of $100,000 or more	Product shipments[1]		Product shipments	
				Quantity[2]	Value (million dollars)	Quantity	Value (million dollars)
	ENGINE ELECTRICAL EQUIPMENT						
3694- --	Total		(NA)	(X)	3,049.3	(X)	1,781.0
36941 --	Ignition harness and cable sets		(NA)	(X)	252.8	(X)	112.8
	Ignition harness sets:						
36941 11	Automotive type	Millions	27	(S)	158.4	27.3	61.8
36941 15	Aircraft type		3	(S)	16.1	(S)	(7)
36941 19	Other types, including tractor, stationery engine, etc.		5			(S)	(7)
	Cable sets:						
36941 31	Automotive type		20	(S)	61.5	8.9	21.6
36941 35	Aircraft and other types	Millions	7	0.2	12.9	.4	14.7
36941 00	Ignition harness and cable sets, n.s.k.		(NA)	(X)	4.0	(X)	7 14.7
36942 --	Battery charging alternators, generators, and regulators		(NA)	(X)	631.7	(X)	382.1
	Battery charging alternators and generators:						
36942 14	Passenger car and light truck type, new	Millions	7	14.3	363.8	14.7	236.5
36942 21	Heavy-duty truck and bus type, 12 volt and higher, new		6	**1.7	112.5	0.9	38.0
36942 29	All other, excluding farm lighting generators, but including farm tractor-type battery charging generators and generators sold to engine manufacturers for incorporation into end products, stationary engines, marine engines, construction machinery, etc.		3	(S)	(8)	(S)	(8)
36942 27	Rebuilt automotive type alternators and generators[9]		40	(S)	65.5	2.1	25.4
	Regulators for battery charging generators:						
36942 37	Rebuilt automotive type regulators[9]		2				
36942 41	Passenger car and light truck type, new		9				
36942 47	Heavy-duty truck and bus type, new		5	18.3	73.7	13.6	56.1
36942 49	Other types	Millions	2				
36942 00	Battery charging alternators, generators, and regulators, n.s.k.		(NA)	(X)	8 16.2	(X)	8 26.1

36993 61	Heating boilers	Thousands	2	(D)	(D)		
	Decentralized systems, excluding portable and residential:						
36993 62	Baseboard	.....	5	(X)	7.9		
36993 63	Infrared	Thousands	6	40.3	2.6	(S)	([12])
36993 64	Unit heaters	Thousands	11	104.1	11.0		
36993 67	Other	.....	6	(X)	7.6		
36994 --	Other electrical equipment, n.e.c., except electric comfort heating equipment	.....	(NA)	(X)	476.7	(X)	([10])
36994 07	Parts for electric comfort heating equipment, excluding portable and residential wall or baseboard radiant heating units	.....	5	(X)	21.2	(X)	([12])
36994 11	Electric lamp (bulb) bases	.....	8	(X)	176.6	(X)	35.4
36994 21	Other electric lamp (bulb) components, including supports, electrodes, lead-ins, and filaments, but excluding lamp bulb blanks	.....	9			(X)	77.9
36994 51	Electric gongs, chimes, bells, etc	.....	7	(X)	35.2	(X)	12.4
36994 71	Christmas tree lighting outfits, including value of bulbs made or purchased and assembled in outfits	Thousands	11	(S)	29.2	(S)	15.9
36994 81	Electromagnets	.....	6	(X)	5.5	(S)	[12]110.2
36994 95	Other electrical products, n.e.c	.....	108	(X)	198.3		
36994 00	Other electrical products, n.e.c., n.s.k	.....	(NA)	(X)	10.7	(X)	30.6
36996 --	Appliance wire and cord and flexible cord sets:						
36996 00	Appliance wire and cord and flexible cord sets manufactured primarily from purchased insulated wire	.....	62	(X)	[13]132.3	(X)	[13]111.5
36990 00	Electrical equipment, n.e.c., n.s.k., typically for establishments with 5 employees or more (see note)	.....	(NA)	(X)	158.5	(X)	94.0
36990 02	Electrical equipment, n.e.c., n.s.k., typically for establishments with less than 5 employees (see note)	.....	(NA)	(X)	24.0	(X)	50.5

Note: In 1977 Census of Manufactures, shipments data for establishments of small single-unit companies with up to 20 employees were estimated from administrative records data rather than data actually collected from respondents. Employment cutoff used for administrative records for each industry and shipments figures are included in code ending with "002." In both 1977 and 1972 Censuses of Manufactures, products not completely identified on standard forms were coded in appropriate product class (5 digits) followed by "00" or, in some cases, to appropriate product group code (4 digits) followed by "0 00."

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. N.E.C. Not elsewhere classified. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards. (X) Not applicable.

[1]Quantity and value reported by all producers of product, not just those with shipments of $100,000 or more.

[2]For some establishments, data have been estimated from central unit values, which are based on quantity-value relationships of reported data. The following symbols are used when percentage of each quantity figure estimated in this manner equals or exceeds 10 percent of published figure: * indicates 10 to 19 percent estimated, ** indicates 20 to 29 percent estimated. If 30 percent or more is estimated, figure is replaced by (S).

[3]For 1977, product codes 36920 95 and 36920 00 were combined to avoid disclosing operations of individual companies.

[4]For 1977, product codes 36932 13, 36932 15, 36932 21, and 36932 23 are combined to avoid disclosing operations of individual companies.

[5]For 1977, product codes 36932 39 and 36932 45 were combined to avoid disclosing operations of individual companies.

[6]For 1972, product codes 36930 82 and 36930 94 were combined to avoid disclosing operations of individual companies.

[7]For 1972, product codes 36941 15 and 36941 19 were included with product code 36941 00.

[8]For 1977 and 1972, product code 36942 29 was included with product code 36942 00.

[9]Data are limited to rebuilding on a factory basis.

[10]Product class 36993 and 36994 were created for 1977. 1972 totals are not comparable.

[11]Excludes value for product code 36993 61.

[12]For 1972, product codes 36993 61 through 36993 00 and 36994 07 were combined with product code 36994 95 to avoid disclosing operations of individual companies.

[13]Product detail is shown in Industry 3357, Nonferrous Wire Drawing and Insulating.

Table 6b. Product Classes — Value of Shipments by All Producers by Geographic Area: 1977 and 1972

(Millions of dollars. Product classes covered are those that are economically significant and whose production is geographically dispersed, provided dispersion is not approximated by data in table 2. Also, product classes are not shown if they are miscellaneous or "not specified by type" classes. Statistics for some States are withheld because they are either less than $2 million in product class shipments or they disclose operations of individual companies in 1977)

Product class and geographic area	Value of product shipments	
	1977	1972
36913, LEAD ACID STORAGE BATTERIES, 1.5 CU. FT. OR LESS

36990	Electrical equipment, n.e.c., n.s.k.	182.5	(68.7)	(S)	(16.9)	124.8	144.5	37.1	10.9

n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards.

[1]Figures are estimates derived from a representative sample of manufacturing establishments canvassed in annual survey of manufactures and, therefore, may differ from results that would be obtained from a complete canvass of all manufacturing establishments. Standard errors associated with estimates are published in annual survey of manufactures volumes for this period. Figures in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data. Thus, at individual product class level, estimates may be of limited reliability; however, they may be combined with other product class totals into broader aggregates which are of acceptable reliability.

Table 7. Materials Consumed by Kind: 1977 and 1972

(Includes quantity and cost of materials consumed or put into production by establishments classified only in this industry. For further explanation, see appendix A, Cost of materials)

1977 material code	Material	Unit of measure	1977 Quantity[1]	1977 Delivered cost (million dollars)	1972 Quantity	1972 Delivered cost (million dollars)
	INDUSTRY 3691, STORAGE BATTERIES					
	Materials, parts, containers, and supplies		(X)	1,049.6	(X)	493.4
	Lead and lead alloys:					
333233	Refined unalloyed lead	1,000 s. tons	301.2	177.0	254.7	76.6
333234	Antimonial lead	1,000 s. tons	378.9	248.6	340.0	110.1
333235	Lead-calcium alloyed	1,000 s. tons	*25.6	17.4	(X)	(2)

Footnotes are on next page.

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. N.E.C. Not elsewhere classified. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards. (X) Not applicable.

[1]For some establishments, data have been estimated from central unit values, which are based on quantity-cost relationships of reported data. The following symbols are used when percentage of each quantity figure estimated in this manner equals or exceeds 10 percent of published figure: * indicates 10 to 19 percent estimated, ** indicates 20 to 29 percent estimated. If 30 percent or more is estimated, figure is replaced by (S).

[2]For 1972, these material codes were not collected separately, but were included in material code 970099.

[3]From 1972 Census of Manufactures Supplemental Inquity: Consumption of Materials, Parts, Containers, and Supplies During 1972 (form MA-131).

[4]Total cost of materials of establishments that did not report detailed materials data, including establishments that were not mailed a form.

[5]For 1977, material codes 333234, 282104, 307903, 281930, and 331012 were combined with material code 971000 to avoid disclosing operations of individual companies.

[6]Material consumed by kind data were not collected in 1972.

[7]Includes delivered cost of material code 322921.

[8]For 1977, material code 333401 and material code 336200 data for copper and copper-base alloy purchased were included with material code 970099.

DESCRIPTION OF INDUSTRIES

MOTOR VEHICLES AND EQUIPMENT

This report shows 1977 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title	
3711	Motor Vehicles and Car Bodies
3713	Truck and Bus Bodies
3714	Motor Vehicle Parts and Accessories
3715	Truck Trailers
3716	Motor Homes Produced on Purchased Chassis

The industry statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments, but also their activities in the manufacture of secondary products as well as their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1a-5a) with product statistics (table 6a) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5b, which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

Small single-unit companies with up to 20 employees (the cutoff varied by industry), were excluded from the mail portion of the census. For these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated), data on payrolls and receipts were obtained from administrative records of other government agencies. The remaining statistics were developed from industry averages.

Establishment data were tabulated based on industry definitions contained in the 1972 Standard Industrial Classification Manual and its 1977 supplement.

INDUSTRY 3711, MOTOR VEHICLES AND CAR BODIES

This industry comprises establishments primarily engaged in the manufacture of passenger cars, passenger car bodies, trucks, buses, and wheeled combat vehicles. Complete car chassis and complete truck chassis, with or without cab, are also included in this industry. Establishments primarily engaged in the manufacture of trucks or buses on purchased chassis are classified in industry 3713; tanks, self-propelled weapons, and other military vehicles in industry 3795; and motor homes produced on purchased chassis in industry 3716.

The total value of shipments for establishments classified in the Motor Vehicles and Car Bodies industry amounted to $76,517 million in 1977, an increase of 78 percent from 1972. The value of shipments of products classified as primary to the industry was $72,979 million, an increase of 78 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were trucks and truck tractors, for which shipments increased 125 percent. The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $18,723 million in 1977, was 59 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 343.6 thousand employees, an increase of 1 percent from 1972. The leading States in employment were Ohio, Michigan, Missouri, and California, accounting for approximately 70 percent of the industry's 1977 employment. Data for California have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided. These same States were in the forefront for 1972, although there has been some shift in the relative importance of individual States.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 1 percent of total value of shipments.

INDUSTRY 3713, TRUCK AND BUS BODIES

This industry comprises establishments primarily engaged in the manufacture of truck and bus bodies, sold separately or for assembly on purchased chassis. Establishments primarily engaged in the manufacture of motor homes produced on purchased chassis are classified in industry 3716; cars, trucks, buses, motor homes, and tactical military vehicles produced on chassis of own manufacture in industry 3711.

The 1977 definition of this industry has been revised from that given in the 1977 SIC Manual, but the SIC number and title are unchanged.

The effect of the revisions on the data are summarized in table 1c, Composition of New (1977) Industry Based on Old (1972) Standard Industrial Classification.

The total value of shipments for establishments classified in the Truck and Bus Bodies industry amounted to $2,003 million.

The value of shipments of products classified as primary to the industry was $1,881 million. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) Value added by manufacture was $946 million. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

The industry had 34.8 thousand employees. The leading States in employment were Pennsylvania, Ohio, Indiana, and California, accounting for approximately 45 percent of the industry's employment. Data for Pennsylvania have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 13 percent of total value of shipments.

INDUSTRY 3714, MOTOR VEHICLE PARTS AND ACCESSORIES

This industry comprises establishments primarily engaged in the manufacture of parts and accessories for cars, trucks, and buses. Establishments primarily engaged in the manufacture of automobiles and trucks are classified in industry 3711; motor homes produced on purchased chassis in industry 3716; tires and tubes in industry 3011; automobile glass in major group 32; automobile stampings in industry 3465; vehicular lighting equipment in industry 3647; ignition systems in industry 3694; storage batteries in industry 3691; and carburetors, pistons, rings, and valves in industry 3592.

The total value of shipments for establishments classified in the Motor Vehicle Parts and Accessories industry amounted to $35,750 million in 1977, an increase of 95 percent from 1972. The value of shipments of products classified as primary to the industry was $37,842 million, an increase of 95 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were gasoline engines, for which shipments increased 120 percent. The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $16,263 million in 1977, was 77 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 450.7 thousand employees, an increase of 12 percent from 1972. The leading States in employment were Michigan, Ohio, Indiana, and California, accounting for approximately 70 percent of the industry's 1977 employment. These same States were in the forefront for 1972 when they accounted for approximately 70 percent of the industry's employment.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 1 percent of total value of shipments.

INDUSTRY 3715, TRUCK TRAILERS

This industry comprises establishments primarily engaged in the manufacture of truck trailers, truck trailer chassis, detachable trailer bodies (cargo containers), and detachable trailers (cargo containers) chassis. Establishments primarily engaged in the manufacture of travel and camping trailers are classified in industry 3792; and establishments primarily engaged in the manufacture of other trailers pulled by automobiles are classified in industry 3799.

The total value of shipments for establishments classified in the Truck Trailer industry amounted to $1,910 million in 1977, an increase of 71 percent from 1972. The value of shipments of products classified as primary to the industry was $1,804 million, an increase of 67 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $645 million in 1977, was 44 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 28.1 thousand employees, an increase of 14 percent from 1972. The leading States in employment were Pennsylvania, Texas, Georgia, and California, accounting for approximately 40 percent of the industry's 1977 employment. Data for Texas, Georgia, and California have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided. These same States were in the forefront for 1972, although there has been some shift in the relative importance of individual States.

The 1977 census obtained data on shipments of truck trailers and chassis with axle ratings of 10,000 pounds and over only at product class levels. This is the source of the data in table 6a described "As reported in census of manufactures." Detailed figures on the shipments of these truck trailers and chassis are reported monthly in the Census Bureau's Current Industrial Reports (CIR) M37L, Truck Trailers. Some of these data are also shown in table 6a.

Establishments of single-unit companies in this industry with up to 10 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 5 percent of total value of shipments.

INDUSTRY 3716, MOTOR HOMES PRODUCED ON PURCHASED CHASSIS

This industry comprises establishments primarily engaged in the manufacture of motor homes produced on purchased chassis. Establishments primarily engaged in the manufacture of motor homes produced on chassis of own manufacture are classified in industry 3711.

The Motor Homes Produced on Purchased Chassis industry is included for the first time in the 1977 census.

The effect of the revisions on the data are summarized in table 1c, Composition of New (1977) Industry Based on Old (1972) Standard Industrial Classification.

The total value of shipments for establishments classified in the Motor Homes Produced on Purchased Chassis industry amounted to $1,564 million. The value of shipments of products classified as primary to the industry was $1,494 million. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) Value added by manufacture was $443 million. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

The industry had 19.2 thousand employees. The leading States in employment were California, Indiana, Iowa, and Michigan, accounting for approximately 80 percent of the industry's employment. Data for Indiana and Iowa have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 1 percent of total value of shipments.

Table 1a. Historical Statistics for the Industry: 1977 and Earlier Years

(For explanation of terms, see appendix A)

Year[1]	Companies[2] (no.)	All establishments: Total (no.)	All establishments: With 20 employees or more (no.)	All employees: Number (1,000)	All employees: Payroll (mil. dol.)	Production workers: Number (1,000)	Production workers: Hours (mil.)	Production workers: Wages (mil. dol.)	Value added by manufacture (mil. dol.)	Cost of materials (mil. dol.)	Value of shipments (mil. dol.)	Expenditures and assets: New capital expenditures (mil. dol.)	Expenditures and assets: Gross value of fixed assets (mil. dol.)	End-of-year inventories (mil. dol.)	Ratios: Specialization (percent)	Ratios: Coverage (percent)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. [r]Revised. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1] In Annual Survey of Manufactures (ASM) years, data are estimates based on a representative sample of establishments canvassed annually and may differ from results of a complete canvass of all establishments. ASM publication shows percentage standard errors. Unless otherwise noted, for data prior to 1963, see 1963 Census of Manufactures, vol. II, table 1 of the Industry chapter.

[2] For the census, a company is defined as a business organization consisting of one establishment or more under common ownership or control.

[3] Industry was defined after 1963 Census of Manufactures, so data are available only for years shown.

[4] Data for 1967 and 1963 were derived from Table 8, General Statistics for Establishments by Industry Specialization and Primary Product Class Specialization, in vol. II of the 1967 and 1963 Censuses of Manufactures. Separate data for other years are not available.

[5] Data either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data; thus these estimates may be of limited reliability.

[6] Estimate for new capital expenditures has associated standard error of 15 percent or more and may be of limited reliability. Estimates for other data items are of acceptable reliability.

[7] Minimum percentage; exact percentage withheld to avoid disclosing operations of individual companies.

[8] Relationships are not meaningful because of predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

Table 1b. Selected Operating Ratios for the Industry: 1977 and Earlier Years

(For explanation of terms, see appendix A)

Year	Payroll per employee (dollars)	Assets per employee (dollars)	Production workers as percent of total employment (percent)	Annual hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials as percent of value of shipments (percent)	Cost of materials and payroll as percent of value of shipments (percent)	Assets as percent of value of shipments (percent)	Value added per employee (dollars)	Payroll as percent of value added (percent)	Value added per production worker hour (dollars)

Table 1c. Composition of New (1977) Industry Based on Old (1972) Standard Industrial Classification

(Under "Composition of new industry," rows of data for "New industries" are for industries as now composed and row of data for "Old industry" is for industry as it would have been if industry definition had not been changed. Under "Totals for industries on old SIC," data are for industries before revision and reflect amounts classified in specified new industry as well as in other new industries. The data in first five columns show that portion of "Old industry" that was moved to "New industry")

Industry	Composition of new industry--1977 data					Total for industries on old SIC--1977 data				
	Establishments		All employees (1,000)	Value added by manufacture (million dollars)	Value of shipments (million dollars)	Establishments		All employees (1,000)	Value added by manufacture (million dollars)	Value of shipments (million dollars)
	Total (number)	With 20 employees or more (number)				Total (number)	With 20 employees or more (number)			
Old industry 3713--Truck and bus bodies	820	313	34.8	946.3	2,003.3	936	427	54.0	1,389.6	3,567.8
New industry 3716--Motor homes produced on purchased chassis.....	116	114	19.2	443.3	1,564.5	(X)	(X)	(X)	(X)	(X)

(X) Not applicable.

Table 2. Industry Statistics by Geographic Area: 1977 and 1972

[For explanation of terms, see appendix A]

Geographic area	1977											1972	
		All establishments		All employees		Production workers							
	E[1]	Total (no.)	With 20 employees or more (no.)	Number[2] (1,000)	Payroll (million dollars)	Number (1,000)	Hours (millions)	Wages (million dollars)	Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	New capital expenditures (million dollars)	All employees[2] (1,000)	Value added by manufacture (million dollars)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown for those States where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2]Statistics for some producing States are withheld to avoid disclosing figures for individual companies. However, for such States with 150 employees or more, number of establishments is shown and employment size range is indicated by one of the following symbols: AA—150 to 249 employees; BB—250 to 499 employees; CC—500 to 999 employees; EE—1,000 to 2,499 employees; FF—2,500 employees or more.

[3]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[4]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[5]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 3a. Summary Statistics for the Industry: 1977

[For explanation of terms, see appendix A]

Item	Unit of measure	Motor vehicles and car bodies (SIC 3711)	Truck and bus bodies (SIC 3713)	Motor vehicle parts and accessories (SIC 3714)	Truck trailers (SIC 3715)	Motor homes (SIC 3716)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Represents ratio of primary product shipments to total product shipments (primary and secondary, excluding miscellaneous receipts) for establishments classified in industry.

[2]Represents ratio of primary products shipped by establishments classified in industry to total shipments of such products by all manufacturing establishments, wherever classified.

[3]Relationships are not meaningful because of predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

[4]Minimum percentage; exact percentage withheld to avoid disclosing operations of individual companies.

[5]Data for value of shipments represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[6]Data for value of shipments represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[7]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 3b. Supplemental Industry Statistics Based on Sample Estimates: 1977

(For explanation of terms, see appendix A. For description of annual survey of manufactures (ASM), see appendix B)

Item	Motor vehicles and car bodies (SIC 3711)		Truck and bus bodies (SIC 3713)		Motor vehicle parts and accessories (SIC 3714)		Truck trailers (SIC 3715)		Motor homes (SIC 3716)	
	Amount (million dollars)	Standard error of estimate[1] (percent)	Amount (million dollars)	Standard error of estimate[1] (percent)	Amount (million dollars)	Standard error of estimate[1] (percent)	Amount (million dollars)	Standard error of estimate[1] (percent)	Amount (million dollars)	Standard error of estimate[1] (percent)
Purchased services:										
Cost of purchased services for repair of--										
Buildings and other structures	19.0	1	(1.7)	29	44.3	3	(1.8)	17	0.9	6

Retirements	870.4	1	(18.5)	26	648.1	2	9.9	10	(3.7)	61
End of year	7,572.2	1	372.3	5	11,626.7	1	300.1	3	120.2	14
Depreciation charges during 1977	399.9	1	23.6	5	738.4	1	19.2	4	(7.6)	33
Buildings and other structures	72.7	1	5.6	10	78.1	1	5.0	14	(2.6)	17
Machinery and equipment	327.2	1	18.0	4	660.3	1	14.1	3	(5.0)	41

Note: Data for total new capital expenditures, new building expenditures, new machinery expenditures, and total used expenditures are shown in table 3a, as well as in this table. The figures in table 3a are census universe totals and may differ from the annual survey of manufactures (ASM) sample estimates shown in this table. The figures in this table represent the best estimates of year-to-year change as measured by the continuing ASM sample. However, they are subject to sampling error and, hence, as estimates of level, are not as reliable as the universe figures shown in table 3a.

- Represents zero. (A) Indicates standard errors of 100 percent or more. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.s.k. Not specified by kind. (X) Not applicable. (Z) Less than 50 thousand dollars.

[1]For a description of the standard error of estimate, see the section "Qualifications of the Data" in appendix B. Figures in parentheses have standard errors of 15 percent or more.

[2]This is a measure of the extent to which respondents reported for each item. It is derived for each item by calculating the ratio of the weighted employment (establishment data multiplied by sample weight; see appendix B) for those sample establishments that reported the specific inquiry to the weighted total employment for all sample establishments classified in the industry.

[3]The standard errors for the detailed categories of new machinery and equipment expenditures were not directly calculated. However, the actual figure is not expected to exceed the estimated figure shown.

[4]This category represents the total machinery and equipment expenditures for establishments that did not break down their expenditures for the three specific categories.

Table 4. Industry Statistics by Employment Size of Establishment: 1977

[For explanation of terms, see appendix A]

Industry and employment size class	E[1]	All establishments (no.) - Represents zero. (D) Withheld to avoid disclosing operations of individual companies. Data for this item are included in figures in parentheses above. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2]Report forms were not mailed to small single-unit companies with up to 20 employees (cutoff varied by industry). Payroll and sales data for 1977 were obtained from administrative records supplied by other agencies of the Federal Government. These data were then used in conjunction with industry averages to estimate the balance of items shown. Data are also included in respective size classes shown.

[3]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[4]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[5]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 5a. Industry Statistics by Industry and Primary Product Class Specialization: 1977

[Table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. Measures of plant specialization shown are (1) industry specialization: ratio of primary product shipments to total product shipments (primary plus secondary, excluding miscellaneous receipts) for the establishment; and (2) product class specialization: ratio of largest primary product class shipments to total product shipments (primary plus secondary, excluding miscellaneous receipts) for the establishment. See appendix for method of computing ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for various reasons; e.g., to avoid disclosing operations of individual companies. For explanation of terms, see appendix A]

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[2]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

Table 5b. Industry-Product Analysis — Value of Shipments for an Industry and Primary Product Shipments, and Specialization and Coverage Ratios: 1977, 1972, and 1967

(An establishment is assigned to an industry based on shipment values of products representing largest amount considered primary to an industry. Frequently, establishment shipments comprise mixtures of products assigned to an industry (primary), those considered primary to other industries (secondary), and receipts for activities such as merchandising or contract work. Columns A-D show this product pattern for an industry, and column E shows primary product specialization ratio. The extent to which an industry's primary products are shipped by establishments classified in and out of an industry is shown in columns F-H and coverage ratio is shown in column I. For explanation of terms, see appendix A)

[1]Industry 3716 was established as a separate industry in 1977. In prior years, data for this industry were included with industry 3713. Data for 1972 and 1967 are not available. See 1972 publication for historical data on a combined basis.

Table 5c. Industry-Product Analysis — Shipments by Product Class and Industry: 1977

(Millions of dollars. Table shows where products of an industry (referred to as primary and listed in table 6a) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Only those product groups that have at least $2 million in shipments from establishments classified in one of industries included in this chapter are shown. Read across to determine where products of industries in this chapter are produced. To extent that some of primary products are made in industries not included in this chapter, value of such shipments is shown in "Other industries" column. Specified "Other industries" are listed at end of table if they account for more than $5 million of products primary to this chapter. For explanation of terms, see appendix A)

Table 5c. Industry-Product Analysis—Shipments by Product Class and Industry: 1977—Con.

(Millions of dollars. Table shows where products of an industry (referred to as primary and listed in table 6a) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Only those product groups that have at least $2 million in shipments from establishments classified in one of industries included in this chapter are shown. Read across to determine where products of industries in this chapter are produced. To extent that some of primary products are made in industries not included in this chapter, value of such shipments is shown in "Other industries" column. Specified "Other industries" are listed at end of table if they account for more than $5 million of products primary to this chapter. For explanation of terms, see appendix A)

1977 product code	Product group, product class, and miscellaneous receipts	All industries	Motor vehicles and car bodies (SIC 3711)	Truck and bus bodies (SIC 3713)	Motor vehicle parts and accessories (SIC 3714)	Truck trailers (SIC 3715)	Motor homes produced on purchased chassis (SIC 3716)	All other industries

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.
[1]Product classes 37113, 37114, and 37115 were combined to avoid disclosing operations of individual companies.

Table 6a. Products and Product Classes — Quantity and Value of Shipments by All Producers: 1977 and 1972

(Includes quantity and value of products of this industry produced by (1) establishments classified in this industry (primary) and (2) establishments classified in other industries (secondary). Transfers of the products of this industry from one establishment of a company to another establishment of the same company (interplant transfers) are also included. For further explanation, see appendix A, Value of shipments)

1977 product code	Product	Unit of measure	1977			1972	
			Number of companies with shipments of $100,000 or more	Product shipments[1]		Product shipments	
				Quantity[2]	Value (million dollars)	Quantity	Value (million dollars)
	MOTOR VEHICLES AND CAR BODIES						
3711- --	Total	.....	(NA)	(X)	72,979.1	(X)	41,045.9
37111 --	Passenger cars, knocked down or assembled, and chassis for sale separately	.....	(NA)	(X)	47,798.9	(X)	29,246.2
37111 11	Complete vehicles, knocked down or assembled, including station wagons, ambulances, hearses, and taxicabs if produced on passenger-car chassis. For vehicles assembled abroad, value is on same basis as for domestic interplant shipments of knocked down vehicles (value includes extra equipment billed with vehicles)	Thousands	10	9,192.2	47,796.3	8,848.6	29,229.3
37111 51	Chassis for sale separately	Thousands	2			5.4	16.9
37111 00	Passenger cars and chassis, n.s.k.	.....	(NA)	(X)	2.6	(X)	-
37112 --	Trucks, truck tractors, and truck chassis (chassis of own manufacture)	Thousands	(NA)	3,548.1	21,543.5	2,438.5	9,566.1
	Trucks, truck tractors and truck chassis, knocked down or assembled, including trucks such as pickup, panel delivery, or other commercial vehicles made on passenger-car chassis if chassis are of own manufacture; including station wagons, motor homes, ambulances, hearses, and taxicabs if produced on truck chassis; and all truck chassis whether or not to be used for transportation of property such as fire apparatus, street sprinklers, school buses, and ambulances. Excludes specialized road construction machinery and off-the-highway trucks. To be reported in number of units and value of shipments for each gross-vehicle-weight category, including value of bodies and other equipment billed with vehicles:						
	Trucks, truck tractors, and truck chassis by gross vehicle weight		(NA)	3,548.1	21,543.5	2,438.5	9,566.1

See footnotes at end of table.

Table 6a. **Products and Product Classes — Quantity and Value of Shipments by All Producers: 1977 and 1972** — Con.

(Includes quantity and value of products of this industry produced by (1) establishments classified in this industry (primary) and (2) establishments classified in other industries (secondary). Transfers of the products of this industry from one establishment of a company to another establishment of the same company (interplant transfers) are also included. For further explanation, see appendix A, Value of shipments)

1977 product code	Product	Unit of measure	1977			1972	
			Number of companies with shipments of $100,000 or more	Product shipments[1]		Product shipments	
				Quantity[2]	Value (million dollars)	Quantity	Value (million dollars)
	MOTOR HOMES BUILT ON PURCHASED CHASSIS[15]						
3716- --	Total	.....	(NA)	(X)	1,494.6	(X)	509.6
37161 --	Motor homes built on purchased chassis	.....	(NA)	(X)	1,309.6	(X)	509.6
37161 01	Conventional (Type A)	Thousands	41	42.0	696.4		
37161 05	Chopped van or mini (Type C)		98	*60.2	654.9		
37161 07	Van camper (Type B)		9	7.6	45.6		
37161 21	Converted vans not qualifying as van camper (Type B) motor homes, excluding custom conversion of vans to which others hold title	Thousands	19	18.0	97.7	51.9	509.6
37161 00	Motor homes built on purchased chassis, n.s.k.	.....	(NA)	(X)	(Z)		

Note: In 1977 Census of Manufactures, shipments data for establishments of small single-unit companies with up to 20 employees were estimated from administrative records data rather than data actually collected from respondents. Employment cutoff used for administrative records for each industry and shipments figures are included in code ending with "002." In both 1977 and 1972 Censuses of Manufactures, products not completely identified on standard forms were coded in appropriate product class (5 digits) followed by "00" or, in some cases, to appropriate product group code (4 digits) followed by "0 00."

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousands dollars or hours; under 50 employees.

[1]Quantity and value reported by all producers of product, not just those with shipments of $100,000 or more.

[2]For some establishments, data have been estimated from central unit values, which are based on quantity-value relationships of reported data. The following symbols are used when percentage of each quantity figure estimated in this manner equals or exceeds 10 percent of published figures: * indicates 10 to 19 percent estimated, ** indicates 20 to 29 percent estimated. If 30 percent or more is estimated, figure is replaced by (S).

[3]In 1972, product code 37112 32 was included with product code 37112 48.

[4]For 1977, data for product classes 37113, 37114, 37115, and n.s.k. product code 37110 00 were combined to avoid disclosing operations of individual companies.

[5]Industry 3713 and product class 37132 were revised for 1977 to exclude motor homes built on purchased chassis, which are now classified in Industry 3716, MOTOR HOMES. 1972 data are revised downward by $509.6 million from values previously published.

[6]For 1977, data for product code 37131 12 were included with product code 37131 55 to avoid disclosing operations of individual companies.

[7]For 1972, data for product codes 37131 00 and 37132 00 were included with product code 37130 00.

[8]Limited to shipments of products classified in industry 3714. Additional shipments of motor vehicle parts were classified outside industry 3714. For 1977, those with greatest value were: stampings, $9.3 billion; tires and tubes, $6.8 billion; motor vehicle hardware, $2.2 billion; engine electrical equipment, $2.2 billion; and diesel engines, $1.3 billion.

[9]Includes $1,286.8 million for which respondents did not indicate whether shipments were for replacement, OEM, or export.

[10]Limited to rebuilding on a factory basis. Rebuilding operations performed in service stations, garages, etc., were excluded from census. Figures may be somewhat understated because of exclusion of data for establishments with less than 10 employees. Such establishments were typically not included in mail portion of census, but were included in published data by use of data from administrative records. These estimates are included in value shown for product code 37140 02. Although use of such administrative records tend to create a small understatement for most specific products, effect is more significant for those products typically produced in small establishments, such as rebuilding facilities.

[11]For 1972, data for product codes 37141 67 and 37141 98 were combined to avoid disclosing operations of individual companies.

[12]Includes $1,336.6 million for which respondents did not indicate whether shipments were for replacements, OEM, or export. Difference was distributed proportionately using ratios of reported data.

[13]Separation between insulated and semi-insulated closed top vans occured after 1972. Separate data are not available for 1972.

[14]FRP categories were introduced after 1972. Data for 1972 were included in product code 37151 49.

[15]Industry 3716, Motor Home Produced on Purchased Chassis was created in 1977 from industry 3713 Truck and Bus Bodies. Separate data for product codes 37161 01, 37161 05, 37161 07, and 37161 21 for 1972 are not available.

Table 6b. Product Classes—Value of Shipments by All Producers by Geographic Area: 1977 and 1972

(Millions of dollars. Product classes covered are those that are economically significant and whose production is geographically dispersed, provided dispersion is not approximated by data in table 2. Also, product classes are not shown if they are miscellaneous or "not specified by type" classes. Statistics for some States are withheld because they are either less than $2 million in product class shipments or they disclose operations of individual companies in 1977)

Product class and geographic area	Value of product shipments	
	1977	1972
37111, PASSENGER CARS AND CAR CHASSIS

37160	Motor homes, n.s.k.								

(NA) Not available. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards.

[1]Figures are estimates derived from a representative sample of manufacturing establishments canvassed in annual survey of manufactures and, therefore, may differ from results that would be obtained from a complete canvass of all manufacturing establishments. Standard errors associated with estimates are published in annual survey of manufactures volumes for this period. Figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data. Thus, at individual product class level, estimates may be of limited reliability; however, they may be combined with other product class totals into broader aggregates which are of acceptable reliability.

[2]Prior to 1967, figures for product class 37114, Combat Vehicles, and product class 37110, Motor Vehicles, n.s.k., were included with product class 37140, Motor Vehicles Parts and Accessories, n.s.k.

[3]Prior to 1967, figures for product class 37115, Passenger Car Bodies, were included with product class 37141, Motor Vehicle Parts and Accessories.

[4]Prior to 1977, Industry 3716, Motor Homes Produced on Purchased Chassis, were included in product class 37132, Motor Vehicles Built on Purchased Chassis. Data for 1972 have been revised to exclude motor homes.

Table 7. Materials Consumed by Kind: 1977 and 1972

(Includes quantity and cost of materials consumed or put into production by establishments classified only in this industry. For further explanation, see appendix A, Cost of materials)

Table 7. **Materials Consumed by Kind: 1977**

(Includes quantity and cost of materials consumed or put into production by establishments classified only in this industry. For further explanation, see appendix A, Cost of materials)

1977 material code	Material	Unit of measure	1977, quantity[1]	1977, delivered cost (million dollars)
	INDUSTRY 3716, MOTOR HOMES PRODUCED ON PURCHASED CHASSIS			
	Materials, parts, containers, and supplies	.....	(X)	1,102.7
	Mill shapes and forms, except castings:			
	Carbon steel:			
331011	Bars and bar shapes	1,000 tons.....	(S)	9.3
331012	Sheet and strip		(S)	24.5
331013	Plates		(D)	(D)
331015	Structural shapes			4.0
331017	Wire and wire products		(D)	(D)
331019	All other		(S)	[1]3.9
	Alloy steel, except stainless:			
331021	Bars and bar shapes		**2.5	3.1
331029	All other			
	Stainless steel:			
331033	Sheet and strip		(D)	(D)
331050	All other	1,000 tons.....	(D)	(D)
335792	Insulated copper wire and cable, except magnet wire	Mil. lb (copper content).	(S)	3.5
	Copper and copper-base alloy:			
335728	Bare wire for electrical conduction	Million lb.....	(D)	(D)
335102	Rod, bar, and mechanical wire, including extruded and/or drawn shapes		(S)	.4
335143	Plate, sheet, and strip, including military cups and discs		*.1	.1
335152	Pipe and tube		(S)	2.0
	Aluminum and aluminum-base alloy:			
335301	Sheet, plate, and foil		(S)	36.4
335405	Extruded shapes, including extruded rod, bar, pipe, tube, etc		(S)	4.3
335008	All other (wire, rolled rod and bar, powder, welded tubing, etc.)		(S)	2.1
339915	Metal powders	Million lb.....	(D)	(D)
	Primary metals:			
331051	Pig iron (exclude silvery iron)	1,000 tons.....	(D)	(D)
333401	Aluminum and aluminum-base alloy refinery shapes		(D)	(D)
	Scrap, excluding home scrap:			
999811	Iron and steel		-	-
999808	Aluminum and aluminum-base alloy		(D)	(D)
	Castings, (rough and semifinished):			
332011	Iron (gray and malleable)		(D)	(D)
332045	Steel	1,000 tons.....	(S)	.5
336100	Aluminum and aluminum-base alloy	Million lb.....	(D)	(D)
336200	Copper and copper-base alloy	Million lb.....	(D)	(D)
	Forgings:			
346200	Iron and steel	1,000 tons.....	(D)	(D)
346310	Aluminum and aluminum-base alloy	Million lb.....	(D)	(D)
362115	Fractional horsepower electric motors (under 1 hp.) excluding timing motors	Thousands.....	(D)	(D)
	Bearings:			
356218	Ball	.....	(X)	(D)
350201	Roller	.....	(X)	(D)
229501	Coated, impregnated or laminated fabrics	Mil. lin. yd...	(D)	8.6
	Uncoated broad woven fabrics:			
221103	Cotton	Mil. lin. yd...	(D)	(D)
220128	Other broadwoven fabrics		(S)	1.1
301101	Pneumatic tires and inner tubes	Million tires..	(S)	13.4
262104	Plastics resins consumed in the form of granules, pellets, powders, liquids, etc	Million pounds.	(S)	2.1
307903	Plastics products consumed in the form of sheets, rods, tubes, and other shapes	.....	(X)	2.4
285101	Paints, varnishes, lacquers, shellacs, japans, and enamels	.....	(X)	5.6
345001	Bolts, nuts, screws, rivets, washers, and screw machine products	.....	(X)	12.8
320102	Glass and glass products, including windows and mirrors	.....	(X)	15.5
306902	Fabricated rubber products, except tires, tubes, hose, belting, and gaskets	.....	(X)	.4
307902	Fabricated plastics products, except gaskets	.....	(X)	6.7
329221	Asbestos friction materials	.....	(X)	(D)
354401	Special dies, tools, die sets, jigs, and fixtures, except cutting tools for machine tools	.....	(X)	(D)
970099	All other materials & components, parts, containers, & supplies consumed (see Note)	.....	(X)	705.7
971000	Materials, parts, containers, and supplies, n.s.k.[3]	.....	(X)	207.9

Note: Supplemental data for code 970099 are presented in the 1977 Census of Manufactures subject series report "Selected Materials Consumed."

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards. (X) Not applicable.

[1]For some establishments, data have been estimated from central unit values, which are based on quantity-cost relationships of reported data. The following symbols are used when percentage of each quantity figure estimated in this manner equals or exceeds 10 percent of published figure: * indicates 10 to 19 percent estimated, ** indicates 20 to 29 percent estimated. If 30 percent or more is estimated, figure is replaced by (S).

[2]From 1972 Census of Manufactures Supplemental Inquiry: Consumption of Materials, Parts, Containers, and Supplies During 1972 (Form MA-131).

[3]Total cost of materials of establishments that did not report detailed materials data, including establishments that were not mailed a form.

[4]For 1972, material code 304101, 306902, 307903, 329221, and 354401 were included with material code 970099.

[5]For 1972, material code 304101, 306902, and 307903 were included with material code 970099.

[6]For 1972, material code 335143, 999808, 304101, 306902, 307903, 307902, 320102, 329221, and 354401 were included with material code 970099.

Description of Industries 2

TABLES

INDUSTRY STATISTICS

1a. Historical Statistics: 1977 and Earlier Years 5
1b. Selected Operating Ratios: 1977 and Earlier Years 6
2. Geographic Area: 1977 and 1972 7
3a. Summary Statistics: 1977 10
3b. Supplemental Statistics Based on Sample Estimates: 1977 . . . . . 11A
4. Employment Size of Establishment: 1977 12
5a. Industry and Primary Product Class Specialization: 1977 13

PRODUCT STATISTICS

5b. Industry-Product Analysis—Value of Shipments for an Industry and Primary Product Shipments, and Specialization and Coverage Ratios: 1977, 1972, and 1967 15
5c. Industry-Product Analysis—Shipments by Product Class and Industry: 1977 16
6a. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1977 and 1972 18
6b. Product Classes—Value of Shipments by All Producers by Geographic Area: 1977 and 1972 21
6c. Product Classes—Value Shipped by All Producers: 1963, 1967, 1972 to 1977 22

MATERIAL STATISTICS

7. Materials Consumed by Kind: 1977 and 1972 23

DESCRIPTION OF INDUSTRIES

AEROSPACE EQUIPMENT, INCLUDING PARTS

This report shows 1977 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title	
3721	Aircraft
3724	Aircraft Engines and Engine Parts
3728	Aircraft Equipment, N.E.C.
3761	Guided Missiles and Space Vehicles
3764	Space Propulsion Units and Parts
3769	Space Vehicle Equipment, N.E.C.

The industry statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products as well as their miscellaneous activities (contract work on materials owned by others, repair work, etc). This fact should be taken into account in comparing industry statistics (tables 1a-5a) with product statistics (table 6a) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5b, which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

Establishments of small single-unit companies with up to 20 employees (the cutoff varied by industry), were excluded from the mail portion of the census. For these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated), data on payrolls and receipts were obtained from administrative records of other government agencies. The remaining statistics were developed from industry averages.

Establishment data were tabulated based on industry definitions contained in the 1972 Standard Industrial Classification Manual and its 1977 Supplement.

INDUSTRY 3721, AIRCRAFT

This industry comprises establishments primarily engaged in the manufacture or assembly of complete aircraft. It also includes establishments primarily engaged in research and development on aircraft or in factory-type aircraft modification on a contract or fee basis. Establishments primarily engaged in the manufacture of engines, propellers, and other aircraft parts and auxiliary equipment are classified in industries 3724 and 3728, and those in the production of guided missiles and space vehicles and parts are classified in SIC group 376.

The total value of shipments for establishments classified in the Aircraft industry amounted to $14,834 million in 1977, an increase of 69 percent from 1972. The value of shipments of products classified as primary to the Aircraft industry was $12,053 million, an increase of 60 percent from 1972 (see the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments). The products accounting for a significant portion of this change were personal and utility type aircraft, for which shipments increased 329 percent. The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $8,134 million in 1977, was 60 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore, not adjusted for changes in price levels.

In 1977 the industry had 222.7 thousand employees, a decrease of 4 percent from 1972. The leading States in employment were California, Texas, Washington, and New York, accounting for 64 percent of the industry's 1977 employment. Data for Washington and New York have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

Monthly data for personal, utility, and commercial type aircraft are avaliable in Current Industrial Reports M37G, Complete Aircraft and Aircraft Engines.

Establishments of small single-unit companies with up to 20 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for less than 1 percent of total value of shipments.

INDUSTRY 3724, AIRCRAFT ENGINES AND ENGINE PARTS

This industry comprises establishments primarily engaged in manufacturing aircraft engines and engine parts. Research and development on aircraft engines is included in this industry. Establishments primarily engaged in manufacturing guided missile and space vehicle propulsion units and parts are classified in industry 3764.

The total value of shipments for establishments classified in the Aircraft Engines and Engine Parts industry amounted to $6,272 million in 1977, an increase of 72 percent over 1972. The value of shipments of products classified as primary to the industry was $4,995 million, an increase of 63 percent from 1972 (see the Introduction for a discussion of the difference between value of shipments for the industry and value of

product shipments). The products accounting for a significant portion of this change were military aircraft engines for which shipments increased 140 percent. The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $3,599 million in 1977, was 81 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 106.1 thousand employees, an increase of 1 percent from 1972. The leading States in employment were Connecticut, Ohio, Indiana, and Massachusetts, accounting for 70 percent of the industry's 1977 employment. Data for Connecticut, Indiana, and Massachusetts have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

Monthly data on shipments of engines for civilian aircraft are available in Current Industrial Report M37G, Complete Aircraft and Aircraft Engines.

Establishments of small single-unit companies with up to 20 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for less than 1 percent of total value of shipments.

INDUSTRY 3728, AIRCRAFT PARTS, N.E.C.

This industry comprises establishments primarily engaged in manufacturing aircraft parts and auxiliary equipment, not elsewhere classified. Research and development on aircraft parts is included in this industry. Establishments primarily engaged in manufacturing or assembling complete aircraft are classified in industry 3721, aircraft engines and parts in industry 3724, aeronautical instruments in industry 3811, aeronautical electrical equipment in industry 3694, aeronautical navigation equipment in industry 3622, and guided missile and space vehicle parts and auxiliary equipment in industry 3769.

The total value of shipments for establishments classified in the Aircraft Equipment, N.E.C. industry amounted to $4,758 million in 1977, an increase of 57 percent over 1972. The value of shipments of products classified as primary to the industry was $5,762 million, an increase of 68 percent from 1972 (see the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments). Value added by manufacture, at $3 billion in 1977, was 46 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 102.0 thousand employees, a decrease of 2 percent from 1972. The leading States in employment were California, Washington, Ohio, and Kansas, accounting for 64 percent of the industry's 1977 employment. Data for Washington, Ohio, and Kansas have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

Establishments of small single-unit companies with up to 20 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 3 percent of total value of shipments.

INDUSTRY 3761, GUIDED MISSILES AND SPACE VEHICLES

This industry comprises establishments primarily engaged in manufacturing complete guided missiles and space vehicles. Research and development and other services on or for guided missiles and space vehicles are included in this industry. Establishments primarily engaged in manufacturing guided missile and space vehicle propulsion units and propulsion unit parts are classified in industry 3764, space satellite, guided missile and space vehicle airborne and ground guidance, checkout and launch electronic systems and components in industry 3662, and guided missile and space vehicle airframes, nose cones and space capsules in industry 3769.

The total value of shipments for establishments classified in the Guided Missiles and Space Vehicles industry amounted to $5,314 million in 1977, an increase of 29 percent over 1972. The value of shipments of products classified as primary to the industry was $4,848 million, an increase of 31 percent from 1972 (see the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments). The products accounting for a significant portion of this change were research and development on complete space vehicles, for which shipments increased 53 percent. The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $3,565 million in 1977, was 21 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 94.1 thousand employees, a decrease of 21 percent from 1972. The leading States in employment were California, Florida, Colorado, and Arizona, accounting for 91 percent of the industry's 1977 employment. Data for Colorado and Arizona have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

Establishments of small single-unit companies with up to 20 employees were excluded from the mail portion of the census. There were no establishments for which administrative records were used.

INDUSTRY 3764, SPACE PROPULSION UNITS AND PARTS

This industry comprises establishments primarily engaged in manufacturing guided missile and space vehicle propulsion units and propulsion unit parts. This industry also includes establishments primarily engaged in research and development

on guided missile and space vehicle propulsion units and propulsion unit parts.

The total value of shipments for establishments classified in the Space Propulsion Units and Parts industry amounted to $887 million in 1977, an increase of 24 percent over 1972. The value of shipments of products classified as primary to the industry was $930 million, an increase of 26 percent from 1972 (see the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments). The products accounting for a significant portion of this change were research and development on missile and space vehicle engines, for which shipments increased 141 percent. The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $587 million in 1977, was 16 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 17.0 thousand employees, a decrease of 18 percent from 1972. The leading States in employment were California, Utah, New York, and Ohio, accounting for 84 percent of the industry's 1977 employment. Data for Utah, New York, and Ohio have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

Establishments of small single-unit companies with up to 20 employees were excluded from the mail portion of the census. There were no establishments for which administrative records were used.

INDUSTRY 3769, SPACE VEHICLE EQUIPMENT, N.E.C.

This industry comprises establishments primarily engaged in manufacturing guided missile and space vehicle parts and auxiliary equipment, not elsewhere classified. Research and development on guided missile and space vehicle parts and equipment, not elsewhere classified, is also included in this industry. Establishments primarily engaged in manufacturing guided missile and space vehicle propulsion units and unit parts are classified in industry 3764, warheads for missiles in industry 3483, and navigational and guidance systems in industry 3662.

The total value of shipments for establishments classified in the Space Vehicle Equipment, N.E.C. industry amounted to $339 million in 1977, a decrease of 57 percent over 1972. The value of shipments of products classified as primary to the industry was $882 million, an increase of 7 percent from 1972 (see the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments). Value added by manufacture, at $237 million in 1977, was 54 percent below value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 7.2 thousand employees, a decrease of 66 percent from 1972. The leading States in employment were Pennsylvania, Louisiana, California, and Connecticut, accounting for 76 percent of the industry's 1977 employment. Data for Pennsylvania, Louisiana, and Connecticut have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

Establishments of small single unit companies with up to 20 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for less than 1 percent of total value of shipments.

Table 1a. Historical Statistics for the Industry: 1977 and Earlier Years

(NA) Not available. N.E.C. Not elsewhere classified.

[1] In Annual Survey of Manufactures (ASM) years, data are estimates based on a representative sample of establishments canvassed annually and may differ from results of a complete canvass of all establishments. ASM publication shows percentage standard errors. Unless otherwise noted, for data prior to 1963, see 1963 Census of Manufactures, vol. II, table 1 of the industry chapter.

[2] For the census, a company is defined as a business organization consisting of one establishment or more under common ownership or control.

[3] Industry was defined or redefined for 1972 Census of Manufactures, so data are available only for years shown.

[4] Data for 1967 and 1963 were derived from Table 8, General Statistics for Establishments by Industry Specialization and Primary Product Class Specialization, in vol. II of the 1967 and 1963 Censuses of Manufactures. Separate data for other years are not available.

[5] Data either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data; thus these estimates may be of limited reliability.

[6] Estimate for new capital expenditures has associated standard error of 15 percent or more and may be or limited reliability. Estimates for other data items are of acceptable reliability.

[7] Minimum percentage; exact percentage withheld to avoid disclosing operations of individual companies.

[8] Relationships are not meaningful because of predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

Table 1b. Selected Operating Ratios for the Industry: 1977 and Earlier Years

(For explanation of terms, see appendix A)

Year	Payroll per employee (dol.)	Assets per employee (dol.)	Production workers as percent of total employment (percent)	Annual hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials as percent of value of shipments (percent)	Cost of materials and payroll as percent of value of shipments (percent)	Assets as percent of value of shipments (percent)	Value added per employee (dollars)	Payroll as percent of value added (percent)	Value added per production worker hour (dollars)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. N.E.C. Not elsewhere classified. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown for those States where estimated data based on administrative records data account for 10 percent or more of figures shown: E1--10 to 19 percent; E2--20 to 29 percent; E3--30 to 39 percent; E4--40 to 49 percent; E5--50 to 59 percent; E6--60 to 69 percent; E7--70 to 79 percent; E8--80 to 89 percent; E9--90 to 99 percent; E0--100 percent.

[2]Statistics for some producing States are withheld to avoid disclosing figures for individual companies. However, for such States with 150 employees or more, number of establishments is shown and employment size range is indicated by one of the following symbols: AA--150 to 249 employees; BB--250 to 499 employees; CC--500 to 999 employees; EE--1,000 to 2,499 employees; FF--2,500 employees or more.

(D) Withheld to avoid disclosing operations of individual companies.

[1]Represents ratio of primary product shipments to total product shipments (primary and secondary, excluding miscellaneous receipts) for establishments classified in industry.

[2]Represents ratio of primary products shipped by establishments classified in industry to total shipments of such products by all manufacturing establishments, wherever classified.

[3]Cost of resales and cost of contract work were combined in industries 3761, 3764, and 3769 to avoid disclosing operations of individual companies.

Machinery and equipment	56.2	1	13.7	1	3.8	2

Note: Data for total new capital expenditures, new building expenditures, new machinery expenditures, and total used expenditures are shown in table 3a, as well as in this table. The figures in table 3a are census universe totals and may differ from the annual survey of manufactures (ASM) sample estimates shown in this table. The figures in this table represent the best estimates of year-to-year change as measured by the continuing ASM sample. However, they are subject to sampling error and, hence, as estimates of level, are not as reliable as the universe figures shown in table 3a.

- Represents zero. (A) Indicates standard errors of 100 percent or more. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. (X) Not applicable. (Z) Less than 50 thousand dollars.

[1]For a description of the standard error of estimate, see the section "Qualifications of the Data" in appendix B. Figures in parentheses have standard errors of 15 percent or more.

[2]This is a measure of the extent to which respondents reported for each item. It is derived for each item by calculating the ratio of the weighted employment (establishment data multiplied by sample weight; see appendix B) for those sample establishments that reported the specific inquiry to the weighted total employment for all sample establishments classified in the industry.

[3]The standard errors for the detailed categories of new machinery and equipment expenditures were not directly calculated. However, the actual figure is not expected to exceed the estimated figure shown.

[4]This category represents the total machinery and equipment expenditures for establishments that did not break down their expenditures for the three specific categories.

This page is intentionally blank.

Covered by administrative records[2]....E0	8	.1	1.5	(Z)	.1	.4	2.5	.9	3.5	.1	.3

(D) Withheld to avoid disclosing operations of individual companies. Data for this item are included in figures in parentheses above. (NA) Not available. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown were estimated data based on administrative records data account for 10 percent or more of figures shown: E1--10 to 19 percent; E2--20 to 29 percent; E3--30 to 39 percent; E4--40 to 49 percent; E5--50 to 59 percent; E6--60 to 69 percent; E7--70 to 79 percent; E8--80 to 89 percent; E9--90 to 99 percent; E0--100 percent.

[2]Report forms were not mailed to small single-unit companies with up to 20 employees (cutoff varied by industry). Payroll and sales data for 1977 were obtained from administrative records supplied to other agencies of the Federal Government. These data were then used in conjunction with industry averages to estimate the balance of items shown. Data are also included in respective size classes shown.

Table 5a. Industry Statistics for Establishments by Industry and Primary Product Class Specialization: 1977

(Table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. Measures of plant specialization shown are (1) industry specialization: ratio of primary product shipments to total product shipments (primary plus secondary, excluding miscellaneous receipts) for the establishment; and (2) product class specialization: ratio of largest primary product class shipments to total product shipments (primary plus secondary; excluding miscellaneous receipts) for the establishment. See appendix for method of computing ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for various reasons; e.g., to avoid disclosing operations of individual companies. For explanation of terms, see appendix A)

Industry or product class code	Industry or product class by percent of specialization	All establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	New capital expenditures (million dollars)
			Number (1,000)	Payroll (million dollars)	Number (1,000)	Hours (millions)	Wages (million dollars)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified.
(S) Withheld because estimate did not meet publication standards. (X) Not collected. (Z) Less than 50 thousand dollars or hours; under 50 employees.

Table 5b. Industry-Product Analysis—Value of Shipments for an Industry and Primary Product Shipments, and Specialization and Coverage Ratios: 1977, 1972, and 1967

(An establishment is assigned to an industry based on shipment values of products representing largest amount considered primary to an industry. Frequently, establishment shipments comprise mixtures of products assigned to an industry (primary), those considered primary to other industries (secondary), and receipts for activities such as merchandising or contract work. Columns A-D show this product pattern for an industry, and column E shows primary product specialization ratio. Extent to which an industry's primary products are shipped by establishments classified in and out of an industry is shown in columns F-H and coverage ratio is shown in column I. For explanation of terms, see appendix A)

1977 product code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total (million dollars)	Primary products (million dollars)	Secondary products (million dollars)	Miscellaneous receipts (million dollars)	Primary product specialization ratio Col. B / Col. [1] Data not available because industry was created in 1972.

Table 5c. Industry-Product Analysis—Shipments by Product Class and Industry: 1977

(Millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6a) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Only those product groups that have at least $2 million in shipments from establishments classified in one of the industries included in this chapter are shown. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are made in industries not included in this chapter, the value of such shipments is shown in the "All other industries" column. The specified "All other industries" are listed at the end of the table if they account for more than $5 million of the products primary to this chapter. For explanation of terms, see appendix A)

Table 5c. Industry -Product Analysis—Shipments by Product Class and Industry: 1977—Con.

(Millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6a) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Only those product groups that have at least $2 million in shipments from establishments classified in one of the industries included in this chapter are shown. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are made in industries not included in this chapter, the value of such shipments is shown in the "All other industries" column. The specified "All other industries" are listed at the end of the table if they account for more than $5 million of the products primary to this chapter. For explanation of terms, see appendix A)

1977 product code	Industry, product class, and miscellaneous receipts	All industries	Aircraft (SIC 3721)	Aircraft engines and engine parts (SIC 3724)	Aircraft equipment, n.e.c. Footnotes are on next page.

Table 6a. **Products and Product Classes — Quantity and Value of Shipments by All Producers: 1977 and 1972** – Con.

Note: In 1977 Census of Manufactures, shipments data for establishments of small companies, typically those with less than 20 employees, were estimated from administrative records data rather than collected from respondents. These shipments figures (discussed in appendix A) are included in code ending with "002." In both 1977 and 1972 Censuses of Manufactures, products not completely identified on standard forms were coded to appropriate product class (5 digits) followed by "00," or in some cases to appropriate industry (4 digits) followed by "0 00."

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (X) Not collected. (NA) Not available. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

[1]Quantity and value reported by all producers of product, not just those with shipments of $100,000 or more.
[2]Comparable combined figure for personal and utility type and commercial transport type complete aircraft reported in Current Industrial Reports M37G, Complete Aircraft and Aircraft Engines, was $4,700.9 million in 1977 and $3,231.8 million in 1972.
[3]For 1977, product codes 37241 11, 37241 39, and 37241 00 were combined to avoid disclosing operations of individual companies.
[4]For 1977, number of turbo-jet and turbo-prop aircraft engines shipped was 2,081.
[5]For 1972, product codes 37281 94 and 37281 95 were included in product codes 37281 96 and 37281 97, respectively.
[6]Data on aircraft propellers are published annually in Current Industrial Reports MA-37E, Aircraft Propellers.
[7]For 1977, product codes 37612 31 and 37612 37 were combined to avoid disclosing operations of individual companies.
[8]For product codes 37692 11, 37692 13, 37692 21, 37692 23, 37692 31, and 37692 33, quantity data were collected but did not meet Bureau statistical standards and have been suppressed.

Table 6b. **Product Classes — Value of Shipments by All Producers by Geographic Area: 1977 and 1972**

(This table cannot be published due to the significant number of disclosures at the product class by State level)

Table 6c. Product Classes—Value Shipped by All Producers: 1963, 1967, 1972 to 1977

(Millions of dollars)

- Represents zero. (NA) Not available. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Figures are estimates derived from a representative sample of manufacturing establishments canvassed in annual survey of manufactures and, therefore, may differ from results that would be obtained from a complete canvass of all manufacturing establishments. Standard errors associated with estimates are published in annual survey of manufactures volumes for this period. Figures in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data. Thus, at individual product class level, estimates may be of limited reliability; however, they may be combined with other product class totals into broader aggregates which are of acceptable reliability.

Table 7. Materials Consumed by Kind: 1977 and 1972

(Includes quantity and cost of materials consumed or put into production by establishments classified only in this industry. For further explanation see appendix A, Cost of materials)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (S) Withheld because estimate did not meet publication standards. (X) Not collected. N.E.C. Not elsehwere classified. n.s.k. Not specified by kind. (Z) Less than $50,000 or less than half the unit of measure specified for quantities.

[1]For some establishments, data have been estimated from central unit values, which are based on quantity-cost relationships of reported data. The following symbols are used when percentage of each quantity figure estimated in this manner equals or exceeds 10 percent of published figure: * indicates 10 to 19 percent estimated, ** indicates 20 to 29 percent estimated. If 30 percent or more is estimated, figure is replaced by (S).

[2]For 1972, material codes 335770 and 339915 were included with materials code 970099.

[3]From 1972 Census of Manufactures Supplemental Inquiry: Consumption of Materials, Parts, Containers, and Supplies During 1972 (Form MA-131).

[4]Total cost of materials of establishments that did not report detailed materials data, including establishments that were not mailed a form.

[5]For 1972, material codes 335770, 339915, 285101, 366211, and 383241 were included with material code 970099.

[6]For 1972, material codes 335770, 339915, 366211, and 383241 were included with material code 970099.

[7]For 1972, material codes 339915, 285101, 366211, and 383241 were included with material code 970099.

[8]For 1972, material codes 335770, 339915, 336200, 285101, 366211, and 383241 were included with material code 970099.

Description of Industries 3

TABLES

INDUSTRY STATISTICS

1a. Historical Statistics: 1977 and Earlier Years 7
1b. Selected Operating Ratios: 1977 and Earlier Years 9
2. Geographic Area: 1977 and 1972 11
3a. Summary Statistics: 1977 14
3b. Supplemental Statistics Based on Sample Estimates: 1977 15
4. Employment Size of Establishment: 1977 17
5a. Industry and Primary Product Class Specialization: 1977 19

PRODUCT STATISTICS

5b. Industry-Product Analysis—Value of Shipments for an Industry and Primary Product Shipments, and Specialization and Coverage Ratios: 1977, 1972, and 1967 20
5c. Industry-Product Analysis—Shipments by Product Class and Industry: 1977 21
6a-1. Products and Product Classes—Quantity and Value of Work Done by All Producers: 1977 and 1972 23
6a-2. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1977 and 1972 24
6a-3. Products and Product Classes—Quantity and Value of Shipments of Railroad Equipment Shipped by Shops of Operating Railroads: 1977 and 1972 29
6b. Product Classes—Value of Shipments by All Producers by Geographic Area: 1977 and 1972 . . . 30
6c. Product Classes—Value Shipped by All Producers: 1963, 1967, 1972 to 1977 33

MATERIAL STATISTICS

7. Materials Consumed by Kind: 1977 and 1972 34

DESCRIPTION OF INDUSTRIES

SHIP AND BOAT BUILDING, RAILROAD AND MISCELLANEOUS TRANSPORTATION EQUIPMENT

This report shows 1977 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code	Title
3731	Ship Building and Repairing
3732	Boat Building and Repairing
3743	Railroad Equipment
3751	Motorcycles, Bicycles, and Parts
3792	Travel Trailers and Campers
3795	Tanks and Tank Components
3799	Transportation Equipment, N.E.C.

The industry statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments, but also their activities in the manufacture of secondary products as well as their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1a-5a) with product statistics (table 6a) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5b, which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

Small single-unit companies with up to 20 employees (the cutoff varied by industry), were excluded from the mail portion of the census. For these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated), data on payrolls and receipts were obtained from administrative records of other government agencies. The remaining statistics were developed from industry averages.

Establishment data were tabulated based on industry definitions contained in the 1972 Standard Industrial Classification Manual and its 1977 supplement.

INDUSTRY 3731, SHIP BUILDING AND REPAIRING

This industry comprises establishments primarily engaged in building and repairing all types of ships, barges, and lighters, whether propelled by sail or motor power or towed by other craft. This industry also includes the conversion and alteration of ships. Establishments primarily engaged in fabricating structural assemblies or components for ships, or subcontractors engaged in ship painting, joinery, carpentry work, electrical wiring installation, etc. are classified in other industries.

The total value of shipments for establishments classified in the Ship Building and Repairing industry amounted to $6,495 million in 1977, an increase of 98 percent from 1972. The value of shipments of products classified as primary to the industry was $6,270 million, an increase of 96 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were nonmilitary self-propelled ships, for which shipments increased 135 percent. The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $3,825 million in 1977, was 103 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 176.4 thousand employees, an increase of 22 percent from 1972. The leading States in employment were Virginia, Mississippi, Connecticut, and Louisiana, accounting for approximately 25 percent of the industry's 1977 employment. Data for Virginia, Mississippi, and Connecticut have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 1 percent of total value of shipments.

INDUSTRY 3732, BOAT BUILDING AND REPAIRING

This industry comprises establishments primarily engaged in building and repairing all types of boats. Establishments primarily engaged in cleaning and storing boats and in the rental of dock space, and yacht clubs are classified in nonmanufacturing industries. Establishments primarily engaged in the manufacture of rubber and nonrigid plastic boats are classified in major group 30.

The total value of shipments for establishments classified in the Boat Building and Repairing industry amounted to $1,823 million in 1977, an increase of 74 percent from 1972. The value of shipments of products classified as primary to the industry was $1,822 million, an increase of 77 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were inboard-outdrive motor boats, for which shipments increased 277 percent, and sailboats, for which shipments increased 140 percent. The change reflected a general

trend in the shipments of most of the products of the industry. Value added by manufacture, at $856 million in 1977, was 66 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 43.8 thousand employees, an increase of 8 percent from 1972. The leading States in employment were Florida, Texas, Washington, and California, accounting for approximately 45 percent of the industry's 1977 employment. Data for Washington have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 5 percent of total value of shipments.

INDUSTRY 3743, RAILROAD EQUIPMENT

This industry comprises establishments primarily engaged in building and rebuilding locomotives (including frames and parts not elsewhere classified) of any type or gage; and railroad, street, and rapid transit cars and car equipment for operation on rails for freight and passenger service. This industry also includes establishments primarily engaged in the manufacture of trackless trolley buses. Establishments primarily engaged in the manufacture of mining cars are classified in industry 3532. Repair shops owned and operated by railroads or local transit companies rebuilding or repairing locomotives or cars, or building new locomotives or cars for their own account, are classified in major groups 40 and 41.

The total value of shipments for establishments classified in the Railroad Equipment industry amounted to $4,278 million in 1977, an increase of 75 percent from 1972. The value of shipments of products classified as primary to the industry was $4,002 million, an increase of 75 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $1,883 million in 1977, was 69 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 56.3 thousand employees, an increase of 11 percent from 1972. The leading States in employment were Pennsylvania, Ohio, Indiana, and Illinois, accounting for approximately 70 percent of the industry's 1977 employment. Data for Indiana have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 1 percent of total value of shipments.

INDUSTRY 3751, MOTORCYCLES, BICYCLES, AND PARTS

This industry comprises establishments primarily engaged in the manufacture of motorcycles, bicycles, and similar equipment and parts. This industry also includes establishments primarily engaged in assembling motorcycles or bicycles from purchased parts. Establishments primarily engaged in the manufacture of children's vehicles, except bicycles, are classified in industry 3944, and those manufacturing golf carts and other similar personnel carriers in industry 3799.

The total value of shipments for establishments classified in the Motorcycles, Bicycles, and Parts industry amounted to $1,008 million in 1977, an increase of 53 percent from 1972. The value of shipments of products classified as primary to the industry was $847 million, an increase of 57 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were motorcycles, motorbikes, mopeds, motor scooters, and trail vehicles, for which shipments increased 155 percent. The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $370 million in 1977, was 17 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 15.6 thousand employees, a decrease of 11 percent from 1972. The leading States in employment were Tennessee, California, Illinois, and Pennsylvania, accounting for approximately 60 percent of the industry's 1977 employment. Data for Illinois and Pennsylvania have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 5 percent of total value of shipments.

INDUSTRY 3792, TRAVEL TRAILERS AND CAMPERS

This industry comprises establishments primarily engaged in the manufacture of travel trailers for attachment to passenger cars or other vehicles and pickup coaches (campers) or caps (covers) for mounting on pickup trucks. Establishments primarily engaged in the manufacture of mobile homes are classified in industry 2451.

The total value of shipments for establishments classified in the Travel Trailers and Campers industry amounted to $1,582 million in 1977, an increase of 18 percent from 1972. The value of shipments of products classified as primary to the industry was $1,478 million, an increase of 16 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were travel trailers greater than 25 feet in length, for which shipments increased 93 percent, and pickup cars, for which shipments increased 290 percent. The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $510 million in 1977, was 6 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 26.3 thousand employees, a decrease of 29 percent from 1972. The leading States in employment were Pennsylvania, Indiana, Michigan, and California, accounting for approximately 60 percent of the industry's 1977 employment. Data for Michigan have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 3 percent of total value of shipments.

INDUSTRY 3795, TANKS AND TANK COMPONENTS

This industry comprises establishments primarily engaged in the manufacture of complete tanks and other full-tracked military vehicles, and weapons carriers. Establishments primarily engaged in the manufacture of military vehicles other than tanks are classified in industry group 371, and tank engines in industry 3519.

The total value of shipments for establishments classified in the Tanks and Tank Components industry amounted to $934 million in 1977, an increase of 243 percent from 1972. The value of shipments of products classified as primary to the industry was $1,015 million, an increase of 256 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments. The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $438 million in 1977, was 292 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 12.4 thousand employees, an increase of 110 percent from 1972. The leading States in employment were Pennsylvania, Indiana, Michigan, and California, accounting for approximately 90 percent of the industry's 1977 employment. Data for Indiana, Michigan, and California have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 1 percent of total value of shipments.

INDUSTRY 3799, TRANSPORTATION EQUIPMENT, N.E.C.

This industry comprises establishments primarily engaged in the manufacture of transportation equipment, n.e.c., such as automobile trailers, snowmobiles, self-propelled golf carts and similar vehicles. Establishments primarily engaged in the manufacture of industrial trucks, tractors, trailers, and stackers are classified in industry 3537; and children's vehicles, except bicycles, in industry 3944.

The total value of shipments for establishments classified in the Transportation Equipment, N.E.C. industry amounted to $621 million in 1977, a decrease of 5 percent from 1972. The value of shipments of products classified as primary to the industry was $700 million, a decrease of 7 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were parts for miscellaneous transportation equipment which were misclassified in 1972, for which shipments decreased 50 percent, and snowmobiles and parts, for which shipments decreased 23 percent. The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $233 million in 1977, was 1 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry and 10.3 thousand employees, a decrease of 36 percent from 1972. The leading States in employment were Minnesota, California, Texas, and Georgia, accounting for approximately 45 percent of the industry's 1977 employment. Data for California, Texas, and Georgia have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 5 percent of total value of shipments.

Table 1a. Historical Statistics for the Industry: 1977 and Earlier Years

(For explanation of terms, see appendix A)

Year[1]	Companies[2] (no.)	All establishments		All employees		Production workers			Value added by manufacture (mil. dol.)	Cost of materials (mil. dol.)	Value of shipments (mil. dol.)	Expenditures and assets		End-of-year inventories (mil. dol.)	Ratios	
		Total (no.)	With 20 employees or more (no.)	Number (1,000)	Payroll (mil. dol.)	Number (1,000)	Hours (mil.)	Wages (mil. dol.)				New capital expenditures (mil. dol.)	Gross value of fixed assets (mil. dol.)		Specialization (percent)	Coverage (percent)

(D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. N.E.C. Not elsewhere classified.
r Revised. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]In annual survey of manufactures (ASM) years, data are estimates based on a representative sample of establishments canvassed annually and may differ from results of a complete canvass of all establishments. ASM publication shows percentage standard errors. Unless otherwise noted, for data prior to 1963, see 1963 Census of Manufactures, vol. II, table 1 of the Industry chapter.

[2]For the census, a company is defined as a business organization consisting of one establishment or more under common ownership or control.

[3]Industry was defined or redefined for 1972 Census of Manufactures, so data are available only for years shown.

[4]Data for 1967 and 1963 were derived from table 8, General Statistics for Establishments by Industry Specialization and Primary Product Class Specialization, in vol. II of the 1967 and 1963 Censuses of Manufactures. Separate data for other years are not available.

[5]Data either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data; thus these estimates may be of limited reliability.

[6]Estimate for new capital expenditures has associated standard error of 15 percent or more and may be of limited reliability. Estimates for other items are of acceptable reliability.

[7]Minimum percentage; exact percentage withheld to avoid disclosing operations of individual companies.

[8]Relationships are not meaningful because of predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

[9]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[10]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

Table 1b. Selected Operating Ratios for the Industry: 1977 and Earlier Years

(For explanation of terms, see appendix A)

Year	Payroll per employee (dollars)	Assets per employee (dollars)	Production workers as percent of total employment (percent)	Annual hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials as percent of value of shipments (percent)	Cost of materials and payroll as percent of value of shipments (percent)	Assets as percent of value of shipments (percent)	Value added per employee (dollars)	Payroll as percent of value added (percent)	Value added per production worker hour (dollars)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown for those States where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2]Statistics for some producing States are withheld to avoid disclosing figures for individual companies. However, for such States with 150 employees or more, number of establishments is shown and employment size range is indicated by one of the following symbols: AA—150 to 249 employees; BB—250 to 499 employees; CC—500 to 999 employees; EE—1,000 to 2,499 employees; FF—2,500 employees or more.

[3]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[4]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[5]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 3a. **Summary Statistics for the Industry: 1977**

[For explanation of terms, see appendix A]

Item	Unit of measure	Ship building and repairing (SIC 3731)	Boat building and repairing (SIC 3732)	Railroad equipment (SIC 3743)	Motorcycles, bicycles, and parts (SIC 3751)	Travel trailers and campers (SIC 3792)	Tanks and tank components (SIC 3795)	Transportation equipment, n.e.c. (SIC 3799)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Represents ratio of primary product shipments to total product shipments (primary and secondary, excluding miscellaneous receipts) for establishments classified in industry.

[2]Represents ratio of primary products shipped by establishments classified in industry to total shipments of such products by all manufacturing establishments, wherever classified.

[3]Relationships are not meaningful because of predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

[4]Minimum percentage; exact percentage withheld to avoid disclosing operations of individual companies.

[5]Data for value of shipments represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[6]Data for value of shipments represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[7]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 3b. Supplemental Industry Statistics Based on Sample Estimates: 1977

Depreciation charges during 1977	12.2	4	4.0	1	(10.5)	25
Buildings and other structures	3.4	4	0.7	1	(2.4)	26
Machinery and equipment	8.8	6	3.4	1	(8.1)	25

Note: Data for total new capital expenditures, new building expenditures, new machinery expenditures, and total used expenditures are shown in table 3a, as well as in this table. The figures in table 3a are census universe totals and may differ from the annual survey of manufactures (ASM) sample estimates shown in this table. The figures in this table represent the best estimates of year-to-year change as measured by the continuing ASM sample. However, they are subject to sampling error and, hence, as estimates of level, are not as reliable as the universe figures shown in table 3a.

- Represents zero. (A) Indicates standard errors of 100 percent or more. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. (X) Not applicable. (Z) Less than 50 thousand dollars.

[1]For a description of the standard error of estimate, see the section "Qualifications of the Data" in appendix B. Figures in parentheses have standard errors of 15 percent or more.

[2]This is a measure of the extent to which respondents reported for each item. It is derived for each item by calculating the ratio of the weighted employment (establishment data multiplied by sample weight; see appendix B) for those sample establishments that reported the specific inquiry to the weighted total employment for all sample establishments classified in the industry.

[3]The standard errors for the detailed categories of new machinery and equipment expenditures were not directly calculated. However, the actual figure is not expected to exceed the estimated figure shown.

[4]This category represents the total machinery and equipment expenditures for establishments that did not break down their expenditures for the three specific categories.

Table 4. Industry Statistics by Employment Size of Establishment: 1977

[For explanation of terms, see appendix A]

Industry and employment size class	E[1]	All establishments (no.) Covered by administrative records[2]	E0	185	0.6	5.6	0.5	0.8	3.4	11.6	18.1	29.8	0.5	5.4

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. Data for this item are included in figures in parentheses above. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2]Report forms were not mailed to small single-unit companies with up to 20 employees (cutoff varied by industry). Payroll and sales data for 1977 were obtained from administrative records supplied by other agencies of the Federal Government. These data were then used in conjunction with industry averages to estimate the balance of items shown. Data are also included in respective size classes shown.

[3]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[4]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[5]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 5a. Industry Statistics by Industry and Primary Product Class Specialization: 1977

[Table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. Measures of plant specialization shown are (1) industry specialization: ratio of primary product shipments to total product shipments (primary plus secondary, excluding miscellaneous receipts) for the establishment; and (2) product class specialization: ratio of largest primary product class shipments to total product shipments (primary plus secondary, excluding miscellaneous receipts) for the establishment. See appendix for method of computing ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for various reasons; e.g., to avoid disclosing operations of individual companies. For explanation of terms, see appendix A]

Industry or product class code	Industry or product class by percent of specialization	All establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	New capital expenditures (million dollars)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

Table 5b. Industry-Product Analysis — Value of Shipments for an Industry and Primary Product Shipments, and Specialization and Coverage Ratios: 1977, 1972, and 1967

(An establishment is assigned to an industry based on shipment values of products representing largest amount considered primary to an industry. Frequently, establishment shipments comprise mixtures of products assigned to an industry (primary), those considered primary to other industries (secondary), and receipts for activities such as merchandising or contract work. Columns A-D show this product pattern for an industry, and column E shows primary product specialization ratio. The extent to which an industry's primary products are shipped by establishments classified in and out of an industry is shown in columns F-H and coverage ratio is shown in column I. For explanation of terms, see appendix A)

1977 product code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total (million dollars)	Primary products (million dollars)	Secondary products (million dollars)	Miscellaneous receipts (million dollars)	Primary product specialization ratio Col. B / Col. B&C (percent)	Total made in all industries (million dollars)	Made in this industry (million dollars)	Made in other industries (million dollars)	Coverage ratio Col. B / Col. F (percent)
		A	B	C	D	E	F	G	H	I

(D) Withheld to avoid disclosing operations of individual companies. n.e.c. Not elsewhere classified.

[1]Establishments classified in industry 3731 report value of work done on ships rather than value of shipments. This applies only to ships and does not apply to secondary products.

[2]In 1972, industries 3751 and 3799 were redefined, significantly altering content. For 1967, comparable data were not available.

[3]In 1972, industry 3792 was established as a separate industry. For 1967, comparable data were not available.

Table 5c. Industry-Product Analysis — Shipments by Product Class and Industry: 1977

(Millions of dollars. Table shows where products of an industry (referred to as primary and listed in table 6a) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Only those product groups that have at least $2 million in shipments from establishments classified in one of industries included in this chapter are shown. Read across to determine where products of industries in this chapter are produced. To extent that some of primary products are made in industries not included in this chapter, value of such shipments is shown in "Other industries" column. Specified "Other industries" are listed at end of table if they account for more than $5 million of products primary to this chapter. For explanation of terms, see appendix A)

37310 02	Ship building and repairing, n.s.k., typically for establishments with 10 employees or more (see note)	.....	(NA)	(X)	45.4	(X)	4.7

Note: In 1977 Census of Manufactures, shipments data for establishments of small companies, typically those with less than 10 employees (cut-off varied by industry) were estimated from administrative records data rather than collected from respondents. These shipments figures (discussed in the Introduction) are included in code ending with "002." In both 1977 and 1972 Censuses of Manufactures, products not completely identified on standard forms were coded to appropriate product class (5 digits) followed by "00," or in some cases to appropriate industry (4 digits) followed by "0 00."

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards. (X) Not applicable.

[1]Quantity and value reported by all producers of product, not just those with shipments of $100,000 or more.

[2]For some establishments, data have been estimated from central unit values, which are based on quantity-value relationships of reported data. The following symbols are used when percentage of each quantity figure estimated equals or exceeds 10 percent of published figure: * indicates 10 to 19 percent estimated, ** indicates 20 to 29 percent estimated. If 30 percent or more is estimated, figure is replaced by (S).

[3]For 1977, data for product codes 37311 11 and 37311 81 were combined to avoid disclosing operations of individual companies.

Table 6a-2. Products and Product Classes — Quantity and Value of Shipments by All Producers: 1977 and 1972

(Includes quantity and value of products of this industry produced by (1) establishments classified in this industry (primary) and (2) establishments classified in other industries (secondary). Transfers of the products of this industry from one establishment of a company to another establishment of the same company (interplant transfers) are also included. For further explanation, see appendix A, Value of shipments)

37990 02	Transportation equipment, n.e.c., n.s.k., typically for establishments with less than 5 employees (see note)	.....	(NA)	(X)	29.8	(X)	9.1

Note: In 1977 Census of Manufactures, shipments data for establishments of small single-unit companies with up to 20 employees were estimated from administrative records data rather than data actually collected from respondents. Employment cutoff used for administrative records for each industry and shipments figures are included in code ending with "002." In both 1977 and 1972 Censuses of Manufactures, products not completely identified on standard forms were coded in appropriate product class (5 digits) followed by "00" or, in some cases, to appropriate product code (4 digits) followed by "0 00."

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards. (X) Not applicable.

Footnotes are continued on next page.

Table 6a-2. **Products and Product Classes—Quantity and Value of Shipments by All Producers: 1977 and 1972**—Con.

[1]Quantity and value reported by all producers of product, not just those with shipments of $100,000 or more.

[2]For some establishments, data have been estimated from central unit values, which are based on quantity-value relationships of reported data. The following symbols are used when percentage of each quantity figure estimated in this manner equals or exceeds 10 percent of published figure: *indicates 10 to 19 percent estimates, **indicates 20 to 29 percent estimated. If 30 percent or more is estimated, figure is replaced by (S).

[3]For 1977, data for product codes 37322 15 and 37322 51 were combined to avoid disclosing operations of individual companies.

[4]Data for product codes 37325 11, 37325 32, and 37325 33 were combined to avoid disclosing operations of individual companies.

[5]For 1972, data for product codes 37325 11 and 37325 00 were combined to avoid disclosing operations of individual companies.

[6]Excludes data for railroad equipment shipped by shops of operating railroads. (See table 6a-3).

[7]For 1977, data for product codes 37433 31 and 37433 69 were combined to avoid disclosing operations of individual companies.

[8]For 1972, data for product codes 37921 00 and 37922 00 were included with product code 37920 00.

[9]For 1972, data for product code 37922 59 was not collected separately; most of 1972 value of product shipments was probably included in Industry 3714, Motor Vehicle Parts and Accessories.

[10]For 1972, value also includes mobile homes not specified by kind. For 1977, data for mobile homes was collected in Industry 2451 Mobile Homes.

[11]For 1977, data for product code 37999 98 is not directly comparable with 1972, because some companies erroneously included parts for other transportation equipment in 1972.

Table 6a-3. **Products and Product Classes — Quantity and Value of Shipments of Railroad Equipment Shipped by Shops of Operating Railroads: 1977 and 1972**

1977 product code	Product	Unit of measure	1977				1972		
			Number of companies with shipments of $100,000 or more	Product shipments[1]			Product shipments		
				Quantity	Weight (thousand short tons)	Value[2] (million dollars)	Quantity	Weight (thousand short tons)	Value[2] (million dollars)
	RAILROAD EQUIPMENT								
3743- --	Total	.....	(NA)	(X)	(X)	272.9	(NA)	(X)	127.3

	Rebuilt passenger and freight train cars:								
37433 31	Passenger cars	Number	1	(D)	(D)	(4)	-	-	-
37433 51	Freight cars		4	583	82.9	7.5			
37433 61	Self-propelled street cars, subway cars, rapid transit, and trolley cars, new and rebuilt		-	-	-	-			
37433 62	Non-self-propelled street cars, subway cars, rapid transit, and trolley cars, new and rebuilt		-	-	-	-	52,927	(S)	539.8
37433 69	Other work and service vehicles, excluding locomotive cranes, new and rebuilt	Number	1	(D)	(D)	(4)			
	Parts and accessories for railroad and street cars:								
37433 71	Airbrake equipment	.....	3	(X)	(X)	(4)	(X)	(X)	-
37433 79	Other, except wheels and axles	.....	5	(X)	(X)	448.0	(X)	(X)	-
37433 00	Street, subway, trolley, and rapid transit cars, all rebuilt rail cars, and parts for all rail cars, n.s.k	.....	-	(X)	(X)	-	(X)	(X)	-
37430 00	Railroad equipment, n.s.k	.....	-	(X)	-	-	-	-	-

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.s.k Not specified by kind. (S) Withheld because estimate did not meet publication standards. (X) Not applicable.

[1]Quantity and value reported by all producers of product, not just those with shipments of $100,000 or more.

[2]For new equipment produced by railroads for their own use, value is that written into property accounts; for rebuilt equipment, value is added value written into property accounts.

[3]For 1977, product codes 37431 11, 37431 72, and 37431 79 were combined to avoid disclosing operations of individual companies.

[4]For 1977, product codes 37432 28, 37432 45, 37433 31, 37433 69, 37433 71, and 37433 79 were combined to avoid disclosing operations of individual companies.

[5]For 1972, product codes 37432 31, 37432 34, 37432 45, 37433 51, 37443 61, 37433 62, and 37433 69 were combined to avoid disclosing operations of individual companies.

Table 6b. Product Classes—Value of Shipments by All Producers by Geographic Area: 1977 and 1972

(Millions of dollars. Product classes covered are those that are economically significant and whose production is geographically dispersed, provided dispersion is not approximated by data in table 2. Also, product classes are not shown if they are miscellaneous or "not specified by type" classes. Statistics for some States are withheld because they are either less than $2 million in product class shipments or they disclose operations of individual companies in 1977)

37999	Transportation equipment and parts, n.e.c.	353.6	(500.6)	490.8	499.0	476.8	436.7	151.3	(NA)
37990	Transportation equipment, n.e.c., n.s.k.	81.4	(S)	(S)	(15.0)	66.0	59.5	33.7	(NA)

(D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards.

[1]Figures are estimates derived from a representative sample of manufacturing establishments canvassed in annual survey of manufactures and, therefore, may differ from results that would be obtained from a complete canvass of all manufacturing establishments. Standard errors associated with estimates are published in annual survey of manufactures volumes for this period. Figures in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data. Thus, at individual product class level, estimates may be of limited reliability; however, they may be combined with other product class totals into broader aggregates which are of acceptable reliability.

[2]For 1967 and 1963, golf carts, self-propelled, were included in industry 3751.

[3]For 1977 and 1972, industry 3792 products were equivalent to sum of 1967 product codes 37910 31 through 37910 41 and 37991 21.

[4]For 1977, product class 37921 products were equivalent to sum of 1967 product codes 37910 31, 37910 33, 37910 35, and part of 37991 21, where travel trailers less than 11 feet in length were reported. For 1972, they were equivalent to sum of 1972 product class 37921 and part of product code 37922 41, where travel trailers less than 11 feet in length were reported.

[5]For 1977, product class 37922 products are equivalent to sum of 1967 product code 37910 41 and part of 37991 21, where collapsible camping trailers were reported. For 1972, they were equivalent to 1972 product class 37922 less part of product code 37922 41, where travel trailers less than 11 feet in length were reported.

[6]For 1972 and prior years, includes n.s.k. for industry 2451.

[7]For 1977 and 1972, product class 37994 was equivalent to 1967 product code 37922 93.

339915	Metal powders	Million lb	(X)	(D)	(X)	[2]
970099	All other materials and components, parts, containers, and supplies		(X)	94.5	(X)	[2]132.8
971000	Materials, parts, containers, and supplies, n.s.k.[3]		(X)	75.9	(X)	60.7

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or less than half the unit of measure specified.

[1]For some establishments, data have been estimated from central unit values, which are based on quantity-value relationships of reported data. The following symbols are used when percentage of each quantity figure estimated in this manner equals or exceeds 10 percent of published figure: * indicates 10 to 29 percent estimated. ** indicates 20 to 29 percent estimated. If 30 percent or more is estimated, figure is replaced by (S).

[2]For 1972, material code was included with material code 970099.

[3]Total cost of materials of establishments that did not report detailed materials data, including establishments that were not mailed a form.

[4]From 1972 Census of Manufactures Supplemental Inquiry: Consumption of Materials, Parts, Containers, and Supplies During 1972 (Form MA-131).

[5]For 1972, material codes 335301 and 335008 were combined to avoid disclosing operations of individual companies.

DESCRIPTION OF INDUSTRIES

ENGINEERING, MEASURING AND CONTROLLING AND OPTICAL INSTRUMENTS

This report shows 1977 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code	Title
3811	Engineering and Scientific Instruments
3822	Environmental Controls
3823	Process Control Instruments
3824	Fluid Meters and Counting Devices
3825	Instruments to Measure Electricity
3829	Measuring and Controlling Devices, N.E.C.
3832	Optical Instruments and Lenses

The industry statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishments as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments, but also their activities in the manufacture of secondary products as well as their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1a-5a) with product statistics (table 6a) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5b, which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

Small single-unit companies with up to 20 employees (the cutoff varied by industry), were excluded from the mail portion of the census. For these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated), data on payrolls and receipts were obtained from administrative records of other government agencies. The remaining statistics were developed from industry averages.

Establishment data were tabulated based on industry definitions contained in the 1972 Standard Industrial Classification Manual and its 1977 supplement.

INDUSTRY 3811, ENGINEERING AND SCIENTIFIC INSTRUMENTS

This industry comprises establishments primarily engaged in the manufacture of laboratory, scientific, and engineering instruments such as nautical, navigational, aeronautical, surveying, and drafting; and instruments for laboratory work and scientific research (except optical instruments, in industry 3832). Establishments primarily engaged in the manufacture of surgical and medical instruments are classified in industry 38411; dental instruments and equipment in industry 3843; measuring, analyzing, and controlling instruments, including instruments for measuring electrical quantities and characteristics, in major industry group 382; watches and clocks in industry 3873; machinists' precision measuring tools in industry 3545; and measuring and dispensing pumps in industry 3586.

The total value of shipments for establishments classified in the Engineering and Scientific Instruments industry amounted to $1,927 million in 1977, an increase of 85 percent from 1972. The value of shipments of products classified as primary to the industry was $1,850 million, an increase of 67 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were laboratory and scientific apparatus, for which shipments increased 107 percent, and aeronautical, nautical, and navigational instruments, except aircraft instruments, excluding systems, for which shipments increased 40 percent. The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $1,287 million in 1977, was 89 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 42.3 thousand employees, an increase of 13 percent from 1972. The leading States in employment were California, New Jersey, Arizona, and Michigan, accounting for approximately 40 percent of the industry's 1977 employment. Data for Arizona have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided. This represents a shift from 1972 when California, New York, Michigan, and Illinois accounted for approximately 40 percent of the industry's employment.

The 1977 census obtained data on shipments of engineering and scientific instruments only at product class levels. This is the source of the data in table 6a described "As reported in census of manufactures." Detailed figures on the shipments of engineering and scientific instruments are reported annually in the Census Bureau's Current Industrial Reports (CIR) MA-38B, Selected Instruments and Related Products. Some of these data are also shown in table 6a.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 8 percent of total value of shipments.

INDUSTRY 3822, ENVIRONMENTAL CONTROLS

This industry comprises establishments primarily engaged in the

manufacture of temperature and related controls for heating and air-conditioning installations and refrigeration applications, which are electrically, electronically, or pneumatically actuated, and which measure and control variables such as temperature and humidity; and automatic regulators used as components of household applances. Establishments primarily engaged in the manufacture of industrial process controls are classified in industry 3823; motor control switches in Industry 3622, Industrial Controls; switches for household appliances in Industry 3643, Current-Carrying Wiring Devices; and appliances timers in Industry 3873, Watches, Clocks, and Watchcases.

The total value of shipments for establishments classified in the Environmental Controls industry amounted to $1,359 million in 1977, an increase of 87 percent from 1972. The value of shipments of products classified as primary to the industry was $1,106 million, an increase of 68 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $860 million in 1977, was 68 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 39.0 thousand employees, an increase of 27 percent from 1972. The leading States in employment were Ohio, Massachusetts, California, and Illinois, accounting for approximately 60 percent of the industry's 1977 employment.

The 1977 census obtained data on shipments of environmental controls only at product class levels. This is the source of the data in table 6a described "As reported in census of manufactures." Detailed figures on the shipments of environmental controls are reported annually in the Census Bureau's Current Industrial Reports (CIR) MA-38B, Selected Instruments and Related Products. Some of these data are also shown in table 6a.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 2 percent of total value of shipments.

INDUSTRY 3823, PROCESS CONTROL INSTRUMENTS

This industry comprises establishments primarily engaged in the manufacture of industrial instruments and related products for measuring, displaying (indicating and/or recording), transmitting, and controlling process variables in manufacturing, energy conversion, and public service utilities. These instruments operate mechanically, pneumatically, electronically, or electrically to measure process variables such as temperature, humidity, pressure, vacuum, combustion, flow, level, viscosity, density, acidity, alkalinity, specific gravity, gas and liquid concentration, sequence, time interval, mechanical motion, and rotation. Establishments primarily engaged in the manufacture of electrical integrating meters are classified in industry 3825; residential and commercial comfort controls in industry 3822; all liquid-in-glass and bimetal thermometers and glass hydrometers in industry 3829; recorder charts in major industry group 275; and optical instruments in industry 3832.

The total value of shipments for establishments classified in the Process Control Instruments industry amounted to $2,022 million in 1977, an increase of 123 percent from 1972. The value of shipments of products classified as primary to the industry was $2,061 million, an increase of 159 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $1,399 million in 1977, was 121 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 46.5 thousand employees, an increase of 20 percent from 1972. The leading States in employment were Pennsylvania, Massachusetts, California, and New York, accounting for approximately 60 percent of the industry's 1977 employment. This represents a shift from 1972 when Pennsylvania, Massachusetts, Illinois, and Ohio accounted for approximately 60 percent of the industry's employment.

The 1977 census obtained data on shipments of process control instruments only at product class levels. This is the source of the data in table 6a described "As reported in census of manufactures." Detailed figures on the shipments of process control instruments are reported annually in the Census Bureau's Current Industrial Reports (CIR) MA-38B, Selected Instruments and Related Products. Some of these data are also shown in table 6a.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 5 percent of total value of shipments.

INDUSTRY 3824, FLUID METERS AND COUNTING DEVICES

This industry comprises establishments primarily engaged in the manufacture of totalizing (registering) meters monitoring fluid flows, such as water meters and gas meters; and producers of mechanical and electromechanical counters and associated metering devices. Establishments primarily engaged in the manufacture of electricity integrating meters and electronic frequency counters are classified in industry 3825; and industrial process instruments in industry 3824.

The total value of shipments for establishments classified in the Fluid Meters and Counting Devices industry amounted to $650 million in 1977, an increase of 127 percent from 1972.

The value of shipments of products classified as primary to the industry was $634 million, an increase of 94 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were counting devices, for which shipments increased 201 percent. Value added by manufacture, at $429 million in 1977, was 137 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 15.9 thousand employees, an increase of 81 percent from 1972. The leading States in employment were Illinois, Pennsylvania, California, and Connecticut, accounting for approximately 65 percent of the industry's 1977 employment. This represents a shift from 1972 when Connecticut, Pennsylvania, Wisconsin, and California were in the forefront.

The 1977 census obtained data on shipments of fluid meters and counting devices only at product class levels. This is the source of the data in table 6a described "As reported in census of manufactures." Detailed figures on the shipments of fluid meters and counting devices are reported annually in the Census Bureau's Current Industrial Reports (CIR) MA-38B, Selected Instruments and Related Products. Some of these data are also shown in table 6a.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 2 percent of total value of shipments.

INDUSTRY 3825, INSTRUMENTS TO MEASURE ELECTRICITY

This industry comprises establishments primarily engaged in the manufacture of instruments for measuring the characteristics of electricity and electric signals, such as voltmeters, ammeters, wattmeters, watt-hour meters, demand meters, and equipment for testing the electric characteristics of electrical, radio, and communication circuits, and of internal combusion engines. Establishments primarily engaged in the manufacture of electronic checkout, monitoring, evaluating, and other electronic support equipment for electronic navigational, radar, sonar, and other communication systems are classified in Industry 3662, Radio and TV Communication Equipment.

The total value of shipments for establishments classified in the Instruments to Measure Electricity industry amounted to $2,761 million in 1977, an increase of 85 percent from 1972. The value of shipments of products classified as primary to the industry was $2,566 million, an increase of 93 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were equivalent to test electrical, radio, and communication circuits and motors, for which shipments increased 105 percent. The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $1,808 million in 1977, was 77 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 66.5 thousand employees, an increase of 26 percent from 1972. The leading States in employment were California, Oregon, Illinois, and Colorado, accounting for approximately 50 percent of the industry's 1977 employment. Data for Oregon and Colorado have been withheld to avoid disclosing operations of individual companies.

The 1977 census obtained data on shipments of instruments to measure electricity only at product class levels. This is the source of the data in table 6a described "As reported in census of manufactures." Detailed figures on the shipments of instruments to measure electricity are reported annually in the Census Bureau's Current Industrial Reports (CIR) MA-38B, Selected Instruments and Related Products. Some of these data are also shown in table 6a.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 7 percent of total value of shipments.

INDUSTRY 3829, MEASURING AND CONTROLLING DEVICES, N.E.C.

This industry comprises establishments primarily engaged in the manufacture of measuring and controlling devices, not elsewhere classified, including testing instruments to determine the physical properties of materials, nucelar instruments, aircraft engine instruments, and liquid-in-glass and bimetal thermometers. The total value of shipments for establishments classified in the Measuring and Controlling Devices, N.E.C. industry amounted to $1,118 million in 1977, an increase of 94 percent from 1972. The value of shipments of products classified as primary to the industry was $1,073 million, an increase of 83 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were physical properties and kinematic testing and inspection equipment, for which shipments increased 160 percent, and commercial, meteorological, and general purpose instruments, for which shipments increased 140 percent. The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $747 million in 1977, was 97 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 32.3 thousand employees, an increase of 50 percent from 1972. The leading States in

employment were California, Illinois, Pennsylvania, and Ohio, accounting for approximately 55 percent of the industry's 1977 employment.

The 1977 census obtained data on shipments of measuring and controlling devices, n.e.c. only at product class levels. This is the source of the data in table 6a described "As reported in census of manufactures." Detailed figures on the shipments of measuring and controlling devices, n.e.c. are reported annually in the Census Bureau's Current Industrial Reports (CIR) MA-38B, Selected Instruments and Related Products. Some of these data are also shown in table 6a.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 5 percent of total value of shipments.

INDUSTRY 3832, OPTICAL INSTRUMENTS AND LENSES

This industry comprises establishments primarily engaged in the manufacture of instruments that measure an optical property; apparatus, except photographic, that projects or magnifies, such as binoculars, prisms, and lenses; optical sighting and firecontrol equipment; and related analytical instruments. Establishments primarily engaged in the manufacture of eyeglass lenses, frames, or fittings are classified in Industry 3851, Ophthalmic Goods; laboratory testing and scientific instruments are classified in industry 3811; and electronic tracking and fire-control systems in industry 3662.

The total value of shipments for establishments classified in the Optical Instruments and Lenses industry amounted to $1,336 million in 1977, an increase of 151 percent from 1972. The value of shipments of products classified as primary to the industry was $1,300 million, an increase of 122 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were sighting, tracking, and fire-control equipment, for which shipments increased 174 percent. The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $902 million in 1977, was 135 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 30.2 thousand employees, an increase of 62 percent from 1972. The leading States in employment were California, Massachusetts, New York, and Connecticut, accounting for approximately 60 percent of the industry's 1977 employment. Data for Connecticut have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided. These same States were in the forefront for 1972, although there has been some shift in the relative importance of individual States.

The 1977 census obtained data on shipments of optical instruments and lenses only at product class levels. This is the source of the data in table 6a described "As reported in census of manufactures." Detailed figures on the shipments of optical instruments and lenses are reported annually in the Census Bureau's Current Industrial Reports (CIR) MA-38B, Selected Instruments and Related Products. Some of these data are also shown in table 6a.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 3 percent of total value of shipments.

Table 1a. Historical Statistics for the Industry: 1977 and Earlier Years

(For explanation of terms, see appendix A)

Year[1]	Companies[2] (no.)	All establishments: Total (no.)	All establishments: With 20 employees or more (no.)	All employees: Number (1,000)	All employees: Payroll (mil. dol.) - Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. N.E.C. Not elsewhere classified. [r]Revised. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]In annual survey of manufactures (ASM) years, data are estimates based on a representative sample of establishments canvassed annually and may differ from results of a complete canvass of all establishments. ASM publication shows percentage standard errors. Unless otherwise noted, for data prior to 1963, see 1963 Census of Manufactures, vol. II, table 1 of the industry chapter.

[2]For the census, a company is defined as a business organization consisting of one establishment or more under common ownership or control.

[3]Industry was defined or redefined for 1972 Census of Manufactures, so data are available only for years shown.

[4]Data for 1967 and 1963 were derived from Table 8, General Statistics for Establishments by Industry Specialization and Primary Product Class Specialization, in vol. II of the 1967 and 1963 Censuses of Manufactures. Separate data for other years are not available.

[5]Data either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data; thus these estimates may be of limited reliability.

[6]Estimate for new capital expenditures has associated standard error of 15 percent or more and may be of limited reliability. Estimates for other data items are of acceptable reliability.

[7]Minimum percentage; exact percentage withheld to avoid disclosing operations of individual companies.

[8]Relationships are not meaningful because of predominance of miscellaneous receipts particularly receipts for contract and commission work on materials owned by others.

[9]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[10]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

Table 1b. Selected Operating Ratios for the Industry: 1977 and Earlier Years

(For explanation of terms, see appendix A)

Year	Payroll per employee (dollars)	Assets per employee (dollars)	Production workers as percent of total employment (percent)	Annual hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials as percent of value of shipments (percent)	Cost of materials and payroll as percent of value of shipments (percent)	Assets as percent of value of shipments (percent)	Value added per employee (dollars)	Payroll as percent of value added (percent)	Value added per production worker hour (dollars)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown for those States where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2]Statistics for some producing States are withheld to avoid disclosing figures for individual companies. However, for such States with 150 employees or more, number of establishments is shown and employment size range is indicated by one of the following symbols: AA—150 to 249 employees; BB—250 to 499 employees; CC—500 to 999 employees; EE—1,000 to 2,499 employees; FF—2,500 employees or more.

[3]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[4]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[5]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 3a. Summary Statistics for the Industry: 1977

[For explanation of terms, see appendix A]

Item	Unit of measure	Engineering and scientific instruments (SIC 3811)	Environmental controls (SIC 3822)	Process control instruments (SIC 3823)	Fluid meters and counting devices (SIC 3824)	Instruments to measure electricity (SIC 3825)	Measuring and controlling devices, n.e.c. (SIC 3829)	Optical instruments and lenses (SIC 3832)
Primary product specialization ratio[1]	percent	85	80	90	80	90	89	84
Coverage ratio[2]	do	79	92	80	80	89	83	82
All establishments	number	786	201	426	111	671	670	546
With 1 to 19 employees	do	507	110	219	49	392	480	346
With 20 to 99 employees	do	203	50	129	27	159	156	134
With 100 employees or more	do	76	41	78	35	120	54	66
All employees, average for year	1,000	42.3	39.0	46.5	15.9	66.5	32.3	30.2

New machinery and equipment	do	43.7	36.7	37.2	15.0	70.3	34.5	33.0
Used capital expenditures	do	1.9	8.6	3.9	1.1	4.8	1.0	2.2

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Represents ratio of primary product shipments to total product shipments (primary and secondary, excluding miscellaneous receipts) for establishments classified in industry.

[2]Represents ratio of primary products shipped by establishments classified in industry to total shipments of such products by all manufacturing establishments, wherever classified.

[3]Relationships are not meaningful because of predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

[4]Minimum percentage; exact percentage withheld to avoid disclosing operations of individual companies.

[5]Data for value of shipments represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[6]Data for value of shipments represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[7]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 3b. Supplemental Industry Statistics Based on Sample Estimates: 1977

(For explanation of terms, see appendix A. For description of annual survey of manufactures (ASM), see appendix B)

Item	Engineering and scientific instruments (SIC 3811)		Environmental controls (SIC 3822)		Process control instruments (SIC 3823)		Fluid meters and counting devices (SIC 3824)	
	Amount (million dollars)	Standard error of estimate[1] (percent)	Amount (million dollars)	Standard error of estimate[1] (percent)	Amount (million dollars)	Standard error of estimate[1] (percent)	Amount (million dollars)	Standard error of estimate[1] (percent)

End of year	655.2	3	283.2	5	334.9	3
Depreciation charges during 1977	46.8	3	19.5	6	(24.8)	17
Buildings and other structures	11.0	4	4.0	7	5.7	8
Machinery and equipment	35.7	3	15.4	7	(19.1)	20

Note: Data for total new capital expenditures, new building expenditures, new machinery expenditures, and total used expenditures are shown in table 3a, as well as in this table. The figures in table 3a are census universe totals and may differ from the annual survey of manufactures (ASM) sample estimates shown in this table. The figures in this table represent the best estimates of year-to-year change as measured by the continuing ASM sample. However, they are subject to sampling error and, hence, as estimates of level, are not as reliable as the universe figures shown in table 3a.

- Represents zero. (A) Indicates standard errors of 100 percent or more. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. (X) Not applicable. (Z) Less than 50 thousand dollars.

[1]For a description of the standard error of estimate, see the section "Qualifications of the Data" in appendix B. Figures in parentheses have standard errors of 15 percent or more.

[2]This is a measure of the extent to which respondents reported for each item. It is derived for each item by calculating the ratio of the weighted employment (establishment data multiplied by sample weight; see appendix B) for those sample establishments that reported the specific inquiry to the weighted total employment for all sample establishments classified in the industry.

[3]The standard errors for the detailed categories of new machinery and equipment expenditures were not directly calculated. However, the actual figure is not expected to exceed the estimated figure shown.

[4]This category represents the total machinery and equipment expenditures for establishments that did not break down their expenditures for the three specific categories.

Table 4. Industry Statistics by Employment Size of Establishment: 1977

[For explanation of terms, see appendix A]

Industry and employment size class	E[1]	All establishments (no.) - Represents zero. (D) Withheld to avoid disclosing operations of individual companies. Data for this item are included in figures in parentheses above. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2]Report forms were not mailed to small single-unit companies with up to 20 employees (cutoff varied by industry). Payroll and sales data for 1977 were obtained from administrative records supplied by other agencies of the Federal Government. These data were then used in conjunction with industry averages to estimate the balance of items shown. Data are also included in respective size classes shown.

[3]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[4]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[5]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 5a. Industry Statistics by Industry and Primary Product Class Specialization: 1977

[Table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. Measures of plant specialization shown are (1) industry specialization: ratio of primary product shipments to total product shipments (primary plus secondary, excluding miscellaneous receipts) for the establishment; and (2) product class specialization: ratio of largest primary product class shipments to total product shipments (primary plus secondary, excluding miscellaneous receipts) for the establishment. See appendix for method of computing ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for various reasons; e.g., to avoid disclosing operations of individual companies. For explanation of terms, see appendix A]

Industry or product class code	Industry or product class by percent of specialization	All establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	New capital expenditures (million dollars)
			Number (1,000)	Payroll (million dollars)	Number (1,000)	Hours (millions)	Wages (million dollars)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[2]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

Table 5b. Industry-Product Analysis — Value of Shipments for an Industry and Primary Product Shipments, and Specialization and Coverage Ratios: 1977, 1972, and 1967

(An establishment is assigned to an industry based on shipment values of products representing largest amount considered primary to an industry. Frequently, establishment shipments comprise mixtures of products assigned to an industry (primary), those considered primary to other industries (secondary), and receipts for activities such as merchandising or contract work. Columns A-D show this product pattern for an industry, and column E shows primary product specialization ratio. The extent to which an industry's primary products are shipped by establishments classified in and out of an industry is shown in columns F-H and coverage ratio is shown in column I. For explanation of terms, see appendix A)

1977 product code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total (million dollars)	Primary products (million dollars)	Secondary products (million dollars)	Miscellaneous receipts (million dollars)	Primary product specialization ratio Col. B / Col. n.e.c. Not elsewhere classified.
[1]Industries 3823, 3825, and 3829 were established as seperate industries in 1972. Data for 1967 are not available.

Table 5c. Industry-Product Analysis — Shipments by Product Class and Industry: 1977

(Millions of dollars. Table shows where products of an industry (referred to as primary and listed in table 6a) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Only those product groups that have at least $2 million in shipments from establishments classified in one of industries included in this chapter are shown. Read across to determine where products of industries in this chapter are produced. To extent that some of primary products are made in industries not included in this chapter, value of such shipments is shown in "Other industries" column. Specified "Other industries" are listed at end of table if they account for more than $5 million of products primary to this chapter. For explanation of terms, see appendix A)

1977 product code	Product	Unit of measure	1977			1972	
			Number of companies with shipments of $100,000 or more	Product shipments[1]		Product shipments	
				Quantity[2]	Value (million dollars)	Quantity	Value (million dollars)
3823- --	PROCESS CONTROL INSTRUMENTS--Con.						
38230 --	Industrial instruments for measurement, display, and control of process variables--Con. As reported in Current Industrial Reports MA-38B, Selected Instruments and Related Products--Con. Temperature instruments, excluding receiver-type instruments--Con. Electrical and electronic measuring types (thermocouple, resistance temperature detector, radiation, optical, thermistor, and other electrical sensors)--Con.						
38230 47	Electromechanical self-balancing types (electric or pneumatic controllers for all types of electrical temperature sensors)	Thousands	9	[3]31.8	[4]14.9	(S)	14.3
38230 48	Electromechanical self-balancing types (indicators, recorders, and integrators for all types of electrical temperature sensors)		30	17.5	27.0	10.0	9.8
38230 49	Electronic controllers for all types of electrical temperature sensors		17	151.3	21.7	(S)	10.1
38230 50	Digital types for all types of electrical temperature sensors, excluding data loggers		23	[3]31.1	18.5	2.3	2.3
38230 51	Transmitters, producing standardized electric or pneumatic analog transmission signals for all types of electrical temperature sensors		14	[4]26.5	8.8	7.8	2.9
	Mechanical measuring types: Filled system (liquid filled, vapor pressure, gas filled, and mercury filled types):						
38230 52	Indicating or recording controllers		13	196.8	27.7	119.6	13.9
38230 53	Recorders, noncontrol		22	44.7	5.8	10.7	2.9
38230 56	Indicators only, excluding indoor-outdoor and other household or appliance type thermometers		24	[3]807.2	18.1	(X)	20.8
38230 57	Transmitters producing standardized electric or pneumatic analog transmission signals		10	9.1	4.6	(X)	2.7
	Primary temperature sensor, excluding aircraft types:						
38230 59	Thermocouples and thermocouple lead wire		41	(X)	72.3	(X)	21.0
38230 60	All other types (resistance temperature detectors, radiation and optical sensors, thermistors, etc.)		27	(X)	24.4	(X)	14.6
	Pressure (gauge, absolute, vacuum) and draft instruments connected to the process, excluding receiver-type instruments and receiver-type gauge:						
38230 61	Indicating or recording controllers		24	2,267.7	33.8	51.7	9.7
38230 62	Recorders, noncontrol		15	[3]13.8	2.7	6.5	1.5
	Indicators only, excluding receiver-type gauges:						
38230 20	3-inch diameter and over		17	12,966.0	71.2	14,413.4	59.4
38230 21	Under 3-inch diameter		3				
	Transmitters producing standardized analog transmission signals:						
38230 24	Electronic analog transmission signals		17	[3]35.3	26.2	28.8	10.5
38230 25	Pneumatic analog transmission signals		9	19.7	8.5		
	Flow and liquid level instruments connected to the process:						
	Differential pressure types:						
38230 65	Indicating or recording controllers		13	106.8	10.1	8.9	5.0
38230 66	Recorders (noncontrol), and indicators (noncontrol)		17	[3]114.0	27.8	36.4	11.4
	Transmitters producing standardized analog transmission signals:						
38230 27	Electronic analog transmission signals		17	[3]84.6	65.7	55.8	23.0
38230 28	Pneumatic analog transmission signals		9				
38230 29	Primary pressure sensors (load cells, strain gauges, etc.)		3	[4]90.1	[4]18.9	([4])	([4])
38230 68	Primary flow elements, including orifice plates, venturi tubes, flow nozzles, pitot tubes, etc		14			(S)	7.3
	Electromagnetic, capacitance, ultrasonic, and other electronic types: Electromagnetic:						
38230 01	Controlling, recording, indicating, and transmitting instruments		13	42.3	22.9	29.4	19.6
38230 03	Primary flow elements		6	17.3	21.1		
38230 04	Capacitance, ultrasonic, and other electronic types, including magnetic resonance, vortex-precession, and vortex-shedding type elements		6	5.0	3.6		
38230 71	Variable area-controlling (recording, indicating and transmitting instruments, and associated primary flow elements)		12	[4]279.9	36.1	164.3	21.1
38230 72	Float and displacement (controlling, recording, indicating and transmitting instruments, and associated primary flow elements)	Thousands	20	[3]246.1	34.6	210.2	14.3

See footnotes at end of table.

Table 6a. **Products and Product Classes — Quantity and Value of Shipments by All Producers: 1977 and 1972**—Con.

(Includes quantity and value of products of this industry produced by (1) establishments classified in this industry (primary) and (2) establishments classified in other industries (secondary). Transfers of the products of this industry from one establishment of a company to another establishment of the same company (interplant transfers) are also included. 38240 02	Fluid meters and counting devices, n.s.k., typically for establishments with less than 5 employees (see note)	.....	(NA)	(X)	12.1	(X)	-

See footnotes at end of table.

Table 6a. **Products and Product Classes — Quantity and Value of Shipments by All Producers: 1977 and 1972** – Con.

(Includes quantity and value of products of this industry produced by (1) establishments classified in this industry (primary) and (2) establishments classified in other industries (secondary). Transfers of the products of this industry from one establishment of a company to another establishment of the same company (interplant transfers) are also included. For further explanation, see appendix A, Value of shipments)

1977 product code	Product	Unit of measure	1977			1972	
			Number of companies	Product shipments[1]		Product shipments	
				Quantity	Value (million dollars)	Quantity	Value (million dollars)
	INSTRUMENTS TO MEASURE ELECTRICITY						
3825- --	Total		(NA)	(X)	2,566.2	(X)	1,329.7
38251 --	Integrating instruments, electrical:						
	As reported in census of manufactures		28	(X)	223.5	(X)	169.5
	As reported in Current Industrial Reports MA-38B, Selected Instruments and Related Products		(X)	(X)	215.8	(X)	156.7
	A.c. watt hour meters:						
	Single phase:						
38251 10	Detachable types	Millions	4	[3]3,781.1	77.1	4,710.1	67.3
38251 11	A-base types		3				
38251 14	Switchboard types		1				
38251 15	Polyphase		5	287.1	24.1	329.5	14.9
38251 35	Demand meters (kW and kVA), combined watt-hour and demand meters (single phase and polyphase), and combined watt-hour and time switch meters	Millions	5	325.9	50.5	347.2	32.5
38251 51	Other electrical integrating meters, including d.c. watt-hour meters, ampere-hour meters, and other miscellaneous integrating instruments, n.e.c.		9	(X)	[3]11.4	(X)	42.0
38251 61	Parts for electric integrating meters, including meter mountings, registers, and test equipment, sold separately		8	(X)	42.1		
38251 00	Electrical integrating instruments, n.s.k.		3	(X)	10.5	(X)	-
38252 --	Equipment to test electrical, radio, and communication circuits and motors:						
	As reported in census of manufactures		253	(X)	1,784.9	(X)	869.0
	As reported in Current Industrial Reports MA-38B, Selected Instruments and Related Products		(X)	(X)	1,706.0	(X)	830.4
	Voltage, current, and resistance measuring equipment, except multimeters:						
	Electronic:						
38252 20	Digital		16	(X)	9.1	(X)	29.1
38252 21	Analog		34	(X)	85.2	(X)	20.3
38252 22	Electrical (service-type), except panel meters		16	(X)	14.5	(X)	7.3
	Multimeters:						
	Electronic:						
38252 28	Digital		14	(X)	42.9	(X)	21.2
38252 29	Analog		8				
38252 30	Electrical		7		19.7		
	Power and energy measuring equipment:						
	Electronic:						
38252 25	Analog		13	(X)	6.0	(X)	9.2
38252 26	Digital		2				
38252 27	Electrical		3		3.1		
	Frequency measuring equipment:						
	Electronic:						
38252 67	890 megacycles and over		6	[4]108.4	[3]56.1	(X)	33.4
38252 68	Other		14				
38252 69	Electrical and mechanical	Millions	3			95.5	3.7
	Waveform measuring and/or analyzing equipment:						
	Oscilloscopes and plug-in accessories:						
38252 12	Under 10 megacycles		15	(X)	294.6	(X)	130.0
38252 13	10 megacycles and over		8				
38252 14	Oscillographs (low frequency)		1				
38252 16	Other waveform measuring and analyzing equipment		21				
	Signal generating equipment:						
38252 56	Audio		18	(X)	10.8	(X)	14.8
38253 58	RF (over 20 kilocycles to 889 megacycles)		25	(X)	60.8	(X)	27.4
38252 59	Microwave (890 megacycles and over)		11	(X)	14.2	(X)	21.7
	Field strength and intensity measuring equipment, including RFI measuring equipment:						
38252 91	Electronic		12	(X)	[3]59.0	(X)	20.1
38252 92	Electrical field measuring equipment		2				
	Impedance and standing wave ratio measuring equipment (transfer function measuring equipment):						
38252 93	Electronic impedance and related measuring equipment		5	(X)	5.5	(X)	5.7
38252 94	Standing wave measuring equipment (slotted lines, sliding shorts, reflectometers, and other SWR equipment)		8	(X)	11.8	(X)	3.6
38252 96	Electronic time measuring and counting equipment (electronic chronoscopes and chronometers, range calibrators, time interval measuring equipment)		13	(X)	30.3	(X)	27.0
38252 97	Electronic X-Y plotters (recorders)		8	(X)	69.3	(X)	18.8

See footnotes at end of table.

38252 39	Analyzers for testing characteristics of internal combustion engines		23	(X)	151.7	(X)	92.1
38252 82	Associated devices for electronic and electrical test and measuring equipment		32	(X)	37.0	(X)	18.0
38252 98	Other test measuring and analyzing equipment for electronic and electrical circuits and equipment		74	(X)	286.1	(X)	145.1
38253 --	Instruments to measure electricity, n.e.c.:						
	As reported in census of manufactures		154	(X)	429.9	(X)	223.4
	As reported in Current Industrial Reports MA-38B, Selected Instruments and Related Products		(X)	(X)	399.8	(X)	200.4
38253 08	Digital panel meters (DPM) between 0.05 percent and 1 percent plus-or-minus 1-digit accuracy, excluding precision DVM's and electronic counters	Millions	24	[3]339.6	25.6	(S)	3.7
38253 10	Analog solid state panel meters (generally of plus-or-minus 2 percent accuracy) with LED, LDC, or neon gas discharge display		2			(S)	(1)
	Panel types other than ruggedized or sealed (generally of 2 percent accuracy):						
38253 12	A.c., including moving iron vane and dynamometer types.		14	[3]688.1	10.3	(S)	6.6
38253 13	D.c., including rectifier and self-contained thermocouple types		16	[4]3,522.7	42.1	2,831.8	29.0
38253 11	Panel types ruggedized or sealed (generally of 2 percent accuracy)		15	[5]628.4	11.3	(S)	7.2
	Panel types with control or signal initiating means, including instrument relays:						
38253 16	Indicating		11	226.5	8.9	145.8	4.9
38253 17	Nonindicating		3				
38253 19	All other panel type instruments, including ammeters and voltmeters for motor vehicles		19	[3]10,503.5	[3]40.6	(S)	[1]11.8
	Switchboard instruments (generally of 1 percent accuracy):						
38253 23	A.c., including moving iron vane and dynamometer types		6	55.8	7.1	(S)	10.1
38253 25	D.c., including rectifier and thermocouple types		7	[3]52.5	7.0		
38253 27	Elapsed time meter (with and without reset)		9	[4]1,163.1	15.3	(S)	5.9
	Portable instruments (generally capable of accuracies within plus-or-minus 2 percent full scale indications), which can be cased for moving and using at various locations, and which are an end product:						
38253 29	Portable types, accuracy rating 0.11 percent thru 0.50 percent		5	9.0	2.1	(S)	5.1
38253 30	Portable types, accuracy rating 0.51 percent thru 2 percent		13	[3]70.6	4.9	(S)	3.0
38253 35	Laboratory portable instruments with accuracies within plus-or-minus 1 percent up to 1/10 percent of full scale and better (all case sizes)		5				
38253 37	Volt-ohm millimeter (VOM), accuracy 0.10 percent thru 5 percent	Millions	1	[3]45.0	3.4		
38253 45	Other electrical indicating instruments, except self-balancing types		7	(X)	5.6	(S)	6.1
	Electrical recording instruments (portable and panel mounting), excluding potentiometer and bridge self-balancing types:						
38253 50	Direct deflecting (direct acting, except temperature calibrated instruments), excluding oscillographic types.		7	334.2	17.2	35.4	10.1
	Oscillographic recorders:						
38253 63	Pen or stylus type	Millions	11	57.7	90.5	11.1	27.2
38253 65	Light beam type	Millions	3			4.5	13.0
38253 72	Other electrical recording instruments		26	(X)	77.2	(X)	40.8

See footnotes at end of table.

38325---	Optical instruments, components, and lenses, except opthalmic--Con.						
	As reported in Current Industrial Reports MA-38B, Selected Instruments and Related Products--Con.						
38325 20	Optical components, including mirrors, filters, gratings, coatings, movements, reflectors, reticles, prisms, monochrometers, light amplifiers, Kerr cells, etc., excluding lenses		55	(X)	86.5		
	Lenses, except ophthalmic focus lenses:						
38325 21	Unmounted lenses		20	(X)	7.9	(X)	155.4
	Mounted lenses:						
38325 22	Photographic lenses		12	(X)	8.1		
38325 23	Other mounted lenses		10				
38325 25	Other optical instruments, excluding analytical instruments listed above and sighting and fire-control equipment		43	(X)	148.0		
38325 00	Optical instruments, components, and lenses, except ophthalmic, n.s.k.		3	(X)	12.2	(X)	-
38326 --	Analytical and scientific instruments, except optical:						
	As reported in census of manufactures		133	(X)	604.5	(X)	(NA)
	As reported in Current Industrial Reports MA-38B, Selected Instruments and Related Products		(NA)	(X)	588.7	(X)	216.4
38326 01	pH electrodes and meters		15	(X)	15.3	(X)	6.8
38326 03	Ion selective electrodes and meters		6	(X)	4.4		
38326 04	Electrophoresis chambers and supplies		15	(X)	20.1	(X)	11.4
38326 05	Other, except process type, including polarographic, redox, titraters, etc		16	(X)	8.7	(X)	2.0
	Chromatographic instruments:						
38326 07	Gas	Number	12	[4]24,353	91.2	(X)	53.6
38326 08	Other, including liquid, paper, and gel		13	[4]11,503	53.2		
38326 10	Spectographs		7	[4]1,521	19.9	(X)	8.1
	Spectographic instruments:						
38326 12	Atomic absorption and flame emission		5	[3]5,545	58.3	(X)	28.4
38326 13	Infrared		8				
38326 14	Ultraviolet/visible		15	[3]26,364	48.6	(X)	24.5
38326 15	Fluoresence instruments		5	[5]2,192	9.0	(X)	4.1
38326 16	Densitometers, reflection and glass meters	Number	9	[3]3,642	25.6	(X)	4.9
38326 17	Other, including near UV visible and colorimeters		14	(X)	20.8	(X)	10.7
38326 19	Thermal analysis instruments; TGA, DTA, QTA, etc		7	(X)	20.2	(X)	17.7
38326 20	Nuclear magnetic resonance instruments	Number	1				
38326 21	Microscopes, electron and proton	Number	6	[4]274	14.6		
38326 23	Mass spectroscopy instrumentation		11	(X)	39.4	(X)	6.5
	Automatic chemical analyzers:						
38326 25	Multi-purpose	Number	2	[5]1,626	44.5	(X)	16.7
38326 27	Special purpose	Number	6				
38326 28	Other analytic instruments including CHNOS, particle analyzers, osmometers, amino acid and protein analyzers, etc		37	(X)	95.0	(X)	21.0
38320 00	Optical instruments and lenses, n.s.k., typically for establishments with 5 employees or more (see note)		(NA)	(X)	53.9	(X)	40.6
38320 02	Optical instruments and lenses, n.s.k., typically for establishment with less than 5 employees (see note)		(NA)	(X)	23.9	(X)	16.6

Note: In 1977 Census of Manufactures, shipments data for establishments of small single-unit companies with up to 20 employees were estimated from administrative records data rather than data actually collected from respondents. Employment cutoff used for administrative records for each industry and shipments figures are included in code ending with "002." In both 1977 and 1972 Censuses of Manufactures, products not completely identified on standard forms were coded in appropriate product class (5 digits) followed by "00", or, in some cases, to appropriate product group code (4 digits) followed by "0 00."

- Represents zero. (NA) Not available. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards. (X) Not applicable.

[1]Quantity and value reported by all producers of product, not just those with shipments of $100,000 or more.

[2]For 1977, content of products in product class 3811 were revised to exclude navigational systems, which was moved to industry 3662.

[3]10 to 25 percent estimated.

[4]26 to 50 percent estimated.

[5]Over 50 percent estimated.

[6]Data for product codes 33220 50, 38220 55, and 38220 65 were combined to avoid disclosing operations of individual companies.

[7]For 1972, product codes 38230 29, 38230 09, 38230 10, 38230 12, 38230 14, 38230 15, 38230 16, and 38230 18 were combined to avoid disclosing operations of individual companies.

Table 6b. Product Classes — Value of Shipments by All Producers by Geographic Area: 1977 and 1972

(Millions of dollars. Product classes covered are those that are economically significant and whose production is geographically dispersed, provided dispersion is not approximated by data in table 2. Also, product classes are not shown if they are miscellaneous or "not specified by type" classes. Statistics for some States are withheld because they are either less than $2 million in product class shipments or they disclose operations of individual companies in 1977)

(NA) Not available. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards.

[1]Figures are estimates derived from a representative sample of manufacturing establishments canvassed in annual survey of manufactures and, therefore, may differ from results that would be obtained from a complete canvass of all manufacturing establishments. Standard errors associated with estimates are published in annual survey of manufactures volumes for this period. Figures in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data. Thus, at individual product class level, estimates may be of limited reliability; however, they may be combined with other product class totals into broader aggregates which are of acceptable reliability.

Table 7. Materials Consumed by Kind: 1977 and 1972

(Includes quantity and cost of materials consumed or put into production by establishments classified only in this industry. For further explanation, see appendix A, Cost of materials)

1977 material code	Material	Unit of measure	1977 Quantity[1]	1977 Delivered cost (million dollars)	1972 Quantity	1972 Delivered cost (million dollars)

282104	Plastics resins consumed in the form of granules, pellets, powders, liquids, etc., but excluding sheets, rods, tubes, and shapes	Million lb.....	(S)	4.5	(X)	[3]
333903	Precious metals, all forms, including ingot, sheet, strip, solder, plating, electrodes, etc	Million lb.....	(S)	6.2	(X)	[3]
970099	All other materials and components, parts, containers, and supplies	.....	(X)	205.9	(X)	[3]94.1
971000	Materials, parts, containers, and supplies, n.s.k.[4]	.....	(X)	65.8	(X)	34.2

(D) Withheld to avoid disclosing operations of individual companies. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or less than half the unit of measure specified.

[1]For some establishments, data have been estimated from central unit values, which are based on quantity-cost relationships of reported data. The following symbols are used when percentage of each quantity figure estimated in this manner equals or exceeds 10 percent of published figure: * indicates 10 to 19 percent estimated, ** indicates 20 to 29 percent estimated. If 30 percent or more is estimated, figure is replaced by (S).

[2]From 1972 Census of Manufactures Supplemental Inquiry: Consumption of Materials, Parts, Containers, and Supplies During 1972 (Form MA-131).

[3]For 1972 these materials were included with material code 970099.

[4]Total cost of materials of establishments that did not report detailed materials data, including establishments that were not mailed a form.

[5]For 1977, material codes 331013, 331017, and 331019 were combined to avoid disclosing operations of individual companies.

[6]For 1972, material codes 331015 and 331019 were combined to avoid disclosing operations of individual companies.

Medical Instruments; Ophthalmic Goods; Photographic Equipment; Clocks, Watches, and Watchcases

DESCRIPTION OF INDUSTRIES

MEDICAL INSTRUMENTS; OPHTHALMIC GOODS; PHOTOGRAPHIC EQUIPMENT; CLOCKS, WATCHES, AND WATCHCASES

This report shows 1977 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code	Title
3841	Surgical and Medical Instruments
3842	Surgical Appliances and Supplies
3843	Dental Equipment and Supplies
3851	Ophthalmic Goods
3861	Photographic Equipment and Supplies
3873	Watches, Clocks, and Watchcases

The industry statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments, but also their activities in the manufacture of secondary products as well as their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1a-5a) with product statistics (table 6a) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5b, which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

Small single-unit companies with up to 20 employees (the cutoff varied by industry), were excluded from the mail portion of the census. For these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated), data on payrolls and receipts were obtained from administrative records of other government agencies. The remaining statistics were developed from industry averages.

Establishment data were tabulated based on industry definitions contained in the 1972 Standard Industrial Classification Manual and its 1977 Supplement.

INDUSTRY 3841, SURGICAL AND MEDICAL INSTRUMENTS

This industry comprises establishments primarily engaged in the manufacture of medical, surgical, ophthalmic, and veterinary instruments and apparatus. Establishments primarily engaged in the manufacture of surgical and orthopedic appliances are classified in industry 3842, and electrotherapeutic, electromedical, and X-ray apparatus in industry 3693.

The total value of shipments for establishments classified in the Surgical and Medical Instruments industry amounted to $1,829 million in 1977, an increase of 90 percent from 1972. The value of shipments of products classified as primary to the industry was $1,891 million, an increase of 92 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were surgical instruments, including suture needles, and eye, ear, nose, and throat instruments, for which shipments increased 180 percent, and hypodermic needles, for which shipments increased 108 percent. Value added by manufacture, at $1,212 million in 1977, was 92 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 43.2 thousand employees, an increase of 25 percent from 1972. The leading States in employment were Utah, California, New York, and Pennsylvania, accounting for approximately 50 percent of the industry's 1977 employment. Data for Utah have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided. There has been some shift in the relative importance of individual States from 1972 when New York, New Jersey, and California were in the forefront of the industry's employment.

The establishments in this industry with less than 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 5 percent of total value of shipments.

INDUSTRY 3842, SURGICAL APPLIANCES AND SUPPLIES

This industry comprises establishments primarily engaged in the manufacture of orthopedic, prosthetic, and surgical appliances and supplies; arch supports and other foot appliances; fracture appliances, elastic hosiery, abdominal supporters, braces, and trusses; bandages; surgical gauze and dressings; sutures; adhesive tapes and medicated plasters; and personal safety appliances and equipment. Establishments primarily engaged in the manufacture of surgical and medical instruments are classified in industry 3841.

The total value of shipments for establishments classified in the Surgical Appliances and Supplies industry amounted to $2,588 million in 1977, an increase of 77 percent from 1972. The value of shipments of products classified as primary to the industry was $2,413 million, an increase of 111 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were surgical dressings, for which

shipments increased 78 percent. The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $1,586 million in 1977, was 70 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 53.5 thousand employees, an increase of 22 percent from 1972. The leading States in employment were California, New Jersey, Pennsylvania, and Illinois, accounting for approximately 40 percent of the industry's 1977 employment. These same States were in the forefront for 1972.

The establishments in this industry with less than 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 5 percent of total value of shipments.

INDUSTRY 3843, DENTAL EQUIPMENT AND SUPPLIES

This industry comprises establishments primarily engaged in the manufacture of artificial teeth, dental metals, alloys and amalgams, and a wide variety of equipment, instruments, and supplies used by dentists, dental laboratories, and dental colleges. Dental laboratories constructing artificial dentures, bridges, inlays, and other dental restorations on specifications from dentists are classified in industry 8072.

The total value of shipments for establishments classified in the Dental Equipment and Supplies industry amounted to $787 million in 1977, an increase of 92 percent from 1972. The value of shipments of products classified as primary to the industry was $661 million, an increase of 88 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were precious dental metals, for which shipments increased 85 percent, and dental alloys for amalgams, for which shipments increased 372 percent. Value added by manufacture, at $459 million in 1977, was 75 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 16.3 thousand employees, an increase of 31 percent from 1972. The leading States in employment were California, New York, Pennsylvania, and Illinois, accounting for approximately 53 percent of the industry's 1977 employment. These same States were in the forefront for 1972.

The establishments in this industry with less than 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 5 percent of total value of shipments.

INDUSTRY 3851, OPHTHALMIC GOODS

This industry comprises establishments primarily engaged in the manufacture of ophthalmic frames, lenses, sunglass lenses, and complete non-prescription sunglasses. Establishments primarily engaged in the manufacture of molded glass blanks are classified in industry 3229; and focus lenses, except ophthalmic in industry 3832. Establishments primarily engaged in grinding lenses to prescription are classified in trade industries.

The total value of shipments for establishments classified in the Ophthalmic Goods industry amounted to $972 million in 1977, an increase of 71 percent from 1972. The value of shipments of products classified as primary to the industry was $844 million, an increase of 75 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were plastic ophthalmic focus lenses, for which shipments increased 565 percent, and contact lenses, for which shipments increased 423 percent. The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $656 million in 1977, was 58 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 30.0 thousand employees, an increase of 12 percent from 1972. The leading States in employment were New York, Massachusetts, Florida, and California, accounting for approximately 62 percent of the industry's 1977 employment. These same States were in the forefront for 1972.

The establishments in this industry with less than 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 10 percent of total value of shipments.

INDUSTRY 3861, PHOTOGRAPHIC EQUIPMENT AND SUPPLIES

This industry comprises establishments primarily engaged in the manufacture of photographic apparatus, equipment, parts, attachments, and accessories, such as still and motion picture cameras and projection apparatus; photocopy and microfilm equipment; blueprinting and diazotype (white printing) apparatus and equipment; other photographic equipment; sensitized film paper, cloth, and plates; and prepared photographic chemicals for use therewith. Establishments primarily engaged in the manufacture of photographic paper stock (unsensitized), and paper mats, mounts, easels, and folders for photographic use are classified in major group 26; photographic lenses in industry 3832; photographic glass in major group 32; chemicals for technical purposes, not specifically prepared and

packaged for use in photography, in major group 28; and photographic flash, flood, enlarger, and projection lamps in industry 3641.

The total value of shipments for establishments classified in the Photographic Equipment and Supplies industry amounted to $9,934 million in 1977, an increase of 78 percent from 1972. The value of shipments of products classified as primary to the industry was $9,218 million, an increase of 76 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were sensitized photographic film and plates, silver halide type, except X-ray, for which shipments increased 81 percent. The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $6,729 million in 1977, was 65 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 111.6 thousand employees, an increase of 18 percent from 1972. The leading States in employment were New York, Colorado, Massachusetts, and Illinois, accounting for approximately 60 percent of the industry's 1977 employment. Data for Colorado and Massachusetts have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

The establishments in this industry with less than 20 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 2 percent of total value of shipments.

INDUSTRY 3873, WATCHES, CLOCKS, AND WATCHCASES

This industry comprises establishments primarily engaged in the manufacture of clocks (including electric), watches, watchcases, mechanisms for clockwork-operated devices, and clock and watch parts. This industry also includes establishments primarily engaged in assembling clocks and watches from purchased movements and cases. Establishments primarily engaged in the manufacture of time clocks are classified in industry 3579, glass crystals in industry 3231, and unbreakable crystals in industry 3079.

The total value of shipments for establishments classified in the Watches, Clocks, and Watchcases industry amounted to $1,598 million in 1977, an increase of 70 percent from 1972. The value of shipments of products classified as primary to the industry was $1,332 million, an increase of 53 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The products accounting for a significant portion of this change were watches with imported movements or modules, for which shipments increased 57 percent. The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $686 million in 1977, was 47 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 31.6 thousand employees, an increase of 3 percent from 1972. The leading States in employment were New York, Connecticut, Arkansas, and Illinois, accounting for approximately 25 percent of the industry's 1977 employment. Data for Connecticut and Arkansas have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided. There has been some shift in the relative importance of individual States from 1972 when Massachusetts, Connecticut, New York, and Arkansas were in the forefront of the industry's employment.

The establishments in this industry with less than 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 3 percent of total value of shipments.

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. [r]Revised. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1] In annual survey of manufactures (ASM) years, data are estimates based on representative sample of establishments canvassed annually and may differ from results of a complete canvass of all establishments. ASM publication shows percentage standard errors. Unless otherwise noted, for data prior to 1963, see 1963 Census of Manufactures, vol. II, table 1 of the Industry chapter.

[2] For the census, a company is defined as a business organization consisting of one establishment or more under common ownership or control.

[3] Industry was defined or redefined for 1972 Census of Manufactures, so data are available only for years shown.

[4] Data for 1967 and 1963 were derived from Table 8, General Statistics for Establishments by Industry Specialization and Primary Product Class Specialization, in vol. II of the 1967 and 1963 Censuses of Manufactures. Separate data for other years are not available.

[5] Data either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data; thus these estimates may be of limited reliability.

[6] Estimate for new capital expenditures has associated standard error of 15 percent or more and may be of limited reliability. Estimates for other data items are of acceptable reliability.

[7] Minimum percentage; exact percentage withheld to avoid disclosing operations of individual companies.

[8] Relationships are not meaningful because of predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

[9] Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[10] Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

Table 1b. Selected Operating Ratios for the Industry: 1977 and Earlier Years

[For explanation of terms, see appendix A]

Year	Payroll per employee (dollars)	Assets per employee (dollars)	Production workers as percent of total employment (percent)	Annual hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials as percent of value of shipments (percent)	Cost of materials and payroll as percent of value of shipments (percent)	Assets as percent of value of shipments (percent)	Value added per employee (dollars)	Payroll as percent of value added (percent)	Value added per production worker hour (dollars)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown for those States where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2]Statistics for some producing States are withheld to avoid disclosing figures for individual companies. However, for such States with 150 employees or more, number of establishments is shown and employment size range is indicated by one of the following symbols: AA—150 to 249 employees; BB—250 to 499 employees; CC—500 to 999 employees; EE—1,000 to 2,499 employees; FF—2,500 employees or more.

[3]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[4]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[5]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 3a. **Summary Statistics for the Industry: 1977**

[For explanation of terms, see appendix A]

Item	Unit of measure	Surgical and medical instruments (SIC 3841)	Surgical appliances and supplies (SIC 3842)	Dental equipment and supplies (SIC 3843)	Ophthalmic goods (SIC 3851)	Photographic equipment and supplies (SIC 3861)	Watches, clocks, and watchcases (SIC 3873)
Primary product specialization ratio[1]	percent	88	87	92	92	95	91
Coverage ratio[2]	do	80	85	98	98	95	95
All establishments	number	650	1 153	550	634	779	303
With 1 to 19 employees	do	413	832	431	479	516	190
With 20 to 99 employees	do	147	213	85	98	170	58
With 100 employees or more	do	90	108	34	57	93	55
All employees, average for year	1,000	43.2	53.5	16.3	30.0	111.6	31.6
Payroll for year, all employees	mil. dol.	490.7	618.8	203.3	314.1	1 898.1	317.4
Production workers:							
Average for year	1,000	29.2	36.5	10.7	21.7	61.6	24.1
March	do	29.0	36.0	10.7	21.1	61.3	23.6
May	do	29.0	36.4	10.7	21.3	61.7	24.0
August	do	29.4	36.9	10.7	21.8	62.2	24.4
November	do	29.3	36.8	10.5	22.5	61.2	24.2
Hours	millions	57.4	69.9	21.2	43.1	119.2	46.4
January to March	do	14.2	17.3	5.2	10.6	30.0	11.4
April to June	do	14.5	17.9	5.4	10.9	30.1	12.2
July to September	do	14.0	17.2	5.3	10.5	29.3	11.4
October to December	do	14.6	17.6	5.4	11.2	29.9	11.4
Wages	mil. dol.	260.9	342.4	104.8	188.4	885.2	199.9
Cost of materials, etc.	do	647.0	1 038.9	339.7	331.1	3 236.5	914.4
Materials, parts, containers, etc., consumed	do	537.9	854.7	284.6	262.2	2 857.5	803.6
Resales	do	69.2	131.8	44.3	47.8	242.1	95.8
Fuels consumed	do	4.7	8.7	1.8	7.3	56.5	2.7
Purchased electric energy	do	14.5	16.4	4.0	9.7	38.1	7.7
Contract work	do	20.7	27.4	5.0	4.1	42.3	4.5
Value of shipments, including resales	do	1 829.4	2 588.2	786.7	971.8	9 933.9	1 597.8
Value of resales	do	81.2	201.7	64.5	67.2	420.8	199.1
Value added by manufacture	do	1 212.2	1 586.4	458.6	656.2	6 728.9	685.6
Manufacturers' inventories:							
Beginning of year	do	314.4	454.0	164.3	224.6	1 424.9	271.4
Finished products	do	104.3	179.4	60.3	100.4	300.7	87.2
Work in process	do	100.0	123.6	57.5	80.6	584.5	118.5
Materials, supplies, fuel, etc.	do	110.1	150.9	46.5	43.6	539.8	65.7
End of year	do	360.3	503.3	174.1	244.9	1 501.3	272.1
Finished products	do	130.7	205.3	63.0	125.3	276.5	101.5
Work in process	do	103.4	134.9	66.3	71.2	640.2	106.3
Materials, supplies, fuel, etc.	do	126.2	163.1	44.8	48.3	584.6	64.3
Capital expenditures for plant and equipment	do	89.5	70.2	17.4	48.6	330.2	25.0
New capital expenditures	do	85.3	67.4	16.2	44.1	322.7	24.2
New buildings and other structures	do	21.3	16.0	3.7	13.2	69.2	5.6
New machinery and equipment	do	64.0	51.3	12.5	30.9	253.5	18.6
Used capital expenditures	do	4.2	2.8	1.1	4.4	7.4	0.8

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Represents ratio of primary product shipments to total product shipments (primary and secondary, excluding miscellaneous receipts) for establishments classified in industry.

[2]Represents ratio of primary products shipped by establishments classified in industry to total shipments of such products by all manufacturing establishments, wherever classified.

[3]Relationships are not meaningful because of predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

[4]Minimum percentage; exact percentage withheld to avoid disclosing operations of individual companies.

[5]Data for value of shipments represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[6]Data for value of shipments represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[7]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 3b. Supplemental Industry Statistics Based on Sample Estimates: 1977

(For explanation of terms, see appendix A. For description of annual survey of manufactures (ASM), see appendix B)

Item	Surgical and medical instruments (SIC 3841)		Surgical appliances and supplies (SIC 3842)		Dental equipment and supplies (SIC 3843)	
	Amount (million dollars)	Standard error of estimate[1] (percent)	Amount (million dollars)	Standard error of estimate[1] (percent)	Amount (million dollars)	Standard error of estimate[1] (percent)
Purchased services:						
Cost of purchased services for repair of--						
Buildings and other structures	3.8	6	4.4	12	1.2	12

Total gross value of depreciable assets:						
Beginning of year	268.0	3	3,692.9	1	209.2	3
New capital expenditures	32.0	3	322.2	3	21.9	3
Used capital expenditures	4.4	3	(8.1)	21	(1.0)	17
Retirements	(10.6)	15	81.3	3	13.6	5
End of year	293.8	3	3,941.9	1	218.5	3
Depreciation charges during 1977	19.0	3	275.5	1	18.1	7
Buildings and other structures	3.5	3	55.0	1	2.5	6
Machinery and equipment	15.5	3	220.5	1	15.6	8

Note: Data for total new capital expenditures, new building expenditures, new machinery expenditures, and total used expenditures are shown in table 3a, as well as in this table. The figures in table 3a are census universe totals and may differ from the annual survey of manufactures (ASM) sample estimates shown in this table. The figures in this table represent the best estimates of year-to-year change as measured by the continuing ASM sample. However, they are subject to sampling error and, hence, as estimates of level, are not as reliable as the universe figures shown in table 3a.

- Represents zero. (A) Indicates standard errors of 100 percent or more. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.s.k. Not specified by kind. (X) Not applicable. (Z) Less than 50 thousand dollars.

[1]For a description of the standard error of estimate, see the section "Qualifications of the Data" in appendix B. Figures in parentheses have standard errors of 15 percent or more.

[2]This is a measure of the extent to which respondents reported for each item. It is derived for each item by calculating the ratio of the weighted employment (establishment data multiplied by sample weight; see appendix B) for those sample establishments that reported the specific inquiry to the weighted total employment for all sample establishments classified in the industry.

[3]The standard errors for the detailed categories of new machinery and equipment expenditures were not directly calculated. However, the actual figure is not expected to exceed the estimated figure shown.

[4]This category represents the total machinery and equipment expenditures for establishments that did not break down their expenditures for the three specific categories.

Table 4. Industry Statistics by Employment Size of Establishment: 1977

[For explanation of terms, see appendix A]

Industry and employment size class	E[1]	All establishments (no.)	All employees: Number (1,000)	All employees: Payroll (million dollars)	Production workers: Number (1,000)	Production workers: Hours (millions)	Production workers: Wages (million dollars)	Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	New capital expenditures (million dollars)	End-of-year inventories (million dollars)
INDUSTRY 3841, SURGICAL AND MEDICAL INSTRUMENTS

2,500 employees or more	-	2	(D)	(D)	(D)	(D)	(D)	(D)	(D)	(D)	(D)	(D)
Covered by administrative records[2]	E0	152	0.8	7.2	0.6	1.1	4.7	15.9	17.1	33.0	0.5	5.8

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. Data for this item are included in figures in parentheses above. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2]Report forms were not mailed to small single-unit companies with up to 20 employees (cutoff varied by industry). Payroll and sales data for 1977 were obtained from administrative records supplied by other agencies of the Federal Government. These data were then used in conjunction with industry averages to estimate the balance of items shown. Data are also included in respective size classes shown.

[3]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[4]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[5]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 5a. Industry Statistics by Industry and Primary Product Class Specialization: 1977

[Table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. Measures of plant specialization shown are (1) industry specialization: ratio of primary product shipments to total product shipments (primary plus secondary, excluding miscellaneous receipts) for the establishment; and (2) product class specialization: ratio of largest primary product class shipments to total product shipments (primary plus secondary, excluding miscellaneous receipts) for the establishment. See appendix for method of computing ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for various reasons; e.g., to avoid disclosing operations of individual companies. For explanation of terms, see appendix A]

[1]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[2]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

Table 5b. Industry-Product Analysis—Value of Shipments for an Industry and Primary Product Shipments, and Specialization and Coverage Ratios: 1977, 1972, and 1967

(An establishment is assigned to an industry based on shipment values of products representing largest amount considered primary to an industry. Frequently, establishment shipments comprise mixtures of products assigned to an industry (primary), those considered primary to other industries (secondary), and receipts for activities such as merchandising or contract work. Columns A-D show this product pattern for an industry, and column E shows primary product specialization ratio. The extent to which an industry's primary products are shipped by establishments classified in and out of an industry is shown in columns F-H and coverage ratio is shown in column I. For explanation of terms, see appendix A)

Table 5c. Industry-Product Analysis — Shipments by Product Class and Industry: 1977

(Millions of dollars. Table shows where products of an industry (referred to as primary and listed in table 6a) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Only those product groups that have at least $2 million in shipments from establishments classified in one of industries included in this chapter are shown. Read across to determine where products of industries in this chapter are produced. To extent that some of primary products are made in industries not included in this chapter, value of such shipments is shown in "Other industries" column. Specified "Other industries" are listed at end of table if they account for more than $5 million of products primary to this chapter. For explanation of terms, see appendix A)

1977 product code	Product group, product class, and miscellaneous receipts	All industries	Surgical and medical instruments (SIC 3841)	Surgical appliances and supplies (SIC 3842)	Dental equipment and supplies (SIC 3843)	Ophthalmic goods (SIC 3851)	Photographic equipment and supplies (SIC 3861)	Watches, clocks, and watchcases (SIC 3873)	Other industries

38610 02	Photographic equipment and supplies, n.s.k., typically for establishments with less than 20 employees (see note)	.....	(NA)	(X)	115.4
				1972	
	PHOTOGRAPHIC EQUIPMENT AND SUPPLIES				
3861- --	Total	.....	(NA)	(X)	5,255.4
38611 --	Still picture equipment	.....	(NA)	(X)	616.5
	Still cameras:				
	Hand-type cameras, excluding film, bulbs, batteries, etc.:				
38611 11	Suggested retail list price less than $30	Thousands	NA	9,774.3	120.3
38611 13	Suggested retail list price $30 or more, but less than $80				
	Suggested retail list price $80 or more:		(NA)	3,896.0	122.7
38611 15	Using film or paper, 35 mm or under				
38611 17	Using film or paper, over 35 mm, including sheet and pack film				
	Process cameras for photoengraving and photolithography, including value of stands and attachments when shipped with camera:				
38611 22	Horizontal types, including overhead, all sizes		(NA)	4.8	9.8
38611 24	Vertical types, all sizes				
38611 31	Other still cameras, including view and studio, designed primarily for tripod or stand, but excluding photocopying, microfilming, blueprinting, brown-printing, and whiteprinting		(NA)	(S)	35.7
	Flash units, except built-in:				
	Electronic (stroboscopic):				
38611 42	Portable, battery operated				
38611 45	Studio type		NA	1,165.9	10.5
38611 47	Nonelectronic (using disposable flashbulb)				
38611 10	Photographic exposure meters, complete, except built-ins	Thousands			

See footnotes at end of table.

Table 6a. Products and Product Classes — Quantity and Value of Shipments by All Producers: 1977 and 1972 – Con.

(Includes value of products of this industry produced by (1) establishments classified in this industry (primary) and (2) establishments classified in other industries (secondary). Transfers of the products of this industry from one establishment of a company to another establishment of the same company (interplant transfers) are also included. For further explanation, see appendix A, Value of shipments)

1977 product code	Product	Unit of measure	Number of companies with shipments of $100,000 or more	Product shipments[1]	
				Quantity[2]	Value (million dollars)
			1972--Con.		
3861- --	PHOTOGRAPHIC EQUIPMENT AND SUPPLIES--Con.				
38611 --	Still picture equipment--Con.				
	Projectors with leases of f/4.0 or faster, suggested list price $25 or more:				
	Slide film:				
38611 61	List price $25 to $79.99	Thousands	(NA)	405.2	15.2
38611 65	List price $80 or more		(NA)	470.8	44.4
38611 68	Strip film, including combination slide and strip		(NA)	108.6	9.5
38611 69	Other, including overhead, opaque, etc	Thousands	(NA)	(S)	20.8
	Still picture commercial-type finishing equipment:				
38611 73	Processing equipment for film		(NA)	(X)	49.2
38611 75	Processing equipment for paper		(NA)	(X)	21.8
38611 79	All other processing equipment, including developing machines, continuous printing machines, and motor-operated print washers and dryers		(NA)	(X)	40.4
38611 81	Enlargers	1,000 heads	(NA)	(S)	5.7
38611 91	Rebuilt still picture equipment				
38611 98	Other still picture equipment, parts, attachments, and accessories, including projectors with lenses not as fast as f/4.0 and/or with suggested retail list price less than $25 and hand viewers, but excluding lenses for sale separately and projection screens		(NA)	(X)	105.3
38611 00	Still picture equipment, n.s.k		(NA)	(X)	5.2
38612 --	Photocopying equipment	Thousands	(NA)	(S)	1,455.1
	Photocopying equipment, primarily for producing copies 11 in x 14 in or smaller:				
	Suggested retail list price:				
38612 11	Less than $100				
38612 13	$100 to $499.99				
38612 16	$500 to $999.99				
38612 18	$1,000 to $1,499.99		(NA)	(S)	[15]1,455.1
38612 19	$1,500 or more				
38612 23	Photocopying equipment, primarily for producing copies larger than 11 in x 14 in	Thousands			
38612 00	Photocopying equipment, n.s.k				
38613 --	Motion picture equipment		(NA)	(X)	191.6
	8 mm and 16 mm motion picture equipment:				
	Cameras, excluding film, bulbs, batteries, etc., in outfits:				
38613 07	16 mm	Thousands	(NA)	537.9	42.8
38613 15	8 mm				
	Projectors with lenses f/2.0 or faster, suggested retail list price $25 or more:				
38613 27	16 mm. sound and silent		(NA)	70.0	29.7
38613 42	8 mm. sound		(NA)	88.1	13.9
	8 mm. silent:				
38613 43	Less than $100		(NA)	383.7	13.7
38613 45	$100 to $174.99		(NA)	293.4	25.4
38613 47	$175 or more				
38613 52	Projection screens for motion picture and/or still projection	Thousands	(NA)	1,073.9	14.9
38613 75	8 mm and 16 mm motion picture parts, attachments, accessories, and other 8 mm and 16 mm motion picture equipment, including sound recording, projectors with lenses not as fast as f/2.0 and/or suggested retail list price less than $25 and hand viewers, but excluding lenses for sale separately and projection screens		(NA)	(X)	10.2
38613 61	Motion picture processing equipment, all types, including printing, developing, and drying machines, but excluding motion picture type equipment used for still picture work and interchangeable types		(NA)	(X)	18.2
	35 mm and over motion picture equipment:				
38613 81	Cameras	Thousands	(NA)	1.7	8.5
38613 85	Projectors	Thousands			
38613 98	35 mm and over motion picture parts, attachments, accessories, and other 35 mm and over motion picture equipment, including sound recording and studio equipment, but excluding lenses for sale separately and processing equipment		(NA)	(X)	6.3
38613 00	Motion picture equipment, n.s.k		(NA)	(X)	8.0
38614 --	Microfilming, blueprinting, brownprinting, and whiteprinting equipment		(NA)	(X)	137.5
38614 11	Microfilming equipment, including microfilm cameras, readers, printers, enlargers, and other special purpose equipment for microfilm use		(NA)	(X)	116.2
38614 21	Blueprinting, brownprinting, and whiteprinting (direct process type) equipment		(NA)	(X)	20.9
38614 00	Micrographic equipment and supplies, n.s.k		(NA)	(X)	.4

See footnotes at end of table.

	Women's wristwatch cases:				
38737 21	Karat gold and platinum		(NA)	442.7	9.1
38737 23	Gold filled		(NA)	448.8	2.7
38737 25	Rolled goldplate and sterling silver, including rolled goldplate with steel back		(NA)	3,563.4	7.5
38737 29	Other metals		(NA)		
	For nonjeweled or pinlever watch movements:				
	Wristwatch cases:				
38737 51	Gold filled, rolled goldplate, and sterling silver, including rolled goldplate with steel back		(NA)	943.0	6.2
38737 59	Other metals		(NA)		
38737 65	Pocket and other watchcases, all qualities, for jeweled, nonjeweled, or pinlever watch movements	Thousands	(NA)		
38737 00	Watchcases, n.s.k.	.....	(NA)	(X)	4.5
38730 00	Watches, clocks, and watchcases, n.s.k., typically for establishments with 5 employees or more (see note)	.....	(NA)	(X)	14.3
38730 02	Watches, clocks, and watchcases, n.s.k., typically for establishments with less than 5 employees (see note)	.....	(NA)	(X)	6.4

Note: In 1977 Census of Manufactures, shipments data for establishments of small single-unit companies with up to 20 employees were estimated from administrative records data rather than data actually collected from respondents. Employment cutoff used for administrative records for each industry and shipments figures are included in code ending with "002." In both 1977 and 1972 Censuses of Manufactures, products not completely identified on standard forms were coded in appropriate product class (5 digits) followed by "00," or in some cases, to appropriate product group code (4 digits) followed by "0 00."

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or less than half the unit of measure specified.

[1]Quantity and value reported by all producers of product, not just those with shipments of $100,000 or more.

[2]For some establishments, data have been estimated from central unit values, which are based on the quantity-value relationships of reported data. The following symbols are used when percentage of each quantity figure estimated in this manner equals or exceeds 10 percent of published. figure: * indicates 10 to 19 percent estimated, ** indicates 20 to 29 percent estimated. If 30 percent or more is estimated, figure is replaced by (S).

[3]Product classes 38411 and 38412 were created for 1977; there were none in this industry in prior years.

[4]For 1972, data for products now coded 38411 41 and 38411 89 were combined to avoid disclosing operations of individual companies.

[5]Not applicable because data were not collected separately for product classes 38411 and 38412 in 1972.

[6]For 1977, product codes 38421 15, 38421 33, 38421 34,38421 61, and 38421 98 were combined to avoid disclosing operations of individual companies.

[7]For 1972, product codes 38421 26 and 38421 29 were combined to avoid disclosing operations of individual companies.

[8]For 1972, product codes 38421 31, 38421 32, 38421 61, and 38421 98 were combined to avoid disclosing operations of individual companies.

[9]For 1972, product codes 38515 00 and 38516 00 were included with product code 38514 00 and, thus, in product class 38514 total.

[10]For 1977, product codes 38612 --, 38616 --, and 38610 00 were combined to avoid disclosing operations of individual companies.

[11]For 1977, product codes 38614 02 and 38614 05 were combined to avoid disclosing operations of individual companies.

[12]Quantities represent total square feet of sensitized material (TSFSM) in millions. Motion picture film was collected in linear feet by width but was converted to TSFSM to provide a common unit of measure for the combination shown.

[13]For 1977, product codes 38615 11 through 38615 64 plus 38615 81 were combined to avoid disclosing operations of individual companies.

[14]For 1977, product codes 38617 11 and 38617 00 were combined to avoid disclosing operations of individual companies.

[15]This value includes rental receipts for some companies.

[16]Quantities represent total square yards of sensitized materials (TSYSM) in millions.

[17]For 1977, product codes 38731 31, 38731 41, 38731 61, 38731 52, and 38731 28 were combined to avoid disclosing operations of individual companies.

[18]For 1977, product codes 38731 32 and 38731 39 were combined to avoid disclosing operations of individual companies.

Table 6b. Product Classes — Value of Shipments by All Producers by Geographic Area: 1977 and 1972

(Millions of dollars. Product classes covered are those that are economically significant and whose production is geographically dispersed, provided dispersion is not approximated by data in table 2. Also, product classes are not shown if they are miscellaneous or "not specified by type" classes. Statistics for some States are withheld because they are either less than $2 million in produce class shipments or they disclose operations of individual companies in 1977)

Product class and geographic area	Value of product shipments	
	1977	1972

(D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards.

[1]Figures are estimates derived from a representative sample of manufacturing establishments canvassed in annual survey of manufactures and, therefore, may differ from results that would be obtained from a complete canvass of all manufacturing establishments. Standard errors associated with estimates are published in annual survey of manufactures volumes for this period. Figures in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data. Thus, at individual product class level, estimates may be of limited reliability; however, they may be combined with other product class totals into broader aggregates which are of acceptable reliability.

[2]Prior to 1972, this industry was published as two separate industries: 3871, Watches and Clocks; and 3872, Watchcases.

Table 7. Materials Consumed by Kind: 1977 and 1972

(Includes quantity and cost of materials consumed or put into production by establishments classified only in this industry. For further explanation, see appendix A, Cost of materials)

1977 material code	Material	Unit of measure	1977, quantity	1977, delivered cost (million dollars)

(D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards. (X) Not applicable.

[1]Materials consumed by kind data were not collected in 1972.

[2]Total cost of materials of establishments that did not report detailed materials data, including establishments that were not mailed a form.

[3]For some establishments, data have been estimated from central unit values, which are based on quantity-cost relationships of reported data. The following symbols are used when percentage of each quantity figure estimated in this manner equals of exceeds 10 percent of published figure: * indicates 10 to 19 percent estimated, ** indicates 20 to 29 percent estimated. If 30 percent or more is estimated, figure is replaced by (S).

[4]From 1972 Census of Manufactures Supplemental Inquiry: Consumption of Materials, Parts, Containers, and Supplies During 1972 (Form MA-131).

[5]For 1972, material codes 367408, 367001, and 307903 were included with material code 970099.

[6]For 1972, material codes 282104, 307903, 356601, and 386180 were included with material code 970099.

[7]Represents only quantity and value purchased.

[8]For 1972, material codes 367400 and 367411 were included with material code 970099.

PRODUCT STATISTICS

5b. Industry-Product Analysis—Value of Shipments for an Industry and Primary Product Shipments, and Specialization and Coverage Ratios: 1977, 1972, and 1967 12
5c. Industry-Product Analysis—Shipments by Product Class and Industry: 1977 13
6a. Products and Product Classes—Quantity and Value of Production by All Producers: 1977 and 1972 14
6b. Product Classes—Value of Shipments by All Producers by Geographic Area: 1977 and 1972 16
6c. Product Classes—Value Shipped by All Producers: 1962, 1967, 1972 to 1977 17

MATERIAL STATISTICS

7. Materials Consumed by Kind: 1977 and 1972 17

DESCRIPTION OF INDUSTRIES

JEWELRY, SILVERWARE, AND PLATED WARE

This report shows 1977 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

3911 Jewelry, Precious Metal
3914 Silverware and Plated Ware
3915 Jewelers' Materials and Lapidary Work

The industry statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments, but also their activities in the manufacture of secondary products as well as their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1a-5a) with product statistics (table 6a) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5b, which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

Small single-unit companies with up to 20 employees (the cutoff varied by industry), were excluded from the mail portion of the census. For these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated), data on payrolls and receipts were obtained from administrative records of other government agencies. The remaining statistics were developed from industry averages.

Establishment data were tabulated based on industry definitions contained in the 1972 Standard Industrial Classification Manual and its 1977 supplement.

INDUSTRY 3911, JEWELRY, PRECIOUS METAL

This industry comprises establishments primarily engaged in the manufacture of jewelry and other articles worn on or carried about the person, made of precious metals with or without stones (including the setting of stones where used), including cigarette cases and lighters, vanity cases and compacts; trimmings for umbrellas and canes; and jewel settings and mountings. Establishments primarily engaged in the manufacture of costume jewelry from nonprecious metals and other materials are classified in industry 3961. For a detailed list of products of industry 3911, refer to table 6A, product codes 39111 12 to 39112 98.

The total value of shipments for establishments classified in the Jewelry, Precious Metal industry amounted to $2,107 million in 1977, an increase of 87 percent from 1972. The value of shipments of products classified as primary to the industry was $1,908 million, an increase of 94 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $980 million in 1977, was 83 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 42.1 thousand employees, an increase of 29 percent from 1972. The leading States in employment were New York, Rhode Island, Massachusetts, and California, accounting for approximately 70 percent of the industry's 1977 employment.

The establishments in this industry with less than 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 12 percent of total value of shipments.

INDUSTRY 3914, SILVERWARE AND PLATED WARE

This industry comprises establishments primarily engaged in the manufacture of flatware (including knives, forks, and spoons), hollowware, toiletware, ecclesiastical ware, and related products made of sterling silver; of metal plated with silver, gold, or other metal; of nickel silver; of pewter; or of stainless steel. For a detailed list of products of industry 3914, refer to table 6A, product codes 39141 11 to 39142 61.

The total value of shipments for establishments classified in the Silverware and Plated Ware industry amounted to $457 million in 1977, an increase of 21 percent from 1972. The value of shipments of products classified as primary to the industry was $403 million, an increase of 27 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $255 million in 1977, was 29 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 10.8 thousand employees, a decrease of 14 percent from 1972. The leading States in employment were New York, Massachusetts, Connecticut, and Rhode Island, accounting for approximately 75 percent of the indus-

try's 1977 employment. Data for Rhode Island have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

The establishments in this industry with less than 20 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 6 percent of total value of shipments.

INDUSTRY 3915, JEWELERS' MATERIALS AND LAPIDARY WORK

This industry comprises establishments primarily engaged in the manufacture of unassembled jewelry parts and stock shop products such as sheet, wire, and tubing; establishments of lapidaries primarily engaged in cutting, slabbing, tumbling, carving, engraving, polishing or faceting stones from natural or manmade precious or semiprecious gem raw materials, either for sale or on a contract basis for the trade; in recutting, repolishing, and setting gem stones; or in cutting, drilling, and otherwise preparing jewels for instruments, dies, watches, chronometers, and other industrial uses. This industry includes the drilling, sewing, and peeling of real or cultured pearls, but does not include the manufacture of artificial pearls which are classified in industry 3961. For a detailed list of products of industry 3915, refer to table 6A, product codes 39151 13 to 39152 31.

The total value of shipments for establishments classified in the Jewelers' Materials and Lapidary Work industry amounted to $685 million in 1977, an increase of 112 percent from 1972. The value of shipments of products classified as primary to the industry was $726 million, an increase of 116 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $214 million in 1977, was 82 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 8.3 thousand employees, an increase of 4 percent from 1972. The leading States in employment were Rhode Island, New York, and Massachusetts, accounting for approximately 80 percent of the industry's 1977 employment. Data for Rhode Island have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

The establishments in this industry with less than 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 12 percent of total value of shipments.

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. r Revised. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]In annual survey of manufactures (ASM) years, data are estimates based on a representative sample of establishments canvassed annually and may differ from results of a complete canvass of all establishments. ASM publication shows percentage standard errors. Unless otherwise noted, for data prior to 1963, see 1963 Census of Manufactures, vol. II, table 1 of the Industry chapter.

[2]For the census, a company is defined as a business organization consisting of one establishment or more under common ownership or control.

[3]Industry was defined or redefined for 1972 Census of Manufactures, so data are available only for years shown.

[4]Data for 1967 and 1963 were derived from Table 8, General Statistics for Establishments by Industry Specialization and Primary Product Class Specialization, in vol. II of the 1967 and 1963 Censuses of Manufactures. Separate data for other years are not available.

[5]Data either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data; thus these estimates may be of limited reliability.

[6]Estimate for new capital expenditures has associated standard error of 15 percent or more and may be of limited reliability. Estimates for other data items are of acceptable reliability.

[7]Minimum percentage; exact percentage withheld to avoid disclosing operations of individual companies.

[8]Relationships are not meaningful because of predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

[9]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[10]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

Table 1b. Selected Operating Ratios for the Industry: 1977 and Earlier Years

[For explanation of terms, see appendix A]

Year	Payroll per employee (dollars)	Assets per employee (dollars)	Production workers as percent of total employment (percent)	Annual hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials as percent of value of shipments (percent)	Cost of materials and payroll as percent of value of shipments (percent)	Assets as percent of value of shipments (percent)	Value added per employee (dollars)	Payroll as percent of value added (percent)	Value added per production worker hour (dollars)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown for those States where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent, E5—50 to 59 percent, E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent

[2]Statistics for some producing States are withheld to avoid disclosing figures for individual companies. However, for such States with 150 employees or more, number of establishments is shown and employment size range is indicated by one of the following symbols: AA—150 to 249 employees; BB—250 to 499 employees; CC—500 to 999 employees, EE—1,000 to 2,499 employees, FF—2,500 employees or more.

[3]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year

[4]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[5]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 3a. Summary Statistics for the Industry: 1977

[For explanation of terms, see appendix A]

Item	Unit of measure	Jewelry, precious metal (SIC 3911)	Silverware and plated ware (SIC 3914)	Jewelers' materials and lapidary work (SIC 3915)
Primary product specialization ratio[1]	percent	92	93	D6
Coverage ratio[2]	do	97	98	89
All establishments	number	2 206	258	654
With 1 to 19 employees	do	1 801	191	562
With 20 to 99 employees	do	327	45	78
With 100 employees or more	do	78	22	14
All employees, average for year	1,000	42.1	10.8	8.3
Payroll for year, all employees	mil. dol.	432.0	119.8	85.9
Production workers:				
Average for year	1,000	29.2	8.3	6.8
March	do	28.4	8.2	6.5
May	do	28.5	8.1	6.7
August	do	28.8	8.3	6.8
November	do	31.1	8.6	7.1
Hours	millions	53.3	15.7	12.2
January to March	do	13.0	3.8	2.9
April to June	do	13.3	3.9	3.1
July to September	do	12.5	3.8	2.9
October to December	do	14.5	4.2	3.3
Wages	mil. dol.	241.4	80.2	51.3
Cost of materials, etc.	do	1 154.9	205.4	491.1
Materials, parts, containers, etc., consumed	do	1 041.6	172.9	470.0
Resales	do	58.2	20.5	3.6
Fuels consumed	do	2.4	4.3	0.9
Purchased electric energy	do	6.9	3.7	1.7
Contract work	do	45.6	4.1	14.9
Value of shipments, including resales	do	2 107.0	457.0	685.2
Value of resales	do	65.8	27.9	5.0
Value added by manufacture	do	979.8	255.1	213.6
Manufacturers' inventories:				
Beginning of year	do	437.4	136.8	96.5
Finished products	do	199.9	65.3	51.7
Work in process	do	99.3	36.1	23.1
Materials, supplies, fuel, etc.	do	138.3	35.4	21.7
End of year	do	489.8	142.8	119.9
Finished products	do	217.0	68.3	63.8
Work in process	do	109.8	36.7	30.5
Materials, supplies, fuel, etc.	do	162.9	37.9	25.6
Capital expenditures for plant and equipment	do	27.7	8.4	7.4
New capital expenditures	do	25.6	8.0	5.9
New buildings and other structures	do	7.9	0.7	1.6
New machinery and equipment	do	17.8	7.3	4.4
Used capital expenditures	do	2.1	0.4	1.4

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Represents ratio of primary product shipments to total product shipments (primary and secondary, excluding miscellaneous receipts) for establishments classified in industry.

[2]Represents ratio of primary products shipped by establishments classified in industry to total shipments of such products by all manufacturing establishments, wherever classified.

[3]Relationships are not meaningful because of predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

[4]Minimum percentage; exact percentage withheld to avoid disclosing operations of individual companies.

[5]Data for value of shipments represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[6]Data for value of shipments represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[7]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 3b. Supplemental Industry Statistics Based on Sample Estimates: 1977

(For explanation of terms, see appendix A. For description of annual survey of manufactures (ASM), see appendix B)

Item	Jewelry, precious metal (SIC 3911)		Silverware, and platedware (SIC 3914)		Jewelers' materials, and lapidary work (SIC 3915)	
	Amount (million dollars)	Standard error of estimate[1] (percent)	Amount (million dollars)	Standard error of estimate[1] (percent)	Amount (million dollars)	Standard error of estimate[1] (percent)
Purchased services:						
Cost of purchased services for repair of--						
Buildings and other structures	(1.1)	20	(D)	27	(D)	47
Response coverage ratio[2] (percent)	58	(X)	56	(X)	63	(X)
Machinery	2.1	8	2.0	7	(D)	26
Response coverage ratio[2] (percent)	60	(X)	63	(X)	57	(X)
Cost of purchased communication services	4.3	11	(1.1)	26	(1.1)	29
Response coverage ratio[2] (percent)	61	(X)	64	(X)	56	(X)
Rental payments	13.4	8	3.2	8	(2.3)	17
Buildings and other structures	9.1	8	1.6	12	(2.0)	22
Machinery and equipment	4.3	11	1.6	7	(0.4)	30
Supplemental labor costs	50.8	2	26.3	5	9.9	7
Legal costs	30.2	2	11.2	4	5.9	6
Voluntary costs	20.6	4	15.1	6	4.0	11
Gross value of depreciable assets:						
Buildings and other structures:						
Beginning of year	(62.1)	16	45.6	6	12.0	4
New capital expenditures	6.0	8	(0.8)	45	(0.4)	47
Used capital expenditures	(1.1)	23	0.3	1	(0.2)	86
Retirements	(2.2)	16	(0.5)	23	(0.1)	38
End of year	67.0	14	46.2	7	12.5	4
Machinery and equipment:						
Beginning of year	147.5	6	93.5	3	45.9	11
New capital expenditures	22.9	12	6.6	4	(4.6)	18
Automobiles, trucks, etc., for highway use[3]	(D)	(A)	(D)	(A)	(D)	(A)
Computers and peripheral data processing equipment[3]	(D)	(A)	(D)	(A)	(D)	(A)
All other[3]	(16.9)	(A)	(5.7)	(A)	(3.1)	(A)
New machinery and equipment, n.s.k.[4]	(4.8)	(A)	(D)	(A)	(D)	(A)
Used capital expenditures	(1.8)	50	(0.3)	47	(0.7)	45
Retirements	(11.3)	39	2.7	12	4.2	7
End of year	161.0	5	97.6	3	47.0	12
Total gross value of depreciable assets:						
Beginning of year	209.6	6	139.1	3	57.9	12
New capital expenditures	28.9	10	7.4	5	(5.1)	16
Used capital expenditures	(3.0)	32	(0.5)	24	(1.0)	52
Retirements	(13.5)	34	3.2	13	4.5	8
End of year	228.0	5	143.8	3	59.5	11
Depreciation charges during 1977	(19.7)	15	7.6	2	(7.0)	32
Buildings and other structures	(2.9)	15	1.4	10	(2.9)	80
Machinery and equipment	(16.8)	15	6.3	3	4.1	12

Note: Data for total new capital expenditures, new building expenditures, new machinery expenditures, and total used expenditures are shown in table 3a, as well as in this table. The figures in table 3a are census universe totals and may differ from the annual survey of manufactures (ASM) sample estimates shown in this table. The figures in this table represent the best estimates of year-to-year change as measured by the continuing ASM sample. However, they are subject to sampling error and, hence, as estimates of level, are not as reliable as the universe figures shown in table 3a.

- Represents zero. (A) Indicates standard errors of 100 percent or more. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.s.k. Not specified by kind. (X) Not applicable. (Z) Less than 50 thousand dollars.

[1]For a description of the standard error of estimate, see the section "Qualifications of the Data" in appendix B. Figures in parentheses have standard errors of 15 percent or more.

[2]This is a measure of the extent to which respondents reported for each item. It is derived for each item by calculating the ratio of the weighted employment (establishment data multiplied by sample weight; see appendix B) for those sample establishments that reported the specific inquiry to the weighted total employment for all sample establishments classified in the industry.

[3]The standard errors for the detailed categories of new machinery and equipment expenditures were not directly calculated. However, the actual figure is not expected to exceed the estimated figure shown.

[4]This category represents the total machinery and equipment expenditures for establishments that did not break down their expenditures for the three specific categories.

Table 4. Industry Statistics by Employment Size of Establishment: 1977

[For explanation of terms, see appendix A]

Industry and employment size class	E[1]	All establishments (no.)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	New capital expenditures (million dollars)	End-of-year inventories (million dollars)
			Number (1,000)	Payroll (million dollars)	Number (1,000)	Hours (millions)	Wages (million dollars)					
INDUSTRY 3911, JEWELRY, PRECIOUS METAL

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. Data for this item are included in figures in parentheses above. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2]Report forms were not mailed to small single-unit companies with up to 20 employees (cutoff varied by industry). Payroll and sales data for 1977 were obtained from administrative records supplied by other agencies of the Federal Government. These data were then used in conjunction with industry averages to estimate the balance of items shown. Data are also included in respective size classes shown.

[3]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[4]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[5]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 5a. Industry Statistics by Industry and Primary Product Class Specialization: 1977

[Table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. Measures of plant specialization shown are (1) industry specialization: ratio of primary product shipments to total product shipments (primary plus secondary, excluding miscellaneous receipts) for the establishment; and (2) product class specialization: ratio of largest primary product class shipments to total product shipments (primary plus secondary, excluding miscellaneous receipts) for the establishment. See appendix for method of computing ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for various reasons; e.g., to avoid disclosing operations of individual companies. For explanation of terms, see appendix A]

Industry or product class code	Industry or product class by percent of specialization	All establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	New capital expenditures (million dollars)
			Number (1,000)	Payroll (million dollars)	Number (1,000)	Hours (millions)	Wages (million dollars)				
3911	**Jewelry, precious metal:**										
	Entire industry	2 206	42.1	432.0	29.2	53.3	241.4	979.8	1 154.9	2 107.0	25.6
	Establishments with 75 percent specialization or more	2 118	37.1	379.9	25.7	46.6	211.2	823.8	948.9	1 744.8	21.0

	Establishments with this product class primary	63	1.1	13.2	0.8	1.4	6.7	49.6	215.2	250.9	1.1
	Establishments with 75 percent specialization or more in class	59	(D)	(D)	(D)	(D)	(D)	(D)	(D)	(D)	(D)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[2]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

Table 5b. Industry-Product Analysis — Value of Shipments for an Industry and Primary Product Shipments, and Specialization and Coverage Ratios: 1977, 1972, and 1967

(An establishment is assigned to an industry based on shipment values of products representing largest amount considered primary to an industry. Frequently, establishment shipments comprise mixtures of products assigned to an industry (primary), those considered primary to other industries (secondary), and receipts for activities such as merchandising or contract work. Columns A-D show this product pattern for an industry, and column E shows primary product specialization ratio. The extent to which an industry's primary products are shipped by establishments classified in and out of an industry is shown in columns F-H and coverage ratio is shown in column I. For explanation of terms, see appendix A)

1977 product code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total (million dollars)	Primary products (million dollars)	Secondary products (million dollars)	Miscellaneous receipts (million dollars)	Primary product specialization ratio Col. B / Col. Table 5c. Industry-Product Analysis — Shipments by Product Class and Industry: 1977

(Millions of dollars. Table shows where products of an industry (referred to as primary and listed in table 6a) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Only those product groups that have at least $2 million in shipments from establishments classified in one of industries included in this chapter are shown. Read across to determine where products of industries in this chapter are produced. To extent that some of primary products are made in industries not included in this chapter, value of such shipments is shown in "Other industries" column. Specified "Other industries" are listed at end of table if they account for more than $5 million of products primary to this chapter. For explanation of terms, see appendix A)

1977 product code	Product group, product class, and miscellaneous receipts	All industries	Jewelry, precious metal (SIC 3911)	Silverware and plated ware (SIC 3914)	Jewelers' materials and lapidary work (SIC 3915)	Other industries
	Total	(X)	2,107.0	457.0	685.2	(X)
	Primary products	(X)	1,850.8	396.1	642.9	(X)
	Secondary products	(X)	170.8	28.7	25.0	(X)
	Miscellaneous receipts	(X)	85.4	32.2	17.3	(X)
3911-	Jewelry, precious metal	1,907.7	1,850.8	(D)	14.8	39.5
39111	Jewelry made of platinum metals and karat gold	1,251.5	1,225.5	(D)	8.8	16.7

39140 02	Silverware and plated ware, n.s.k., typically for establishments with less than 20 employees (see note)		(NA)	(X)	26.8	(X)	6.1

See footnotes at end of table.

Table 6a. **Products and Product Classes — Quantity and Value of Shipments by All Producers: 1977 and 1972** - Con.

(Includes value of products of this industry produced by (1) establishments classified in this industry (primary) and (2) establishments classified in other industries (secondary). Transfers of the products of this industry from one establishment of a company to another establishment of the same company (interplant transfers) are also included. For further explanation, see appendix A, Value of shipments)

1977 product code	Product	1977		1972
		Number of companies with shipments of $100,000 or more	Value of product shipments[1] (million dollars)	Value of product shipments (million dollars)
	JEWELERS' MATERIALS AND LAPIDARY WORK			
3915- --	Total	(NA)	726.0	336.2
39151 --	Jewelers' findings and materials	(NA)	305.5	142.5
39151 13	Jewelers' findings, such as joints, pins, clasps, spring rings, ring blanks, and other unassembled parts	82	189.4	68.6
39151 31	Machine chain	26	79.0	25.5
39151 41	Gold filled and rolled goldplate materials	10	[4]19.7	30.7
39151 51	Stock shop products, such as flat stock, wire, and tubing	11		11.9
39151 00	Jewelers' findings and materials, n.s.k., for establishments with 10 employees or more. (see note.)	(NA)	17.5	5.8
39152 --	Lapidary work and diamond cutting and polishing	(NA)	305.6	132.8
	Stones cut or polished in the plant from materials owned by the plant:			
39152 11	Diamonds for jewelry purposes	34	284.7	120.1
39152 15	Diamonds for industrial purposes	3	11.0	10.6
39152 31	Other natural precious and semiprecious stones and synthetic stones, including drilling of pearls	9		
39152 00	Lapidary work and diamond cutting and polishing, n.s.k.	(NA)	9.9	2.1
39150 00	Jewelers' materials and lapidary work, n.s.k., typically for establishments with 5 employees or more (see note)	(NA)	71.9	23.4
39150 02	Jewelers' materials and lapidary work, n.s.k., typically for establishments with less than 5 employees (see note)	(NA)	43.0	37.5

Note: In the 1977 Census of Manufactures, shipments data for establishments of small single-unit companies with up to 20 employees were estimated from administrative record data rather than data actually collected from respondents. The employment cutoff used for administrative records for each industry and the shipments figures are included in the code ending with "002." In both the 1977 and 1972 Censuses of Manufactures, products not completely identified on the standard forms were coded in the appropriate product class (5 digits) followed by "00" or, in some cases, to the appropriate product group code (4 digits) followed by "0 00."

- Represents zero. (NA) Not available. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards. (X) Not applicable.

[1]Value reported by all producers of product, not just those with shipments of $100,000 or more.

[2]For 1972, product code 39111 11 was included with product code 39111 14.

[3]In 1977, small establishments generally with 5 to 20 employees reported on short forms, which requested only product class totals. These data are included in codes ending with "00." Thus 1977 data for product codes (7 digits) may not be completely comparable with 1972 data.

[4]Excludes products made by establishments classified in Industry 3356, Nonferrous Rolling and Drawing, N.E.C. Historically, some establishments supplying jewelry manufacturing industry with precious metals have been erroneously classified in industry 3915; thus, 1977 data are not comparable with 1972 data.

Table 6b. Product Classes—Value of Shipments by All Producers by Geographic Area: 1977 and 1972

(Millions of dollars. Product classes covered are those that are economically significant and whose production is geographically dispersed, provided dispersion is not approximated by data in table 2. Also, product classes are not shown if they are miscellaneous or "not specified by type" classes. Statistics for some States are withheld because they are either less than $2 million in product class shipments or they disclose operations of individual companies in 1977)

Product class and geographic area	Value of product shipments	
	1977	1972
39111, JEWELRY MADE OF PLATINUM METALS AND KARAT GOLD		
United States	1,251.5	656.7

39150	Jewelers' materials and lapidary work, n.s.k.	114.9	(30.2)	(11.7)	(19.7)	(5.1)	60.8	(NA)	(NA)

(NA) Not available. n.s.k. Not specified by kind.

[1]Figures are estimates derived from a representative sample of manufacturing establishments canvassed in annual survey of manufactures and, therefore, may differ from results that would be obtained from a complete canvass of all manufacturing establishments. Standard errors associated with estimates are published in annual survey of manufactures volumes for this period. Figures in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data. Thus, at individual product class level, estimates may be of limited reliability; however, they may be combined with other product class totals into broader aggregates which are of acceptable reliability.

[2]Withheld because estimated figure is negative. This is consequence of using difference method of estimation (see Estimating Procedures in appendix B) and of improved establishment reporting that resulted in changing classification of shipments from n.s.k. code for 1972 Census to specified 5-digit product classes for this year. Four-digit total is best estimate, even though smaller than sum of 5-digit values.

Table 7. Materials Consumed by Kind: 1977 and 1972

(Includes quantity and cost of materials consumed or put into production by establishments classified only in this industry. For further explanation, see appendix A, Cost of materials)

1977 material code	Material	Unit of measure	1977		1972	
			Quantity[1]	Delivered cost (million dollars)	Quantity	Delivered cost[2] (million dollars)

	(Materials consumed data were not collected for industry 3915)					

n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards. (X) Not applicable.

[1]For some establishments, data have been estimated from central unit values, which are based on quantity-cost relationships of reported data. The following symbols are used when percentage of each quantity figure estimated in this manner equals or exceeds 10 percent of published figure: * indicates 10 to 19 percent estimated, ** indicates 20 to 29 percent estimated. If 30 percent or more is estimated, figure is replaced by (S).

[2]From 1972 Census of Manufactures Supplemental Inquiry: Consumption of Materials, Parts, Containers, and Supplies During 1972 (Form MA-131).

[3]Total cost of materials of establishments that did not report detailed materials data, including establishments that were not mailed a form and establishments reporting on short form that did not include material inquiry.

INDUSTRY STATISTICS

1a. Historical Statistics: 1977 and Earlier Years 5
1b. Selected Operating Ratios: 1977 and Earlier Years 7
2. Geographic Area: 1977 and 1972 8
3a. Summary Statistics: 1977 11
3b. Supplemental Statistics Based on Sample Estimates: 1977 12
4. Employment Size of Establishment: 1977 13
5a. Industry and Primary Product Class Specialization: 1977 14

PRODUCT STATISTICS

5b. Industry-Product Analysis—Value of Shipments for an Industry and Primary Product Shipments, and Specialization and Coverage Ratios: 1977, 1972, and 1967 15
5c. Industry-Product Analysis—Shipments by Product Class and Industry: 1977 16
6a. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1977 and 1972 18
6b. Product Classes—Value of Shipments by All Producers by Geographic Area: 1977 and 1972 22
6c. Product Classes—Value Shipped by All Producers: 1963, 1967, 1972 to 1977 24

MATERIAL STATISTICS

7. Materials Consumed by Kind: 1977 and 1972 25

DESCRIPTION OF INDUSTRIES

MUSICAL INSTRUMENTS AND PARTS; TOYS AND SPORTING GOODS

This report shows 1977 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code	Title
3931	Musical Instruments
3942	Dolls
3944	Games, Toys, and Children's Vehicles
3949	Sporting and Athletic Goods, N.E.C.

The industry statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishments as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments, but also their activities in the manufacture of secondary products as well as their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1a-5a) with product statistics (table 6a) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5b, which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

Small single-unit companies with up to 20 employees (the cutoff varied by industry), were excluded from the mail portion of the census. For these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated), data on payrolls and receipts were obtained from administrative records of other government agencies. The remaining statistics were developed from industry averages.

Establishment data were tabulated based on industry definitions contained in the 1972 Standard Industrial Classification Manual and its 1977 supplement.

INDUSTRY 3931, MUSICAL INSTRUMENTS

This industry comprises establishments primarily engaged in the manufacture of pianos, with or without player attachments, organs, other musical instruments, and parts and accessories for musical instruments.

The total value of shipments for establishments classified in the Musical Instruments industry amounted to $925 million in 1977, an increase of 50 percent from 1972. The value of shipments of products classified as primary to the industry was $879 million, an increase of 67 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $488 million in 1977, was 44 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 25.2 thousand employees, an increase of 3 percent from 1972. The leading States in employment were Illinois, Indiana, California, and New York, accounting for approximately 45 percent of the industry's 1977 employment.

Establishments of single-unit companies in this industry with up to 20 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 6 percent of total value of shipments.

INDUSTRY 3942, DOLLS

This industry comprises establishments primarily engaged in the manufacture of dolls, doll parts, and doll clothing. Establishments primarily engaged in the manufacture of stuffed toy animals are also included in this industry.

The total value of shipments for establishments classified in the Dolls industry amounted to $340 million in 1977, an increase of 71 percent from 1972. The value of shipments of products classified as primary to the industry was $508 million, an increase of 83 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $182 million in 1977, was 85 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 9.1 thousand employees, a decrease of 11 percent from 1972. The leading States in employment were New York, New Jersey, California, and Minnesota, accounting for approximately 70 percent of the industry's 1977 employment.

Establishments of single-unit companies in this industry with up to 10 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 9 percent of total value of shipments.

INDUSTRY 3944, GAMES, TOYS, AND CHILDREN'S VEHICLES

This industry comprises establishments primarily engaged in the manufacture of games and game sets for adults and children, such as chess, checkers, dominoes, puzzles, and mechanical and nonmechanical toys. This industry also includes establishments primarily engaged in the manufacture of toys, such as toy furniture, doll carriages and carts, construction sets, mechanical trains, toy guns and air rifles, and other mechanical games and toys; baby carriages and strollers; children's velocipedes and tricycles, coaster wagons, play cars, sleds, and other children's outdoor wheel goods and vehicles, except bicycles. Establishments primarily engaged in the manufacture of dolls are classified in industry 3942, sporting and athletic goods for children and adults in industry 3949, and bicycles in industry 3751.

The total value of shipments for establishments classified in the Games, Toys, and Children's Vehicles industry amounted to $2,720 million in 1977, an increase of 56 percent from 1972. The value of shipments of products classified as primary to the industry was $2,333 million, an increase of 55 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $1,545 million in 1977, was 58 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 53.1 thousand employees, a decrease of 14 percent from 1972. The leading States in employment were New York, California, Illinois, and Massachusetts, accounting for approximately 55 percent of the industry's 1977 employment.

Establishments of single-unit companies in this industry with up to 20 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 4 percent of total value of shipments.

INDUSTRY 3949, SPORTING AND ATHLETIC GOODS, N.E.C.

This industry comprises establishments primarily engaged in the manufacture of sporting and athletic goods, not elsewhere classified, such as fishing tackle; golf and tennis goods; baseball, football, basketball, and boxing equipment; roller skates and ice skates; gymnasium and playground equipment; billiard and pool tables; and bowling alleys and equipment. Establishments primarily engaged in the manufacture of athletic apparel are classified in major group 23, small arms ammunition in industry 3482, and firearms in industry 3484.

The total value of shipments for establishments classified in the Sporting and Athletic Goods, N.E.C. industry amounted to $2,425 million in 1977, an increase of 40 percent from 1972. The value of shipments of products classified as primary to the industry was $2,217 million, an increase of 44 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $1,274 million in 1977, was 38 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 57.2 thousand employees, a decrease of 6 percent from 1972. The leading States in employment were California, Illinois, Massachusetts, and New York, accounting for approximately 35 percent of the industry's 1977 employment. Data for Illinois and Massachusetts have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 7 percent of total value of shipments.

Table 1a. Historical Statistics for the Industry: 1977 and Earlier Years

[For explanation of terms, see appendix A]

Year[1]	Companies[2] (no.)	All establishments: Total (no.)	All establishments: With 20 employees or more (no.) - Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. r Revised. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]In annual survey of manufactures (ASM) years, data are estimates based on a representative sample of establishments canvassed annually and may differ from results of a complete canvass of all establishments. ASM publication shows percentage standard errors. Unless otherwise noted, for data prior to 1963, see 1963 Census of Manufactures, vol. II, table 1 of the Industry chapter.

[2]For the census, a company is defined as a business organization consisting of one establishment or more under common ownership or control.

[3]Industry was defined or redefined for 1972 Census of Manufactures, so data are available only for years shown.

[4]Data for 1967 and 1963 were derived from Table 8, General Statistics for Establishments by Industry Specialization and Primary Product Class Specialization, in vol. II of the 1967 and 1963 Censuses of Manufactures. Separate data for other years are not available.

[5]Data either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data, thus these estimates may be of limited reliability.

[6]Estimate for new capital expenditures has associated standard error of 15 percent or more and may be of limited reliability. Estimates for other data items are of acceptable reliability.

[7]Minimum percentage; exact percentage withheld to avoid disclosing operations of individual companies.

[8]Relationships are not meaningful because of predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

[9]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[10]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

Table 1b. Selected Operating Ratios for the Industry: 1977 and Earlier Years

[For explanation of terms, see appendix A]

Year	Payroll per employee (dollars)	Assets per employee (dollars)	Production workers as percent of total employment (percent)	Annual hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials as percent of value of shipments (percent)	Cost of materials and payroll as percent of value of shipments (percent)	Assets as percent of value of shipments (percent)	Value added per employee (dollars)	Payroll as percent of value added (percent)	Value added per production worker hour (dollars)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown for those States where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2]Statistics for some producing States are withheld to avoid disclosing figures for individual companies. However, for such States with 150 employees or more, number of establishments is shown and employment size range is indicated by one of the following symbols: AA—150 to 249 employees; BB—250 to 499 employees; CC—500 to 999 employees; EE—1,000 to 2,499 employees; FF—2,500 employees or more.

[3]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[4]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[5]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 3a. Summary Statistics for the Industry: 1977

[For explanation of terms, see appendix A]

Item	Unit of measure	Musical instruments (SIC 3931)	Dolls (SIC 3942)	Games, toys, and children's vehicles (SIC 3944)	Sporting and athletic goods, n.e.c. (SIC 3949)
Primary product specialization ratio[1]	percent	98	94	86	95
Coverage ratio[2]	do	99	59	93	94
All establishments	number	450	231	800	1 879
With 1 to 19 employees	do	323	143	549	1 383
With 20 to 99 employees	do	62	61	147	356
With 100 employees or more	do	65	27	104	140
All employees, average for year	1,000	25.2	9.1	53.1	57.2
Payroll for year, all employees	mil. dol.	259.7	65.3	520.6	525.9
Production workers:					
Average for year	1,000	20.6	8.0	39.2	46.1
March	do	20.8	6.0	33.5	46.5
May	do	20.4	7.5	37.9	46.8
August	do	20.8	9.4	45.0	45.6
November	do	20.2	8.8	40.4	45.2
Hours	millions	38.2	13.3	73.1	85.9
January to March	do	9.7	2.5	15.0	21.3
April to June	do	9.8	3.3	18.5	22.5
July to September	do	8.9	4.0	20.6	20.7
October to December	do	9.8	3.6	19.1	21.4
Wages	mil. dol.	178.2	43.5	295.0	358.6
Cost of materials, etc.	do	428.9	171.6	1 205.6	1 182.0
Materials, parts, containers, etc., consumed	do	387.8	142.7	1 024.2	971.4
Resales	do	24.4	12.5	124.1	162.2
Fuels consumed	do	3.2	1.1	7.5	11.3
Purchased electric energy	do	6.1	2.0	20.0	17.6
Contract work	do	7.4	13.2	29.9	19.5
Value of shipments, including resales	do	924.9	340.2	2 719.7	2 425.2
Value of resales	do	34.6	17.2	201.4	219.6
Value added by manufacture	do	488.2	181.6	1 544.6	1 273.6
Manufacturers' inventories:					
Beginning of year	do	245.4	46.6	383.2	546.2
Finished products	do	84.2	20.6	173.0	242.5
Work in process	do	85.6	9.5	67.3	127.3
Materials, supplies, fuel, etc.	do	75.6	16.4	142.9	176.4
End of year	do	243.2	62.5	437.7	579.1
Finished products	do	68.3	28.4	190.3	259.7
Work in process	do	93.7	14.8	80.6	140.6
Materials, supplies, fuel, etc.	do	81.3	19.3	166.8	178.8
Capital expenditures for plant and equipment	do	14.4	6.6	80.8	70.9
New capital expenditures	do	13.8	6.4	78.5	62.7
New buildings and other structures	do	2.7	1.4	19.5	12.3
New machinery and equipment	do	11.2	5.0	58.9	50.4
Used capital expenditures	do	0.5	0.2	2.3	8.2

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Represents ratio of primary product shipments to total product shipments (primary and secondary, excluding miscellaneous receipts) for establishments classified in industry.

[2]Represents ratio of primary products shipped by establishments classified in industry to total shipments of such products by all manufacturing establishments, wherever classified.

[3]Relationships are not meaningful because of predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

[4]Minimum percentage; exact percentage withheld to avoid disclosing operations of individual companies.

[5]Data for value of shipments represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[6]Data for value of shipments represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[7]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 3b. Supplemental Industry Statistics Based on Sample Estimates: 1977

(For explanation of terms, see appendix A. For description of annual survey of manufactures (ASM), see appendix B)

Item	Musical instruments (SIC 3931)		Dolls (SIC 3942)		Games, toys, and children's vehicles (SIC 3944)		Sporting and athletic goods, n.e.c. (SIC 3949)	
	Amount (million dollars)	Standard error of estimate[1] (percent)	Amount (million dollars)	Standard error of estimate[1] (percent)	Amount (million dollars)	Standard error of estimate[1] (percent)	Amount (million dollars)	Standard error of estimate[1] (percent)
Purchased services:								
Cost of purchased services for repair of--								
Buildings and other structures	1.9	10	(D)	44	3.8	1	(2.6)	15
Response coverage ratio[2] (percent)	57	(X)	54	(X)	73	(X)	60	(X)

Retirements	(0.7)	20	(0.1)	44	5.5	13	(7.4)	30
End of year	70.1	5	18.3	12	215.7	4	192.0	5
Machinery and equipment:								
Beginning of year	94.3	3	(23.8)	16	368.1	4	(362.4)	18
New capital expenditures	(14.7)	25	(3.8)	19	57.9	3	70.0	14
Automobiles, trucks, etc., for highway use[3]	(D)	(A)	(D)	(A)	(1.6)	(A)	(3.0)	(A)
Computers and peripheral data processing equipment[3]	(D)	(A)	(D)	(A)	(1.1)	(A)	(1.6)	(A)
All other[3]	(13.2)	(A)	(2.7)	(A)	47.0	2	57.3	3
New machinery and equipment, n.s.k.[4]	(0.5)	(A)	(0.7)	(A)	(8.2)	(A)	(8.2)	(A)
Used capital expenditures	(0.6)	17	(0.1)	82	1.4	5	(7.9)	18
Retirements	4.8	6	(1.1)	25	31.1	6	(37.7)	29
End of year	104.7	5	(26.6)	15	396.3	3	402.7	5
Total gross value of depreciable assets:								
Beginning of year	162.8	3	41.2	10	567.1	3	(541.7)	18
New capital expenditures	(16.9)	22	(4.7)	21	79.4	4	85.9	13
Used capital expenditures	(0.6)	16	(0.2)	66	2.1	3	(12.2)	19
Retirements	55	7	(1.3)	22	36.6	6	(45.2)	29
End of year	174.8	3	44.8	9	612.0	3	(594.7)	5
Depreciation charges during 1977	12.4	4	3.8	13	55.7	4	51.4	6
Buildings and other structures	2.9	4	(1.0)	16	8.4	5	9.1	9
Machinery and equipment	9.6	5	(2.8)	15	47.3	4	42.2	6

Note: Data for total new capital expenditures, new building expenditures, new machinery expenditures, and total used expenditures are shown in table 3a, as well as in this table. The figures in table 3a are census universe totals and may differ form the annual survey of manufactures (ASM) sample estimates shown in this table. The figures in this table represent the best estimates of year-to-year change as measured by the continuing ASM sample. However, they are subject to sampling error and, hence, as estimates of level, are not as reliable as the universe figures shown in table 3a.

- Represents zero. (A) Indicates standard errors of 100 percent of more. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. (X) Not applicable. (Z) Less than 50 thousand dollars.

[1]For a description of the standard error of estimate, see the section "Qualifications of the Data" in appendix B. Figures in parentheses have standard errors of 15 percent or more.

[2]This is a measure of the extent to which respondents reported for each item. It is derived for each item by calculating the ratio of the weighted employment (establishment data multiplied by sample weight; see appendix B) for those sample establishments that reported the specific inquiry to the weighted total employment for all sample establishments classified in the industry.

[3]The standard errors for the detailed categories of new machinery and equipment expenditures were not directly calculated. However, the actual figure is not expected to exceed the estimated figure shown.

[4]This category represents the total machinery and equipment expenditures for establishments that did not break down their expenditures for the three specific categories.

Table 4. Industry Statistics by Employment Size of Establishment: 1977

[For explanation of terms, see appendix A]

Industry and employment size class	E[1]	All establishments (no.)	All employees: Number (1,000)	All employees: Payroll (million dollars)	Production workers: Number (1,000)	Production workers: Hours (millions)	Production workers: Wages (million dollars)	Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	New capital expenditures (million dollars)	End-of-year inventories (million dollars)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. Data for this item are included in figures in parentheses above. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2]Report forms were not mailed to small single-unit companies with up to 20 employees (cutoff varied by industry). Payroll and sales data for 1977 were obtained from administrative records supplied by other agencies of the Federal Government. These data were then used in conjunction with industry averages to estimate the balance of items shown. Data are also included in respective size classes shown.

[3]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[4]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[5]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 5a. Industry Statistics by Industry and Primary Product Class Specialization: 1977

[Table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. Measures of plant specialization shown are (1) industry specialization: ratio of primary product shipments to total product shipments (primary plus secondary, excluding miscellaneous receipts) for the establishment; and (2) product class specialization: ratio of largest primary product class shipments to total product shipments (primary plus secondary, excluding miscellaneous receipts) for the establishment. See appendix for method of computing ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for various reasons; e.g., to avoid disclosing operations of individual companies. For explanation of terms, see appendix A]

Industry or product class code	Industry or product class by percent of specialization	All establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	New capital expenditures (million dollars)
			Number (1,000)	Payroll (million dollars)	Number (1,000)	Hours (millions)	Wages (million dollars)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[2]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

Table 5b. **Industry-Product Analysis — Value of Shipments for an Industry and Primary Product Shipments, and Specialization and Coverage Ratios: 1977, 1972, and 1967**

(An establishment is assigned to an industry based on shipment values of products representing largest amount considered primary to an industry. Frequently, establishment shipments comprise mixtures of products assigned to an industry (primary), those considered primary to other industries (secondary), and receipts for activities such as merchandising or contract work. Columns A-D show this product pattern for an industry, and column E shows primary product specialization ratio. The extent to which an industry's primary products are shipped by establishments classified in and out of an industry is shown in columns F-H and coverage ratio is shown in column I. For explanation of terms, see appendix A)

Table 5c. Industry-Product Analysis—Shipments by Product Class and Industry: 1977

(Millions of dollars. Table shows where products of an industry (referred to as primary and listed in table 6a) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Only those product groups that have at least $2 million in shipments from establishments classified in one of industries included in this chapter are shown. Read across to determine where products of industries in this chapter are produced. To extent that some of primary products are made in industries not included in this chapter, value of such shipments is shown in "Other industries" column. Specified "Other industries" are listed at end of table if they account for more than $5 million of products primary to this chapter. For explanation of terms, see appendix A)

Table 5c. Industry-Product Analysis—Shipments by Product Class and Industry: 1977—Con.

(Millions of dollars. Table shows where products of an industry (referred to as primary and listed in table 6a) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Only those product groups that have at least $2 million in shipments from establishments classified in one of industries included in this chapter are shown. Read across to determine where products of industries in this chapter are produced. To extent that some of primary products are made in industries not included in this chapter, value of such shipments is shown in "Other industries" column. Specified "Other industries" are listed at end of table if they account for more than $5 million of products primary to this chapter. For explanation of terms, see appendix A)

1977 product code	Industry and miscellaneous receipts	Other industries	1977 product code	Industry and miscellaneous receipts	Other industries
	Other industries with over $5 million shipments of primary products:			Other industries with over $5 million shipments of primary products-Con.

	Lawn tennis equipment:						
39495 82	Rackets, all types	Thousands	11	3,409	52.6	(X)	(5)
39495 83	Tennis balls	1,000 dozens	4	9,076	63.1		
39495 84	Other tennis equipment and accessories, including frames and nets, but excluding tennis clothing and shoes		16	(X)	19.4		
39495 85	Archery equipment		23	(X)	63.7	(X)	21.9
39495 90	Football protective equipment (helmets, shoulder pads, hip pads, kidney pads, thigh pads, etc.)		13	(X)	29.8	(X)	42.1
39495 91	Body protective equipment of all types for baseball, soccer, lacrosse, hockey, fencing, and other sports, including helmets, masks, chest pads, shoulder pads, kidney pads, skin guards, mouth guards, etc		21	(X)	15.8		
39595 93	Football, baseball, and soccer equipment, n.e.c., including track, field, and miscellaneous athletic field equipment, goal posts and nets, training devices for batting and pitching, javelins, shot puts, etc		23	(X)	26.0	(X)	9.5
39495 95	Wading pools and other above ground swimming pools under 15 feet in diameter, not filtered, including plastics and metal-walled types	Thousands	7	(S)	13.4	(X)	6.7
39495 97	Above ground swimming pools, 15 feet in diameter and over, filtered (completely manufactured)	Thousands	6	(S)	46.3	(X)	28.7
39495 98	Other sporting and athletic goods, including table tennis goods, water skiing equipment (except skis), diving boards, other water sports equipment, n.e.c., skeet and shooting range equipment including decoys, clay pigeons, trap target launchers, etc. (excluding firearms, ammunition), badminton rackets, shuttlecocks and related equipment, squash equipment, and other supplies (excluding athletic clothing and shoes)		76	(X)	141.2	(X)	206.6
39495 00	Other sporting and athletic goods, n.s.k.		(NA)	(X)	50.1	(X)	24.3
39490 00	Sporting and athletic goods, n.s.k., typically for establishments with 5 employees or more (see note)		(NA)	(X)	179.3	(X)	109.8
39490 02	Sporting and athletic goods, n.s.k., typically for establishments with less than 5 employees (see note)		(NA)	(X)	64.1	(X)	65.6

Note: In 1977 Census of Manufactures, shipments data for establishments of small single-unit companies with up to 20 employees were estimated from administrative records data rather than data actually collected from respondents. Employment cutoff used for administrative records for each industry and shipments figures are included in code ending with "002." In both 1977 and 1972 Censuses of Manufactures, products not completely identified on standard forms were coded in appropriate product class (5 digits) followed by "00" or, in some cases, to appropriate product group code (4 digits) followed by "0 00."

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. N.E.C. Not elsewhere classified. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards. (X) Not applicable.

[1]Quantity and value reported by all producers of product, not just those with shipments of $100,000 or more.

[2]For some establishments, data have been estimated from central unit values, which are based on quantity-value relationships of reported data. The following symbols are used when percentage of each quantity figure estimated in this manner equals of exceeds 10 percent of published figure: * indicates 10 to 19 percent estimated, ** indicates 20 to 29 percent estimated. If 30 percent or more is estimated, figure is replaced by (S).

[3]For 1972 product codes 39314 23, 39314 26, and 39314 88 were included with 39314 98.

[4]Includes electronic and video games.

[5]For 1972 product codes 39495 53, 39495 54, 39495 74, 39495 82, 39495 83, and 39495 84 were included with 39495 98.

Table 6b. Product Classes—Value of Shipments by All Producers by Geographic Area: 1977 and 1972

(Millions of dollars. Product classes covered are those that are economically significant and whose production is geographically dispersed, provided dispersion is not approximated by data in table 2. Also, product classes are not shown if they are miscellaneous or "not specified by type" classes. Statistics for some States are withheld because they are either less than $2 million in product shipments or they disclose operations of individual companies in 1977)

[1]Figures are estimates derived from a representative sample of manufacturing establishments canvassed in annual survey of manufactures and, therefore, may differ from the results that would be obtained from a complete canvass of all manufacturing establishments. Standard errors associated with estimates are published in annual survey of manufactures volumes for this period. Figures in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data. Thus, at individual product class level, estimates may be of limited reliability; however, they may be combined with other product class totals into broader aggregates which are of acceptable reliability.

Table 7. Materials Consumed by Kind: 1977 and 1972

(Includes quantity and cost of materials consumed or put into production by establishments classified only in this industry. For further explanation, see appendix A, Cost of materials)

1977 material code	Material	Unit of measure	1977		1972

TABLES

INDUSTRY STATISTICS

1a. Historical Statistics: 1977 and Earlier Years 7
1b. Selected Operating Ratios: 1977 and Earlier Years 10
2. Geographic Area: 1977 and 1972 12
3a. Summary Statistics: 1977 15
3b. Supplemental Statistics Based on Sample Estimates: 1977 . . . . . 16A
4. Employment Size of Establishment: 1977 17
5a. Industry and Primary Product Class Specialization: 1977 19

PRODUCT STATISTICS

5b. Industry-Product Analysis—Value of Shipments for an Industry and Primary Product Shipments, and Specialization and Coverage Ratios: 1977, 1972, and 1967 20
5c. Industry-Product Analysis—Shipments by Product Class and Industry: 1977 21
6a. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1977 and 1972 22
6b. Product Classes—Value of Shipments by All Producers by Geographic Area: 1977 and 1972 25
6c. Product Classes—Value Shipped by All Producers: 1963, 1967, 1972 to 1977 26

MATERIAL STATISTICS

7. Materials Consumed by Kind: 1977 and 1972 27

DESCRIPTION OF INDUSTRIES

OFFICE SUPPLIES, COSTUME JEWELRY, AND NOTIONS

This report shows 1977 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code	Title
3951	Pens and Mechanical Pencils
3952	Lead Pencils and Art Goods
3953	Marking Devices
3955	Carbon Paper and Inked Ribbons
3961	Costume Jewelry
3962	Artificial Flowers
3963	Buttons
3964	Needles, Pins, and Fasteners

The industry statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments, but also their activities in the manufacture of secondary products as well as their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1a-5a) with product statistics (table 6a) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5b, which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

Small single-unit companies with up to 20 employees (the cutoff varied by industry), were excluded from the mail portion of the census. For these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated), data on payrolls and receipts were obtained from administrative records of other government agencies. The remaining statistics were developed from industry averages.

Establishment data were tabulated based on industry definitions contained in the 1972 Standard Industrial Classification Manual and its 1977 supplement.

INDUSTRY 3951, PENS AND MECHANICAL PENCILS

This industry comprises establishments primarily engaged in the manufacture of pens, pen points, fountain pens, ballpoint pens, refill cartridges, porous tipped felt-tip markers, and parts.

The total value of shipments for establishments classified in the Pens and Mechanical Pencils industry amounted to $670 million in 1977, an increase of 116 percent from 1972. The value of shipments of products classified as primary to the industry was $563 million, an increase of 81 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $420 million in 1977, was 96 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 13.2 thousand employees, an increase of 21 percent from 1972. The leading States in employment were California, New Jersey, Connecticut, and Iowa, accounting for approximately 50 percent of the industry's 1977 employment. Data for Connecticut and Iowa have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

Establishments of single-unit companies in this industry with up to 20 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 4 percent of total value of shipments.

INDUSTRY 3952, LEAD PENCILS AND ART GOODS

This industry comprises establishments primarily engaged in the manufacture of lead pencils, pencil leads, and crayons; and materials and equipment for artwork, such as airbrushes, drawing tables and boards, palettes, sketch boxes, pantographs, artists' colors and waxes, pyrography goods, drawing inks, and drafting materials. Establishments primarily engaged in the manufacture of mechanical pencils are classified in industry 3951, and drafting instruments in industry 3811.

The total value of shipments for establishments classified in the Lead Pencils and Art Goods industry amounted to $276 million in 1977, an increase of 39 percent from 1972. The value of shipments of products classified as primary to the industry was $268 million, an increase of 54 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $146 million in 1977, was 34 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 6.6 thousand employees, a decrease of 7 percent from 1972. The leading States in employment were Tennessee, Pennsylvania, and New York, accounting for approximately 60 percent of the industry's 1977 employment.

Establishments of single-unit companies in this industry with up to 10 employees were excluded from the mail portion of the

census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 4 percent of total value of shipments.

INDUSTRY 3953, MARKING DEVICES

This industry comprises establishments primarily engaged in the manufacture of rubber and metal hand stamps, dies, and seals; steel letters and figures; and stencils for use in painting or marking. Establishments primarily engaged in the manufacture of felt-tip markers are classified in industry 3951.

The total value of shipments for establishments classified in the Marking Devices industry amounted to $249 million in 1977, an increase of 38 percent from 1972. The value of shipments of products classified as primary to the industry was $216 million, an increase of 32 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $160 million in 1977, was 32 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 7.4 thousand employees, a decrease of 9 percent from 1972. The leading States in employment were Illinois, California, and New York, accounting for approximately 45 percent of the industry's 1977 employment.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 13 percent of total value of shipments.

INDUSTRY 3955, CARBON PAPER AND INKED RIBBONS

This industry comprises establishments primarily engaged in the manufacture of carbon paper for business machines, salesbooks, etc.; spirit or gelatin process and other stencil paper; and inked or carbon ribbons for business machines.

The total value of shipments for establishments classified in the Carbon Paper and Inked Ribbons industry amounted to $344 million in 1977, an increase of 47 percent from 1972. The value of shipments of products classified as primary to the industry was $489 million, an increase of 54 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $142 million in 1977, was 29 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 4.6 thousand employees, a decrease of 18 percent from 1972. The leading States in employment were New York, California, and New Jersey, accounting for approximately 45 percent of the industry's 1977 employment.

Establishments of single-unit companies in this industry with up to 10 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 4 percent of total value of shipments.

INDUSTRY 3961, COSTUME JEWELRY

This industry comprises establishments primarily engaged in the manufacture of costume jewelry, costume novelties, and ornaments made of all materials except precious metal, precious or semiprecious stones, and rolled gold plate and gold-filled materials. Establishments primarily engaged in the manufacture of jewelry from precious metals, such as platinum and karat gold are classified in industry 3911.

The total value of shipments for establishments classified in the Costume Jewelry industry amounted to $817 million in 1977, an increase of 73 percent from 1972. The value of shipments of products classified as primary to the industry was $782 million, an increase of 77 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments. The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $485 million in 1977, was 76 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 25.0 thousand employees, an increase of 17 percent from 1972. The leading States in employment were Rhode Island and New York, accounting for approximately 65 percent of the industry's 1977 employment.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 6 percent of total value of shipments.

INDUSTRY 3962, ARTIFICIAL FLOWERS

This industry comprises establishments primarily engaged in the manufacture of artificial trees (including Christmas trees), flowers, fruits, and foliage made from all materials except glass; and in producing fancy feathers, plumes, and articles made principally of feathers and plumes. Establishments primarily engaged in the manufacture of artificial flowers, fruits, and foliage from glass are classified in industry 3231.

The total value of shipments for establishments classified in the Artificial Flowers industry amounted to $156 million in 1977, an increase of 44 percent from 1972. The value of shipments of products classified as primary to the industry was $160 million, an increase of 57 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $82 million in 1977, was 43 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 4.4 thousand employees, a decrease of 8 percent from 1972. The leading States in employment were New York, California, New Jersey, and Texas, accounting for approximately 50 percent of the industry's 1977 employment.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 9 percent of total value of shipments.

INDUSTRY 3963, BUTTONS

This industry comprises establishments primarily engaged in the manufacture of buttons, button parts, and button blanks and molds of all materials, except precious metal and precious or semiprecious stones.

The total value of shipments for establishments classified in the Buttons industry amounted to $95 million in 1977, an increase of 2 percent from 1972. The value of shipments of products classified as primary to the industry was $106 million, an increase of 3 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $50 million in 1977, was 3 percent below value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 3.2 thousand employees, a decrease of 20 percent from 1972. The leading State in employment was New York, accounting for approximately 50 percent of the industry's 1977 employment. This same State was in the forefront for 1972 when it accounted for approximately 60 percent of the industry's employment.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 10 percent of total value of shipments.

INDUSTRY 3964, NEEDLES, PINS, AND FASTENERS

This industry comprises establishments primarily engaged in the manufacture of notions, such as machine and hand needles, pins, hooks and eyes, eyelets, buckles, and slide and snap fasteners.

The total value of shipments for establishments classified in the Needles, Pins, and Fasteners industry amounted to $674 million in 1977, an increase of 17 percent from 1972. The value of shipments of products classified as primary to the industry was $634 million, an increase of 14 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $375 million in 1977, was 12 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 17.7 thousand employees, a decrease of 12 percent from 1972. The leading States in employment were New York, Connecticut, Georgia, and Pennsylvania, accounting for approximately 60 percent of the industry's 1977 employment. Data for Georgia and Pennsylvania have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

Establishments of single-unit companies in this industry with up to 20 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 8 percent of total value of shipments.

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. r Revised. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1] In annual survey of manufactures (ASM) years, data are estimates based on a representative sample of establishments canvassed annually and may differ from results of a complete canvass of all establishments. ASM publication shows percentage standard errors. Unless otherwise noted, for data prior to 1963, see 1963 Census of Manufactures, vol. II, table 1 of the Industry chapter.

[2] For the census, a company is defined as a business organization consisting of one establishment or more under common ownership or control.

[3] Industry was defined or redefined for 1972 Census of Manufactures, so data are available only for years shown.

[4] Data for 1967 and 1963 were derived from Table 8, General Statistics for Establishments by Industry Specialization and Primary Product Class Specialization, in vol. II of the 1967 and 1963 Censuses of Manufactures. Separate data for other years are not available.

[5] Data either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data; thus these estimates may be of limited reliability.

[6] Estimate for new capital expenditures has associated standard error of 15 percent or more and may be of limited reliability. Estimates for other data items are of acceptable reliability.

[7] Minimum percentage; exact percentage withheld to avoid disclosing operations of individual companies.

[8] Relationships are not meaningful because of predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

[9]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[10]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

Table 1b. Selected Operating Ratios for the Industry: 1977 and Earlier Years

[For explanation of terms, see appendix A]

Year	Payroll per employee (dollars)	Assets per employee (dollars)	Production workers as percent of total employment (percent)	Annual hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials as percent of value of shipments (percent)	Cost of materials and payroll as percent of value of shipments (percent)	Assets as percent of value of shipments (percent)	Value added per employee (dollars)	Payroll as percent of value added (percent)	Value added per production worker hour (dollars)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown for those States where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2]Statistics for some producing States are withheld to avoid disclosing figures for individual companies. However, for such States with 150 employees or more, number of establishments is shown and employment size range is indicated by one of the following symbols: AA—150 to 249 employees; BB—250 to 499 employees; CC—500 to 999 employees; EE—1,000 to 2,499 employees; FF—2,500 employees or more.

[3]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[4]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[5]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 3a. Summary Statistics for the Industry: 1977

[For explanation of terms, see appendix A]

Item	Unit of measure	Pens, and mechanical pencils (SIC 3951)	Lead pencils and art goods (SIC 3952)	Marking devices (SIC 3953)	Carbon paper and inked ribbons (SIC 3955)	Costume jewelry (SIC 3961)	Artificial flowers (SIC 3962)	Buttons (SIC 3963)	Needles, pins, and fasteners (SIC 3964)
Primary product specialization ratio[1]	percent	85	85	85	96	92	98	98	92
Coverage ratio[2]	do	94	79	88	64	89	91	82	95
All establishments	number	141	134	612	100	847	232	159	275

New buildings and other structures	do	9.1	1.8	0.8	0.9	7.8	1.0	0.3	3.0
New machinery and equipment	do	23.7	9.0	4.7	5.3	9.8	1.7	1.2	19.0
Used capital expenditures	do	1.2	0.1	0.4	1.4	0.6	0.8	0.2	12.9

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Represents ratio of primary product shipments to total product shipments (primary and secondary, excluding miscellaneous receipts) for establishments classified in industry.

[2]Represents ratio of primary products shipped by establishments classified in industry to total shipments of such products by all manufacturing establishments, wherever classified.

[3]Relationships are not meaningful because of predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

[4]Minimum percentage; exact percentage withheld to avoid disclosing operations of individual companies.

[5]Data for value of shipments represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[6]Data for value of shipments represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[7]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Machinery and equipment	4.9	6	1.1	9	1.8	9	14.2	3

Note: Data for total new capital expenditures, new building expenditures, new machinery expenditures, and total used expenditures are shown in table 3a, as well as in this table. The figures in table 3a are census universe totals and may differ from the annual survey of manufactures (ASM) sample estimates shown in this table. The figures in this table represent the best estimates of year-to-year change as measured by the continuing ASM sample. However, they are subject to sampling error and, hence, as estimates of level, are not as reliable as the universe figures shown in table 3a.

- Represents zero. (A) Indicates standard errors of 100 percent or more. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.s.k. Not specified by kind. (X) Not applicable. (Z) Less than 50 thousand dollars.

[1]For a description of the standard error of estimate, see the section "Qualifications of the Data" in appendix B. Figures in parentheses have standard errors of 15 percent or more.

[2]This is a measure of the extent to which respondents reported for each item. It is derived for each item by calculating the ratio of the weighted employment (establishment data multiplied by sample weight; see appendix B) for those sample establishments that reported the specific inquiry to the weighted total employment for all sample establishments classified in the industry.

[3]The standard errors for the detailed categories of new machinery and equipment expenditures were not directly calculated. However, the actual figure is not expected to exceed the estimated figure shown.

[4]This category represents the total machinery and equipment expenditures for establishments that did not break down their expenditures for the three specific categories.

Table 4. Industry Statistics by Employment Size of Establishment: 1977

[For explanation of terms, see appendix A]

Industry and employment size class	E[1]	All establishments (no.) Covered by administrative records[2]	E0	135	0.9	7.2	0.7	1.2	4.8	18.3	13.5	31.8	0.7	4.8

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. Data for this item are included in figures in parentheses above. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2]Report forms were not mailed to small single-unit companies with up to 20 employees (cutoff varied by industry). Payroll and sales data for 1977 were obtained from administrative records supplied by other agencies of the Federal Government. These data were then used in conjunction with industry averages to estimate the balance of items shown. Data are also included in respective size classes shown.

[3]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[4]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[5]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 5a. Industry Statistics by Industry and Primary Product Class Specialization: 1977

[Table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. Measures of plant specialization shown are (1) industry specialization: ratio of primary product shipments to total product shipments (primary plus secondary, excluding miscellaneous receipts) for the establishment; and (2) product class specialization: ratio of largest primary product class shipments to total product shipments (primary plus secondary, excluding miscellaneous receipts) for the establishment. See appendix for method of computing ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for various reasons; e.g., to avoid disclosing operations of individual companies. For explanation of terms, see appendix A]

Industry or product class code	Industry or product class by percent of specialization	All establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	New capital expenditures (million dollars)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[2]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

Table 5b. **Industry-Product Analysis—Value of Shipments for an Industry and Primary Product Shipments, and Specialization and Coverage Ratios: 1977, 1972, and 1967**

(An establishment is assigned to an industry based on shipment values of products representing largest amount considered primary to an industry. Frequently, establishment shipments comprise mixtures of products assigned to an industry (primary), those considered primary to other industries (secondary), and receipts for activities such as merchandising or contract work. Columns A-D show this product pattern for an industry, and column E shows primary product specialization ratio. The extent to which an industry's primary products are shipped by establishments classified in and out of an industry is shown in columns F-H and coverage ratio is shown in column I. For explanation of terms, see appendix A)

Table 5c. Industry-Product Analysis—Shipments by Product Class and Industry: 1977

(Millions of dollars. Table shows where products of an industry (referred to as primary and listed in table 6a) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Only those product groups that have at least $2 million in shipments from establishments classified in one of industries included in this chapter are shown. Read across to determine where products of industries in this chapter are produced. To extent that some of primary products are made in industries not included in this chapter, value of such shipments is shown in "Other industries" column. Specified "Other industries" are listed at end of table if they account for more than $5 million of products primary to this chapter. For explanation of terms, see appendix A)

1977 product code	Product group, product class, and miscellaneous receipts	All industries	Pens and mechanical pencils (SIC 3951)	Lead pencils and art goods (SIC 3952)	Marking devices (SIC 3953)	Carbon paper and inked ribbons (SIC 3955)	Costume jewelry (SIC 3961)	Artificial flowers (SIC 3962)	Buttons (SIC 3963)	Needles, pins, and fasteners (SIC 3964)	Other industries

Footnotes are on next page.

Table 6a. **Products and Product Classes — Quantity and Value of Shipments by All Producers: 1977 and 1972** - Con.

Note: In 1977 Census of Manufactures, shipments data for establishments of small single-unit companies with up to 20 employees were estimated from administrative records data rather than data actually collected from respondents. Employment cutoff used for administrative records for each industry and shipments figures are included in code ending with "002." In both 1977 and 1972 Censuses of Manufactures, products not completely identified on standard forms were coded in appropriate product class (5 gigits) followed by "00" or, in some cases, to appropriate product group code (4 digits) followed by "0 00."

- Represents zero. (NA) Not available. n.s.k. Not specified by kind. [r]Revised. (S) Withheld because estimate did not meet publication standards. (X) Not applicable.

[1]Quantity and value reported by all producers of product, not just those with shipments of $100,000 or more.

[2]For some establishments, data have been estimated from central unit values, which are based on quantity-value relationships of reported data. The following symbols are used when percentage of each quantity figure estimated in this manner equals or exceeds 10 percent of published figure: * indicates 10 to 19 percent estimated, ** indicates 20 to 29 percent estimated. If 30 percent or more is estimated, figure is replaced by (S).

[3]For 1972, product codes 39510 01, 39510 05, and 39510 06 were included with product code 39510 63.

[4]Product code 39552 41 was included with product code 39552 98.

Table 6b. **Product Classes — Value of Shipments by All Producers by Geographic Area: 1977 and 1972**

(Millions of dollars. Product classes covered are those that are economically significant and whose production is geographically dispersed, provided dispersion is not approximated by data in table 2. Also, product classes are not shown if they are miscellaneous or "not specified by type" classes. Statistics for some States are withheld because they are either less than $2 million in product class shipments or they disclose operations of individual companies in 1977)

Product class and geographic area	Value of product shipments	
	1977	1972
39521, WOOD-CASED PENCILS, CRAYONS, AND CHALK		
United States	90.6	63.1

(NA) Not available. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards.

[1]Figures are estimates derived from a representative sample of manufacturing establishments canvassed in annual survey of manufactures and, therefore, may differ from results that would be obtained from a complete canvass of all manufacturing establishments. Standard errors associated with estimates are published in annual survey of manufactures volumes for this period. Figures in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data. Thus, at individual product class level, estimates may be of limited reliability; however, they may be combined with other product class totals into broader aggregates which are of acceptable reliability.

[2]Withheld because estimated value derived is a negative figure. This is a consequence of using difference method of estimation and of improved establishment reporting that resulted in changing classification of its shipments from the n.s.k. code in the 1972 Census of Manufactures to specified 5-digit product classes in current year. 4-digit total shown for this group of product classes is considered to be best estimate of totals, even though it is smaller than sum of individual 5-digit product class values.

Table 7. Materials Consumed by Kind: 1977 and 1972

(Includes quantity and cost of materials consumed or put into production by establishments classified only in this industry. For further explanation, see appendix A, Cost of materials)

Note: Prior to 1977, materials consumed were not collected for industries 3951 and 3955.

(D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.s.k. Not specified by kind.
(S) Withheld because estimate did not meet publication standards. (X) Not applicable.

[1]Total cost of materials of establishments that did not report detailed materials data, including establishments that were not mailed a form.

[2]For some establishments, data have been estimated from central unit values, which are based on quantity-cost relationships of reported data. The following symbols are used when percentage of each quantity figure estimated in this manner equals or exceeds 10 percent of published figure: * indicates 10 to 19 percent estimated, ** indicates 20 to 29 percent estimated. If 30 percent or more is estimated, figure is replaced by (S).

[3]For 1972, material codes 220101, 282104, 335001, 346901, and 396401 were included with material code 970099 for industry 3963.

[4]For 1977, material codes 220101 and 396401 were included with material code 970099 for industry 3963.

[5]From 1972 Census of Manufactures Supplemental Inquiry: Consumption of Materials, Parts, Containers, and Supplies During 1972 (Form MA-131).

[6]For 1972, data for material codes 282104 and 346901 were included with material code 970099.

Description of Industries. 2

TABLES

INDUSTRY STATISTICS

1a. Historical Statistics: 1977 and Earlier Years 5
1b. Selected Operating Ratios: 1977 and Earlier Years. 7
2. Geographic Area: 1977 and 1972 9
3a. Summary Statistics: 1977 12
3b. Supplemental Statistics Based on Sample Estimates: 1977. 13
4. Employment Size of Establishment: 1977 14
5a. Industry and Primary Product Class Specialization: 1977 16

PRODUCT STATISTICS

5b. Industry-Product Analysis—Value of Shipments for an Industry and Primary Product Shipments, and Specialization and Coverage Ratios: 1977, 1972, and 1967 17
5c. Industry-Product Analysis—Shipments by Product Class and Industry: 1977. 18
6a. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1977 and 1972. 20
6b. Product Classes—Value of Shipments by All Producers by Geographic Area: 1977 and 1972 23
6c. Product Classes—Value Shipped by All Producers: 1963, 1967, 1972 to 1977. 26

MATERIAL STATISTICS

7. Materials Consumed by Kind: 1977 and 1972. 27

DESCRIPTION OF INDUSTRIES

MISCELLANEOUS MANUFACTURES

This report shows 1977 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

3991 Brooms and Brushes
3993 Signs and Advertising Displays
3995 Burial Caskets
3996 Hard Surface Floor Coverings
3999 Manufacturing Industries, N.E.C.

The industry statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments, but also their activities in the manufacture of secondary products as well as their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1a-5a) with product statistics (table 6a) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5b, which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

Small single-unit companies with up to 20 employees (the cutoff varied by industry), were excluded from the mail portion of the census. For these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated), data on payrolls and receipts were obtained from administrative records of other government agencies. The remaining statistics were developed from industry averages.

Establishment data were tabulated based on industry definitions contained in the 1972 Standard Industrial Classification Manual and its 1977 supplement.

INDUSTRY 3991, BROOMS AND BRUSHES

This industry comprises establishments primarily engaged in the manufacture of household, industrial, and street sweeping brooms; and brushes.

The total value of shipments for establishments classified in the Brooms and Brushes industry amounted to $673 million in 1977, an increase of 54 percent from 1972. The value of shipments of products classified as primary to the industry was $621 million, an increase of 58 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $354 million in 1977, was 50 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 16.5 thousand employees, a decrease of 6 percent from 1972. The leading States in employment were Ohio, Massachusetts, New York, and Illinois, accounting for approximately 40 percent of the industry's 1977 employment. Data for Ohio and New York have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 5 percent of total value of shipments.

INDUSTRY 3993, SIGNS AND ADVERTISING DISPLAYS

This industry comprises establishments primarily engaged in the manufacture of electrical, mechanical, cutout, or plate signs and advertising displays, including neon signs and advertising novelties. Sign painting shops doing business on a custom basis are classified in industry 7399. Establishments primarily engaged in the manufacture of electric signal equipment are classified in industry 3662, and lighting fixtures in industry 3642.

The total value of shipments for establishments classified in the Signs and Advertising Displays industry amounted to $1,739 million in 1977, an increase of 45 percent from 1972. The value of shipments of products classified as primary to the industry was $1,607 million, an increase of 48 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $1,061 million in 1977, was 42 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 49.7 thousand employees, approximately the same as in 1972. The leading States in employment were New York, Illinois, California, and Ohio, accounting for approximately 40 percent of the industry's 1977 employment.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 14 percent of total value of shipments.

INDUSTRY 3995, BURIAL CASKETS

This industry comprises establishments primarily engaged in the manufacture of caskets, coffins, burial cases, and coffin shipping cases, whether of wood or other material except concrete (industry 3272). Establishments primarily engaged in producing other goods for use by morticians are classified on the basis of the product such as burial garments in major group 23.

The total value of shipments for establishments classified in the Burial Caskets industry amounted to $506 million in 1977, an increase of 30 percent from 1972. The value of shipments of products classified as primary to the industry was $495 million, an increase of 28 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $264 million in 1977, was 26 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 12.0 thousand employees, a decrease of 19 percent from 1972. The leading States in employment were Indiana, Pennsylvania, Tennessee, and Illinois, accounting for approximately 50 percent of the industry's 1977 employment.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 5 percent of total value of shipments.

INDUSTRY 3996, HARD SURFACE FLOOR COVERINGS

This industry comprises establishments primarily engaged in the manufacture of linoleum, asphalted-felt-base, and other hard surface floor coverings, not elsewhere classified. Establishments primarily engaged in the manufacture of rubber floor coverings are classified in industry 3069, and cork floor and wall tile in industry 2499.

The total value of shipments for establishments classified in the Hard Surface Floor Coverings industry amounted to $607 million in 1977, an increase of 77 percent from 1972. The value of shipments of products classified as primary to the industry was $561 million, an increase of 87 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $321 million in 1977, was 52 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 6.4 thousand employees, an increase of 10 percent from 1972. The leading States in employment were Pennsylvania and New Jersey, accounting for approximately 80 percent of the industry's 1977 employment. Data for New Jersey have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided.

Establishments of single-unit companies in this industry with up to 20 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 1 percent of total value of shipments.

INDUSTRY 3999, MANUFACTURING INDUSTRIES, N.E.C.

This industry comprises establishments primarily engaged in the manufacture of miscellaneous fabricated products, including beauty shop and barber shop equipment; hairwork; tobacco pipes and cigarette holders; coin-operated amusement machines; matches; candles; lampshades; dressed and dyed furs; umbrellas; parasols and canes; and other articles, not elsewhere classified.

The total value of shipments for establishments classified in the Manufacturing Industries, N.E.C. industry amounted to $2,662 million in 1977, an increase of 73 percent from 1972. The value of shipments of products classified as primary to the industry was $2,589 million, an increase of 78 percent from 1972. (See the Introduction for a discussion of the difference between value of shipments for the industry and value of product shipments.) The change reflected a general trend in the shipments of most of the products of the industry. Value added by manufacture, at $1,485 million in 1977, was 65 percent above value added in 1972. All dollar figures shown in this report are in current dollars; they are therefore not adjusted for changes in price levels.

In 1977 the industry had 67.3 thousand employees, an increase of 3 percent from 1972. The leading States in employment were Illinois, New York, California, and Pennsylvania, accounting for approximately 50 percent of the industry's 1977 employment. Data for New York have been withheld to avoid disclosing operations of individual companies. However, establishment counts and employment size ranges are provided. These same States were in the forefront for 1972 when they accounted for approximately 50 percent of the industry's employment although there has been some shift in the relative importance of individual States.

Establishments of single-unit companies in this industry with up to 5 employees were excluded from the mail portion of the census. The data for these establishments (and a small number of larger establishments whose reports were not received at the time the data were tabulated) were obtained from administrative records of other agencies or developed from industry averages. These establishments accounted for 16 percent of total value of shipments.

Table 1a. Historical Statistics for the Industry: 1977 and Earlier Years

[For explanation of terms, see appendix A]

Year[1]	Companies[2] (no.)	All establishments: Total (no.)	All establishments: With 20 employees or more (no.) - Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. r Revised. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]In annual survey of manufactures (ASM) years, data are estimates based on a representative sample of establishments canvassed annually and may differ from results of a complete canvass of all establishments. ASM publication shows percentage standard errors. Unless otherwise noted, for data prior to 1963, see 1963 Census of Manufactures, vol. II, table 1 of the Industry chapter.

[2]For the census, a company is defined as a business organization consisting of one establishment or more under common ownership or control.

[3]Industry was defined or redefined for 1972 Census of Manufactures, so data are available only for years shown.

[4]Data for 1967 and 1963 were derived from Table 8, General Statistics for Establishments by Industry Specialization and Primary Product Class Specialization, in vol. II of the 1967 and 1963 Censuses of Manufactures. Separate data for other years are not available.

[5]Data either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data; thus these estimates may be of limited reliability.

[6]Estimate for new capital expenditures has associated standard error of 15 percent or more and may be of limited reliability. Estimates for other data items are of acceptable reliability.

[7]Minimum percentage; exact percentage withheld to avoid disclosing operations of individual companies.

[8]Relationships are not meaningful because of predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

[9]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[10]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

Table 1b. Selected Operating Ratios for the Industry: 1977 and Earlier Years

[For explanation of terms, see appendix A]

Year	Payroll per employee (dollars)	Assets per employee (dollars)	Production workers as percent of total employment (percent)	Annual hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials as percent of value of shipments (percent)	Cost of materials and payroll as percent of value of shipments (percent)	Assets as percent of value of shipments (percent)	Value added per employee (dollars)	Payroll as percent of value added (percent)	Value added per production worker hour (dollars)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown for those States where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2]Statistics for some producing States are withheld to avoid disclosing figures for individual companies. However, for such States with 150 employees or more, number of establishments is shown and employment size range is indicated by one of the following symbols: AA—150 to 249 employees; BB—250 to 499 employees; CC—500 to 999 employees; EE—1,000 to 2,499 employees; FF—2,500 employees or more.

[3]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[4]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[5]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 3a. **Summary Statistics for the Industry: 1977**

[For explanation of terms, see appendix A]

Item	Unit of measure	Brooms and brushes (SIC 3991)	Signs and advertising displays (SIC 3993)	Burial caskets (SIC 3995)	Hard surface floor coverings (SIC 3996)	Manufacturing industries, n.e.c. (SIC 3999)
Primary product specialization ratio[1]	percent	91	98	99	92	91
Coverage ratio[2]	do	89	97	98	98	80
All establishments	number	409	3 468	406	21	3 976
With 1 to 19 employees	do	256	2 841	273	8	3 362
With 20 to 99 employees	do	111	547	112	6	488
With 100 employees or more	do	42	80	21	7	126
All employees, average for year	1,000	16.5	49.7	12.0	6.4	67.3
Payroll for year, all employees	mil. dol.	163.8	566.6	129.7	93.5	669.1
Production workers:						
Average for year	1,000	12.7	36.8	9.3	5.0	52.0
March	do	12.0	35.3	9.7	4.9	50.1
May	do	12.4	36.2	9.3	4.9	52.4

April to June	do	6.0	17.3	4.4	2.7	23.3
July to September	do	6.1	17.5	4.3	2.6	22.4
October to December	do	6.2	18.1	4.4	2.5	24.1
Wages	mil. dol.	101.1	343.1	79.7	68.6	408.5
Cost of materials, etc.	do	326.7	689.2	244.1	291.9	1 208.1
Materials, parts, containers, etc., consumed	do	266.6	588.4	229.2	276.9	1 091.3
Resales	do	51.6	39.6	7.9	3.2	60.9
Fuels consumed	do	1.9	7.9	3.1	6.3	11.3
Purchased electric energy	do	5.5	12.2	3.6	5.5	17.3
Contract work	do	1.2	41.1	0.3	(Z)	27.2
Value of shipments, including resales	do	673.1	1 738.7	505.9	607.2	2 662.0
Value of resales	do	67.3	50.9	11.8	5.1	99.0
Value added by manufacture	do	353.6	1 060.9	264.2	321.3	1 484.7
Manufacturers' inventories:						
Beginning of year	do	119.9	190.0	78.2	76.2	442.9
Finished products	do	48.7	36.2	23.8	43.9	117.0
Work in process	do	20.6	63.8	18.9	11.6	108.4
Materials, supplies, fuel, etc.	do	50.7	90.0	35.6	20.7	217.5
End of year	do	129.9	210.8	81.8	84.9	481.1
Finished products	do	54.1	39.2	24.9	49.4	131.0
Work in process	do	22.4	72.2	20.2	12.1	125.2
Materials, supplies, fuel, etc.	do	53.4	99.4	36.7	23.3	224.8
Capital expenditures for plant and equipment	do	17.3	47.5	16.9	17.0	85.2
New capital expenditures	do	15.7	43.0	16.3	16.9	81.3
New buildings and other structures	do	2.4	13.5	2.2	1.9	21.5
New machinery and equipment	do	13.3	29.5	14.2	15.1	59.8
Used capital expenditures	do	1.6	4.4	0.6	0.1	3.9

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Represents ratio of primary product shipments to total product shipments (primary and secondary, excluding miscellaneous receipts) for establishments classified in industry.

[2]Represents ratio of primary products shipped by establishments classified in industry to total shipments of such products by all manufacturing establishments, wherever classified.

[3]Relationships are not meaningful because of predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

[4]Minimum percentage; exact percentage withheld to avoid disclosing operations of individual companies.

[5]Data for value of shipments represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[6]Data for value of shipments represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[7]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 3b. Supplemental Industry Statistics Based on Sample Estimates: 1977

(For explanation of terms, see appendix A. For description of annual survey of manufacture (ASM), see appendix B)

Item	Brooms and brushes (SIC 3991)		Signs and advertising displays (SIC 3993)		Burial caskets (SIC 3995)		Hard surface floor coverings, n.e.c. (SIC 3996)		Manufacturing industries, n.e.c. (SIC 3999)	
	Amount (million dollars)	Standard error of estimate[1] (percent)	Amount (million dollars)	Standard error of estimate[1] (percent)	Amount (million dollars)	Standard error of estimate[1] (percent)	Amount (million dollars)	Standard error of estimate[1] (percent)	Amount (million dollars)	Standard error of estimate[1] (percent)
Purchased services:										
Cost of purchased services for repair of--										
Buildings and other structures	(1.3)	22	(1.8)	28	(0.7)	33	0.5	1	3.0	9

End of year	110.0	5	247.7	8	82.3	5	172.1	1	(425.7)	21
Total gross value of depreciable assets:										
Beginning of year	158.8	7	352.6	8	120.8	6	230.2	1	584.7	3
New capital expenditures	17.6	14	41.8	12	17.1	6	16.8	1	102.9	4
Used capital expenditures	(2.8)	33	(5.0)	26	(0.5)	25	.1	1	3.9	10
Retirements	5.6	12	16.0	10	(8.2)	34	4.4	1	(34.9)	15
End of year	173.5	6	383.5	8	130.1	5	242.7	1	656.6	3
Depreciation charges during 1977	12.5	6	33.6	7	8.2	8	12.0	1	58.3	5
Buildings and other structures	3.3	14	(9.5)	16	1.9	14	1.7	1	16.1	5
Machinery and equipment	0.9	6	24.1	7	6.3	8	10.3	1	42.2	7

Note: Data for total new capital expenditures, new building expenditures, new machinery expenditures, and total used expenditures are shown in table 3a, as well as in this table. The figures in table 3a are census universe totals and may differ from the annual survey of manufactures (ASM) sample estimates shown in this table. The figures in this table represent the best estimates of year-to-year change as measured by the continuing ASM sample. However, they are subject to sampling error and, hence, as estimates of level, are not as reliable as the universe figures shown in table 3a.

- Represents zero. (A) Indicates standard errors of 100 percent or more. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. (X) Not applicable. (Z) Less than 50 thousand dollars.

[1]For a description of the standard error of estimate, see the section "Qualifications of the Data" in appendix B. Figures in parentheses have standard errors of 15 percent or more.

[2]This is a measure of the extent to which respondents reported for each item. It is derived for each item by calculating the ratio of the weighted employment (establishment data multiplied by sample weight; see appendix B) for those sample establishments that reported the specific inquiry to the weighted total employment for all sample establishments classified in the industry.

[3]The standard errors for the detailed categories of new machinery and equipment expenditures were not directly calculated. However, the actual figure is not expected to exceed the estimated figure shown.

[4]This category represents the total machinery and equipment expenditures for establishments that did not break down their expenditures for the three specific categories.

Table 4. Industry Statistics by Employment Size of Establishment: 1977

[For explanation of terms, see appendix A]

Industry and employment size class	E[1]	All establishments (no.)	All employees: Number (1,000)	All employees: Payroll (million dollars)	Production workers: Number (1,000)	Production workers: Hours (millions)	Production workers: Wages (million dollars)	Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	New capital expenditures (million dollars)	End-of-year inventories (million dollars)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. Data for this item are included in figures in parentheses above. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Payroll and sales data for small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the balance of items shown for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at time data were tabulated. The following symbols are shown where estimated data based on administrative records data account for 10 percent or more of figures shown: E1—10 to 19 percent; E2—20 to 29 percent; E3—30 to 39 percent; E4—40 to 49 percent; E5—50 to 59 percent; E6—60 to 69 percent; E7—70 to 79 percent; E8—80 to 89 percent; E9—90 to 99 percent; E0—100 percent.

[2]Report forms were not mailed to small single-unit companies with up to 20 employees (cutoff varied by industry). Payroll and sales data for 1977 were obtained from administrative records supplied by other agencies of the Federal Government. These data were then used in conjunction with industry averages to estimate the balance of items shown. Data are also included in respective size classes shown.

[3]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[4]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

[5]Four-digit industry totals for all items including establishment counts are not equal to sum of 6-digit subindustry figures due to difficulties in classifying a few establishments at subindustry level.

Table 5a. Industry Statistics by Industry and Primary Product Class Specialization: 1977

[Table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. Measures of plant specialization shown are (1) industry specialization: ratio of primary product shipments to total product shipments (primary plus secondary, excluding miscellaneous receipts) for the establishment; and (2) product class specialization: ratio of largest primary product class shipments to total product shipments (primary plus secondary, excluding miscellaneous receipts) for the establishment. See appendix for method of computing ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for various reasons; e.g., to avoid disclosing operations of individual companies. For explanation of terms, see appendix A]

Industry or product class code	Industry or product class by percent of specialization	All establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	New capital expenditures (million dollars)
			Number (1,000)	Payroll (million dollars)	Number (1,000)	Hours (millions)	Wages (million dollars)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. (S) Withheld because estimate did not meet publication standards. (X) Not applicable. (Z) Less than 50 thousand dollars or hours; under 50 employees.

[1]Data in value of shipments column represent value of production rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.

[2]Data in value of shipments column represent value of work done rather than value of shipments. Consequently, formula for computing value added by manufacture was modified to exclude any change in inventories between beginning and end of year.

Table 5b. Industry-Product Analysis — Value of Shipments for an Industry and Primary Product Shipments, and Specialization and Coverage Ratios: 1977, 1972, and 1967

(An establishment is assigned to an industry based on shipment values of products representing largest amount considered primary to an industry. Frequently, establishment shipments comprise mixtures of products assigned to an industry (primary), those considered primary to other industries (secondary), and receipts for activities such as merchandising or contract work. Columns A-D show this product pattern for an industry, and column E shows primary product specialization ratio. The extent to which an industry's primary products are shipped by establishments classified in and out of an industry is shown in columns F-H and coverage ratio is shown in column I. For explanation of terms, see appendix A)

1977 product code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total (million dollars)	Primary products (million dollars)	Secondary products (million dollars)	Miscellaneous receipts (million dollars)	Primary product specialization ratio Col. B / Col. Table 5c. Industry-Product Analysis — Shipments by Product Class and Industry: 1977

(Millions of dollars. Table shows where products of an industry (referred to as primary and listed in table 6a) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Only those product groups that have at least $2 million in shipments from establishments classified in one of industries included in this chapter are shown. Read across to determine where products of industries in this chapter are produced. To extent that some of primary products are made in industries not included in this chapter, value of such shipments is shown in "Other industries" column. Specified "Other industries" are listed at end of table if they account for more than $5 million of products primary to this chapter. For explanation of terms, see appendix A)

Table 5c. Industry-Product Analysis—Shipments by Product Class and Industry: 1977—Con.

(Millions of dollars. Table shows where products of an industry (referred to as primary and listed in table 6a) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Only those product groups that have at least $2 million in shipments from establishments classified in one of industries included in this chapter are shown. Read across to determine where products of industries in this chapter are produced. To extent that some of primary products are made in industries not included in this chapter, value of such shipments is shown in "Other industries" column. Specified "Other industries" are listed at end of table if they account for more than $5 million of products primary to this chapter. For explanation of terms, see appendix A)

1977 product code	Industry and miscellaneous receipts	Other industries	1977 product code	Industry and miscellaneous receipts	Other industries

39990 02	Miscellaneous fabricated products, n.e.c., n.s.k., typically for establishments with less than 5 employees (see note)	.....	(NA)	(X)	184.8	(X)	121.0

Note: In 1977 Census of Manufactures, shipments data for establishments of small single-unit companies with up to 20 employees were estimated from administrative records data rather than data actually collected from respondents. Employment cutoff used for administrative records for each industry and shipments figures are included in code ending with "002." In both 1977 and 1972 Censuses of Manufactures, products not completely identified on standard forms were coded in appropriate product class (5 digits) followed by "00" or, in some cases, to appropriate product group code (4 digits) followed by "0 00."

- Represents zero. (NA) Not available. N.E.C. Not elsewhere classified. n.s.k. Not specified by kind. [r]Revised. (S) Withheld because estimate did not meet publication standards. (X) Not applicable.

[1]Quantity and value reported by all producers of product, not just those with shipments of $100,000 or more.

[2]For some estahlishments, data have been estimated from central unit values, which are based on quantity-value relationships of reported data. The following symbols are used when percentage of each quantity figure estimated in this manner equals or exceeds 10 percent of published figure: * indicates 10 to 19 percent estimated, ** indicates 20 to 29 percent estimated. If 30 percent or more is estimated, figure is replaced by (S).

[3]Value reported by all producers of product, not just those with shipments of $100,000 or more.

[4]In 1977, in a new procedure, small establishments with more than 5 employees reported on short forms, which requested only product class totals. These data are included in the codes ending in "00." Thus, 1977 data for product codes (7 digits) may not be completely comparable with 1972 data.

[5]For 1977, product codes 39960 14 and 39960 25 were included with product codes 39960 41, 39960 51, 39960 62, and 39960 63 to avoid disclosing operations of individual companies.

Table 6b. Product Classes—Value of Shipments by All Producers by Geographic Area: 1977 and 1972

(Millions of dollars. Product classes covered are those that are economically significant and whose production is geographically dispersed, provided dispersion is not approximated by data in table 2. Also, product classes are not shown if they are miscellaneous or "not specified by type" classes. Statistics for some States are withheld because they are either less than $2 million in product class shipments or they disclose operations of individual companies in 1977)

39990	Manufacturing industries, n.e.c., n.s.k	614.2	(149.9)	(119.1)	146.6	(294.9)	317.5	160.9	62.0

(NA) Not available. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards.

[1]Figures are estimates derived from a representative sample of manufacturing establishments canvassed in annual survey of manufactures and, therefore, may differ from results that would be obtained from a complete canvass of all manufacturing establishments. Standard errors associated with estimates are published in annual survey of manufactures volumes for this period. Figures in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data. Thus, at individual product class level, estimates may be of limited reliability; however, they may be combined with other product class totals into broader aggregates which are of acceptable reliability.

Table 7. Materials Consumed by Kind: 1977 and 1972

(Includes quantity and cost of materials consumed or put into production by establishments classified only in this industry. For further explanation, see appendix A, Explanation of Terms, Cost of Materials, Parts, Containers, and Supplies Consumed)

– Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. N.E.C. Not elsewhere classified. n.s.k. Not specified by kind. (S) Withheld because estimate did not meet publication standards. (X) Not applicable.

[1]From 1972 Census of Manufactures Supplementary Inquiry: Consumption of Materials, Parts, Containers, and Supplies during 1972 (Form MA-131).

[2]Total cost of materials of establishments that did not report detailed materials data, including establishments that were not mailed a form and establishments reporting on the short form that did not include a material inquiry.

[3]For some establishments, data have been estimated from central unit values, which are based on quantity-cost relationships of reported data. The following symbols are used when percentage of each quantity figure estimated in this manner equals or exceeds 10 percent of published figure: * indicates 10 to 19 percent estimated, ** indicates 20 to 29 percent estimated. If 30 percent or more is estimated, figure is replaced by (S).

[4]For 1977, material codes 149971, 249941, 266111, 084913, and 289102 were included with material code 970099.

[5]For 1972, material codes 349941, 266111, 282104, 282202, 084913, 084915, 289102, 306902, and 331018 were included with material code 970099.

[6]For 1977, material code 336200 was included with material code 970099.

APPENDIX A. Explanation of Terms

This appendix is in two sections. Section 1 includes items for which all establishments that were mailed census of manufactures forms were requested to supply information. Section 2 covers supplementary items for which only establishments included in the annual survey of manufactures (ASM) sample were requested to supply information. Results of the supplementary ASM inquiries are included in this report. (See the Introduction, Manufacturing Universe and Census Report Forms, for a detailed explanation of the use of the ASM sample in a census of manufactures year and a description of the various report forms.)

SECTION 1. ITEMS COLLECTED ON ALL CENSUS OF MANUFACTURES REPORT FORMS

Employment and related items—The regular report forms requested separate information on production workers as of a payroll period for each quarter of the year and on other employees as of the payroll period which included the 12th of March.

All employees—This item includes all full-time and part-time employees on the payrolls of operating manufacturing establishments during any part of the pay period ending nearest the 12th of the months specified on the report form. Included are all persons on paid sick leave, paid holidays and paid vacations during these pay periods. Officers of corporations are included as employees; proprietors and partners of unincorporated firms are excluded. The "all employees" number is the average number of production workers plus the number of other employees in mid-March. The number of production workers is the average for the mid-month payroll periods of March, May, August, and November.

Production workers—This item includes workers (up through the working foreman level) engaged in fabricating, processing, assembling, inspecting, receiving, storing, handling, packing, warehousing, shipping (but not delivering), maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with these production operations at the establishment covered by the report. Supervisory employees above the working foreman level are excluded from this category.

All other employees—This item covers nonproduction personnel of the manufacturing establishment, including those engaged in factory supervision above the working foreman level, sales (including driver salesmen), sales delivery (highway truck drivers and their helpers), advertising, credit, collection, installation and servicing of own products, clerical and routine office functions, executive, purchasing, financing, legal, personnel (including cafeteria, medical, etc.), professional, and technical. Also included are employees on the payroll of the manufacturing establishment who are engaged in the construction of major additions or alterations to the plant and who are utilized as a separate work force.

In addition to reports sent to operating manufacturing establishments, information on employment during the payroll period which included March 12 and annual payrolls was also requested of administrative offices or auxiliary units (e.g., warehouses and research and development laboratories) of multiestablishment companies. However, these figures are not included in the totals for individual industries shown in this report. They are included in the Summary and Geographic Area reports and in the final bound volumes as a separate category.

Administrative office and auxiliary unit employees—As noted in the Introduction, companies were asked to file a special report form for any administrative office that was at a different location than the establishments managed or served, or at the same location as one of the establishments but not operated as an integral part of the establishment. Employees in **administrative offices** are concerned with the general management of multiestablishment companies, i.e., with the general supervision and control of two units or more, such as manufacturing plants, mines, sales branches, or stores. The functions of these employees may include (1) program planning, including sales research and coordination of purchasing, production, and distribution; (2) company purchasing, including general contracts and purchasing methods; (3) company financial policy and accounting, tax accounting, company sales and profits reports, and personnel accounting; (4) general engineering, including design of product machinery and equipment, and direction of engineering effort conducted at the individual operation locations; (5) direction of company personnel matters; and (6) legal and patent matters. **Auxiliaries** are separate storage facilities, garages, repair shops, purchasing offices, sales promotion offices, research and development organizations, etc., serving the plants or central management of the company.

The employment and payrolls of the administrative offices and auxiliaries serving manufacturing establishments are included in all tables at the "all industries" level. In tables where industry detail is shown, the data for these units appear as a separate industry group.

Payrolls—This item includes the gross earnings paid in the calendar year 1977 to all employees on the payroll of operating

manufacturing establishments. Respondents were told they could follow the definition of payrolls used for calculating the Federal withholding tax. It includes all forms of compensation such as salaries, wages, commissions, dismissal pay, all bonuses, vacation and sick leave pay, and compensation in kind, prior to such deductions as employees' Social Security contributions, withholding taxes, group insurance, union dues, and savings bonds. The total includes salaries of officers of corporations, but excludes payments to proprietors or partners of unincorporated concerns. Also excluded are payments to members of Armed Forces and pensioners carried on the active payroll of manufacturing establishments.

The census definition of payrolls is identical to that recommended to all Federal statistical agencies by the Office of Federal Statistical Policy and Standards. It should be noted that this definition does not include employers' Social Security contributions or other nonpayroll labor costs such as employees' pension plans, group insurance premiums, and workers' compensation.

The ASM provides estimates of employers' supplemental labor costs, both those required by Federal and State laws and those incurred voluntarily or as part of collective bargaining agreements. (Supplemental labor costs are explained later in this appendix.)

As in the case of employment figures, the payrolls of separate administrative offices and auxiliary units of multi-establishment companies are included in all tables at the "all industries" level. In tables where industry detail is shown, the data for these units appear as a separate industry group.

Production worker hours—This item covers hours worked or paid for at the plant, including actual overtime hours (not straight-time equivalent hours). It excludes hours paid for vacations, holidays, or sick leave when the employee was not at the plant.

Cost of materials—This item refers to direct charges actually paid or payable for items consumed or put into production during the year, including freight charges and other direct charges incurred by the establishment in acquiring these materials. It includes the cost of materials or fuel consumed, regardless of whether what was consumed was purchased by the individual establishment from other companies, transferred to it from other establishments of the same company, or withdrawn from inventory during the year.

The important components of this cost item are (1) all raw materials, semifinished goods, parts, components, containers, scrap, and supplies put into production or used as operating supplies and for repair and maintenance during the year; (2) electric energy purchased; (3) fuels consumed for heat, power, or generating electricity; (4) work done by others on materials or parts furnished by manufacturing establishments (contract work); and (5) products bought and resold in the same condition. (See discussion of duplication of data.)

Value of shipments—This item covers the received or receivable net selling values, f.o.b. plant (exclusive of freight and taxes), of all products shipped, both primary and secondary, as well as all miscellaneous receipts, such as receipts for contract work performed for others, installation and repair, sales of scrap, and sale of products bought and resold without further processing. Included are all items made by or for the establishments from materials owned by it whether sold, transferred to other plants of the same company, or shipped on consignment. The net selling value of products made in one plant on a contract basis from materials owned by another was reported by the plant providing the materials.

In the case of multiunit companies, the manufacturer was requested to report the value of products transferred to other establishments of the same company at full economic or commercial value, i.e., including not only the direct costs of production but also a reasonable proportion of "all other costs" (including company overhead) and profit. (See discussion of duplication of data.)

Duplication in cost of materials and value of shipments—The aggregate of the cost of materials and value of shipments figures for industry groups and for all manufacturing industries includes large amounts of duplication, since the products of some industries are used as materials by others. With some important exceptions, such as for motor vehicles and parts, this duplication is not significant at the 4-digit industry level. However, it is significant at the 2-digit and 3-digit industry group level because these totals often include industries which represent successive stages in the production of a finished manufactured product. Examples are the addition of flour mills to bakeries in the "Food" group and the addition of pulp mills to paper mills in the "Paper and Allied Products" group of industries. Estimates of the overall extent of this duplication indicate that the value of manufactured products exclusive of such duplication—the value of finished manufactures—tends to approximate two-thirds of the total value of products reported in the census of manufactures.

Value added by manufacture—This measure of manufacturing activity is derived by subtracting the cost of materials, supplies, containers, fuel, purchased electricity, and contract work from the value of shipments (products manufactured plus receipts for services rendered). The result of this calculation is then adjusted by the addition of value added by merchandising operations (i.e., the difference between the sales value and the cost of merchandise sold without further manufacture, processing, or assembly) plus the net change in finished goods and work-in-process inventories between the beginning and end of the year.

"Value added" avoids the duplication in the figure for value of shipments which results from the use of products of some establishments as materials by others. Value added is considered to be the best value measure available for comparing the relative economic importance of manufacturing among industries and geographic areas.

New and used capital expenditures—For establishments in operation and establishments under construction but not yet in operation, manufacturers were asked to report their new expenditures for (1) permanent additions and major alterations to manufacturing establishments, and (2) machinery and equip-

ment used for replacement and additions to plant capacity if they were of the type for which depreciation accounts were ordinarily maintained.

The totals for new expenditures exclude that portion of expenditures leased from nonmanufacturing concerns, new facilities owned by the Federal Government but operated under contract by private companies, and plant and equipment furnished to the manufacturer by communities and nonprofit organizations. Also excluded are expenditures for used plant and equipment (although reported in the census), expenditures for land, and cost of maintenance and repairs charged as current operating expenses.

Manufacturers were also requested to report the value of all used buildings and equipment purchased during the year at the purchase price. For any equipment or structure transferred to the use of the reporting establishment by the parent company or one of its subsidiaries, the value at which it was transferred to the establishment was to be reported. Furthermore, if the establishment changed ownership during the year, the cost of the fixed assets (building and equipment) was to be reported under used capital expenditures.

Total expenditures for used plant and equipment is a universe figure; i.e., it is collected on all census forms. However, the breakdown of this figure between expenditures for used buildings and other structures and expenditures for used machinery and equipment is collected only on the ASM form and is subject to sampling error (see table 3b, chapters 2 and 4).

End-of-year inventories—Respondents were asked to report their 1977 and 1976 end-of-year inventories at approximate current costs, if feasible; otherwise, at book values. Since different methods of inventory valuation are used (last-in-first-out (LIFO), first-in-first-out (FIFO), etc.), the definition of the value of inventories aggregate for all establishments in an industry is not precise. The change in inventory between years is of considerably greater significance.

In using inventory data by stage of fabrication for "all industries" and at the 2-digit industry level, it should be noted that an item treated as a finished product by an establishment in one industry may be reported as a raw material by another establishment in a different industry. For example, the finished product inventories of a steel mill would be reported as raw materials by a stamping plant. Such differences are present in the inventory figures by stage of fabrication shown for individual industries, industry groups, and "all manufacturing" which are aggregates of figures reported by establishments in specified industries.

SECTION 2. ITEMS COLLECTED ONLY ON ASM REPORT FORM

Cost of purchased services—ASM establishments were requested to provide information on the cost of purchased services for the repair of buildings and other structures, the repair of machinery and communication services. Included in the cost of purchased services for the repair of building and machinery are payments made for all maintenance and repair work on buildings and equipment such as painting, roof repairs, replacing parts, and overhauling equipment. Such payments made to other establishments of the same company and for repair and maintenance of any leased property are also included. Extensive repairs or reconstruction that were capitalized are considered capital expenditures for used buildings and machinery and are, therefore, excluded from this item. Repair and maintenance costs provided by an owner as part of a rental contract and incurred directly by an establishment in using its own work force are also excluded.

The response coverage ratio for each of the three types of purchased services listed above is a measure of the extent to which respondents reported for each item. It is derived for each item by calculating the ratio of the weighted employment (establishment data multiplied by sample weight; see appendix B) for those ASM establishments that reported the specific inquiry to the weighted total employment for all ASM establishments classified in the industry (see table 3c, chapters 2 and 4).

Rental payments—This item includes rental payments for the use of all items for which depreciation reserves would be maintained if they were owned by the establishment, e.g., structures and buildings, and production, office, and transportation equipment. Excluded are royalties and other payments for the use of intangibles and depletable assets, and land rents where separable.

When an establishment of a multiestablishment company was charged rent by another part of the same company for the use of assets owned by the company, it was instructed to exclude that cost from rental payments. However, the book value (original cost) of these company-owned assets were to be reported as assets of the establishment at the end of the year.

If there were assets at an establishment rented from another company, and the rents were paid centrally by the head office of the establishment, the company was instructed to report these rental payments as if they were paid directly by the establishment.

Supplemental labor costs—Supplemental labor costs are divided into legally required expenditures and payments for voluntary programs. The legally required portion consists primarily of Federal old age and survivors' insurance, unemployment compensation, and workers' compensation. Payments for voluntary programs include all programs not specifically required by legislation whether they were employer initiated or the result of collective bargaining. They include the employer portion of such plans as insurance premiums, premiums for supplemental accident and sickness insurance, pension plans, supplemental unemployment compensation, welfare plans, stock purchase plans on which the employer payment is not subject to withholding tax, and deferred profit-sharing plans. They exclude such items as company-operated cafeterias, in-plant medical services, free parking lots, discounts on employee purchases, and uniforms and work clothing for employees. While the excluded items do benefit employees, and all or part of their cost is generally similar to the items covered in the annual survey labor costs statistics, accounting records do not generally provide reliable figures on net employee benefits of these types.

Beginning and end-of-year depreciable assets—The data encompass all fixed depreciable assets on the books of establishments at the beginning and at the end of the year. The values shown represent the actual cost of assets at the time they were acquired, including all costs incurred in making the assets usable (such as transportation and installation). Included are all buildings, structures, machinery, and equipment (production, office, and transportation equipment) for which depreciation reserves are maintained. Excluded are nondepreciable capital assets, including inventories and intangible assets such as patent rights and royalties. Also excluded are land and depletable assets such as timber and mineral rights.

The definition of fixed depreciable assets is consistent with the definition of capital expenditures. For example, expenditures include actual capital outlays during the year, rather than the final value of equipment put in place and buildings completed during the year. Accordingly, the value of assets at the end of the year includes the value of construction in progress. In addition, respondents were requested to make certain that assets at the beginning of the year plus new and used capital expenditures, less retirements, equaled assets at the end of the year.

New and used capital expenditures—The data for total new capital expenditures, new building expenditures, new machinery expenditures, and total used capital expenditures are collected on all census forms. However, the breakdown between expenditures for used buildings and other structures and expenditures for used machinery and equipment is collected only on the ASM form. (See further explanation on capital expenditures in section 1.)

Breakdown of new capital expenditures for machinery and equipment—ASM establishments were requested to separate their capital expenditures for new machinery and equipment into (1) automobiles, trucks, etc., for highway use; (2) computers and peripheral data processing equipment; and (3) all other.

The category "automobiles, trucks, etc., for highway use" is intended to measure expenditures for vehicles designed for highway use which were acquired through a purchase of lease-purchase agreement. Vehicles normally operating off public highways—vehicles specifically designed to transport materials, property, or equipment on mining, construction, logging, and petroleum development projects—are excluded from this item.

The "not specified by kind" or n.s.k. item for expenditures for new machinery and buildings shown in table 3b represents the total machinery and equipment expenditures for establishments that did not break down their expenditures for the three specific categories. This means that for most industries the specific categories are understated.

Retirements—Included in this item is the gross value of assets sold, retired, scrapped, destroyed, etc., during 1977. When a complete operation or establishment changed ownership, the respondent was instructed to report the value of the assets sold at the original cost as recorded in the books of the seller. The respondent was also requested to report retirements of equipment or structures owned by a parent company that the establishment was using as if it were a tenant.

Depreciation charges—This item includes depreciation and amortization charged during the year against assets. Depreciation charged against fixed assets acquired since the beginning of the year and against assets sold or retired during the year are components of this category. Respondents were requested to make certain that they did not report accumulated depreciation.

APPENDIX B. Annual Survey of Manufactures

DESCRIPTION OF SURVEY SAMPLE

The annual survey of manufactures (ASM) is a survey based on a probability sample of about 70,000 manufacturing establishments selected from the census of manufactures universe. The current sample was selected from the manufacturing establishments included in the 1972 Census of Manufactures supplemented by Social Security Administration (SSA) files of manufacturers that opened after 1972. As in the earlier surveys, companies rather than establishments were defined as the sampling units. The selected companies were required to report for all of their plants, so that new establishments of existing companies also were represented in the sample.

All companies that had any manufacturing establishments with 250 employees or more in the 1972 census were included in the survey sample. These large companies, included with certainty, collectively account for more than two-thirds of total manufacturing employment.

Smaller companies were selected for the ASM in accordance with mathematical theory for optimum allocation of a sample. Their probabilities of inclusion ranged from 1.000 to 0.005 and were proportional to measures of size determined for each company. The measures of size of companies included in the 1972 Census of Manufactures depended directly upon each company's 1972 product class values and the historic variability of the year-to-year shipments of each product class. Roughly equivalent measures of size were assigned to the postcensus companies based on their industry codes and anticipated employment. (More specific information was not available for them in the SSA files used for sampling.)

To improve the reliability of the industry statistics for geographic areas, two features were incorporated into the sample design. First, some weight was given to the total value of shipments of each establishment relative to the total value of shipments for the State in which the establishment was located. Second, product class values for establishments in those States in which the total level of manufacturing was relatively low or was rapidly expanding (but for which the reliability of estimates was not expected to be much improved by the first sample design feature) were multiplied by factors ranging from 1.15 to 1.25 before measures of size were developed.

This method of assigning measures of size was used to maximize the precision (i.e., minimize the variance) of estimates of the year-to-year change in the value of product class shipments. Implicitly, it also gave weight to differences in employment, value added, and other industry statistics. These items are highly correlated with total value of shipments, and the assigned size measures varied directly with that total for each company.

The cost of collecting and processing data for a company is roughly proportional to the number of its establishment reports. To maximize the sample information obtained for a fixed total cost, each company's initial size measure was divided by the square root of its number of establishments. Sample selection probabilities then were obtained by multiplying each company's final measure of size by an overall sampling fraction calculated to yield the total expected sample size.

The sample selection procedure gave each company in the sampling frame an independent chance of selection. This method of selection differs from the method of systematic selection used in annual surveys prior to 1959. (With systematic selection, only certain combinations of companies can fall into the sample depending on the order in which they are arrayed at the time the sample is drawn.) Independent selection permits the rotation of the smaller companies into and out of a given sample panel without introducing a bias into the survey estimates.

ESTIMATING PROCEDURES

Most of the historical data compiled from the annual survey of manufactures sample were computed by the "difference estimate formula." For each item, linear estimates of the totals for both the most recent census of manufactures year and the ASM year were developed by multiplying each sample establishment's data by its sample weight (the reciprocal of its probability of selection) and summing the weighted values to publication levels. Then the difference between the two linear estimates was added to the complete (universe) total for the census year to produce the estimate for the ASM year. Estimates developed by the difference estimate formula usually are far more reliable than the comparable linear estimates developed from the current sample data alone.

The 1977 sample data were also developed using difference estimates. However, since the universe totals for the census year (either 1972 or 1977) were not known, a modification of the procedure described above was necessary. For each item, except purchased services and the breakdown of expenditures for new machinery and equipment (see further description in appendix A), linear estimates of the publication totals from the ASM sample were adjusted by the difference between imputed census totals and the corresponding ASM sample estimates of these imputed totals. These imputed totals are obtained by applying industry average ratios to control item values at the establishment level. For example, an imputed total beginning assets figure is obtained by multiplying each establishment's total value of shipments by the industry (4-digit SIC) average for the ratio of beginning assets to shipments.

QUALIFICATIONS OF THE DATA

The estimates developed from the sample are apt to differ somewhat from the results of a survey covering all companies in the sampled lists but otherwise conducted under essentially the same conditions as the actual sample survey. The sampling errors—the differences between the estimates obtained and the results theoretically obtainable from a comparable complete coverage survey—are unknown. Guides to the potential size of the sampling errors, however, are provided by the standard errors of the estimates.

The particular sample selected for the ASM is one of a large number of similar probability samples that, by chance, might have been selected under the same specifications. Each of the possible samples would yield somewhat different sets of results, and the standard errors are measures of the variation of all the possible sample estimates around the theoretical, comparable, complete coverage values.

Estimates of the standard errors have been computed from the sample data for the current statistics, as well as the historical ASM data. They are presented in the form of relative standard errors, i.e., the standard errors divided by the estimated values to which they refer.

In conjunction with its associated estimate, the relative standard error may be used to define confidence intervals—ranges that would include the comparable complete coverage value for specified percentages of all the possible samples. The complete coverage value would be included in the range:

a. From one standard error below to one standard error above the derived estimate for about two-thirds of all possible samples.
b. From two standard errors below to two standard errors above the derived estimate for about 19 out of 20 of all possible samples.
c. From three standard errors below to three standard errors above the derived estimate for nearly all possible samples.

An inference that the comparable complete survey result would be within the indicated ranges would be correct in approximately the relative frequencies shown. Those proportions, therefore, may be interpreted as defining the confidence with which the estimates from a particular sample would differ from complete coverage results by as much as one, two, or three standard errors, respectively.

For example, suppose an estimated total is shown as 50,000 with an associated relative standard error of 2 percent, i.e., a standard error of 1,000 (2 percent of 50,000). Then there is approximately 67 percent confidence that the interval 49,000 to 51,000 includes the complete coverage total, about 95 percent confidence that the interval 48,000 to 52,000 includes the complete coverage total, and almost certain confidence that the interval 47,000 to 53,000 includes the complete coverage total.

In addition to the sample errors, the estimates are subject to various operational errors (errors of collection, reporting, coding, transcription, imputation for nonresponse, etc.). These errors would also occur if a complete canvass were to be conducted under the same conditions as the survey. Explicit measures of their effects generally are not available. However, it is believed that most of the important operational errors were detected and corrected in the course of the Bureau's review of the data for reasonableness and consistency. When they were detected too late to correct, the data were suppressed or were specifically qualified in the tables. The small operational errors usually remain; to some extent, they are compensating in the aggregated totals shown.

As derived, the estimated standard errors include part of the effect of the operational errors. The total error, which depends upon the joint effect of the sampling and operation errors, is usually of the order of size indicated by the standard error or only moderately higher. For particular estimates, however, the total error may considerably exceed the standard errors shown.

The concept of complete coverage under the conditions prevailing for the annual surveys of manufactures is not identical to the complete coverage of the censuses of manufactures as conducted. Nearly all types of operational errors that affect the surveys also occur in the censuses. The surveys and the censuses, however, are conducted under quite different conditions, and operational errors can be controlled more tightly in the surveys than in the censuses. As a result, errors in many of the census figures are of the same order of size as the total errors in the corresponding annual survey estimates. The differences between the census and the survey operating conditions also disturb, to some degree, the comparability of the census and annual survey data.

Any figure shown in the tables in this publication having an associated standard error exceeding 15 percent may be of limited reliability. However, the figure may be combined with other totals, creating a broader aggregate, which may then be of acceptable reliability.

APPENDIX C. Industry Descriptions

This appendix contains descriptions of the 450 4-digit industries for which data were compiled and published in the 1977 Census of Manufactures. With two exceptions, the industries are the same as those described in the 1972 edition of the Standard Industrial Classification (SIC) Manual. SIC Industry 3572, Typewriters, was combined with Industry 3579, Office Machines, N.E.C., in the census tabulations and SIC Industry 3716, Motor Homes Produced on Purchased Chassis, was added

The industry titles and descriptions, in general, agree with those appearing in the SIC Manual, but the descriptions have been expanded, in some instances, to include references to additional products classified in other industries.

20 FOOD AND KINDRED PRODUCTS

This major group includes establishments manufacturing or processing foods and beverages for human consumption, and certain related products, such as manufactured ice, chewing gum, vegetable and animal fats and oils, and prepared feeds for animals and fowls.

201 MEAT PRODUCTS

2011 **Meatpacking Plants.**—Establishments primarily engaged in the slaughtering, for their own account or on a contract basis for the trade, of cattle, hogs, sheep, lambs, and calves for meat to be sold or to be used on the same premises in canning and curing, and in making sausage, lard and other products. Establishments primarily engaged in killing, dressing, and packing poultry, rabbits, and other small game are classified in industry 2016; and those primarily engaged in killing and processing horses and other nonfood animals are classified in industry 2047. Establishments primarily engaged in manufacturing sausages and meat specialties from purchased meats are classified in industry 2013; and establishments primarily engaged in canning meat for baby food are classified in industry 2032.

2013 **Sausages and Other Prepared Meat Products.**—Establishments primarily engaged in manufacturing sausages, cured meats, smoked meats, canned meats, frozen meats, natural sausage casings, and other prepared meats and meat specialties from purchased carcasses and other materials. Sausage kitchens and other prepared meat plants operated by packing houses as separate establishments are also included in this industry. Establishments primarily engaged in canning or otherwise processing poultry, rabbits, and other small game are classified in industries 2016 and 2017. Establishments primarily engaged in the cutting up and resale of purchased fresh carcasses are classified in trade industries. Establishments primarily engaged in canning meat for baby food are classified in industry 2032.

2016 **Poultry Dressing Plants.**—Establishments primarily engaged in slaughtering and dressing poultry for their own account or on a contract basis for the trade for meat to be sold or to be used on the same premises in further processing, including cooking, smoking, raw-boning, canning, freezing, and dehydrating. This industry also includes the killing, dressing, and packing of rabbits and other small game. Establishments primarily engaged in processing purchased carcasses are classified in industry 2017.

2017 **Poultry and Egg Processing.**—Establishments primarily engaged in the preparation of processed poultry products from purchased carcasses, including cooking, smoking, raw-boning, canning, freezing, and dehydrating, for their own account or on a contract basis for the trade; or in the drying, freezing, and breaking of eggs. The cleaning, oil treating, packing, and grading of eggs are classified in industry 5144. Establishments primarily engaged in the cutting up and resale of purchased fresh carcasses are classified in the trade industries.

202 DAIRY PRODUCTS

This group includes establishments primarily engaged in (1) manufacturing creamery butter, natural cheese, condensed and evaporated milk, ice cream and frozen desserts, and special dairy products such as processed cheese and malted milk and (2) processing (pasteurizing, homogenizing, vitaminizing, bottling) fluid milk and cream for wholesale or retail distribution. Independently operated milk receiving stations primarily engaged in the assembly and reshipment of bulk milk for the use of manufacturing or processing plants are classified in industry 5143.

2021 **Creamery Butter.**—Establishments primarily engaged in manufacturing creamery butter.

2022 **Cheese, Natural and Processed.**—Establishments primarily engaged in manufacturing all types of natural cheese (except cottage cheese—industry 2026), processed cheese, cheese foods, and cheese spreads.

2023 **Condensed and Evaporated Milk.**—Establishments primarily engaged in manufacturing condensed and evaporated milk and related products, including ice-cream mix and ice-milk mix made for sale as such, and dry milk products. Also included in the manufacture of nondairy-base cream substitutes and dietary supplements.

2024 **Ice Cream and Frozen Desserts.**—Establishments primarily engaged in manufacturing ice cream and other frozen desserts.

2026 **Fluid Milk.**—Establishments primarily engaged in processing (pasteurizing, homogenizing, vitaminizing, bottling) and distributing fluid milk and cream, and related products, including cottage cheese.

203 CANNED AND PRESERVED FRUITS AND VEGETABLES

2032 **Canned Specialties.**—Establishments primarily engaged in canning specialty products, such as baby foods, "native foods," health foods, and soups except seafood. Establishments primarily engaged in canning seafoods other than frozen are classified in industry 2091, frozen seafoods in industry 2092, and those primarily engaged in quick freezing canned specialties in industry 2038.

2033 **Canned Fruits, Vegetables, Preserves, Jams, and Jellies.**—Establishments primarily engaged in canning fruits and vegetables, and fruit and vegetable juices; and manufacturing catsup and similar tomato sauces, preserves, jams, and jellies. Establishments primarily engaged in canning seafoods (except frozen) are classified in industry 2091; and canned specialties, baby foods, and soups (except seafood) in industry 2032.

2034 **Dried and Dehydrated Fruits, Vegetables, and Soup Mixes.**—Establishments primarily engaged in sun drying or artificially dehydrating fruits and vegetables, or in manufacturing packaged soup mixes from dehydrated ingredients. Establishments primarily engaged in the grading and marketing of farm dried fruits, such as prunes and raisins, are classified in industry 5149.

2035 **Pickled Fruits and Vegetables, Vegetable Sauces and Seasonings, and Salad Dressings.**—Establishments primarily engaged in pickling and brining fruits and vegetables, and in manufacturing salad dressings, vegetable relishes, sauces, and seasonings. Establishments primarily engaged in manufacturing catsup and similar tomato sauces are classified in industry 2033, and those packing purchased pickles and olives in trade industries.

2037 **Frozen Fruits, Fruit Juices and Vegetables.**—Establishments primarily engaged in freezing and coldpacking (freezing) fruits, fruit juices, and vegetables.

2038 **Frozen Specialties.**—Establishments primarily engaged in freezing and coldpacking (freezing) food specialties such as frozen dinners and frozen pizza.

204 GRAIN MILL PRODUCTS

2041 **Flour and Other Grain Mill Products.**—Establishments primarily engaged in milling flour or meal from grain, except rice. The products of flour mills may be sold plain or in the form of prepared mixes or doughs for specific purposes. Establishments primarily engaged in manufacturing prepared flour mixes or doughs from purchased ingredients are classified in industry 2045, and rice milling in industry 2044.

2043 **Cereal Breakfast Foods.**—Establishments primarily engaged in manufacturing cereal breakfast foods and related preparations.

2044 **Rice Milling.**—Establishments primarily engaged in cleaning and polishing rice, and in manufacturing rice flour or meal. Other important products of this industry include brown rice, milled rice (including polished rice), rice polish, and rice bran.

2045 **Blended and Prepared Flour.**—Establishments primarily engaged in the preparation of blended flours and flour mixes or doughs from purchased flour. Establishments primarily engaged in milling flour from grain are classified in industry 2041.

2046 **Wet Corn Milling.**—Establishments primarily engaged in milling corn or sorghum grain (milo) by the wet process, and producing starch, sirup, oil, sugar, and byproducts such as gluten feed and meal. Establishments primarily engaged in manufacturing starch from other vegetable sources (potato, wheat, etc.) are also included. Establishments primarily engaged in manufacturing table sirups from corn sirup and other ingredients and those manufacturing starch-base dessert powders are classified in industry 2099.

2047 **Dog, Cat and Other Pet Food.**—Establishments primarily engaged in manufacturing dog, cat, and other pet food from cereal, meat, and other ingredients. These preparations may be canned, frozen, or dry. This industry also includes establishments slaughtering animals for pet food. Establishments primarily engaged in manufacturing feed for animals, other than pets, are classified in industry 2048.

2048 **Prepared Feeds and Feed Ingredients for Animals and Fowls, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing prepared feeds and feed ingredients and adjuncts, for animals and fowls, not elsewhere classified. This industry in-

cludes poultry and livestock feed and feed ingredients, such as alfalfa meal, feed supplements, feed concentrates, and feed premixes. Establishments primarily engaged in manufacturing pet foods are classified in industry 2047.

205 BAKERY PRODUCTS

2051 Bread and Other Bakery Products, Except Cookies and Crackers.—Establishments primarily engaged in manufacturing bread, cakes, and other "perishable" bakery products. Establishments manufacturing bakery products for sale primarily for home service delivery, or through one or more non-baking retail outlets, are included in this industry. Establishments primarily engaged in producing "dry" bakery products, such as biscuits, crackers, and cookies, are classified in industry 2052. Establishments producing bakery products primarily for direct sale on the premises to household consumers are classified in Retail Trade, industry 5462.

2052 Cookies and Crackers.—Establishments primarily engaged in manufacturing cookies, crackers, pretzels, and similar "dry" bakery products. Establishments primarily engaged in producing "perishable" bakery products are classified in industry 2051.

206 SUGAR AND CONFECTIONERY PRODUCTS

2061 Cane Sugar, Except Refining Only.—Establishments primarily engaged in manufacturing raw sugar, sirup, or finished (granulated or clarified) cane sugar from sugarcane. Establishments primarily engaged in refining sugar from purchased raw cane sirup or sugar sirups are classified in industry 2062.

2062 Cane Sugar Refining.—Establishments primarily engaged in refining purchased raw cane sugar and sugar sirup.

2063 Beet Sugar.—Establishments primarily engaged in manufacturing sugar from sugar beets.

2065 Candy and Other Confectionery Products.—Establishments primarily engaged in manufacturing candy, including chocolate candy, salted nuts, other confections, and related products. Establishments primarily engaged in manufacturing solid chocolate bars are classified in industry 2066 and chewing gum in industry 2067. Establishments primarily engaged in manufacturing confectionery for direct sale on the premises are classified in industry 5441, and those primarily engaged in shelling and roasting nuts are classified in industry 5145.

2066 Chocolate and Cocoa Products.—Establishments primarily engaged in shelling, roasting, and grinding cacao beans for the purpose of making chocolate liquor, from which cocoa powder and cocoa butter are derived, and in the further manufacture of solid chocolate bars and chocolate coatings. Establishments primarily engaged in manufacturing products, except candy, from purchased chocolate and cocoa are classified in industry 2099, and chocolate candy in industry 2065.

2067 Chewing Gum.—Establishments primarily engaged in manufacturing chewing gum or chewing gum base.

207 FATS AND OILS

2074 Cottonseed Oil Mills.—Establishments primarily engaged in manufacturing cottonseed oil and by-product cake, meal, and linters. Establishments primarily engaged in refining cottonseed oil into edible cooking oils are classified in industry 2079.

2075 Soybean Oil Mills.—Establishments primarily engaged in manufacturing soybean oil and byproduct cake and meal. Establishments primarily engaged in refining soybean oil into edible cooking oils are classified in industry 2079.

2076 Vegetable Oil Mills, Except Corn, Cottonseed, and Soybean.—Establishments primarily engaged in manufacturing vegetable oils and byproduct cake and meal, except corn, cottonseed, and soybean. Establishments primarily engaged in manufacturing corn oil and its byproducts are classified in industry 2046, those which are refining vegetable oils into edible cooking oils are classified in industry 2079, and those refining these oils for medicinal purposes in industry 2833.

2077 Animal and Marine Fats and Oils.—Establishments primarily engaged in manufacturing animal oils, including fish oil and other marine animal oils and fish and animal meal; and those rendering inedible grease and tallow from animal fat, bones, and meat scraps. Establishments primarily engaged in manufacturing lard and edible tallow and stearin are classified in group 201; those refining marine animal oils for medicinal purposes in industry 2833; and those manufacturing fatty acids in industry 2899.

2079 **Shortening, Table Oils, Margarine and Other Edible Fats and Oils, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing shortening, table oils, margarine, and other edible fats and oils, not elsewhere classified, by further processing of purchased animal and vegetable oils. Establishments primarily engaged in producing corn oil are classified in industry 2046.

208 BEVERAGES

2082 **Malt Beverages.**—Establishments primarily engaged in manufacturing all kinds of malt beverages. Establishments primarily engaged in bottling purchased malt beverages are classified in industry 5181.

2083 **Malt.**—Establishments primarily engaged in manufacturing malt or malt byproducts from barley or other grains.

2084 **Wines, Brandy, and Brandy Spirits.**—Establishments primarily engaged in manufacturing wines, brandy, and brandy spirits. This industry also includes bonded storerooms which are engaged in blending wines. Establishments primarily bottling purchased wines, brandy, and brandy spirits, but which do not manufacture wines and brandy, are classified in industry 5182.

2085 **Distilled, Rectified, and Blended Liquors.**—Establishments primarily engaged in manufacturing alcoholic liquors by distillation and rectification and in manufacturing cordials and alcoholic cocktails by blending processes or by mixing liquors and other ingredients. Establishments primarily engaged in manufacturing industrial alcohol are classified in industry 2869, and those only bottling purchased liquors in industry 5182.

2086 **Bottled and Canned Soft Drinks and Carbonated Waters.**—Establishments primarily engaged in manufacturing soft drinks (nonalcoholic beverages) and carbonated waters. Establishments primarily engaged in manufacturing fruit and vegetable juices are classified in group 203, fruit sirups for flavoring in industry 2087, and cider in industry 2099. Establishments primarily engaged in bottling natural spring waters are classified in industry 5149.

2087 **Flavoring Extracts and Flavoring Sirups, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing flavoring extracts, sirups, and fruit juices, not elsewhere classified, for soda fountain use or for the manufacture of soft drinks, and colors for bakers' and confectioners' use. Establishments primarily engaged in manufacturing chocolate sirup are classified in industry 2066 if from cacao beans and in industry 2099 if from purchased chocolate.

209 MISCELLANEOUS FOOD PREPARATIONS AND KINDRED PRODUCTS

2091 **Canned and Cured Fish and Seafoods.**—Establishments primarily engaged in cooking and canning fish, shrimp, oysters, clams, crabs, and other seafoods, including soups; and those engaged in smoking, salting, drying, or otherwise curing fish for the trade. Establishments primarily engaged in shucking and packing fresh oysters in nonsealed containers, or in freezing and packaging fresh fish, are classified in industry 2092.

2092 **Fresh or Frozen Packaged Fish and Seafoods.**—Establishments primarily engaged in preparing fresh and raw or cooked frozen packaged fish and other seafood, including soups. This industry also includes establishments primarily engaged in the shucking and packing of fresh oysters in nonsealed containers.

2095 **Roasted Coffee.**—Establishments primarily engaged in roasting coffee and in manufacturing coffee concentrates and extracts in powdered, liquid, or frozen form, including freeze-dried.

2097 **Manufactured Ice.**—Establishments primarily engaged in manufacturing ice for sale. Ice plants operated by public utility companies are included in this industry when separate reports are available. When separate reports are not available, they should be classified in SIC Major Group 49. Establishments primarily engaged in manufacturing dry ice are classified in industry 2813.

2098 **Macaroni, Spaghetti, Vermicelli, and Noodles.**—Establishments primarily engaged in manufacturing dry macaroni, spaghetti, vermicelli, and noodles. Establishments primarily engaged in manufacturing canned macaroni, spaghetti, etc., are classified in industry 2032.

2099 **Food Preparations, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing prepared foods and miscellaneous food specialties, not elsewhere classified, such as baking powder, yeast, and other leavening compounds; chocolate and cocoa products, except confectionery, made from purchased materials; peanut butter; packaged tea including instant; ground spices; potato, corn, and other chips; and vinegar and cider.

21 TOBACCO MANUFACTURES

This major group includes establishments engaged in manufacturing cigarettes, cigars, smoking and chewing tobacco, and snuff, and in stemming and redrying tobacco. The manufacture of insecticides from tobacco byproducts is included in SIC Major Group 28.

211 CIGARETTES

2111 **Cigarettes.**—Establishments engaged in manufacturing cigarettes.

212 CIGARS

2121 **Cigars.**—Establishments engaged in manufacturing cigars. Retail stores producing cigars are classified in trade industries.

213 TOBACCO (CHEWING AND SMOKING) AND SNUFF

2131 **Tobacco (Chewing and Smoking) and Snuff.**—Establishments engaged in manufacturing smoking and chewing tobaccos, and snuff.

214 TOBACCO STEMMING AND REDRYING

2141 **Tobacco Stemming and Redrying.**—Establishments primarily engaged in the stemming and redrying of tobacco. Establishments which sell leaf tobacco as merchant wholesalers, agents, or brokers, and which may be also engaged in stemming tobacco, are classified in SIC Major Group 51. Leaf tobacco warehouses which may be also engaged in stemming tobacco are classified in SIC Major Group 42.

22 TEXTILE MILL PRODUCTS

This major group includes establishments engaged in performing any of the following operations: (1) Preparation of fiber and subsequent manufacturing yarn, thread, braids, twine, and cordage; (2) manufacturing broadwoven fabric, narrow woven fabric, knit fabric, and carpets and rugs from yarn; (3) dyeing and finishing fiber, yarn, fabric, and knit apparel; (4) coating, waterproofing, or otherwise treating fabric; (5) the integrated manufacture of knit apparel and other finished articles from yarn; and (6) the manufacture of felt goods, lace goods, nonwoven fabrics, and miscellaneous textiles.

This classification makes no distinction between the two types of organizations which operate in the textile industry: (1) The "integrated" mill which purchases materials, produces textiles and related articles within the establishment, and sells the finished products; and (2) the "contract" or "commission" mill which processes materials owned by others. Converters or other nonmanufacturing establishments which assign materials to contract mills for processing (other than knitting) are classified in nonmanufacturing industries; establishments which assign yarns to outside contractors or commission knitters for the production of knit products are classified in group 225.

221 BROADWOVEN FABRIC MILLS, COTTON

2211 **Broadwoven Fabric Mills, Cotton.**—Establishments primarily engaged in weaving fabrics over 12 inches in width, wholly or chiefly by weight of cotton. Establishments primarily engaged in weaving cotton carpets and rugs are classified in industry 2271; those tufting carpets and rugs in industry 2272; those making tire cord and fabric in industry 2296; and finishers of cotton broadwoven fabrics in industry 2261.

222 BROAD WOVEN FABRIC MILLS, MANMADE FIBER AND SILK

2221 **Broadwoven Fabric Mills, Manmade Fiber and Silk.**—Establishments primarily engaged in weaving fabrics over 12 inches in width, wholly or chiefly by weight of silk and manmade fibers, including glass. Establishments primarily engaged in weaving carpets and rugs from these fibers are classified in industry 2271; those tufting carpets and rugs from these fibers in industry 2272; those making tire cord and fabric in industry 2296; and finishers of manmade fiber and silk broadwoven goods in industry 2262.

223 BROADWOVEN FABRIC MILLS, WOOL (INCLUDING DYEING AND FINISHING)

2231 **Broadwoven Fabric Mills, Wool (Including Dyeing and Finishing).**—Establishments primarily engaged in

weaving fabrics over 12 inches in width, wholly or chiefly by weight of wool, mohair, or similar animal fibers; those dyeing and finishing all woven wool fabrics or dyeing wool, tops, or yarn; and those shrinking and sponging wool goods for the trade. Establishments primarily engaged in weaving wool carpets and rugs are classified in industry 2271, and those tufting wool carpets and rugs in industry 2272.

224 NARROW FABRICS AND OTHER SMALLWARES MILLS: COTTON, WOOL, SILK, AND MANMADE FIBER

2241 Narrow Fabrics and Other Smallwares Mills: Cotton, Wool, Silk, and Manmade Fiber.—Establishments primarily engaged in weaving or braiding fabrics 12 inches or narrower in width of cotton, wool, silk, and manmade fibers, including glass fibers. Establishments primarily engaged in producing fabric-covered elastic yarn or thread are also included in this industry.

225 KNITTING MILLS

This group includes three types of organizations which operate in the knitting mill industry: (1) The "integrated" mill which purchases materials, produces textiles and related articles within the establishment, and sells the finished products; (2) the "contract" or "commission" mill which processes materials owned by others; and (3) establishments commonly known as jobbers or converters of knit goods which perform the entrepreneurial functions of a manufacturing company, such as buying the raw material, designing and preparing samples, and assigning yarns to others for knitting products on their account.

2251 Women's Full Length and Knee Length Hosiery.—Establishments primarily engaged in knitting, dyeing, or finishing women's and misses' full length and knee length hosiery, both seamless and full-fashioned, and panty hose.

2252 Hosiery, Except Women's Full Length and Knee Length Hosiery.—Establishments primarily engaged in knitting, dyeing, or finishing hosiery except women's and misses' full length and knee length seamless and full-fashioned hosiery and panty hose.

2253 Knit Outerwear Mills.—Establishments primarily engaged in knitting outerwear from yarn or in manufacturing outerwear from knit fabric produced in the same establishment. Establishments primarily engaged in handknitting outerwear for the trade are included in this industry. Establishments primarily engaged in knitting gloves and mittens are classified in industry 2259, and those manufacturing outerwear from purchased knit fabric in SIC Major Group 23.

2254 Knit Underwear Mills.—Establishments primarily engaged in knitting underwear and nightwear from yarn or in manufacturing underwear and nightwear from knit fabric produced in the same establishment. Establishments primarily engaged in manufacturing underwear and nightwear from purchased knit fabric are classified in SIC Major Group 23.

2257 Circular Knit Fabric Mills.—Establishments primarily engaged in knitting circular (tubular) fabric or in dyeing or finishing circular (tubular) knit fabric. Establishments primarily engaged in knitting, dyeing, or finishing warp fabric are classified in industry 2258.

2258 Warp Knit Fabric Mills.—Establishments primarily engaged in knitting warp (flat) fabric or in dyeing or finishing warp (flat) knit fabric. Establishments primarily engaged in knitting, dyeing, or finishing circular fabric are classified in industry 2257.

2259 Knitting Mills, Not Elsewhere Classified.—Establishments primarily engaged in knitting gloves and other articles not elsewhere classified. Establishments primarily engaged in manufacturing woven or knit fabric gloves and mittens from purchased fabrics are classified in industry 2381.

226 DYEING AND FINISHING TEXTILES, EXCEPT WOOL FABRICS AND KNIT GOODS

2261 Finishers of Broadwoven Fabrics of Cotton.—Establishments primarily engaged in finishing purchased cotton broadwoven fabrics or finishing such fabrics on a commission basis. These finishing operations include bleaching, dyeing, printing (roller, screen, flock, plisse), and other mechanical finishing such as preshrinking, calendering, and napping. This industry also includes the shrinking and sponging of cloth for the trade, and chemical finishing for water repellency, fire resistance, and mildew proofing. Establishments primarily engaged in finishing wool broadwoven fabrics are classified in industry 2231; knit goods in group 225; and those coating or impregnating fabrics in industry 2295.

2262 Finishers of Broadwoven Fabrics of Manmade Fiber and Silk.—Establishments primarily engaged in finishing purchased manmade fiber and silk broadwoven fabrics or finishing such fabrics on a commission basis. These finishing operations include bleaching, dyeing, printing (roller, screen, flock, plisse), and other mechanical finishing such as preshrinking, calendering, and napping. Establishments primarily engaged in finishing wool broadwoven fabrics are classified in industry 2231; knit goods in group 225; and those coating or impregnating fabrics in industry 2295.

2269 Finishers of Textiles, Not Elsewhere Classified.—Establishments primarily engaged in dyeing and finishing textiles, not elsewhere classified, such as bleaching, dyeing, printing, and finishing of raw stock, yarn, braided goods, and narrow fabrics, except wool and knit fabrics. These establishments perform finishing operations on purchased textiles or on a commission basis.

227 FLOOR COVERING MILLS

2271 Woven Carpets and Rugs.—Establishments primarily engaged in weaving carpets and rugs from any textile yarn. Important products of this industry include Axminster, Wilton, velvet, and similar woven carpets and rugs; and woven automobile and aircraft floor coverings.

2272 Tufted Carpets and Rugs.—Establishments primarily engaged in tufting carpets and rugs from any textile fiber. Important products of this industry include tufted carpets, rugs, scatter rugs, and bathmats and bathmat sets except terry woven. Finishers of these products are also included in this industry.

2279 Carpets and Rugs, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing rugs, carpets, art squares, floor mattings, needle punch carpeting, and doormats and mattings from twisted paper, grasses, reeds, coir, sisal, jute, or rags. Establishments primarily engaged in manufacturing hard-surface floor coverings, except rubber and cork, are classified in industry 3996.

228 YARN AND THREAD MILLS

2281 Yarn Spinning Mills: Cotton, Manmade Fibers and Silk.—Establishments primarily engaged in spinning yarn wholly or chiefly by weight of cotton, manmade fibers, or silk. Establishments primarily engaged in dyeing or finishing purchased yarns or finishing yarns on a commission basis are classified in industry 2269.

2282 Yarn Texturizing, Throwing, Twisting, and Winding Mills: Cotton, Manmade Fibers and Silk.—Establishments primarily engaged in texturizing, throwing, twisting, winding or spooling yarn wholly or chiefly by weight of cotton, manmade fibers, or silk. Establishments primarily engaged in dyeing or finishing purchased yarns or finishing yarns on a commission basis are classified in industry 2269.

2283 Yarn Mills, Wool, Including Carpet and Rug Yarn.—Establishments primarily engaged in spinning, twisting, winding, or spooling yarn (including carpet and rug yarn) wholly or chiefly by weight of wool, mohair, or similar animal fibers. Establishments primarily engaged in dyeing or finishing purchased wool yarn or finishing wool yarn on a commission basis are classified in industry 2231.

2284 Thread Mills.—Establishments primarily engaged in manufacturing thread from natural or manmade fiber except flax (industry 2299) and wool (industry 2283). Important products of this industry include sewing, crochet, darning, embroidery, tatting, handknitting, and other handicraft threads.

229 MISCELLANEOUS TEXTILE GOODS

2291 Felt Goods, Except Woven Felts and Hats.—Establishments primarily engaged in manufacturing pressed felt, regardless of fiber, by means of heat, moisture, and pressure; and those making punched felt for rugs, cushions, and other products from hair, jute, wool, or other fibers by the needle loom process. Establishments primarily engaged in manufacturing woven wool felts and wool haircloth are classified in industry 2231, those manufacturing felt hats in group 235, and those manufacturing needle punch carpeting in industry 2279.

2292 Lace Goods.—Establishments primarily engaged in manufacturing lace machine products, and those primarily engaged in dyeing and finishing lace goods. Establishments primarily engaged in manufacturing Schiffli machine embroideries are classified in industry 2397. Establishments primarily engaged in manufacturing knitted lace and netting are classified in industry 2258.

2293 **Paddings and Upholstery Filling.**—Establishments primarily engaged in manufacturing batting, padding, wadding, and filling for upholstery, pillows, quilts, and apparel, from curled hair, cotton-mill waste, moss, hemp tow, flax tow, kapok, and related materials. Establishments primarily engaged in manufacturing wood excelsior pads and wrappers are classified in industry 2429.

2294 **Processed Waste and Recovered Fibers and Flock.**—Establishments primarily engaged in processing textile mill waste for spinning, padding, batting, or other uses; in recovering textile fibers from clippings and rags; in cutting flock from waste, recovered fibers, or new fiber stock; and in manufacturing oakum and twisted jute packing. Establishments primarily engaged in cleaning and sorting wiping rags or waste are classified in industry 5093.

2295 **Coated Fabrics, Not Rubberized.**—Establishments primarily engaged in manufacturing coated and impregnated textiles and in the special finishing of textiles, such as varnishing and waxing. Establishments primarily engaged in rubberizing purchased fabrics are classified in industry 3069, and those primarily engaged in dyeing and finishing textiles in group 226.

2296 **Tire Cord and Fabric.**—Establishments primarily engaged in manufacturing cord and fabric for use in reinforcing rubber tires, industrial belting, fuel cells, and similar uses.

2297 **Nonwoven Fabrics.**—Establishments primarily engaged in manufacturing nonwoven fabrics (by bonding and/or interlocking of fibers) by mechanical, chemical, thermal, or solvent means or by combinations thereof. Establishments primarily engaged in producing fabrics by the wool felting process are classified in other industries in this major group.

2298 **Cordage and Twine.**—Establishments primarily engaged in manufacturing rope, cable, cordage, twine, and related products from abaca (Manila), sisal, henequen, hemp, cotton, paper, jute, flax, manmade fibers including glass, and other fibers.

2299 **Textile Goods, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing linen goods, jute goods except felt, and other textile goods not elsewhere classified. Establishments primarily engaged in processing textile fibers to prepare them for spinning, such as wool scouring and carbonizing and combing and converting tow to top, are also classified here. Establishments primarily engaged in manufacturing woven felts are classified in industry 2231, nonwoven felts in industry 2291, nonwoven textiles in industry 2297, and cordage and twine in industry 2298.

23 APPAREL AND OTHER FINISHED PRODUCTS MADE FROM FABRICS AND SIMILAR MATERIALS

This major group, known as the cutting-up and needle trades, includes establishments producing clothing and fabricating products by cutting and sewing purchased woven or knit textile fabrics and related materials such as leather, rubberized fabrics, plastics, and furs.

Included in the apparel industries are three types of establishments: (1) The "regular" or inside factories, (2) contract factories, and (3) apparel jobbers. The regular factories perform all of the usual manufacturing functions within their own plant; the contract factories manufacture apparel from materials owned by others; and apparel jobbers perform the entrepreneurial functions of a manufacturing company, such as buying raw materials, designing and preparing samples, arranging for the manufacture of the garments from their materials, and selling of the finished apparel.

Custom tailors and dressmakers not operating on a factory basis are classified in industry 5699; establishments which purchase and resell finished garments but do not perform the functions of the apparel jobbers are classified in group 513.

231 MEN'S, YOUTHS', AND BOYS' SUITS, COATS, AND OVERCOATS

2311 **Men's, Youths', and Boys' Suits, Coats, and Overcoats.**—Establishments primarily engaged in manufacturing men's, youths', and boys' tailored suits, coats, and overcoats. Establishments primarily engaged in manufacturing uniforms (except athletic uniforms) are also included in this industry. Establishments primarily engaged in manufacturing men's work garments are classified in industry 2328.

232 MEN'S, YOUTHS', AND BOYS' FURNISHINGS, WORK CLOTHING, AND ALLIED GARMENTS

2321 **Men's, Youths', and Boys' Shirts (Except Work Shirts) and Nightwear.**—Establishments primarily

engaged in manufacturing men's, youths', and boys' shirts (including polo and sports shirts) and nightwear, cut and sewed from purchased woven or knit fabric. Establishments primarily engaged in manufacturing work shirts are classified in industry 2328. Knitting mills primarily engaged in manufacturing nightwear are classified in industry 2254, and outerwear in industry 2253.

2322 **Men's, Youths', and Boys' Underwear.**—Establishments primarily engaged in manufacturing men's, youths', and boys' underwear, cut and sewed from purchased woven or knit fabric. Knitting mills primarily engaged in manufacturing underwear are classified in industry 2254.

2323 **Men's, Youths', and Boys' Neckwear.**—Establishments primarily engaged in manufacturing men's, youths', and boys' neckties, scarfs, and mufflers, cut and sewed from purchased woven or knit fabric. Knitting mills primarily engaged in manufacturing neckties, scarfs, and mufflers are classified in industry 2253.

2327 **Men's, Youths', and Boys' Separate Trousers.**—Establishments primarily engaged in manufacturing men's, youths', and boys' separate trousers and slacks. Establishments primarily engaged in manufacturing complete suits are classified in industry 2311, and work pants and jeans in industry 2328.

2328 **Men's, Youths', and Boys' Work Clothing.**—Establishments primarily engaged in manufacturing men's, youths', and boys' work shirts, pants, jeans, and other work clothing and washable service apparel.

2329 **Men's, Youths', and Boys' Clothing, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing men's, youths', and boys' clothing not elsewhere classified. Establishments primarily engaged in manufacturing polo and sport shirts from purchased woven or knit materials are classified in industry 2321; separate trousers in industry 2327; work clothing in industry 2328; and leather and sheep lined garments in industry 2386. Knitting mills primarily engaged in manufacturing outerwear are classified in industry 2253.

233 WOMEN'S, MISSES', AND JUNIORS' OUTERWEAR

2331 **Women's, Misses', and Juniors' Blouses, Waists, and Shirts.**—Establishments primarily engaged in manufacturing women's, misses', and juniors' blouses, waists, and shirts. Knitting mills primarily engaged in manufacturing outerwear are classified in industry 2253. Establishments primarily engaged in manufacturing girls', children's, and infants' blouses, waists, and shirts are classified in industry 2361.

2335 **Women's, Misses', and Juniors' Dresses.**—Establishments primarily engaged in manufacturing women's, misses', and juniors' dresses, including ensemble dresses and pants dresses, whether sold by the piece or by the dozen. Establishments primarily engaged in manufacturing girls', children's, and infants' dresses are classified in industry 2361.

2337 **Women's, Misses', and Juniors' Suits, Skirts, and Coats.**—Establishments primarily engaged in manufacturing women's, misses', and juniors' suits, pantsuits, skirts, and coats except furcoats and raincoats. These garments are generally tailored and usually lined. Establishments primarily engaged in manufacturing fur garments are classified in industry 2371, raincoats in industry 2385, and knitting mills primarily engaged in manufacturing knit outerwear in industry 2253.

2339 **Women's, Misses', and Juniors' Outerwear, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing women's, misses', and juniors' outerwear, not elsewhere classified, cut and sewed from purchased woven or knit fabric. Knitting mills primarily engaged in manufacturing outerwear are classified in industry 2253.

234 WOMEN'S, MISSES', CHILDREN'S, AND INFANTS' UNDERGARMENTS

2341 **Women's, Misses', Children's, and Infants' Underwear and Nightwear.**—Establishments primarily engaged in manufacturing women's, misses', children's, and infants' underwear and nightwear, cut and sewed from purchased woven or knit fabric. Knitting mills primarily engaged in manufacturing underwear and nightwear are classified in industry 2254.

2342 **Brassieres, Girdles, and Allied Garments.**—Establishments primarily engaged in manufacturing brassieres, girdles, corsets, corset accessories, and allied garments. Establishments primarily engaged in manufacturing surgical and orthopedic appliances are classified in industry 3842.

235 HATS, CAPS, AND MILLINERY

2351 Millinery.—Establishments primarily engaged in manufacturing women's, misses', children's, and infants' millinery. Establishments primarily engaged in manufacturing millinery braid and trimmings are classified in industry 2396.

2352 Hats and Caps, Except Millinery.—Establishments primarily engaged in manufacturing hats and caps (except millinery) and all hat bodies. Knitting mills primarily engaged in manufacturing caps are classified in industry 2253.

236 GIRLS', CHILDREN'S, AND INFANTS' OUTERWEAR

2361 Girls', Children's, and Infants' Dresses, Blouses, Waists, and Shirts.—Establishments primarily engaged in manufacturing girls', children's, and infants' dresses, blouses, waists, and shirts, cut and sewed from purchased woven or knit fabric. Knitting mills primarily engaged in manufacturing outerwear are classified in industry 2253.

2363 Girls', Children's, and Infants' Coats and Suits.—Establishments primarily engaged in manufacturing girls', children's, and infants' coats and suits, cut and sewed from purchased woven or knit fabric. Knitting mills primarily engaged in manufacturing outerwear are classified in industry 2253.

2369 Girls', Children's, and Infants' Outerwear, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing girls', children's, and infants' outerwear, not elsewhere classified, cut and sewed from purchased woven or knit fabric. Knitting mills primarily engaged in manufacturing outerwear are classified in industry 2253.

237 FUR GOODS

2371 Fur Goods.—Establishments primarily engaged in manufacturing furcoats, and other garments, accessories, and trimmings made of fur. Establishments primarily engaged in manufacturing sheep lined clothing are classified in industry 2386, and those engaged in dyeing and dressing of furs in industry 3999.

238 MISCELLANEOUS APPAREL AND ACCESSORIES

2381 Dress and Work Gloves, Except Knit and All-Leather.—Establishments primarily engaged in manufacturing dress, semidress, and work gloves and mittens, cut and sewed from purchased woven or knit fabric, or these materials combined with leather or plastic. Knitting mills primarily engaged in manufacturing gloves and mittens are classified in industry 2259, establishments primarily engaged in manufacturing leather gloves in industry 3151, those manufacturing rubber gloves in industry 3069, and plastic gloves in industry 3079.

2384 Robes and Dressing Gowns.—Establishments primarily engaged in manufacturing men's and women's robes and dressing gowns.

2385 Raincoats and Other Waterproof Outer Garments.—Establishments primarily engaged in manufacturing raincoats from purchased rubberized fabrics and other waterproof outer garments made from such material as pliofilm and cellophane. Establishments primarily engaged in manufacturing oiled fabric work garments are classified in industry 2328, and those manufacturing vulcanized rubber garments and garments made from rubberized fabrics produced in the same establishment are classified in industry 3069.

2386 Leather and Sheep Lined Clothing.—Establishments primarily engaged in manufacturing leather and sheep lined garments. Establishments primarily engaged in manufacturing leather gloves and mittens are classified in industry 3151, and fur garments in industry 2371.

2387 Apparel Belts.—Establishments primarily engaged in manufacturing men's and women's apparel belts, regardless of material.

2389 Apparel and Accessories, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing suspenders, garters, handkerchiefs, and other apparel, not elsewhere classified, such as academic caps and gowns, vestments, and theatrical costumes.

239 MISCELLANEOUS FABRICATED TEXTILE PRODUCTS

2391 Curtains and Draperies.—Establishments primarily engaged in manufacturing curtains and draperies from

purchased materials. Establishments primarily engaged in manufacturing lace curtains on lace machines are classified in industry 2292.

2392 **Housefurnishings, Except Curtains and Draperies.**—Establishments primarily engaged in manufacturing housefurnishings, such as blankets, bedspreads, sheets, tablecloths, and towels from purchased materials. Establishments primarily engaged in manufacturing curtains and draperies are classified in industry 2391. Establishments producing housefurnishings primarily of fabric woven at the same establishment are classified according to fiber in industries 2211, 2221, or 2231.

2393 **Textile Bags.**—Establishments primarily engaged in manufacturing shipping and other industrial bags from purchased fabric. Establishments primarily engaged in manufacturing plastic bags are classified in industry 2643; laundry, wardrobe, shoe, and other textile housefurnishing bags in industry 2392; and luggage in industry 3161.

2394 **Canvas and Related Products.**—Establishments primarily engaged in manufacturing awnings, tents, and related products from purchased fabric. Establishments primarily engaged in manufacturing canvas bags are classified in industry 2393.

2395 **Pleating, Decorative and Novelty Stitching, and Tucking for the Trade.**—Establishments primarily engaged in pleating, decorative and novelty stitching, and tucking for the trade. Establishments primarily engaged in performing similar services for individuals are classified in service industries. Establishments primarily engaged in manufacturing trimmings are classifled in industry 2396.

2396 **Automotive Trimmings, Apparel Findings, and Related Products.**—Establishments primarily engaged in manufacturing automotive trimmings and apparel findings and related products.

2397 **Schiffli Machine Embroideries.**—Establishments primarily engaged in manufacturing Schiffli machine embroideries.

2399 **Fabricated Textile Products, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing fabricated textile products not elsewhere classified.

24 LUMBER AND WOOD PRODUCTS, EXCEPT FURNITURE

This major group includes logging camps engaged in cutting timber and pulpwood; merchant sawmills, lath mills, shingle mills, cooperage stock mills, planing mills, and plywood mills and veneer mills engaged in producing lumber and wood basic materials; and establishments engaged in manufacturing finished articles made entirely or mainly of wood or wood substitutes. Certain types of establishments producing wood products are classified elsewhere. For example, furniture and office and store fixtures are classified in SIC Major Group 25; musical instruments, toys, playground equipment, and caskets in SIC Major Group 39. Woodworking in connection with construction in the nature of reconditioning and repair or performed to individual order, is classified in nonmanufacturing industries.

241 LOGGING CAMPS AND LOGGING CONTRACTORS

2411 **Logging Camps and Logging Contractors.**—Logging camps and logging contractors primarily engaged in cutting timber and in producing rough, round, hewn, or riven primary forest or wood raw materials. Independent contractors engaged in estimating or trucking timber, but who perform no cutting operations, are classified in nonmanufacturing industries. Logging and woods operations conducted in combination with sawmills, pulpmills, or other converting establishments, and not separately reported, are classified in their respective industry groups; namely, with sawmills in SIC group 242, veneer and plywood mills in SIC group 243, pulpmills in SIC Major Group 26, and charcoal and wood distillation plants in SIC group 286. Establishments primarily engaged in the collection of bark, sap, gum, and other forest byproducts are classified in SIC Major Group 08.

242 SAWMILLS AND PLANING MILLS

2421 **Sawmills and Planing Mills, General.**—Establishments primarily engaged in sawing rough lumber and timber from logs and bolts, or resawing cants and flitches into lumber, including box lumber and softwood cut stock; planing mills combined with sawmills; and separately operated planing mills which are engaged primarily in producing surfaced

lumber and standard workings or patterns of lumber. This industry includes establishments primarily engaged in sawing lath and railroad ties and in producing tobacco hogshead stock, wood chips, and snow fence lath. Establishments primarily engaged in manufacturing box shook or boxes are classified in SIC group 244; sash, doors, wood molding, window and door frames, and other fabricated millwork in SIC group 243; and hardwood dimension and flooring in industry 2426. Logging camps combined with sawmills, when not separately reported, are included in this industry.

2426 **Hardwood Dimension and Flooring Mills.**—Establishments primarily engaged in manufacturing hardwood dimension lumber and workings therefrom; other hardwood dimension, semifabricated or ready for assembly; hardwood flooring; and wood frames for household furniture. Establishments primarily engaged in manufacturing stairwork, molding, and trim are classified in industry 2431; and those manufacturing textile machinery bobbins, picker sticks, and shuttles in industry 3552.

2429 **Special Product Sawmills, Not Elsewhere Classified.**—Mills primarily engaged in manufacturing excelsior, wood shingles, and cooperage stock; and in sawing special products not elsewhere classified.

243 MILLWORK, VENEER, PLYWOOD, AND STRUCTURAL WOOD MEMBERS

2431 **Millwork.**—Establishments primarily engaged in manufacturing fabricated millwork. Planing mills primarily engaged in producing millwork are included in this industry, but planing mills primarily producing standard workings or patterns of lumber are classified in industry 2421. Establishments primarily manufacturing wood kitchen cabinets and bathroom vanities are classified in industry 2434.

2434 **Wood Kitchen Cabinets.**—Establishments primarily engaged in manufacturing wood kitchen cabinets and wood bathroom vanities.

2435 **Hardwood Veneer and Plywood.**—Establishments primarily engaged in producing commercial hardwood veneer, either face or technical, and those primarily engaged in manufacturing commercial plywood or prefinished hardwood plywood. This includes nonwood backed or faced veneer and nonwood faced plywood from veneer produced in the same establishment or from purchased veneer. Establishments primarily engaged in the production of veneer which is used in the same establishment for the manufacture of end products such as fruit and vegetable baskets and wood boxes are classified in industries 2441 and 2449.

2436 **Softwood Veneer and Plywood.**—Establishments primarily engaged in producing commercial softwood veneer and plywood from veneer produced in the same establishment or from purchased veneer. Establishments primarily engaged in producing commercial hardwood veneer and plywood are classified in industry 2435. Establishments primarily engaged in the production of veneer which is used in the same establishment for the manufacture of end products such as fruit and vegetable baskets and wood boxes are classified in industries 2441 and 2449.

2439 **Structural Wood Members, Not Elsewhere Classified.**—Establishments primarily engaged in producing laminated or fabricated trusses, arches, and other structural members of lumber. Establishments primarily engaged in fabrication on the site of construction are classified in Division C, Construction. Establishments primarily engaged in producing prefabricated wooden buildings, sections, and panels are classified in industry 2452.

244 WOOD CONTAINERS

2441 **Nailed and Lock Corner Wood Boxes and Shook.**—Establishments primarily engaged in manufacturing nailed and lock corner wood boxes (lumber or plywood) and those which also may produce shook for nailed and lock corner boxes.

2448 **Wood Pallets and Skids.**—Establishments primarily engaged in manufacturing wood and wood-metal combination pallets and skids.

2449 **Wood Containers, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing wood containers, not elsewhere classified, such as cooperage, wirebound boxes and crates, and other veneer and plywood containers. Establishments primarily engaged in manufacturing tobacco hogshead stock are classified in industry 2421, and those manufacturing cooperage stock in industry 2429.

245 WOOD BUILDINGS AND MOBILE HOMES

2451 Mobile Homes.—Establishments primarily engaged in manufacturing mobile homes. These mobile homes are generally over 35 feet long, at least 8 feet wide, do not have facilities for storage of water or waste, and are equipped with wheels. These products may also have nonresidential uses such as classrooms or offices. Trailers that are generally 35 feet long or less, 8 feet wide or less, and with self-contained facilities are classified in industry 3792. Portable buildings not equipped with wheels are classified in industry 2452.

2452 Prefabricated Wood Buildings and Components.—Establishments primarily engaged in manufacturing prefabricated wood buildings, sections, and panels. Establishments primarily engaged in fabricating buildings on the site of construction are classified in Division C, Construction.

249 MISCELLANEOUS WOOD PRODUCTS

2491 Wood Preserving.—Establishments primarily engaged in treating wood, sawed or planed in other establishments, with creosote or other preservatives to prevent decay and to protect against fire and insects. This industry also includes the cutting, treating, and selling of poles, posts, and piling, but establishments primarily engaged in manufacturing other wood products, which they may also treat with preservatives, are not included.

2492 Particleboard.—Establishments primarily engaged in manufacturing wood panel products from small wood particles. This includes preparation of small particles of wood, drying, mixing with a synthetic resin binder, and compressing. Pressing may take place in hydraulic presses with heated platens or by extrusion.

2499 Wood Products, Not Elsewhere Classified.—Establishments primarily engaged in turning and shaping wood and manufacturing miscellaneous wood products, not elsewhere classified, from rattan, reed, splint, straw, veneer, veneer strips, wicker, and willow. This industry also includes establishments manufacturing lasts and related products, cork products, hardboard, and wood or metal mirror and picture frames. Establishments primarily engaged in manufacturing particleboard are classified in industry 2492, and those manufacturing pallets and skids in industry 2448.

25 FURNITURE AND FIXTURES

This major group includes establishments engaged in manufacturing household, office, public building, and restaurant furniture; and office and store fixtures. Establishments primarily engaged in the production of millwork are classified in industry 2431; wood kitchen cabinets in industry 2434; cut stone and concrete furniture in SIC Major Group 32; laboratory and hospital furniture in SIC Major Group 38; beauty and barber shop furniture in SIC Major Group 39; and woodworking to individual order or in the nature of reconditioning and repair in nonmanufacturing industries.

251 HOUSEHOLD FURNITURE

2511 Wood Household Furniture, Except Upholstered.—Establishments primarily engaged in manufacturing wood household furniture commonly used in dwellings. This industry also includes establishments manufacturing camp furniture. Establishments primarily engaged in manufacturing upholstered furniture are classified in industry 2512; reed and rattan furniture in industry 2519; television, radio, phonograph, and sewing machine cabinets in industry 2517; and kitchen cabinets and bathroom vanities in industry 2434.

2512 Wood Household Furniture, Upholstered.—Establishments primarily engaged in manufacturing upholstered furniture on wood frames. Shops primarily engaged in reupholstering furniture, or upholstering frames to individual order, are classified in nonmanufacturing industries. Establishments primarily engaged in manufacturing dual-purpose sleep furniture, such as studio couches, sofa beds, and chair beds, are classified in industry 2515, regardless of the material used in the frame. Establishments primarily engaged in manufacturing wood frames for upholstered furniture are classified in industry 2426.

2514 Metal Household Furniture.—Establishments primarily engaged in manufacturing padded or plain metal household furniture of a type commonly used in dwellings. Establishments primarily engaged in manufacturing dual-purpose sleep furniture, such as studio couches, sofa beds, and chair beds, are classified in industry 2515, regardless of the material used in the frame.

2515 Mattresses and Bedsprings.—Establishments primarily engaged in manufacturing innerspring mattresses, box spring mattresses, and noninnerspring mattresses containing felt, form rubber, urethane, hair, or any other filling material; and assembled wire springs (fabric, coil, or box) for use on beds, couches, and cots. This industry also includes establishments primarily engaged in manufacturing dual-purpose sleep furniture, such as studio couches, sofa beds, and chair beds, regardless of the material used in the frame. Establishments primarily engaged in manufacturing automobile seats and backs are classified in industry 2531; individual wire springs in industry 3495; and paddings and upholstery filling in industry 2293.

2517 Wood Television, Radio, Phonograph, and Sewing Machine Cabinets.—Establishments primarily engaged in manufacturing wood cabinets for radios, television sets, phonographs, and sewing machines.

2519 Household Furniture, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing reed, rattan, and other wicker furniture, plastics and fiberglass household furniture and cabinets, and household furniture not elsewhere classified.

252 OFFICE FURNITURE

2521 Wood Office Furniture.—Establishments primarily engaged in manufacturing wood office furniture, whether padded, upholstered, or plain.

2522 Metal Office Furniture.—Establishments primarily engaged in manufacturing metal office furniture, whether padded or plain. Establishments primarily engaged in manufacturing safes and vaults are classified in industry 3499.

253 PUBLIC BUILDING AND RELATED FURNITURE

2531 Public Building and Related Furniture.—Establishments primarily engaged in manufacturing furniture for schools, theaters, assembly halls, churches, and libraries. Establishments primarily engaged in manufacturing seats for public conveyances, as well as seats for automobiles and aircraft, are included in this industry. Establishments primarily engaged in manufacturing stone furniture are classified in industry 3281, and concrete furniture in industry 3272.

254 PARTITIONS, SHELVING, LOCKERS, AND OFFICE AND STORE FIXTURES

2541 Wood Partitions, Shelving, Lockers, and Office and Store Fixtures.—Establishments primarily engaged in manufacturing wood shelving, lockers, office and store fixtures, prefabricated partitions, plastic laminated fixture tops, and related fabricated products. Establishments primarily engaged in manufacturing refrigerated cabinets, show cases, and display cases are classified in industry 3585, and safes and vaults in industry 3499.

2542 Metal Partitions, Shelving, Lockers, and Office and Store Fixtures.—Establishments primarily engaged in manufacturing metal shelving, storage racks, lockers, office and store fixtures, prefabricated partitions, and related fabricated products. Establishments primarily engaged in manufacturing refrigerated cabinets, show cases, and display cases are classified in industry 3585, and safes and vaults in industry 3499.

259 MISCELLANEOUS FURNITURE AND FIXTURES

2591 Drapery Hardware and Window Blinds and Shades.—Establishments primarily engaged in manufacturing curtain and drapery rods, poles, and fixtures; and venetian blinds and other window blinds and shades, regardless of the materials used, except canvas shades and awnings (industry 2394).

2599 Furniture and Fixtures, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing furniture and fixtures, not elsewhere classified, including furniture specially designed for use in restaurants, bars, cafeterias, bowling establishments, and ships.

26 PAPER AND ALLIED PRODUCTS

This major group includes the manufacture of pulps from wood and other cellulose fibers, and from rags; the manufacture of paper and paperboard; and the manufacture of paper and paperboard into converted products such as paper coated off the paper machine, paper bags, paper boxes and envelopes. Certain types of converted paper products are classified elsewhere, such as abrasive paper in industry 3291, carbon paper in industry 3955, and photosensitized and blueprint paper in industry 3861.

261 PULPMILLS

2611 Pulpmills.—Establishments primarily engaged in manufacturing pulp from wood or from other materials such as rags, linters, wastepaper, and straw. Logging camps operated by pulpmills, and not separately reported, are also included in this industry. Establishments primarily engaged in cutting pulpwood are classified in industry 2411; and pulpmills combined with papermills or paperboard mills, and not separately reported, are classified with the latter in industries 2621 and 2631, respectively.

262 PAPERMILLS, EXCEPT BUILDING PAPERMILLS

2621 Papermills, Except Building Papermills.—Establishments primarily engaged in manufacturing paper (except building paper—industry 2661) from woodpulp and other fibers, and which may also manufacture converted paper products. Pulpmills combined with papermills, and not separately reported, are also included in this industry; where separately reported, they are classified in industry 2611. Establishments primarily engaged in manufacturing converted paper products from purchased paper stock are classified in SIC groups 264 or 265.

263 PAPERBOARD MILLS

2631 Paperboard Mills.—Establishments primarily engaged in manufacturing paperboard, including paperboard coated on the paperboard machine, from woodpulp and other fibers; and which may also manufacture converted paperboard products. Pulpmills combined with paperboard mills, and not separately reported, are also included in this industry; where separately reported, they are classified in industry 2611. Establishments primarily engaged in manufacturing converted paperboard products from purchased paperboard are classified in SIC groups 264 or 265, and building board in industry 2661.

264 CONVERTED PAPER AND PAPERBOARD PRODUCTS, EXCEPT CONTAINERS AND BOXES

2641 Paper Coating and Glazing.—Establishments primarily engaged in manufacturing coated, glazed, or varnished paper from purchased paper. Also included are establishments primarily manufacturing pressure sensitive tape with backing of any material other than rubber. Establishments primarily engaged in manufacturing carbon paper are classified in industry 3955, and photographic and blueprint paper in industry 3861.

2642 Envelopes.—Establishments primarily engaged in manufacturing envelopes of any description from purchased paper and paperboard. Establishments primarily engaged in manufacturing papeteries (boxed stationery) are classified in industry 2648.

2643 Bags, Except Textile Bags.—Establishments primarily engaged in manufacturing bags from purchased paper, cellophane, acetate, polyethylene, polypropylene, pliofilm, foil, and similar sheet or film materials.

2645 Die-Cut Paper and Paperboard and Cardboard.—Establishments primarily engaged in diecutting purchased paper and paperboard; and in manufacturing cardboard by laminating, lining, or surface coating paperboard. Establishments primarily engaged in laminating building paper or building board from purchased paper or board are classified in industry 2649.

2646 Pressed and Molded Pulp Goods.—Establishments primarily engaged in manufacturing all kinds of pressed and molded pulp goods, including papier-mache articles other than statuary and art goods (industry 3299). Establishments primarily engaged in manufacturing plates and utensils from paper are classified in industry 2654.

2647 Sanitary Paper Products.—Establishments primarily engaged in manufacturing, from purchased paper, sanitary paper products, such as facial tissues and handkerchiefs, table napkins, toilet paper, towels, disposable diapers, and sanitary napkins and tampons.

2648 Stationery, Tablets, and Related Products.—Establishments primarily engaged in manufacturing stationery, tablets, looseleaf fillers, and related items from purchased paper. Establishments primarily engaged in manufacturing envelopes are classified in industry 2642.

2649 Converted Paper and Paperboard Products, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing from purchased paper or paperboard miscellaneous converted paper or paperboard

products not elsewhere classified. Establishments primarily engaged in manufacturing sanitary paper products from purchased paper are classified in industry 2647. The paper stock used for wallpaper, called "hanging paper," is classified in industry 2621. Establishments primarily engaged in manufacturing stationery, tablets, and related products are classified in industry 2648.

265 PAPERBOARD CONTAINERS AND BOXES

2651 Folding Paperboard Boxes.—Establishments primarily engaged in manufacturing folding paperboard boxes from purchased paperboard.

2652 Set-up Paperboard Boxes.—Establishments primarily engaged in manufacturing set-up paperboard boxes from purchased paperboard.

2653 Corrugated and Solid Fiber Boxes.—Establishments primarily engaged in manufacturing corrugated and solid fiber boxes and related products from purchased paperboard of fiber stock. Important products of this industry include corrugated and solid fiberboard boxes, pads, partitions, display items, pallets, single-face products, and corrugated sheets.

2654 Sanitary Food Containers.—Establishments primarily engaged in manufacturing food containers from special food board. Important products of this industry include fluid milk containers; folding paraffined cartons for butter, margarine, and shortening; ice cream containers; frozen food containers; liquid tight containers; round nested food containers; paper cups for hot or cold drinks; pails for food and ice cream; and stamped plates, dishes, spoons, and similar products. Establishments primarily engaged in manufacturing similar items of plastics materials are classified in industry 3079.

2655 Fiber Cans, Tubes, Drums, and Similar Products.—Establishments primarily engaged in manufacturing from purchased materials fiber cans, cones, drums, similar products with or without metal ends, and vulcanized fiber boxes.

266 BUILDING PAPER AND BUILDING BOARD MILLS

2661 Building Paper and Building Board Mills.—Establishments primarily engaged in manufacturing building paper and building board from woodpulp and other fibrous materials. Pulpmills combined with building paper and building board mills, and not separately reported, are also included in this industry; where separately reported, they are classified in industry 2611.

27 PRINTING, PUBLISHING, AND ALLIED INDUSTRIES

This major group includes establishments engaged in printing by one or more of the common processes, such as letterpress, lithography, gravure, or screen; and those establishments which perform services for the printing trade, such as bookbinding, typesetting, engraving, photoengraving, and electrotyping. This major group also includes establishments engaged in publishing newspapers, books, and periodicals, regardless of whether or not they do their own printing. News syndicates are classified in service industries, (industry 7351) and textile printing and finishing in SIC Major Group 22.

271 NEWSPAPERS: PUBLISHING, PUBLISHING AND PRINTING

2711 Newspapers: Publishing, Publishing and Printing.—Establishments primarily engaged in publishing newspapers or in publishing and printing newspapers. These establishments carry on the various operations necessary for issuing newspapers, including the gathering of news and the preparation of editorials and advertisements, but may or may not perform their own printing. Commercial printing is frequently carried on by establishments engaged in publishing and printing newspapers, but, even though the commercial printing may be of major importance, such establishments are included in this industry. Establishments not engaged in publishing newspapers, but which print or lithograph newspapers for publishers, are classified in SIC group 275. News syndicates are classified in service industries (industry 7351).

272 PERIODICALS: PUBLISHING, PUBLISHING AND PRINTING

2721 Periodicals: Publishing, Publishing and Printing.—Establishments primarily engaged in publishing periodicals or in preparing, publishing, and printing

periodicals. These establishments carry on the various operations necessary for issuing periodicals, but may or may not perform their own printing. Establishments not engaged in publishing periodicals, but which print or lithograph periodicals for publishers, are classified in SIC group 275.

273 BOOKS

2731 Books: Publishing, Publishing and Printing.—Establishments primarily engaged in publishing only, or in publishing and printing books and pamphlets. Establishments primarily engaged in printing or in printing and binding (but not publishing) books and pamphlets are classified in industry 2732.

2732 Book Printing.—Establishments primarily engaged in printing only or in printing and binding books and pamphlets, but not engaged in publishing. Establishments primarily engaged in publishing, or in publishing and printing books and pamphlets, are classified in industry 2731. Establishments engaged in both printing and binding books, but primarily binding books printed elsewhere, are classified in industry 2789.

274 MISCELLANEOUS PUBLISHING

2741 Miscellaneous Publishing.—Establishments primarily engaged in miscellaneous publishing activities, not elsewhere classified, whether or not engaged in printing. Establishments primarily engaged in offering financial, credit, or other business services, and which may publish directories as part of this service, are not included in this industry but are classified in service industries.

275 COMMERCIAL PRINTING

2751 Commercial Printing, Letterpress and Screen.—Establishments primarily engaged in letterpress and screen commercial or job printing, including flexographic. This industry includes general printing shops, as well as shops specializing in printing newspapers and periodicals for others, and those which specialize in screen printing. Establishments primarily engaged in printing books, without publishing, are classified in industry 2732, and greeting cards in industry 2771. Establishments primarily engaged in printing from lithographic plates are classified in industry 2752, and gravure and rotogravure printing in industry 2754.

2752 Commercial Printing, Lithographic.—Establishments primarily engaged in printing by the lithographic process. The greater part of the work in this industry is performed on a job or custom basis; but, in some cases, lithographed calendars, maps, posters, decalcomanias, etc., are made for sale. Offset printing, photo-offset printing, and photolithographing are also included in this industry. Establishments primarily engaged in lithographing books and pamphlets, without publishing, are classified in industry 2732, and greeting cards in industry 2771. Establishments primarily engaged in preparing lithographic plates and in related services are classified in industry 2795.

2753 Engraving and Plate Printing.—Establishments primarily engaged in engraving and etching steel, copper, wood, or rubber plates; in using these plates to print stationery, visiting and other cards, invitations, maps, etc.; and in making woodcuts for use in printing illustrations, posters, etc. Engraving for purposes other than printing is classified in industry 3479.

2754 Commercial Printing, Gravure.—Establishments primarily engaged in gravure printing.

276 MANIFOLD BUSINESS FORMS

2761 Manifold Business Forms.—Establishments primarily engaged in designing and printing, by any process, special forms for use in the operation of a business, in single and multiple sets, including carbonized or interleaved with carbon or otherwise processed for multiple reproduction.

277 GREETING CARD PUBLISHING

2771 Greeting Card Publishing.—Establishments primarily engaged in the designing, publishing, and printing by any process of greeting cards for all occasions.

278 BLANKBOOKS, LOOSELEAF BINDERS, AND BOOKBINDING AND RELATED WORK

2782 Blankbooks, Looseleaf Binders, and Devices.—Establishments primarily engaged in manufacturing blankbooks, looseleaf devices, and library binders; and in ruling paper.

2789 Bookbinding and Related Work.—Establishments primarily engaged in edition, trade, job, and library bookbinding; in book or paper bronzing, gilding, and edging; in map and sample mounting; and other services related to bookbinding. Establishments primarily binding books printed elsewhere are classified in this industry, but those primarily binding books printed in the same establishment are classified in SIC group 273.

279 SERVICE INDUSTRIES FOR THE PRINTING TRADE

2791 Typesetting.—Establishments primarily engaged in typesetting for the trade, including advertisement typesetting.

2793 Photoengraving.—Establishments primarily engaged in preparing photoengraved plates (halftones and linecuts). These establishments do not, as a rule, print from the plates which they make, but prepare them for use by others.

2794 Electrotyping and Stereotyping.—Establishments primarily engaged in preparing electrotype and stereotype plates. These establishments do not, as a rule, print from the plates which they make, but prepare them for use by others.

2795 Lithographic Platemaking and Related Services.—Establishments primarily engaged in making lithographic plates and positives or negatives from which lithographic plates are made, and in related services. Establishments primarily engaged in printing by the lithographic process are classified in industry 2752.

28 CHEMICALS AND ALLIED PRODUCTS

This major group includes establishments producing basic chemical and establishments manufacturing products by predominantly chemical processes. Establishments classified in this major group manufacture three general classes of products: (1) Basic chemicals such as acids, alkalies, salts, and organic chemicals; (2) chemical products to be used in further manufacture such as synthetic fibers, plastics materials, dry colors, and pigments; (3) finished chemical products to be used for ultimate consumption such as drugs, cosmetics, and soaps; or to be used as materials or supplies in other industries, such as paints, fertilizers, and explosives. The mining of natural rock salt is classified in mining industries. Establishments primarily engaged in manufacturing nonferrous metals and high-percentage ferroalloys are classified in SIC Major Group 33; silicon carbide in SIC Major Group 32; baking powder, other leavening compounds, and starches in SIC Major Group 20; and artists' colors in SIC Major Group 39. Establishments primarily engaged in packaging, repackaging, and bottling of purchased chemical products, but not engaged in manufacturing chemicals and allied products, are classified in trade industries.

281 INDUSTRIAL INORGANIC CHEMICALS

This group includes establishments primarily engaged in manufacturing basic industrial inorganic chemicals. Establishments primarily engaged in manufacturing formulated agricultural pesticides are classified in industry 2879; medicinal chemicals, drugs, and medicines in industry 2833; and soap and cosmetics in SIC group 284.

2812 Alkalies and Chlorine.—Establishments primarily engaged in manufacturing alkalies and chlorine.

2813 Industrial Gases.—Establishments primarily engaged in manufacturing gases for sale in compressed, liquid, and solid forms. Establishments primarily engaged in manufacturing fluorine and sulfur dioxide are classified in industry 2819; household ammonia in industry 2842, and other ammonia in industry 2873; and cholorine in industry 2812. Distributors of industrial gases and establishments primarily engaged in shipping liquid oxygen are classified in trade.

2816 Inorganic Pigments.—Establishments primarily engaged in manufacturing inorganic pigments. Important products of this industry include black pigments (except carbon black, industry 2895), white pigments, and color pigments. Organic color pigments, except animal black and bone black, are classified in industry 2865.

2819 Industrial Inorganic Chemicals, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing industrial inorganic chemicals not elsewhere classified. Important products of this industry include inorganic salts of sodium (excluding refined sodium chloride), potassium, aluminum, calcium, chromium, magnesium, mercury, nickel, silver, tin; inorganic compounds such as alums, calcium carbide, hydrogen peroxide, sodium silicate,

ammonia compounds (except fertilizers), rare earth metal salts and elemental bromine, fluorine, iodine, phosphorus, and alkali metals (sodium, potassium, lithium, etc.). Establishments primarily engaged in mining, milling, or otherwise preparing natural potassium, sodium, or boron compounds (other than common salt) are classified in industry 1474. Establishments primarily engaged in manufacturing household bleaches are classified in industry 2842; phosphoric acid in industry 2874; and nitric acid, anhydrous ammonia, and other nitrogenous fertilizer materials in industry 2873.

282 PLASTICS MATERIALS AND SYNTHETIC RESINS, SYNTHETIC RUBBER, SYNTHETIC AND OTHER MANMADE FIBERS, EXCEPT GLASS

This group includes chemical establishments primarily engaged in manufacturing plastics materials and synthetic resins, synthetic rubbers, and cellulosic and manmade organic fibers. Establishments primarily engaged in the manufacture of rubber products and those primarily engaged in the compounding of purchased resins or the fabrication of plastics sheets, rods, and miscellaneous plastics products are classified in SIC Major Group 30; and textile mills primarily engaged in throwing, spinning, weaving, or knitting textile products from manufactured fibers are classified in SIC Major Group 22.

2821 **Plastics Materials, Synthetic Resins, and Nonvulcanizable Elastomers.**—Establishments primarily engaged in manufacturing synthetic resins, plastics materials, and nonvulcanizable elastomers. Important products of this industry include: Cellulose plastic materials; phenolic and other tar acid resins; urea and melamine resins; vinyl resins; styrene resins; alkyd resins; acrylic resins; polyethylene resins; polypropylene resins; rosin modified resins; coumarone-indene and petroleum polymer resins; and miscellaneous resins including polyamide resins, silicones, polyisobutylenes, polyesters, polycarbonate resins, acetal resins, fluorohydrocarbon resins; and casein plastics. Establishments primarily engaged in manufacturing fabricated plastics products or plastics film, sheet, rod, nontextile monofilaments and regenerated cellulose products, and vulcanized fiber are classified in industry 3079, whether from purchased resins or from resins produced in the same plant. Establishments primarily engaged in compounding purchased resins are also classified in industry 3079. Establishments primarily manufacturing adhesives are classified in industry 2891.

2822 **Synthetic Rubber (Vulcanizable Elastomers).**—Establishments primarily engaged in manufacturing synthetic rubber by polymerization or copolymerization. An elastomer for the purpose of this classification is a rubber-like material capable of vulcanization, such as copolymers of butadiene and styrene, or butadiene and acrylonitrile, polybutadienes, chloroprene rubbers, and isobutylene-isoprene copolymers. Butadiene copolymers containing less than 50% butadiene are classified in industry 2821. Natural chlorinated rubbers and cyclized rubbers are considered as semifinished products and are classified in industry 3069.

2823 **Cellulosic Manmade Fibers.**—Establishments primarily engaged in manufacturing cellulosic fibers (including cellulose acetate and regenerated cellulose such as rayon by the viscose or cuprammonium process) in the form of monofilament, yarn, staple, or tow suitable for further manufacturing on spindles, looms, knitting machines, or other textile processing equipment. Establishments primarily engaged in manufacturing textile glass fibers are classified in industry 3229.

2824 **Synthetic Organic Fibers, Except Cellulosic.**—Establishments primarily engaged in manufacturing synthetic organic fibers, except cellulosic (including those of regenerated proteins, and of polymers or copolymers of such components as vinyl chloride, vinylidene chloride, linear esters, vinyl alcohols, acrylonitrile, ethylenes, amides, and related polymeric materials) in the form of monofilament, yarn, staple, or tow suitable for further manufacturing on spindles, looms, knitting machines, or other textile processing equipment. Establishments primarily engaged in manufacturing textile glass fibers are classified in industry 3229.

283 DRUGS

This group includes establishments primarily engaged in manufacturing, fabricating, or processing medicinal chemicals and pharmaceutical products. Also included in this group are establishments primarily engaged in the grading, grinding, and milling of botanicals.

2831 **Biological Products.**—Establishments primarily engaged in the production of bacterial and virus vaccine, toxoids and analogous products (such as allergenic extracts), serums, plasmas, and other blood derivatives for human or veterinary use.

2833 Medicinal Chemicals and Botanical Products.—Establishments primarily engaged in (1) manufacturing bulk organic and inorganic medicinal chemicals and their derivatives; and (2) processing (grading, grinding, and milling) bulk botanical drugs and herbs. Establishments primarily engaged in manufacturing agar-agar and similar products of natural origin, endocrine products, manufacturing or isolating basic vitamins, and isolating active medicinal principals such as alkaloids from botanical drugs and herbs are also included in this industry.

2834 Pharmaceutical Preparations.—Establishments primarily engaged in manufacturing, fabricating, or processing drugs in pharmaceutical preparations for human or veterinary use. The greater part of the products of these establishments are finished in the form intended for final consumption, such as ampoules, tablets, capsules, vials, ointments, medicinal powders, solutions, and suspensions. Products of this industry consist of two important lines, namely: (1) Pharmaceutical preparations promoted primarily to the dental, medical, or veterinary professions; and (2) pharmaceutical preparations promoted primarily to the public.

284 SOAP, DETERGENTS, AND CLEANING PREPARATIONS, PERFUMES, COSMETICS, AND OTHER TOILET PREPARATIONS

This group includes establishments primarily engaged in manufacturing soap and other detergents and in producing glycerin from vegetable and animal fats and oils; specialty cleaning, polishing, and sanitation preparations; and surface active preparations used as emulsifiers, wetting agents, and finishing agents, including sulfonated oils; and perfumes, cosmetics, and other toilet preparations.

2841 Soap and Other Detergents, Except Specialty Cleaners.—Establishments primarily engaged in manufacturing soap, synthetic organic detergents, inorganic alkaline detergents, or any combination thereof, and establishments producing crude and refined glycerin from vegetable and animal fats and oils. Establishments primarily engaged in manufacturing shampoos or shaving products, whether from soap or synthetic detergents, are classified in industry 2844; and synthetic glycerin in industry 2869.

2842 Specialty Cleaning, Polishing, and Sanitation Preparations.—Establishments primarily engaged in manufacturing furniture, metal, and other polishes; waxes and dressings for fabricated leather and other materials; household, institutional and industrial plant disinfectants, deodorants; dry cleaning preparations; household bleaches; and other sanitation preparations. Establishments primarily manufacturing household pesticidal preparations are classified in industry 2879.

2843 Surface Active Agents, Finishing Agents, Sulfonated Oils and Assistants.—Establishments primarily engaged in producing surface active preparations for use as wetting agents, emulsifiers, and penetrants. Establishments engaged in producing sulfonated oils and fats and related products are also included.

2844 Perfumes, Cosmetics, and Other Toilet Preparations.—Establishments primarily engaged in manufacturing perfumes (natural and synthetic), cosmetics, and other toilet preparations. This industry also includes establishments primarily engaged in blending and compounding perfume bases; and those manufacturing shampoos and shaving products, whether from soap or synthetic detergents. Establishments primarily engaged in manufacturing synthetic perfume and flavoring materials are classified in industry 2869, and essential oils in industry 2899.

285 PAINTS, VARNISHES, LACQUERS, ENAMELS, AND ALLIED PRODUCTS

2851 Paints, Varnishes, Lacquers, Enamels, and Allied Products.—Establishments primarily engaged in manufacturing paints (in paste and ready-mixed form); varnishes; lacquers; enamels and shellac; putties, wood fillers and sealers; paint and varnish removers; and paint brush cleaners and allied paint products. Establishments primarily engaged in manufacturing carbon black are classified in industry 2895; boneblack, lampblack, and inorganic color pigments in industry 2816; organic color pigments in industry 2865; plastics materials in industry 2821; printing ink in industry 2893; calking compounds and sealants in industry 2891; and artists' paints in industry 3952.

286 INDUSTRIAL ORGANIC CHEMICALS

Establishments primarily engaged in manufacturing industrial organic chemicals. Important products of this group include: (1) Noncyclic organic chemicals such as

acetic, chloroacetic, adipic, formic, oxalic and tartaric acids and their metallic salts; chloral, formaldehyde, and methylamine; (2) solvents such as amyl, butyl, and ethyl alcohols; methanol; amyl, butyl and ethyl acetates; ethel ether, ethylene glycol ether and diethylene glycol ether; acetone, carbon disulfide, and chlorinated solvents such as carbon tetrachloride, perchloroethylene and trichloroethylene; (3) polyhydric alcohols such as ethylene glycol, sorbitol, pentaerythritol, synthetic glycerin; (4) synthetic perfume and flavoring materials such as coumarin, methyl salicylate, saccharin, citral, citronellal, synthetic geraniol, ionone, terpineol, and synthetic vanillin; (5) rubber processing chemicals such as accelerators and antioxidants, both cyclic and acyclic; (6) plasticizers, both cyclic and acyclic, such as esters of phosphoric acid, phthalic anhydride, adipic acid, lauric acid, oleic acid, sebacic acid, and stearic acid; (7) synthetic tanning agents such as naphthalene sulfonic acid condensates, (8) chemical warfare gases; (9) esters, amines, etc., of polyhydric alcohols and fatty and other acids; (10) cyclic crudes and intermediates; (11) cyclic dyes and organic pigments; and (12) natural gum and wood chemicals. Establishments primarily engaged in manufacturing plastics materials and nonvulcanizable elastomers are classified in industry 2821; synthetic rubber in industry 2822; essential oils in industry 2899; rayon and other synthetic fibers in industries 2823 and 2824; specialty cleaning, polishing and sanitation preparations in industry 2842; paints in industry 2851; and inorganic pigments in industry 2816. Distilleries engaged in the manufacture of grain alcohol for beverage purposes are classified in industry 2085.

2861 Gum and Wood Chemicals.—Establishments primarily engaged in manufacturing hardwood and softwood distillation products, wood and gum naval stores, charcoal, natural dyestuffs, and natural tanning materials. Establishments primarily engaged in manufacturing synthetic tanning materials and synthetic organic chemicals are classified in industry 2869, and synthetic organic dyes in industry 2865.

2865 Cyclic (Coal Tar) Crudes, and Cyclic Intermediates, Dyes, and Organic Pigments (Lakes and Toners).—Establishments primarily engaged in manufacturing coal tar crudes and cyclic organic intermediates, dyes, color lakes, and toners. Important products of this industry include: (1) Derivatives of benzene, toluene, naphthaline, anthracene, pyridine, carbazole, and other cyclic chemical products; (2) synthetic organic dyes; (3) synthetic organic pigments; and (4) cyclic (coal tar) crudes, such as light oils and light oil products; coal tar acids; and products of medium and heavy oil such as creosote oil, naphthalene, anthracene, and their higher homologues, and tar. Establishments primarily engaged in manufacturing coal tar crudes in chemical recovery ovens are classified in industry 3312, and petroleum refineries which produce such products in industry 2911.

2869 Industrial Organic Chemicals, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing industrial organic chemicals not elsewhere classified. Important products of this industry include: (1) Noncyclic organic chemicals such as acetic, chloroacetic, adipic, formic, oxalic and tartaric acids and their metallic salts; chloral, formaldehyde and methylamine; (2) solvents such as amyl, butyl, and ethyl alcohols; methanol; amyl, butyl and ethyl acetates; ethel ether, ethylene glycol ether and diethylene glycol ether; acetone, carbon disulfide and chlorinated solvents such as carbon tetrachloride, perchloroethylene and trichloroethylene; (3) polyhydric alcohols such as ethylene glycol, sorbitol, pentaerythritol, synthetic glycerin; (4) synthetic perfume and flavoring materials such as coumarin, methyl salicylate, saccharin, citral, citronellal, synthetic geraniol, ionone, terpineol, and synthetic vanillin; (5) rubber processing chemicals such as accelerators and antioxidants, both cyclic and acyclic; (6) plasticizers, both cyclic and acyclic, such as esters of phosphoric acid, phthalic anhydride, adipic acid, lauric acid, oleic acid, sebacic acid, and stearic acid; (7) synthetic tanning agents such as naphthalene sulfonic acid condensates; (8) chemical warfare gases; and (9) esters, amines, etc., of polyhydric alcohols and fatty and other acids. Establishments primarily engaged in manufacturing plastics materials and nonvulcanizable elastomers are classified in industry 2821; synthetic rubber in industry 2822; essential oils in industry 2899; wood distillation products, naval stores, and natural dyeing and tanning materials in industry 2861; rayon and other synthetic fibers in industries 2823 and 2824; specialty cleaning, polishing, and sanitation preparations in industry 2842; paints in industry 2851; urea in industry 2873; organic pigments in industry 2865; and inorganic pigments in industry 2816. Distilleries engaged in the manufacture of grain alcohol for beverage purposes are classified in industry 2085.

287 AGRICULTURAL CHEMICALS

This group includes establishments primarily engaged in manufacturing nitrogenous and phosphatic basic fertilizers, mixed fertilizers, pesticides, and other agricultural chemicals. Establishments primarily engaged in manufacturing basic chemicals which require further processing or formulation before use as agricultural pest-control agents are classified in SIC group 281 or 286.

2873 Nitrogenous Fertilizers.—Establishments primarily engaged in manufacturing nitrogenous fertilizer material or mixed fertilizers from nitrogenous materials produced in the same establishment. Included are ammonia fertilizer compounds and anhydrous ammonia, nitric acid, ammonium nitrate, ammonium sulfate and nitrogen solutions, urea, and natural organic fertilizers (except compost) and mixtures.

2874 Phosphatic Fertilizers.—Establishments primarily engaged in manufacturing phosphatic fertilizer materials or mixed fertilizers from phosphatic materials produced in the same establishment. Included are phosphoric acid; normal, enriched, and concentrated superphosphates; ammonium phosphates; nitrophosphates; and calcium metaphosphates.

2875 Fertilizers, Mixing Only.—Establishments primarily engaged in mixing fertilizers from purchased fertilizer materials.

2879 Pesticides and Agricultural Chemicals, Not Elsewhere Classified.—Establishments primarily engaged in the formulation and preparation of ready-to-use agricultural and household pest-control chemicals, including insecticides, fungicides, and herbicides from technical chemicals or concentrates; and the production of concentrates which require further processing before use as agricultural pesticides. This industry also includes establishments primarily engaged in manufacturing or formulating agricultural chemicals, not elsewhere classified, such as minor or trace elements and soil conditioners. Establishments primarily engaged in manufacturing basic or technical agricultural pest-control chemicals including insecticides, fungicides, and herbicides such as lead and calcium arsenates, and copper sulfate are classified in SIC group 281, and DDT, BHC, 2,4-D carbamates, etc., in SIC group 286. Establishments primarily engaged in manufacturing agricultural lime products are classified in SIC Major Group 32.

289 MISCELLANEOUS CHEMICAL PRODUCTS

2891 Adhesives and Sealants.—Establishments primarily engaged in manufacturing industrial and household adhesives, glues, calking compounds, sealants, and linoleum, tile, and rubber cements from vegetable, animal, or synthetic plastics materials, purchased or produced in the same establishment. Establishments primarily engaged in manufacturing gelatin and sizes are classified in industry 2899, and vegetable gelatin or agar-agar in industry 2833.

2892 Explosives.—Establishments primarily engaged in manufacturing explosives. Establishments primarily engaged in manufacturing ammunition for small arms are classified in industry 3482, and fireworks in industry 2899.

2893 Printing Ink.—Establishments primarily engaged in manufacturing printing ink, gravure ink, screen process ink, and lithographic ink.

2895 Carbon Black.—Establishments primarily engaged in manufacturing carbon black (channel and furnace black).

2899 Chemicals and Chemical Preparations, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing miscellaneous chemical preparations, not elsewhere classified, such as fatty acids, essential oils, gelatin (except vegetable), sizes, bluing, laundry sours, writing and stamp pad inks; industrial compounds, such as boiler and heat insulating compounds, metal, oil and water treating compounds, and waterproofing compounds and chemical supplies for foundries. Establishments primarily engaged in manufacturing vegetable gelatin (agar-agar) are classified in industry 2833; and dessert preparations based on gelatin in industry 2099.

29 PETROLEUM REFINING AND RELATED INDUSTRIES

This major group includes establishments primarily engaged in petroleum refining, manufacturing paving and roofing materials, and compounding lubricating oils and greases from purchased materials. Establishments manufacturing and distributing gas to consumers are classified in public utilities industries, and those primarily engaged in producing coke and byproducts in SIC Major Group 33.

291 PETROLEUM REFINING

2911 Petroleum Refining.—Establishments primarily engaged in producing gasoline, kerosene, distillate fuel oils, residual fuel oils, lubricants, and other products from crude petroleum and its fractionation products, through straight distillation of crude oil, redistillation of unfinished petroleum derivatives, cracking, or other processes. Establishments primarily engaged in producing natural gasoline from natural gas are classified in mining industries. Those manufacturing lubricating oils and greases by blending and compounding purchased materials are included in industry 2992. Establishments primarily re-refining used lubricating oils are classified in industry 2992.

295 PAVING AND ROOFING MATERIALS

2951 Paving Mixtures and Blocks.—Establishments primarily engaged in manufacturing asphalt and tar paving mixtures; and paving blocks made of asphalt, creosoted wood, and various compositions of asphalt or tar with other materials. Establishments primarily engaged in manufacturing brick, concrete, granite, and stone paving blocks are classified in SIC Major Group 32.

2952 Asphalt Felts and Coatings.—Establishments primarily engaged in manufacturing asphalt and other saturated felts in roll or shingle form, either smooth or faced with grit, and in manufacturing roofing cements and coatings. Establishments primarily engaged in manufacturing paint are classified in industry 2851, and linoleum and tile cement in industry 2891.

299 MISCELLANEOUS PRODUCTS OF PETROLEUM AND COAL

2992 Lubricating Oils and Greases.—Establishments primarily engaged in blending, compounding, and re-refining lubricating oils and greases from purchased mineral, animal, and vegetable materials. Petroleum refineries engaged in the production of lubricating oils and greases are classified in industry 2911.

2999 Products of Petroleum and Coal, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing fuel briquettes, boulets, packaged fuel, powdered fuel, and other products of petroleum and coal not elsewhere classified.

30 RUBBER AND MISCELLANEOUS PLASTICS PRODUCTS

This major group includes establishments manufacturing from natural, synthetic, or reclaimed rubber, gutta percha, balata, or gutta siak, rubber products such as tires, rubber footwear, mechanical rubber goods, heels and soles, flooring, and rubber sundries. This group also includes establishments primarily manufacturing tires, but establishments primarily recapping and retreading automobile tires are classified in industry 7534. This group also includes establishments engaged in molding primary plastics for the trade and manufacturing miscellaneous finished plastics products. The manufacture of elastic webbing is classified in SIC Major Group 22; products made of elastic webbing and garments made from rubberized fabrics in SIC Major Group 23; and synthetic rubber in industry 2822.

301 TIRES AND INNER TUBES

3011 Tires and Inner Tubes.—Establishments primarily engaged in manufacturing pneumatic casings, inner tubes, and solid and cushion tires for all types of vehicles, airplanes, farm equipment, and children's vehicles; tiring; and camelback, and tire repair and retreading materials. Establishments primarily engaged in retreading tires are classified in industry 7534.

302 RUBBER AND PLASTICS FOOTWEAR

3021 Rubber and Plastics Footwear.—Establishments primarily engaged in manufacturing all rubber and plastics footwear, waterproof fabric upper footwear, and other fabric upper footwear having rubber or plastic soles vulcanized to the uppers. Establishments primarily engaged in manufacturing rubber, composition, and fiber heels, soles, soling strips, and related shoemaking and repairing materials are classified in industry 3069; plastic soles and soling strips in industry 3079.

303 RECLAIMED RUBBER

3031 Reclaimed Rubber.—Establishments primarily engaged in reclaiming rubber from scrap rubber tires, tubes, and miscellaneous waste rubber articles by processes which result in devulcanized, depolymerized, or regenerated replasticized products containing added ingredients. These products are sold

for use as a raw material in the manufacture of rubber goods with or without admixture with crude rubber or synthetic rubber. Establishments primarily engaged in the assembly and wholesale sale of scrap rubber are classified in trade industries.

304 RUBBER AND PLASTICS HOSE AND BELTING

3041 Rubber and Plastics Hose and Belting.—Establishments primarily engaged in manufacturing rubber and plastics hose and belting, including garden hose. Establishments primarily engaged in manufacturing rubber tubing are classified in industry 3069; plastic tubing in industry 3079; and flexible metallic hose in industry 3599.

306 FABRICATED RUBBER PRODUCTS, NOT ELSEWHERE CLASSIFIED

3069 Fabricated Rubber Products, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing industrial and mechanical rubber goods, rubberized fabrics, vulcanized rubber clothing, and miscellaneous rubber specialties and sundries. Establishments primarily engaged in rebuilding and retreading tires are classified in industry 7534; and gaskets and packing in industry 3293.

307 MISCELLANEOUS PLASTICS PRODUCTS

3079 Miscellaneous Plastics Products.—Establishments primarily engaged in molding primary plastics for the trade, and fabricating miscellaneous finished plastics products. Establishments primarily engaged in manufacturing fabricated plastics products or plastics film, sheet, rod, nontextile monofilaments and regenerated cellulose products, and vulcanized fiber are classified in this industry, whether from purchased resins or from resins produced in the same plant. Establishments primarily engaged in compounding purchased resins are also classified in this industry. Establishments primarily engaged in manufacturing artificial leather are classified in industry 2295.

31 LEATHER AND LEATHER PRODUCTS

This major group includes establishments engaged in tanning, currying, and finishing hides and skins, and establishments manufacturing finished leather, artificial leather products, and some similar products made of other materials. Leather converters are also included.

311 LEATHER TANNING AND FINISHING

3111 Leather Tanning and Finishing.—Establishments primarily engaged in tanning, currying, and finishing hides and skins into leather. This industry also includes leather converters who buy hides and skins and have them processed into leather on a contract basis by others.

313 BOOT AND SHOE CUT STOCK AND FINDINGS

3131 Boot and Shoe Cut Stock and Findings.—Establishments primarily engaged in manufacturing leather soles, inner soles, and other boot and shoe cut stock and findings. This industry also includes finished wood heels. Establishments primarily engaged in manufacturing heels, soling strips, and soles made of rubber, composition, plastics, and fiber are classified in SIC Major Group 30.

314 FOOTWEAR, EXCEPT RUBBER

3142 House Slippers.—Establishments primarily engaged in manufacturing house slippers of leather or other materials.

3143 Men's Footwear, Except Athletic.—Establishments primarily engaged in the production of men's footwear designed primarily for dress, street, and work. Establishments primarily engaged in the production of such protective footwear as rubbers, rubber boots, storm shoes, galoshes, and other footwear with rubber soles vulcanized to the uppers are classified in industry 3021. Establishments primarily engaged in the production of athletic shoes and youths' and boys' shoes are classified in industry 3149.

3144 Women's Footwear, Except Athletic.—Establishments primarily engaged in the production of women's footwear designed primarily for dress, street, and work. Establishments primarily engaged in the production of athletic shoes and misses', children's, infants', and babies' footwear are classified in industry 3149 Establishments primarily engaged in the production of rubber or plastics footwear are classified in industry 3021.

3149 Footwear, Except Rubber, Not Elsewhere Classified.—Establishments primarily engaged in the production of shoes, not elsewhere classified, such as misses', youths', boys', children's, infants', and babies' footwear, and athletic footwear. Establishments primarily engaged in the production of rubber or plastics footwear are classified in industry 3021.

315 LEATHER GLOVES AND MITTENS

3151 Leather Gloves and Mittens.—Establishments primarily engaged in manufacturing dress, semidress, and work gloves exclusively of leather or leather with lining of other material. Establishments primarily engaged in manufacturing sporting and athletic gloves are classified in industry 3949; and dress, semidress, and work gloves and mittens of cloth or cloth and leather combined in industry 2381.

316 LUGGAGE

3161 Luggage.—Establishments primarily engaged in manufacturing luggage of leather or other materials.

317 HANDBAGS AND OTHER PERSONAL LEATHER GOODS

3171 Women's Handbags and Purses.—Establishments primarily engaged in manufacturing women's handbags and purses of leather or other materials, except precious metal (industry 3911).

3172 Personal Leather Goods, Except Women's Handbags and Purses.—Establishments primarily engaged in manufacturing small articles, such as billfolds, key cases, and coin purses of leather or other materials, except precious metal (industry 3911).

319 LEATHER GOODS, NOT ELSEWHERE CLASSIFIED

3199 Leather Goods, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing leather goods, not elsewhere classified, such as saddlery, harness, whips, embossed leather goods, leather desk sets, razor strops, and leather belting. Establishments primarily engaged in manufacturing gaskets and packing are classified in industry 3293.

32 STONE, CLAY, GLASS, AND CONCRETE PRODUCTS

This major group includes establishments engaged in manufacturing flat glass and other glass products, cement, structural clay products, pottery, concrete and gypsum products, cut stone, abrasive and asbestos products, etc., from materials taken principally from the earth in the form of stone, clay, and sand. When separate reports are available for mines and quarries operated by manufacturing establishments classified in this major group, the mining and quarrying activities are classified in Division B. When separate reports are not available, the mining and quarrying activities other than those of industry 3295 are classified herein with the manufacturing operations.

If separate reports are not available for crushing, grinding, and other preparation activities of industry 3295, these establishments are classified in Division B.

321 FLAT GLASS

3211 Flat Glass.—Establishments primarily engaged in manufacturing flat glass. This industry also produces laminated glass, but establishments primarily engaged in manufacturing laminated glass from purchased flat glass are classified in industry 3231.

322 GLASS AND GLASSWARE, PRESSED OR BLOWN

This group includes establishments primarily engaged in manufacturing glass and glassware, pressed, blown, or shaped from glass produced in the same establishment. Establishments primarily engaged in manufacturing glass products from purchased glass are classified in industry 3231.

3221 Glass Containers.—Establishments primarily engaged in manufacturing glass containers for commercial packing and bottling and for home canning.

3229 Pressed and Blown Glass and Glassware, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing glass and glassware, not elsewhere classified, pressed, blown, or shaped from glass produced in the same establishment. Establishments primarily engaged in manufacturing textile glass fibers are also included in this industry, but establishments primarily engaged in manufacturing glass wool insulation products are classified in industry

3296. Establishments primarily engaged in the production of pressed lenses for vehicular lighting, beacons, and lanterns are also included in this industry, but establishments primarily engaged in the production of optical lenses are classified in industry 3832. Establishments primarily engaged in manufacturing glass containers are classified in industry 3221, and complete electric light bulbs in industry 3641.

323 GLASS PRODUCTS, MADE OF PURCHASED GLASS

3231 Glass Products, Made of Purchased Glass.—Establishments primarily engaged in manufacturing glass products from purchased glass. Establishments primarily engaged in manufacturing optical lenses and ophthalmic lenses are classified in SIC Major Group 38.

324 CEMENT, HYDRAULIC

3241 Cement, Hydraulic.—Establishments primarily engaged in manufacturing hydraulic cement, including portland, natural, masonry, and pozzolan cements.

325 STRUCTURAL CLAY PRODUCTS

3251 Brick and Structural Clay Tile.—Establishments primarily engaged in manufacturing brick and structural clay tile. Establishments primarily engaged in manufacturing clay firebrick are classified in industry 3255, nonclay firebrick in industry 3297, sand lime brick in industry 3299, and glass brick in industry 3229.

3253 Ceramic Wall and Floor Tile.—Establishments primarily engaged in manufacturing ceramic wall and floor tile. Establishments primarily engaged in manufacturing structural clay tile are classified in industry 3251, and drain tile in industry 3259.

3255 Clay Refractories.—Establishments primarily engaged in manufacturing clay firebrick and other heat-resisting clay products. Establishments primarily engaged in manufacturing nonclay refractories, as well as all graphite refractories whether of carbon bond or ceramic bond, are classified in industry 3297.

3259 Structural Clay Products, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing clay sewer pipe and structural clay products not elsewhere classified

326 POTTERY AND RELATED PRODUCTS

3261 Vitreous China Plumbing Fixtures and China and Earthenware Fittings and Bathroom Accessories.—Establishments primarily engaged in manufacturing china plumbing fixtures and china and earthenware fittings and bathroom accessories.

3262 Vitreous China Table and Kitchen Articles.—Establishments primarily engaged in manufacturing vitreous china table and kitchen articles for use in households and in hotels, restaurants, and other commercial institutions for preparing, serving, or storing food or drink. Establishments primarily engaged in manufacturing fine (semivitreous) types of earthenware (whiteware) table and kitchen articles are classified in industry 3263.

3263 Fine Earthenware (Whiteware) Table and Kitchen Articles.—Establishments primarily engaged in manufacturing fine (semivitreous) types of earthenware table and kitchen articles for preparing, serving, or storing food or drink. Establishments primarily engaged in manufacturing vitreous china table and kitchen articles are classified in industry 3262.

3264 Porcelain Electrical Supplies.—Establishments primarily engaged in manufacturing porcelain electrical insulators, molded porcelain parts for electrical devices, spark plug and steatitic porcelain, and other electrical supplies from clay and other ceramic materials.

3269 Pottery Products, Not Elsewhere Classified.—Establishments primarily engaged in firing and decorating white china and earthenware for the trade and manufacturing art and ornamental pottery, industrial and laboratory pottery, stoneware and coarse earthenware table and kitchen articles, unglazed red earthenware florists' articles, and other pottery products, not elsewhere classified.

327 CONCRETE, GYPSUM, AND PLASTER PRODUCTS

3271 Concrete Block and Brick.—Establishments primarily engaged in manufacturing concrete building block and brick from a combination of cement and aggregate. Contractors engaged in concrete construction work are classified in the construction industries, and establishments primarily engaged in mixing and delivering ready-mixed concrete in industry 3273.

3272 Concrete Products, Except Block and Brick.—Establishments primarily engaged in manufacturing concrete products, except block and brick, from a combination of cement and aggregate. Contractors engaged in concrete construction work are classified in the construction industries, and establishments primarily engaged in mixing and delivering ready-mixed concrete in industry 3273.

3273 Ready-Mixed Concrete.—Establishments primarily engaged in manufacturing portland cement concrete manufactured and delivered to a purchaser in a plastic and unhardened state. This industry includes production and sale of central-mixed concrete, shrink-mixed concrete, and transit-mixed concrete.

3274 Lime.—Establishments primarily engaged in manufacturing quicklime, hydrated lime, and "dead-burned" dolomite from limestone, dolomite shells, or other substances.

3275 Gypsum Products.—Establishments primarily engaged in manufacturing plaster, plasterboard, and other products composed wholly or chiefly of gypsum.

328 CUT STONE AND STONE PRODUCTS

3281 Cut Stone and Stone Products.—Establishments primarily engaged in cutting, shaping, and finishing marble, granite, slate, and other stone for building and miscellaneous uses. Establishments primarily engaged in buying or selling partly finished monuments and tombstones, but performing no work on the stones other than lettering, finishing, or shaping to custom order, are classified in trade industries. The cutting of grindstones, pulpstones, and whetstones at the quarry is classified in Division B.

329 ABRASIVE, ASBESTOS, AND MISCELLANEOUS NONMETALLIC MINERAL PRODUCTS

3291 Abrasive Products.—Establishments primarily engaged in manufacturing abrasive grinding wheels of natural or synthetic materials and other abrasive products. The cutting of grindstones, pulpstones, and whetstones at the quarry is classified in mining industries.

3292 Asbestos Products.—Establishments primarily engaged in manufacturing asbestos textiles, asbestos building materials, except asbestos paper (industry 2661), insulating materials for covering boilers and pipes, and other commodities composed wholly or chiefly of asbestos. Establishments primarily engaged in manufacturing gaskets and steam and other packing are classified in industry 3293.

3293 Gaskets, Packing, and Sealing Devices.—Establishments primarily engaged in manufacturing gaskets, gasketing materials, compression packings, molded packings, oil seals, and mechanical seals. Included are gaskets, packing, and sealing devices made of leather, rubber, metal, asbestos, and plastics.

3295 Minerals and Earths, Ground or Otherwise Treated.—Establishments operating without a mine or quarry and primarily engaged in the crushing, grinding, pulverizing, or otherwise preparing clay, ceramic, and refractory minerals; barite; and miscellaneous nonmetallic minerals, except fuels. These minerals are the crude products mined by establishments of SIC groups 145 and 149 and industry 1472. Also included are establishments primarily crushing slag and preparing roofing granules. The beneficiation or preparation of other minerals and metallic ores, and the cleaning and grading of coal, are classified in the mining industries, whether or not the operation is associated with a mine.

3296 Mineral Wool.—Establishments primarily engaged in manufacturing mineral wool and mineral wool insulation products made of such siliceous materials as rock, slag, and glass, or combinations thereof. Establishments primarily engaged in manufacturing asbestos insulation products are classified in industry 3292, and textile glass fibers in industry 3229.

3297 Nonclay Refractories.—Establishments primarily engaged in manufacturing refractories and crucibles made of materials other than clay. This industry also includes establishments primarily engaged in manufacturing all graphite refractories, whether of carbon bond or ceramic bond. Establishments primarily engaged in manufacturing clay refractories are classified in industry 3255.

3299 Nonmetallic Mineral Products, Not Elsewhere Classified.—Establishments primarily engaged in the factory production of statuary and art goods made of plaster of paris and papier mache, and in manufacturing sand lime products and other nonmetallic mineral products not elsewhere classified.

33 PRIMARY METAL INDUSTRIES

This major group includes establishments engaged in the smelting and refining of ferrous and nonferrous metals from ore, pig, or scrap; in the rolling, drawing, and alloying of ferrous and nonferrous metals; in the manufacture of castings and other basic products of ferrous and nonferrous metals; and in the manufacture of nails, spikes, and insulated wire and cable. This major group also includes the production of coke. Establishments primarily engaged in manufacturing metal forgings or stampings are classified in SIC group 346.

331 BLAST FURNACES, STEELWORKS, AND ROLLING AND FINISHING MILLS

3312 Blast Furnaces (Including Coke Ovens), Steelworks, and Rolling Mills.—Establishments primarily engaged in manufacturing hot metal, pig iron, silvery pig iron, and ferroalloys from iron ore and iron and steel scrap; converting pig iron, scrap iron, and scrap steel into steel; and in hot rolling iron and steel into basic shapes such as plates, sheets, strips, rods, bars, and tubing. Merchant blast furnaces and byproduct or beehive coke ovens are also included in this industry. Establishments primarily engaged in manufacturing ferro and nonferrous additive alloys by electrometallurgical processes are classified in industry 3313.

3313 Electrometallurgical Products.—Establishments primarily engaged in manufacturing ferro and nonferrous additive alloys by electrometallurgical or metallothermic processes, including high percentage ferroalloys and high percentage nonferrous additive alloys.

3315 Steel Wiredrawing and Steel Nails and Spikes.—Establishments primarily engaged in drawing wire from purchased iron or steel rods, bars, or wire, and which may be engaged in the further manufacture of products made from wire; establishments primarily engaged in manufacturing steel nails and spikes from purchased materials are also included in this industry. Rolling mills engaged in the production of ferrous wire from wire rods or hot rolled bars produced in the same establishment are classified in industry 3312. Establishments primarily engaged in drawing nonferrous wire are classified in SIC group 335.

3316 Cold Rolled Steel Sheet, Strip, and Bars.—Establishments primarily engaged in (1) cold rolling steel sheets and strip from purchased hot rolled sheets; (2) cold drawing steel bars and steel shapes from purchased hot rolled steel bars; and (3) producing other cold finished steel. Establishments primarily engaged in the production of steel, including hot rolled steel sheets, and further cold rolling such sheets are classified in industry 3312.

3317 Steel Pipe and Tubes.—Establishments primarily engaged in the production of welded or seamless steel pipe and tubes and heavy riveted steel pipe from purchased materials. Establishments primarily engaged in the production of steel, including steel skelp or steel blanks, tube rounds, or pierced billets, are classified in industry 3312.

332 IRON AND STEEL FOUNDRIES

This group includes establishments primarily engaged in manufacturing iron and steel castings. These establishments generally operate on a job or order basis, manufacturing castings for sale to others or for interplant transfer. Establishments which produce iron and steel castings and which are also engaged in fabricating operations, such as machining, assembling, etc., in manufacturing a specified product are classified in the industry of the specified product. Iron and steel castings are made to a considerable extent by establishments classified in other industries, that operate foundry departments for the production of castings for incorporation, in the same establishment, into such products as stoves, furnaces, plumbing fixtures, motor vehicles, etc. Establishments primarily engaged in the manufacture and rolling of steel and also making steel castings are classified in industry 3312. Establishments primarily engaged in manufacturing nonferrous castings are classified in SIC group 336.

3321 Gray Iron Foundries.—Establishments primarily engaged in manufacturing gray iron castings, including cast iron pressure and soil pipes and fittings.

3322 Malleable Iron Foundries.—Establishments primarily engaged in manufacturing malleable iron castings.

3324 Steel Investment Foundries.—Establishments primarily engaged in manufacturing steel investment castings.

3325 **Steel Foundries, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing steel castings not elsewhere classified.

333 PRIMARY SMELTING AND REFINING OF NONFERROUS METALS

3331 **Primary Smelting and Refining of Copper.**—Establishments primarily engaged in smelting copper from the ore, and in refining copper by electrolytic or other processes. Establishments primarily engaged in rolling, drawing, or extruding copper are classified in industry 3351.

3332 **Primary Smelting and Refining of Lead.**—Establishments primarily engaged in smelting lead from the ore and in refining lead by any process. Establishments primarily engaged in rolling, drawing, or extruding lead are classified in industry 3356.

3333 **Primary Smelting and Refining of Zinc.**—Establishments primarily engaged in smelting zinc from the ore and in refining zinc by any process. Establishments primarily engaged in rolling, drawing, or extruding zinc are classified in industry 3356.

3334 **Primary Production of Aluminum.**—Establishments primarily engaged in producing aluminum from aluminua and in refining aluminum by any process. Establishments primarily engaged in rolling, drawing, or extruding aluminum are classified in industries 3353, 3354, and 3355.

3339 **Primary Smelting and Refining of Nonferrous Metals, Not Elsewhere Classified.**—Establishments primarily engaged in smelting and refining nonferrous metals not elsewhere classified. Establishments primarily engaged in rolling, drawing, and extruding these nonferrous primary metals are classified in industry 3356, and the production of bullion at the site of the mine is classified in the mining industries.

334 SECONDARY SMELTING AND REFINING OF NONFERROUS METALS

3341 **Secondary Smelting and Refining of Nonferrous Metals.**—Establishments primarily engaged in recovering nonferrous metals and alloys from new and used scrap and dross. This industry includes establishments engaged in both the recovery and alloying of precious metals. Plants engaged in the recovery of tin through secondary smelting and refining, as well as by chemical processes, are included in this industry. Establishments primarily engaged in assembling, sorting, and breaking up scrap metal, without smelting and refining, are classified in trade industries.

335 ROLLING, DRAWING, AND EXTRUDING OF NONFERROUS METALS

3351 **Rolling, Drawing, and Extruding of Copper.**—Establishments primarily engaged in rolling, drawing, and extruding copper, brass, bronze, and other copper base alloy basic shapes, such as plate, sheet, strip, bar, and tubing. Establishments primarily engaged in recovering copper and its alloys from scrap or dross are classified in industry 3341.

3353 **Aluminum Sheet, Plate, and Foil.**—Establishments primarily engaged in flat rolling aluminum and aluminum base alloy basic shapes such as sheet, plate, and foil, including establishments producing welded tube. Also included are establishments primarily producing similar products by continuous casting.

3354 **Aluminum Extruded Products.**—Establishments primarily engaged in extruding aluminum and aluminum base alloy basic shapes such as rod and bar, pipe and tube, and tube blooms, including establishments producing tube by drawing.

3355 **Aluminum Rolling and Drawing, Not Elsewhere Classified.**—Establishments primarily engaged in rolling, drawing, and other operations resulting in the production of aluminum ingot, including extrusion ingot, and aluminum and aluminum base alloy basic shapes, not elsewhere classified, such as rolled and continuous cast rod and bar. Establishments primarily engaged in producing aluminum powder, flake, and paste are classified in industry 3399, and those producing aluminum wire and cable from purchased wire bars, rods, or wire are classified in industry 3357.

3356 **Rolling, Drawing, and Extruding of Nonferrous Metals, Except Copper and Aluminum.**—Establishments primarily engaged in rolling, drawing, and extruding nonferrous metals other than copper (industry 3351) and aluminum (industries 3353, 3354, and 3355). The products of this industry are

produced in the form of basic shapes such as plate, sheet, strip, bar, and tubing. Establishments primarily engaged in recovering nonferrous metals and alloys from scrap or dross are classified in industry 3341; in manufacturing gold, silver, tin, and other foils except aluminum in industry 3497; and aluminum foil in industry 3353.

3357 Drawing and Insulating of Nonferrous Wire.—Establishments primarily engaged in drawing and insulating, and insulating wire and cable of nonferrous metals from purchased wire bars, rods, or wire.

336 NONFERROUS FOUNDRIES (CASTINGS)

This group includes establishments primarily engaged in manufacturing castings and die castings of aluminum, brass, bronze and other nonferrous metals and alloys. These establishments generally operate on a job or order basis, manufacturing castings for sale to others or for interplant transfer. Establishments which produce nonferrous castings and which are also engaged in fabricating operations, such as machining, assembling, etc., in manufacturing a specified product are classified in the industry of the specified product. Nonferrous castings are made to a considerable extent by establishments classified in other industries that operate foundry departments for the production of castings for incorporation, in the same establishment, into such products as machinery, motor vehicles, etc. Establishments primarily engaged in manufacturing iron and steel castings are classified in SIC group 332.

3361 Aluminum Foundries (Castings).—Establishments primarily engaged in manufacturing castings and die castings of aluminum and aluminum-base alloys.

3362 Brass, Bronze, Copper, Copper Base Alloy Foundries (Castings).—Establishments primarily engaged in manufacturing castings and die castings of copper and copper-base alloys.

3369 Nonferrous Foundries (Castings), Not Elsewhere Classified.—Establishments primarily engaged in manufacturing castings and die castings of nonferrous materials except aluminum, copper, and copper base alloys.

339 MISCELLANEOUS PRIMARY METAL PRODUCTS

3398 Metal Heat Treating.—Establishments primarily engaged in heat treating of metal for the trade.

3399 Primary Metal Products, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing primary metal products, not elsewhere classified, such as nonferrous nails, brads, and spikes; and metal powder, flakes, and paste.

34 FABRICATED METAL PRODUCTS, EXCEPT MACHINERY AND TRANSPORTATION EQUIPMENT

This major group includes establishments engaged in fabricating ferrous and nonferrous metal products such as metal cans, tinware, handtools, cutlery, general hardware, nonelectric heating apparatus, fabricated structural metal products, metal forgings, metal stampings, ordnance (except vehicles and guided missiles), and a variety of metal and wire products not elsewhere classified. Certain important segments of the metal fabricating industries are classified in other major groups such as machinery in SIC Major Groups 35 and 36; transportation equipment, including tanks, in SIC Major Group 37; professional scientific and controlling instruments, watches, and clocks in SIC Major Group 38; and jewelry and silverware in SIC Major Group 39. Establishments primarily engaged in producing ferrous and nonferrous metals and their alloys are classified in SIC Major Group 33.

341 METAL CANS AND SHIPPING CONTAINERS

3411 Metal Cans.—Establishments primarily engaged in manufacturing metal cans from purchased materials. Establishments primarily engaged in manufacturing foil containers are classified in industry 3497.

3412 Metal Shipping Barrels, Drums, Kegs, and Pails.—Establishments primarily engaged in manufacturing ferrous and nonferrous metal shipping barrels, drums, kegs, and pails.

342 CUTLERY, HANDTOOLS, AND GENERAL HARDWARE

3421 Cutlery.—Establishments primarily engaged in manufacturing cutlery. Establishments primarily engaged in manufacturing table cutlery made entirely of metal are classified in industry 3914; those manufacturing electric razors in industry 3634; and those manufacturing hair clippers for human use in industry 3999, and for animal use in industry 3523.

3423 Hand and Edge Tools, Except Machine Tools and Handsaws.—Establishments primarily engaged in manufacturing files and other hand and edge tools for metalworking, woodworking, and general maintenance. Establishments primarily engaged in manufacturing saws are classified in industry 3425; and metal-cutting dies, power-driven handtools, and attachments and accessories for machine tools in SIC Major Group 35.

3425 Handsaws and Saw Blades.—Establishments primarily engaged in manufacturing handsaws and saw blades for hand and power-driven saws. Establishments primarily engaged in manufacturing power-driven sawing machines are classified in SIC Major Group 35.

3429 Hardware, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing miscellaneous metal products usually termed "hardware," not elsewhere classified. Establishments primarily engaged in manufacturing bolts and nuts are classified in industry 3452, nails and spikes in SIC Major Group 33, cutlery in industry 3421, handtools in industry 3423, and pole line and transmission hardware in SIC Major Group 36.

343 HEATING EQUIPMENT, EXCEPT ELECTRIC AND WARM AIR; AND PLUMBING FIXTURES

3431 Enameled Iron and Metal Sanitary Ware.—Establishments primarily engaged in manufacturing enameled iron, cast iron, or pressed metal sanitary ware. Establishments primarily engaged in manufacturing vitreous and semivitreous pottery sanitary ware are classified in industry 3261; and those manufacturing porcelain enameled kitchen, household, and hospital ware in industry 3469.

3432 Plumbing Fixture Fittings and Trim (Brass Goods).—Establishments primarily engaged in manufacturing plumbing fixture fittings and trim (brass goods). Establishments primarily engaged in the manufacture of steam or water line valves are classified in industry 3494.

3433 Heating Equipment, Except Electric and Warm Air Furnaces.—Establishments primarily engaged in manufacturing heating equipment, except electric and warm air furnaces, including gas, oil, and stoker coal-fired equipment for the automatic utilization of gaseous, liquid, and solid fuels. Establishments primarily engaged in manufacturing warm air furnaces are classified in industry 3585; cooking stoves and ranges in industry 3631; boiler shops primarily engaged in the production of industrial, power and marine boilers in industry 3443; and industrial process furnaces and ovens in industry 3567.

344 FABRICATED STRUCTURAL METAL PRODUCTS

3441 Fabricated Structural Metal.—Establishments primarily engaged in manufacturing fabricated iron and steel or other metal for structural purposes, such as bridges, buildings, and sections for ships, boats, and barges. Establishments primarily engaged in manufacturing metal doors, sash, frames, molding, and trim are classified in industry 3442; and establishments doing fabrication work at the site of construction are classified in Division C.

3442 Metal Doors, Sash, Frames, Molding, and Trim.—Establishments primarily engaged in manufacturing ferrous and nonferrous metal and metal covered doors and sash, window and door frames and screens, molding, and trim.

3443 Fabricated Platework (Boiler Shops).—Establishments primarily engaged in manufacturing power and marine boilers, pressure and nonpressure tanks, processing and storage vessels, heat exchangers, weldments, and similar products by the process of cutting, forming, and joining metal plates, shapes, bars, sheet, pipe mill products, and tubing to custom or standard design for factory or field assembly. Establishments primarily engaged in manufacturing warm air heating furnaces are classified in industry 3585, other nonelectric heating apparatus except power boilers in industry 3433, and household cooking apparatus in industry 3631.

3444 Sheet Metalwork.—Establishments primarily engaged in manufacturing sheet metalwork for buildings (not including fabrication work done by construction contractors at the place of construction), and manufacturing sheet metal stovepipes, light tanks, etc.

3446 Architectural and Ornamental Metalwork.—Establishments primarily engaged in manufacturing architectural and ornamental metalwork of ferrous and nonferrous metals, such as stairs and staircases, open

steel flooring (grating), fire escapes, grilles, railings, and fences and gates, except those made from wire. Establishments primarily engaged in manufacturing prefabricated and portable metal buildings and parts are classified in industry 3448, and miscellaneous metalwork in industry 3449.

3448 **Prefabricated Metal Buildings and Components.**—Establishments primarily engaged in manufacturing prefabricated and portable metal buildings and parts, and prefabricated exterior metal panels.

3449 **Miscellaneous Metalwork.**—Establishments primarily engaged in manufacturing miscellaneous ferrous and nonferrous metalwork, such as metal plaster bases, fabricated bar joists, and concrete reinforcing bars.

345 SCREW MACHINE PRODUCTS, AND BOLTS, NUTS, SCREWS, RIVETS, AND WASHERS

3451 **Screw Machine Products.**—Establishments primarily engaged in manufacturing automatic or hand screw machine products from rod, bar, or tube stock of metal, fiber, plastics, or other material. The products of this industry consist of a wide variety of unassembled parts and are usually manufactured on a job or order basis. Establishments primarily engaged in manufacturing standard bolts, nuts, rivets, screws, and other industrial fasteners on headers, threaders, and nut forming machines are classified in industry 3452.

3452 **Bolts, Nuts, Screws, Rivets, and Washers.**—Establishments primarily engaged in manufacturing bolts, nuts, screws, rivets, washers, formed and threaded wire goods, and special industrial fasteners. Rolling mills engaged in manufacturing similar products are classified in SIC Major Group 33, and establishments primarily engaged in manufacturing screw machine products in industry 3451.

346 METAL FORGINGS AND STAMPINGS

This group includes establishments primarily engaged in manufacturing metal forgings or metal stampings. These establishments generally operate on a job or order basis, manufacturing metal stampings or forgings for sale to others or for interplant transfer. Establishments which produce metal stampings or forgings for incorporation in end products produced in the same establishment are classified on the basis of the end product.

3462 **Iron and Steel Forgings.**—Establishments primarily engaged in manufacturing iron and steel forgings, with or without the use of dies.

3463 **Nonferrous Forgings.**—Establishments primarily engaged in manufacturing nonferrous forgings, with or without the use of dies.

3465 **Automotive Stampings.**—Establishments primarily engaged in manufacturing automotive stampings such as body parts, hubs, and trim.

3466 **Crowns and Closures.**—Establishments primarily engaged in manufacturing metal crowns and closures.

3469 **Metal Stampings, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing metal stampings and spun products, not elsewhere classified, including porcelain enameled products such as household appliance housings and parts; utensils and consumer stamped and spun products such as cooking and kitchen utensils; and other nonautomotive job stampings.

347 COATING, ENGRAVING, AND ALLIED SERVICES

3471 **Electroplating, Plating, Polishing, Anodizing, and Coloring.**—Establishments primarily engaged in all types of electroplating, plating, anodizing, coloring, and finishing of metals and formed products for the trade. Most of the work done in this industry is done on materials owned by others.

3479 **Coating, Engraving, and Allied Services, Not Elsewhere Classified.**—Establishments primarily engaged in performing the following types of services on metals: (1) Enameling, lacquering, and varnishing metal products for the trade; (2) hot-dip galvanizing of mill sheets, plates and bars, castings, and formed products fabricated of iron and steel; hot-dip coating such items with aluminum, lead, or zinc; retinning cans and utensils; (3) engraving, chasing and etching jewelry, silverware, notarial and other seals, and other metal products for the trade and for job contracting for purposes other than printing; and (4) other metal services, not elsewhere classified. Establishments primarily engaged in electroplating, plating, polishing, anodizing, coloring, and finishing of metals and formed products for the trade are classified in industry 3471; and those producing porcelain enameled products in industry 3469.

348 ORDNANCE AND ACCESSORIES, EXCEPT VEHICLES AND GUIDED MISSILES

3482 Small Arms Ammunition.—Establishments primarily engaged in manufacturing ammunition for small arms having a bore of 30 mm (or 1.18 inch) and below. Establishments primarily engaged in manufacturing ammunition except for small arms are classified in industry 3483, blasting and detonating caps and safety fuses in industry 2892, and fireworks in industry 2899.

3483 Ammunition, Except for Small Arms, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing ammunition, not elsewhere classified, or in loading and assembling ammunition over 30 mm (or over 1.18 inch) for naval, aircraft, antiaircraft, tank, coast, and field artillery; including component parts. This industry also includes establishments primarily engaged in manufacturing bombs, mines, torpedoes, grenades, depth charges, chemical warfare projectiles, and their component parts. Establishments primarily engaged in manufacturing small arms ammunition are classified in industry 3482, explosives in industry 2892, and military pyrotechnics in industry 2899.

3484 Small Arms.—Establishments primarily engaged in manufacturing small firearms having a bore 30 mm (or 1.18 inch) and below, and parts for small firearms. Also included in this industry are establishments primarily engaged in manufacturing certain weapons over 30 mm which are carried and employed by the individual, such as grenade launchers and heavy field machine guns. Establishments primarily engaged in manufacturing artillery and mortars having a bore over 30 mm (or over 1.18 inch) and component parts are classified in industry 3489.

3489 Ordnance and Accessories, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing ordnance and accessories, not elsewhere classified, such as naval, aircraft, antiaircraft, tank, coast, and field artillery having a bore over 30 mm (or over 1.18 inch) and components. Establishments primarily engaged in manufacturing small arms and parts 30 mm (or 1.18 inch) and below are classified in industry 3484; tanks in industry 3795; and guided missiles in SIC group 376.

349 MISCELLANEOUS FABRICATED METAL PRODUCTS

3493 Steel Springs, Except Wire.—Establishments primarily engaged in manufacturing leaf springs, hot wound springs, and coiled flat springs. Establishments primarily engaged in manufacturing wire springs are classified in industry 3495.

3494 Valves and Pipe Fittings, Except Plumbers' Brass Goods.—Establishments primarily engaged in manufacturing pipe fittings and valves for controlling the flow of liquids or gases in pipes and mains, and for machinery. Establishments primarily engaged in manufacturing faucets, spigots, and similar plumbers' brass goods and fittings are classified in industry 3432, flexible metal hose and tubing in industry 3599, and fittings and couplings for garden hose in industry 3429.

3495 Wire Springs.—Establishments primarily engaged in manufacturing wire springs. Establishments primarily engaged in assembling wire bedsprings or seats are classified in SIC Major Group 25.

3496 Miscellaneous Fabricated Wire Products.—Establishments primarily engaged in manufacturing miscellaneous fabricated wire products from purchased wire, such as noninsulated wire rope and cable; fencing; screening, netting, paper machine wire cloth; and hangers, paper clips, kitchenware, and wire carts. Rolling mills engaged in manufacturing wire products are classified in SIC Major Group 33; establishments manufacturing nonferrous wire nails and spikes in industry 3399; those drawing and insulating nonferrous wire in industry 3357; and those manufacturing wire springs in industry 3495.

3497 Metal Foil and Leaf.—Establishments primarily engaged in manufacturing gold, silver, tin, and other metal foil (including converted metal foil) and leaf. Also included are establishments primarily engaged in converting metal foil (including aluminum) into wrappers, cookware, dinnerware, and containers, except bags and liners. Establishments primarily engaged in manufacturing plain aluminum foil are classified in industry 3353.

3498 Fabricated Pipe and Fabricated Pipe Fittings.—Establishments primarily engaged in fabricating pipe and pipe fittings from purchased pipe, by cutting,

threading, bending, etc. Establishments primarily engaged in manufacturing cast iron pipe and fittings, including cast and forged pipe fittings which have been machined and threaded, are classified in industry 3321; and welded and heavy riveted pipe and seamless steel pipe in industry 3317. Establishments primarily engaged in manufacturing products such as bannisters, railings, and guards from pipe are classified in industry 3446.

3499 **Fabricated Metal Products, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing fabricated metal products, not elsewhere classified, such as fire or burglary resistive steel safes and vaults and similar fire or burglary resistive products; and collapsible tubes of thin flexible metal. Also included are establishments primarily engaged in manufacturing metal boxes, metal ladders, and metal household articles such as ice cream freezers and ironing boards. Establishments primarily engaged in manufacturing concrete grave vaults are classified in industry 3722, and metal grave vaults in industry 3995. Establishments primarily engaged in manufacturing advertising novelties are classified in industry 3993.

35 MACHINERY, EXCEPT ELECTRICAL

This major group includes establishments engaged in manufacturing machinery and equipment other than electrical equipment (SIC Major Group 36) and transportation equipment (SIC Major Group 37). Machines powered by built-in or detachable motors are ordinarily included in this major group, with the exception of electrical household appliances (SIC Major Group 36). Portable tools, both electric and pneumatic powered, are included in this major group, but handtools are classified in SIC Major Group 34.

351 ENGINES AND TURBINES

3511 **Steam, Gas, and Hydraulic Turbine Generator Set Units.**—Establishments primarily engaged in manufacturing steam turbines; hydraulic turbines; gas turbines, except aircraft; complete steam, gas, and hydraulic turbine generator set units; and steam engines. Establishments primarily engaged in building or rebuilding locomotives are classified in industry 3743; and those manufacturing nonautomotive type generators which are not part of a turbine generator set in industry 3621.

3519 **Internal Combustion Engines, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing diesel, semi-diesel, or other internal combustion engines, not elsewhere classified, for stationary, marine, traction, and other uses. Establishments primarily engaged in manufacturing aircraft engines are classified in industry 3724; automotive engines (except diesel) in industry 3714; engine generator sets in industry 3621; and guided missile and space vehicle propulsion units in industry 3764.

352 FARM AND GARDEN MACHINERY AND EQUIPMENT

3523 **Farm Machinery and Equipment.**—Establishments primarily engaged in manufacturing farm machinery and equipment, including wheel tractors, for use in the preparation and maintenance of the soil; planting and harvesting of the crop; preparing crops for market, on the farm; or for use in performing other farm operations and processes. Establishments primarily engaged in manufacturing industrial trucks, tractors, and trailers used for handling materials in industrial plants, depots, and docks are classified in industry 3537; contractors' off-highway tractors are classified in industry 3531; farm handtools in SIC group 342; and garden tractors, lawn mowers and other lawn and garden equipment in industry 3524.

3524 **Garden Tractors and Lawn and Garden Equipment.**—Establishments primarily engaged in manufacturing lawn mowers, garden tractors, and other lawn and garden equipment used for home lawn and garden care. Also included are establishments primarily manufacturing snow blowers and throwers for residential use. Establishments primarily engaged in manufacturing farm machinery and equipment are classified in industry 3523; hand lawn and garden shears and pruners in industry 3421; and other garden handtools in industry 3423.

353 CONSTRUCTION, MINING, AND MATERIALS HANDLING MACHINERY AND EQUIPMENT

3531 **Construction Machinery and Equipment.**—Establishments primarily engaged in manufacturing heavy machinery and equipment used by the construction industries, such as bulldozers; concrete mixers; cranes, except industrial plant type; dredging machinery; pavers; and power shovels. Establish-

ments primarily engaged in manufacturing mining equipment are classified in industry 3532, and well-drilling machinery in industry 3533.

3532 Mining Machinery and Equipment, Except Oilfield Machinery and Equipment.—Establishments primarily engaged in manufacturing heavy machinery and equipment used by the mining industries, such as coal breakers, mine cars, mineral cleaning machinery, concentration machinery, core drills, coal cutters, portable rock drills, and rock crushing machinery. Establishments primarily engaged in manufacturing construction machinery are classified in industry 3531; well-drilling machinery in industry 3533; and coal and ore conveyors in industry 3535.

3533 Oilfield Machinery and Equipment.—Establishments primarily engaged in manufacturing machinery and equipment for use in oil and gas fields or for drilling water wells.

3534 Elevators and Moving Stairways.—Establishments primarily engaged in manufacturing passenger or freight elevators, automobile lifts, dumbwaiters, and moving stairways. Establishments primarily engaged in manufacturing commercial conveyor systems and equipment are classified in industry 3535, and farm elevators in industry 3523.

3535 Conveyors and Conveying Equipment.—Establishments primarily engaged in manufacturing conveyors and conveying equipment for installation in factories, warehouses, mines, and other industrial and commercial establishments. Establishments primarily engaged in manufacturing passenger or freight elevators, dumbwaiters, and moving stairways are classified in industry 3534; and overhead traveling cranes and monorail systems in industry 3536.

3536 Hoists, Industrial Cranes, and Monorail Systems.—Establishments primarily engaged in manufacturing overhead traveling cranes, hoists, and monorail systems for installation in factories, warehouses, and other industrial and commercial establishments.

3537 Industrial Trucks, Tractors, Trailers, and Stackers.—Establishments primarily engaged in manufacturing industrial trucks, tractors, trailers, stackers (truck type), and related equipment, used for handling materials on floors and paved surfaces in and around industrial and commercial plants, depots, docks, and terminals. Establishments primarily engaged in manufacturing motor vehicles and motor vehicle type trailers are classified in SIC group 371; farm-type wheel tractors in industry 3523; wheel tractor shovel loaders and tracklaying tractors in industry 3531; and wood pallets and skids in industry 2448.

354 METALWORKING MACHINERY AND EQUIPMENT

3541 Machine Tools, Metal-Cutting Types.—Establishments primarily engaged in manufacturing machines, not supported in the hands of an operator when in use, that shape metal by cutting or use of electrical techniques; the rebuilding of such machine tools; and the manufacture of replacement parts for them. Metalworking, or primarily metalworking, machine tools designed primarily for home workshops are also included. Establishments primarily engaged in the manufacture of electric welding equipment are classified in industry 3623; portable power-driven handtools in industry 3546; and gas welding and cutting equipment and automotive maintenance equipment in industry 3549.

3542 Machine Tools, Metal-Forming Types.—Establishments primarily engaged in manufacturing machines, not supported in the hands of an operator while in use, for pressing, hammering, extruding, shearing, die-casting, or otherwise forming metal into shape. This industry also includes rebuilding such machine tools and manufacturing repair parts for them. Establishments primarily engaged in the manufacture of electric welding equipment are classified in industry 3623; portable power-driven handtools in industry 3546; rolling mill machinery and equipment in industry 3547; and gas welding and cutting equipment and automotive maintenance equipment in industry 3549.

3544 Special Dies and Tools, Die Sets, Jigs and Fixtures, and Industrial Molds.—Establishments commonly known as contract tool and die shops and primarily engaged in manufacturing, on a job or order basis, special tools and fixtures for use with machine tools, hammers, die-casting machines, and presses. The products of establishments classified in this industry include a wide variety of special toolings, such as dies; punches; die sets and components and subpresses; jigs and fixtures; and special checking devices. Establishments primarily engaged in manufacturing molds for die casting and foundry casting; metal molds for plasterworking, rubber working,

plastic working, glassworking and similar machinery are also included. Establishments primarily engaged in manufacturing molds for heavy steel ingots are classified in industry 3321.

3545 Machine Tool Accessories and Measuring Devices.—Establishments primarily engaged in manufacturing cutting tools, machinist's precision measuring tools, and attachments and accessories for machine tools and for other metalworking machinery not elsewhere classified. Establishments primarily engaged in manufacturing handtools, except power-driven types, are classified in SIC group 342.

3546 Power-Driven Handtools.—Establishments primarily engaged in manufacturing power-driven handtools, such as drills and drilling tools, pneumatic and snagging grinders, and electric hammers. Establishments primarily engaged in manufacturing automotive maintenance equipment are classified in industry 3549; those primarily manufacturing machine tools for metal cutting and metal forming (including home workshop tools) which are not supported in the hands of an operator, are classified in industries 3541 and 3542; and those primarily manufacturing power-driven heavy construction or mining handtools in SIC group 353.

3547 Rolling Mill Machinery and Equipment.—Establishments primarily engaged in manufacturing rolling mill machinery and processing equipment for metal production such as cold forming mills, structural mills, and finishing equipment.

3549 Metalworking Machinery, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing metalworking machinery, not elsewhere classified, such as gas cutting and welding equipment, wire fabricating machinery and equipment, except wiredrawing dies, and automotive maintenance machinery and equipment. Establishments primarily engaged in manufacturing metal-cutting machine tools are classified in industry 3541; metal-forming machine tools in industry 3542; power-driven handtools in industry 3546; and rolling mill machinery in industry 3547.

355 SPECIAL INDUSTRY MACHINERY, EXCEPT METALWORKING MACHINERY

3551 Food Products Machinery.—Establishments primarily engaged in manufacturing machinery for use by the food products and beverage manufacturing industries in the preparation, canning, or packaging of food products; and parts and attachments for such machinery. Establishments primarily engaged in manufacturing industrial refrigeration machinery are classified in SIC group 358.

3552 Textile Machinery.—Establishments primarily engaged in manufacturing machinery for the textile industries, including parts, attachments, and accessories. Establishments primarily engaged in manufacturing domestic or industrial sewing machines are classified in industry 3636.

3553 Woodworking Machinery.—Establishments primarily engaged in manufacturing machinery for sawmills, planing mills, cabinet and furniture makers, patternmakers, and veneer workers. Establishments primarily engaged in manufacturing handtools such as planes, axes, drawknives, and handsaws are classified in SIC group 342; and portable power-driven handtools in industry 3546.

3554 Paper Industries Machinery.—Establishments primarily engaged in manufacturing machinery for the pulp, paper, and paper product industries. Establishments primarily engaged in manufacturing printing trades machinery are classified in industry 3555.

3555 Printing Trades Machinery and Equipment.—Establishments primarily engaged in manufacturing machinery and equipment used by the printing and bookbinding trades. Establishments primarily engaged in manufacturing textile printing machinery are classified in industry 3552.

3559 Special Industry Machinery, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing special industry machinery, not elsewhere classified, such as smelting and refining equipment, cementmaking, clayworking, cotton ginning, glassmaking, hatmaking, incandescent lampmaking, leatherworking, paintmaking, rubberworking, cigar and cigarette making, tobacco working, shoemaking, and stoneworking machinery.

356 GENERAL INDUSTRIAL MACHINERY AND EQUIPMENT

3561 Pumps and Pumping Equipment.—Establishments primarily engaged in manufacturing pumps and pumping equipment for general industrial use. Establish-

ments primarily engaged in manufacturing measuring and dispensing pumps for gasoline service station use are classified in industry 3586; and air and gas compressors in industry 3563.

3562 Ball and Roller Bearings.—Establishments primarily engaged in manufacturing ball and roller bearings (including ball or roller bearing pillow block, flange, take-up cartridge, and hanger units) and parts. Establishments primarily engaged in manufacturing bearings, except ball and roller, are classified in industry 3568.

3563 Air and Gas Compressors.—Establishments primarily engaged in manufacturing air and gas compressors for general industrial use. Establishments primarily engaged in manufacturing refrigeration compressors and compressing units are classified in industry 3585; and pumps and pumping equipment in industry 3561.

3564 Blowers and Exhaust and Ventilation Fans.—Establishments primarily engaged in manufacturing industrial and commercial blowers, industrial and commercial exhaust and ventilating fans, and attic fans. Establishments primarily engaged in manufacturing air-conditioning units are classified in industry 3585, and free air-circulating fans for use on desks, pedestals, or wall brackets as well as household window-type fans and roll-abouts, kitchen and household ventilating and exhaust fans in industry 3634.

3565 Industrial Patterns.—Establishments primarily engaged in manufacturing industrial patterns.

3566 Speed Changers, Industrial High Speed Drives, and Gears.—Establishments primarily engaged in manufacturing speed changers, industrial high-speed drives, and gears. Establishments primarily engaged in manufacturing these items for motor vehicles are classified in industry 3714, and for aircraft in industry 3728.

3567 Industrial Process Furnaces and Ovens.—Establishments primarily engaged in manufacturing industrial process furnaces, ovens, induction and dielectric heating equipment, and related devices.

3568 Mechanical Power Transmission Equipment, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing mechanical power transmission equipment and parts for industrial machinery. Establishments primarily engaged in manufacturing automotive, tank, and tractor power transmission equipment are classified in industry 3714; aircraft power transmission equipment in industry 3728; ball and roller bearings in industry 3562; and speed changers, industrial high speed drives, and gears in industry 3566.

3569 General Industrial Machinery and Equipment, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing machinery, equipment, and components for general industrial use, and for which no special classification is provided. Machine shops primarily engaged in producing machine and equipment parts, usually on a job or order basis, are classified in industry 3599.

357 OFFICE, COMPUTING, AND ACCOUNTING MACHINES

3572 and 3579 Typewriters and Office Machines, Not Elsewhere Classified.—The Typewriters Industry includes establishments primarily engaged in manufacturing typewriters and parts, including coded media typewriters and specialized composing typewriters. This industry is combined with the Office Machines, N.E.C., Industry which includes establishments primarily engaged in manufacturing office machines and devices not elsewhere classified. Establishments primarily engaged in manufacturing computing machines are classified in industry 3573, cash registers in industry 3574, and photocopy and microfilm equipment in industry 3861 (Photographic Equipment and Supplies).

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President. The statistics for these industries as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system. However, it was necessary to combine industry 3572, Typewriters, with industry 3579, Office Machines, N.E.C., to avoid disclosing the operation of individual companies.

3573 Electronic Computing Equipment.—Establishments primarily engaged in manufacturing electronic computers and peripheral equipment and/or major

logical components intended for use in electronic computer systems. Included are general-purpose electronic analog computers, electronic digital computers, military, ruggedized, and special purpose computers. The electronic computers may be used for data processing or may be incorporated as components of control equipment for industrial use, and as components of equipment used in weapons and weapons systems, space and oceanographic exploration, and transportation and other systems. Electronic computer systems contain high-speed arithmetic and program control units, on-line information storage devices, input/output equipment, terminals, data communication devices, and punched card equipment. Examples of input/output equipment are converters (card and/or tape) and readers and printers. Examples of storage devices are magnetic drums and disks magnetic cores and magnetic film memories. In addition to providing technical manuals necessary for the operation and maintenance of the equipment, establishments in this industry usually furnish general-purpose computer programs and basic operating systems programs needed for effective use of the computer system. Establishments primarily producing rebuilt electronic computers are also included in this industry. Establishments primarily engaged in manufacturing desk calculators, cash registers, accounting machines and similar equipment that are operator-paced are classified in industry 3574; electrical and electronic test equipment in industry 3825; industrial controls, including electronic, in industry 3622; and industrial process instruments in industry 3823.

3574 Calculating and Accounting Machines, Except Electronic Computing Equipment.—Establishments primarily engaged in manufacturing desk calculators, adding and accounting machines, cash registers, and similar equipment. Included are electronic calculating and accounting machines which, even when augmented by attachments or which include program control or have input/output capabilities, must be paced by operator intervention. Establishments primarily engaged in manufacturing electronic computing equipment are classified in industry 3573; typewriters in industry 3572; and office duplicating machines and devices, autographic registers, and other office machines in industry 3579.

3576 Scales and Balances, Except Laboratory.—Establishments primarily engaged in manufacturing weighing and force measuring machines and devices of all types, except those regarded as scientific apparatus for laboratory and experimental work, which are classified in industry 3811.

3579 Typewriters and Office Machines, Not Elsewhere Classified.—(See 3572.)

358 REFRIGERATION AND SERVICE INDUSTRY MACHINERY

3581 Automatic Merchandising Machines.—Establishments primarily engaged in manufacturing automatic merchandising units, also referred to as vending machines (excluding music, amusement, or gaming machines), and coin-operated mechanisms for such machines.

3582 Commercial Laundry, Dry Cleaning, and Pressing Machines.—Establishments primarily engaged in manufacturing laundry and dry cleaning equipment and pressing machines for commercial and industrial use. Establishments primarily engaged in manufacturing household laundry equipment, including coin-operated washers and driers, are classified in industry 3633.

3585 Air-Conditioning and Warm-Air Heating Equipment and Commercial and Industrial Refrigeration Equipment.—Establishments primarily engaged in manufacturing refrigeration equipment and systems and similar equipment for commercial and industrial use; complete air-conditioning units for domestic, commercial, and industrial use; and warm-air furnaces, except electric. Establishments primarily engaged in manufacturing soda fountains and beer dispensing equipment and humidifiers and dehumidifiers, except for rooms, are also classified in this industry. Establishments primarily engaged in manufacturing household refrigerators and home and farm freezers are classified in industry 3632; electric air space heaters in industry 3634; and electric warm-air furnaces and other electric comfort heating equipment in industry 3699.

3586 Measuring and Dispensing Pumps.—Establishments primarily engaged in manufacturing measuring and dispensing pumps commonly used in service and filling stations for dispensing gasoline, oil, and grease, including grease guns. Establishments primarily engaged in manufacturing pumps and pumping equipment for general industrial use are classified in industry 3561.

3589 Service Industry Machines, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing machines and equipment, not elsewhere classified, for use in service industries, such as floor sanding machines, industrial vacuum cleaners, scrubbing machines, commercial cooking and food warming equipment, and commercial dishwashing machines. Establishments primarily engaged in manufacturing household electrical appliances are classified in group 363.

359 MISCELLANEOUS MACHINERY, EXCEPT ELECTRICAL

3592 Carburetors, Pistons, Piston Rings, and Valves.—Establishments primarily engaged in manufacturing carburetors, pistons, piston rings, and valves. Establishments primarily engaged in manufacturing metallic packing are classified in industry 3293; and those primarily engaged in manufacturing machine repair and equipment parts (except electric), on a job or order basis for others, are classified in industry 3599.

3599 Machinery, Except Electrical, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing machinery and parts except electrical, not elsewhere classified, such as amusement park equipment, pneumatic and hydraulic cylinders, and flexible metal hose and tubing. This industry also includes establishments primarily engaged in producing or repairing machine and equipment parts, not elsewhere classified, on a job or order basis for others.

36 ELECTRICAL AND ELECTRONIC MACHINERY, EQUIPMENT, AND SUPPLIES

This major group includes establishments engaged in manufacturing machinery, apparatus, and supplies for the generation, storage, transmission, transformation, and utilization of electrical energy. The manufacture of household appliances is included in this group, but industrial machinery and equipment powered by built-in or detachable electric motors is classified in SIC Major Group 35. Establishments primarily engaged in manufacturing instruments for indicating, measuring, and recording electrical quantities are classified in industry 3825.

361 ELECTRIC TRANSMISSION AND DISTRIBUTION EQUIPMENT

3612 Power, Distribution, and Specialty Transformers.—Establishments primarily engaged in manufacturing power, distribution, instrument, and specialty transformers. Establishments primarily engaged in manufacturing radio frequency or voice frequency transformers, coils, or chokes are classified in industry 3677, and resistance welder transformers in industry 3623.

3613 Switchgear and Switchboard Apparatus.—Establishments primarily engaged in manufacturing switchgear and switchboard apparatus. Important products of this industry include power switches, circuit breakers, power switching equipment, and similar switchgear for general industrial application; switchboards and cubicles, control and metering panels, power fuse mountings, and similar switchboard apparatus and supplies. Establishments primarily engaged in manufacturing industrial controls are classified in industry 3622, and those manufacturing current-carrying wiring devices in industry 3643.

362 ELECTRICAL INDUSTRIAL APPARATUS

3621 Motors and Generators.—Establishments primarily engaged in manufacturing electric motors (except starting motors) and power generators; motor generator sets; railway motors and control equipment; and motors, generators, and control equipment for gasoline, electric, and oil-electric buses and trucks. Establishments primarily engaged in manufacturing turbo-generators are classified in industry 3511, and starting motors and battery charging generators for internal combustion engines in industry 3694.

3622 Industrial Controls.—Establishments primarily engaged in manufacturing motor starters and controllers; control accessories, electronic controls, and other industrial controls. Establishments primarily engaged in manufacturing automatic temperature controls are classified in industry 3822, and industrial process instruments in industry 3823.

3623 Welding Apparatus, Electric.—Establishments primarily engaged in manufacturing electric welding apparatus and accessories. Establishments primarily engaged in coating welding wire from purchased wire or from wire drawn in the same establishment are also included. Establishments primarily engaged

in manufacturing gas welding apparatus are classified in industry 3549, and laser, electron beam, and ultrasonic welding machines and equipment in industry 3662.

3624 **Carbon and Graphite Products.**—Establishments primarily engaged in manufacturing lighting carbons; carbon, graphite, and metal-graphite brushes and brush stock; carbon or graphite electrodes for thermal and electrolytic uses; and other carbon, graphite, and metal-graphite products.

3629 **Electrical Industrial Apparatus, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing industrial and commercial electric apparatus and equipment, not elsewhere classified, such as blasting machines, and fixed and variable capacitors, condensers, and rectifiers for industrial applications. Establishments primarily engaged in manufacturing condensers, capacitors, and rectifiers for electronic end products are classified in SIC group 367.

363 HOUSEHOLD APPLIANCES

3631 **Household Cooking Equipment.**—Establishments primarily engaged in manufacturing household cooking equipment, such as stoves, ranges, and ovens, including both electric and nonelectric types. Establishments primarily engaged in manufacturing household cooking appliances, such as hot plates, grills, percolators, and toasters, are classified in industry 3634. Establishments primarily engaged in manufacturing commercial cooking equipment are classified in industry 3589.

3632 **Household Refrigerators and Home and Farm Freezers.**—Establishments primarily engaged in manufacturing household refrigerators and home and farm freezers. Establishments primarily engaged in manufacturing commercial and industrial refrigeration equipment, packaged room coolers, and all refrigeration compressor and condenser units are classified in industry 3585, and room dehumidifiers are classified in industry 3634.

3633 **Household Laundry Equipment.**—Establishments primarily engaged in manufacturing laundry equipment, such as washing machines, wringers, driers, and ironers, for household use. This industry also includes coin-operated washers and driers. Establishments primarily engaged in manufacturing commercial laundry equipment are classified in industry 3582.

3634 **Electric Housewares and Fans.**—Establishments primarily engaged in manufacturing electric housewares for heating, cooking, and other purposes; and electric fans, including ventilating and exhaust household-type fans. Important products of this industry include electric air heaters, electrically heated bed coverings, blenders, broilers, deep-fat fryers, flat irons, food mixers, hot plates, percolators and coffeemakers, roasters, toasters, desk and bracket fans, hassock or floor fans, window-type propeller fans, roll-about fans and household and kitchen ventilating and exhaust fans. Establishments primarily engaged in manufacturing industrial and commercial blowers, industrial and commercial exhaust and ventilating fans, and attic fans are classified in industry 3564.

3635 **Household Vacuum Cleaners.**—Establishments primarily engaged in manufacturing vacuum cleaners for household use. Establishments primarily engaged in manufacturing vacuum cleaners for industrial use are classified in industry 3589, and built-in vacuum cleaner systems in industry 1796.

3636 **Sewing Machines.**—Establishments primarily engaged in manufacturing sewing machines for domestic and industrial use.

3639 **Household Appliances, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing household appliances, not elsewhere classified, such as water heaters, dishwashers, and food waste disposal units.

364 ELECTRIC LIGHTING AND WIRING EQUIPMENT

3641 **Electric Lamps.**—Establishments primarily engaged in manufacturing electric bulbs, tubes, and related light sources. Important products of this industry include incandescent filament lamps, vapor and fluorescent lamps, photoflash and photoflood lamps, electrotherapeutic lamp units for ultra-violet and infra-red radiation, and other electric light sources. Establishments primarily engaged in manufacturing glass blanks for bulbs are classified in industry 3229; and lamp components, such as supports, filaments, lead-in wires, and cold cathode fluorescent lamp electrodes, in industry 3699.

3643 Current-Carrying Wiring Devices.—Establishments primarily engaged in manufacturing current-carrying wiring devices. Important products of this industry include attachment plugs and caps, convenience outlets, lamp sockets and receptacles, snap switches, conductor connectors, overhead trolley line material, rail bonds for both propulsion and signal circuits, lightning arrestors, and other lightning protective equipment.

3644 Noncurrent-Carrying Wiring Devices.—Establishments primarily engaged in manufacturing noncurrent-carrying wiring devices. Important products of this industry include conduits and fittings; electrical insulators and insulation materials, except porcelain insulators (industry 3264) and glass insulators (industry 3229); outlet, switch and fuse boxes; and pole line hardware.

3645 Residential Electric Lighting Fixtures.—Establishments primarily engaged in manufacturing residential electric lighting fixtures and equipment, fixed or portable. Establishments primarily engaged in producing glassware for lighting fixtures are classified in SIC Major Group 32; electric light bulbs, tubes, and related light sources in industry 3641; lampshades except glass and metal in industry 3999; and nonelectric fixtures and portable electric flashlights, lanterns, and similar lamps in industry 3648.

3646 Commercial, Industrial, and Institutional Electric Lighting Fixtures.—Establishments primarily engaged in manufacturing commercial, industrial, and institutional electric lighting fixtures. Establishments primarily engaged in producing glassware for lighting fixtures are classified in SIC Major Group 32; residential lighting fixtures in industry 3645; and vehicular lighting fixtures in industry 3647.

3647 Vehicular Lighting Equipment.—Establishments primarily engaged in manufacturing vehicular lighting equipment.

3648 Lighting Equipment, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing lighting fixtures and equipment, electric and nonelectric, not elsewhere classified, including flashlights and similar portable lamps, searchlights, ultraviolet lamp fixtures, and infra-red lamp fixtures. Establishments primarily engaged in manufacturing electric light bulbs, tubes, and related light sources are classified in industry 3641, and those producing glassware for lighting fixtures are classified in SIC Major Group 32.

365 RADIO AND TELEVISION RECEIVING EQUIPMENT, EXCEPT COMMUNICATION TYPES

3651 Radio and Television Receiving Sets, Except Communication Types.—Establishments primarily engaged in manufacturing electronic equipment for home entertainment, including auto radios and tape players. This industry also includes establishments primarily engaged in manufacturing public address systems and music distribution apparatus. Establishments primarily engaged in manufacturing phonograph records and prerecorded tape are classified in industry 3652. Establishments primarily engaged in manufacturing separate cabinets for home electronic equipment are classified in SIC Major Group 25.

3652 Phonograph Records and Prerecorded Magnetic Tape.—Establishments primarily engaged in manufacturing phonograph records and prerecorded magnetic tape. Establishments primarily engaged in manufacturing electronic equipment for home entertainment, except records and prerecorded magnetic tape, are classified in industry 3651.

366 COMMUNICATION EQUIPMENT

3661 Telephone and Telegraph Apparatus.—Establishments primarily engaged in manufacturing wire telephone and telegraph equipment and parts especially designed for telephone and telegraph use.

3662 Radio and Television Transmitting, Signaling, and Detection Equipment and Apparatus.—Establishments primarily engaged in manufacturing (1) radio and television broadcasting equipment; (2) electric communication equipment and parts, except telephone and telegraph; (3) electronic field detection apparatus, light and heat emission operating apparatus, object detection apparatus and navigational electronic equipment, and aircraft and missile control systems; (4) high-energy particle accelerator systems and equipment designed and sold as a complete package for radiation therapy, irradiation, radiographic inspection, and research (linear accelerators, betatrons, dynamotrons, Vandergraff generators, resonant transformers, insulating core transformers, etc.); (5) high-energy particle electronic equipment and accessories sold separately for the construction of linear accelerators, cyclotrons, synchrotrons, and other high-energy research installations (transmitters/modulators, accelerating wave-

guide structures, pulsed electron guns, vacuum systems, cooling systems, etc.); and (6) other electric and electronic communication and signaling products not elsewhere classified. Establishments primarily engaged in manufacturing transmitting tubes are classified in industry 3673.

367 ELECTRONIC COMPONENTS AND ACCESSORIES

3671 Radio and Television Receiving-Type Electron Tubes, Except Cathode Ray.—Establishments primarily engaged in manufacturing radio and television receiving-type electron tubes, except cathode ray tubes. Establishments primarily engaged in manufacturing television receiving-type cathode ray tubes are classified in industry 3672; transmitting tubes in industry 3673; and X-ray tubes in industry 3693.

3672 Cathode Ray Television Picture Tubes.—Establishments primarily engaged in manufacturing television receiving-type cathode ray tubes. Establishments primarily engaged in manufacturing other radio and television receiving-type electron tubes are classified in industry 3671; and transmitting tubes in industry 3673.

3673 Transmitting, Industrial, and Special Purpose Electron Tubes.—Establishments primarily engaged in manufacturing transmitting, industrial, and special purpose electron tubes. Establishments primarily engaged in manufacturing radio and television receiving tubes are classified in industry 3671; television receiving-type cathode ray tubes in industry 3672; and X-ray tubes in industry 3693.

3674 Semiconductors and Related Devices.—Establishments primarily engaged in manufacturing semiconductor and related solid state devices, such as semiconductor diodes and stacks, including rectifiers, integrated microcircuits (semiconductor networks), transistors, solar cells, and light sensing and emitting semiconductor (solid state) devices.

3675 Electronic Capacitors.—Establishments primarily engaged in manufacturing electronic capacitors.

3676 Resistors, for Electronic Applications.—Establishments primarily engaged in manufacturing resistors for electronic end products. Establishments primarily engaged in manufacturing resistors for telephone and telegraph apparatus are classified in industry 3661.

3677 Electronic Coils, Transformers, and Other Inductors.—Establishments primarily engaged in manufacturing electronic coils, transformers, and inductors. Establishments primarily engaged in manufacturing transformers and inductors for telephone and telegraph apparatus are classified in industry 3661; electric lamps in industry 3641; and semiconductor (solid state) and related devices in industry 3674.

3678 Connectors, for Electronic Applications.—Establishments primarily engaged in manufacturing electronic connectors. Establishments primarily engaged in manufacturing electronic capacitors are classified in industry 3675; and electronic coils, transformers, and other inductors in industry 3677.

3679 Electronic Components, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing electronic components, not elsewhere classified, such as receiving antennas, printed circuits, switches, and wave guides.

369 MISCELLANEOUS ELECTRICAL MACHINERY, EQUIPMENT, AND SUPPLIES

3691 Storage Batteries.—Establishments primarily engaged in manufacturing storage batteries.

3692 Primary Batteries, Dry and Wet.—Establishments primarily engaged in manufacturing primary batteries, dry or wet.

3693 Radiographic X-ray, Fluoroscopic X-ray, Therapeutic X-ray, and Other X-ray Apparatus and Tubes; Electromedical and Electrotherapeutic Apparatus.—Establishments primarily engaged in manufacturing radiographic X-ray, fluoroscopic X-ray, and therapeutic X-ray apparatus and tubes for medical, industrial, research and control applications. This industry also includes establishments primarily engaged in manufacturing electromedical and electrotherapeutic apparatus except electrotherapeutic lamp units for ultra-violet and infra-red radiation (industry 3641). Establishments primarily engaged in manufacturing radio receiving-type tubes are classified in industry 3671; television receiving cathode ray tubes in industry 3672; and transmitting tubes in industry 3673.

3694 Electrical Equipment for Internal Combustion Engines.—Establishments primarily engaged in manufacturing electrical equipment for internal combustion engines. Important products of this industry

include armatures, starting motors, alternators, and generators for automobiles and aircraft; and ignition apparatus for internal combustion engines, including spark plugs, magnetos, coils, and distributors.

3699 **Electrical Machinery, Equipment, and Supplies, Not Elsewhere Classified.**—Establishments primarily in manufacturing electrical machinery, equipment, and supplies, not elsewhere classified, such as appliance and extension cords, bells and chimes, and insect traps.

37 TRANSPORTATION EQUIPMENT

This major group includes establishments engaged in manufacturing equipment for transportation of passengers and cargo by land, air, and water. Important products produced by establishments classified in this major group include motor vehicles, aircraft, guided missiles and space vehicles, ships, boats, railroad equipment, and miscellaneous transportation equipment such as motorcycles, bicycles, and snowmobiles. Establishments primarily engaged in manufacturing mobile homes are classified in industry 2451.

371 MOTOR VEHICLES AND MOTOR VEHICLE EQUIPMENT

3711 **Motor Vehicles and Car Bodies.**—This industry comprises establishments primarily engaged in the manufacture of passenger cars, passenger car bodies, trucks, buses, and wheeled combat vehicles. Complete car chassis and complete truck chassis, with or without cab, are also included in this industry. Establishments primarily engaged in the manufacture of trucks or buses on purchased chassis are classified in industry 3713; tanks, self-propelled weapons, and other military vehicles in industry 3795; and motor homes produced on purchased chassis in industry 3716.

3713 **Truck and Bus Bodies.**—Establishments primarily engaged in manufacturing truck and bus bodies for sale separately or for assembly on purchased chassis. Establishments primarily engaged in manufacturing complete trucks and buses are classified in industry 3711, stamped body parts for trucks and buses in industry 3465, and truck trailers and demountable cargo containers in industry 3715.

3714 **Motor Vehicle Parts and Accessories.**—Establishments primarily engaged in manufacturing motor vehicle parts and accessories, but not engaged in manufacturing complete motor vehicles or passenger car bodies. Establishments primarily engaged in manufacturing or assembling complete automobiles and trucks are classified in industry 3711, tires and tubes in industry 3011, automobile glass in SIC Major Group 32, automobile stampings in industry 3465, ignition systems in industry 3694, storage batteries in industry 3691, and carburetors, pistons, rings, and valves in industry 3592.

3715 **Truck Trailers.**—Establishments primarily engaged in manufacturing truck trailers, truck trailer chassis for sale separately, detachable trailer bodies (cargo containers) for sale separately, and detachable trailer (cargo container) chasis for sale separately.

3716 **Motor Homes Produced on Purchased Chassis.**—This industry comprises establishments primarily engaged in the manufacture of motor homes produced on purchased chassis. Establishments primarily engaged in the manufacture of motor homes produced on chassis of own manufacture are classified in industry 3711.

The Motor Homes Produced on Purchased Chassis is included for the first time in the 1977 census.

372 AIRCRAFT AND PARTS

3721 **Aircraft.**—Establishments primarily engaged in manufacturing or assembling complete aircraft. This industry also includes establishments primarily engaged in research and development on aircraft or in factory-type aircraft modification on a contract or fee basis. Establishments primarily engaged in manufacturing engines, propellers, and other aircraft parts and auxiliary equipment are classified in industries 3724 and 3728; and those producing guided missiles and space vehicles and parts are classified in SIC group 376.

3724 **Aircraft Engines and Engine Parts.**—Establishments primarily engaged in manufacturing aircraft engines and engine parts. Research and development on aircraft engines is included in this industry. Establishments primarily engaged in manufacturing guided missile and space vehicle propulsion units and parts are classified in industry 3764.

3728 **Aircraft Parts and Auxiliary Equipment, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing aircraft parts and auxiliary equip-

ment not elsewhere classified. Research and development on aircraft parts is included in this industry. Establishments primarily engaged in manufacturing or assembling complete aircraft are classified in industry 3721, aircraft engines and parts in industry 3724, aeronautical instruments in industry 3811, aeronautical electrical equipment in industry 3694, and guided missile and space vehicle parts and auxiliary equipment in industry 3769.

373 SHIP AND BOAT BUILDING AND REPAIRING

3731 Ship Building and Repairing.—Establishments primarily engaged in building and repairing all types of ships, barges, and lighters, whether propelled by sail or motor power or towed by other craft. This industry also includes the conversion and alteration of ships. Establishments primarily engaged in fabricating structural assemblies or components for ships, or subcontractors engaged in ship painting, joinery, carpentry work, electrical wiring installation, etc., are classified in other industries.

3732 Boat Building and Repairing.—Establishments primarily engaged in building and repairing all types of boats. Establishments primarily engaged in cleaning and storing boats and in the rental of dock space and yacht clubs are classified in nonmanufacturing industries. Establishments primarily engaged in manufacturing rubber and nonrigid plastic boats are classified in SIC Major Group 30.

374 RAILROAD EQUIPMENT

3743 Railroad Equipment.—Establishments primarily engaged in building and rebuilding locomotives (including frames and parts not elsewhere classified) of any type or gage; and railroad, street, and rapid transit cars and car equipment for operation on rails for freight and passenger service. This industry also includes establishments primarily engaged in manufacturing trackless trolley buses. Establishments primarily engaged in manufacturing mining cars are classified in industry 3532. Repair shops, owned and operated by railroads or local transit companies, rebuilding or repairing locomotives or cars, or building new locomotives or cars for their own account, are classified in SIC Major Groups 40 and 41.

375 MOTORCYCLES, BICYCLES, AND PARTS

3751 Motorcycles, Bicycles, and Parts.—Establishments primarily engaged in manufacturing motorcycles, bicycles, and similar equipment and parts. Establishments primarily engaged in assembling motorcycles or bicycles from purchased parts are also included in this industry. Establishments primarily engaged in manufacturing children's vehicles, except bicycles, are classified in industry 3944. Establishments primarily engaged in manufacturing golf carts and other similar personnel carriers are classified in industry 3799.

376 GUIDED MISSILES AND SPACE VEHICLES AND PARTS

3761 Guided Missiles and Space Vehicles.—Establishments primarily engaged in manufacturing complete guided missiles and space vehicles. Research and development and other services on or for guided missiles and space vehicles are included in this industry. Establishments primarily engaged in manufacturing guided missile and space vehicle propulsion units and propulsion unit parts are classified in industry 3764; space satellite and guided missile and space vehicle airborne and ground guidance, checkout, and launch electronic systems and components in industry 3662; and guided missile and space vehicle airframes, nose cones, and space capsules in industry 3769.

3764 Guided Missile and Space Vehicle Propulsion Units and Propulsion Unit Parts.—Establishments primarily engaged in manufacturing guided missile propulsion units and propulsion unit parts. Research and development on guided missile and space vehicle propulsion units and propulsion unit parts is also included in this industry.

3769 Guided Missile and Space Vehicle Parts and Auxiliary Equipment, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing guided missile and space vehicle parts and auxiliary equipment not elsewhere classified. Research and development on guided missile and space vehicle parts and auxiliary equipment, not elsewhere classified, is also included in this industry. Establishments primarily engaged in manufacturing navigational and guidance systems are classified in industry 3662.

379 MISCELLANEOUS TRANSPORTATION EQUIPMENT

3792 Travel Trailers and Campers.—Establishments primarily engaged in manufacturing travel trailers for attachment to passenger cars or other vehicles, pickup coaches (campers) or caps (covers) for mounting on pickup trucks and self-contained motor homes. Travel trailers are generally 35 feet long or less, 8 feet wide or less, and have storage facilities for water and waste. Establishments primarily engaged in manufacturing mobile homes are classified in industry 2451.

3795 Tanks and Tank Components.—Establishments primarily engaged in manufacturing or assembling complete tanks and specialized components for tanks. Establishments primarily engaged in manufacturing military vehicles other than tanks are classified in SIC group 371, and tank engines in industry 3519.

3799 Transportation Equipment, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing transportation equipment not elsewhere classified. Establishments primarily engaged in manufacturing industrial trucks, tractors, trailers, and stackers are classified in industry 3537, and children's vehicles except bicycles in industry 3944.

38 MEASURING, ANALYZING, AND CONTROLLING INSTRUMENTS; PHOTOGRAPHIC, MEDICAL, AND OPTICAL GOODS; WATCHES AND CLOCKS

This major group includes establishments engaged in manufacturing instruments (including professional and scientific) for measuring, testing, analyzing, and controlling, and their associated sensors and accessories; optical instruments and lenses; surveying and drafting instruments; surgical, medical, and dental instruments, equipment, and supplies; opthalmic goods; photographic equipment and supplies; and watches and clocks.

381 ENGINEERING, LABORATORY, SCIENTIFIC, AND RESEARCH INSTRUMENTS AND ASSOCIATED EQUIPMENT

3811 Engineering, Laboratory, Scientific, and Research Instruments and Associated Equipment.—Establishments primarily engaged in manufacturing engineering, laboratory, and scientific instruments, including nautical, navigational, aeronautical, surveying, and drafting equipment and instruments for laboratory work and scientific research (except optical instruments—industry 3832). Establishments primarily engaged in manufacturing surgical and medical instruments are classified in industry 3841; dental instruments and equipment in industry 3843; measuring, analyzing, and controlling instruments, including instruments for measuring electrical quantities and characteristics, in SIC group 382; watches and clocks in industry 3873; machinists' precision measuring tools in industry 3545; and measuring and dispensing pumps in industry 3586.

382 MEASURING AND CONTROLLING INSTRUMENTS

3822 Automatic Controls for Regulating Residential and Commercial Environments and Appliances.—Establishments primarily engaged in manufacturing temperature and related controls for heating and air-conditioning installations and refrigeration applications, which are electrically, electronically, or pneumatically actuated, and which measure and control variables such as temperature and humidity; and automatic regulators used as components of household appliances. Establishments primarily engaged in manufacturing industrial process controls are classified in industry 3823; motor control switches in industry 3622, switches for household appliances in industry 3643, and appliance timers in industry 3873.

3823 Industrial Instruments for Measurement, Display, and Control of Process Variables; and Related Products.—Establishments primarily engaged in manufacturing industrial instruments and related products for measuring, displaying (indicating and/or recording), transmitting, and controlling process variables in manufacturing, energy conversion, and public service utilities. These instruments operate mechanically, pneumatically, electronically, or electrically to measure process variables such as temperature, humidity, pressure, vacuum, combustion, flow, level, viscosity, density, acidity, alkalinity, specific gravity, gas and liquid concentration, sequence, time interval, mechanical motion, and rotation. Establishments primarily engaged in manufacturing electrical integrating meters are classified in industry 3825; residential and commercial comfort controls in industry 3822; all liquid-in-glass and bimetal thermometers and glass hydrometers in industry 3829; recorder charts in SIC group 275, and optical instruments in industry 3832.

3824 **Totalizing Fluid Meters and Counting Devices.**—Establishments primarily engaged in manufacturing totalizing (registering) meters, monitoring fluid flows, such as watermeters and gasmeters; and producers of mechanical and electromechanical counters and associated metering devices. Establishments primarily engaged in manufacturing electricity integrating meters and electronic frequency counters are classified in industry 3825; and industrial process instruments in industry 3823.

3825 **Instruments for Measuring and Testing of Electricity and Electrical Signals.**—Establishments primarily engaged in manufacturing instruments for measuring the characteristics of electricity and electrical signals, such as voltmeters, ammeters, watt-meters, watt-hour meters, demand meters, and equipment for testing the electrical characteristics of electrical, radio, and communication circuits and of internal combustion engines. Establishments primarily engaged in the manufacturing of electronic checkout, monitoring, evaluating, and other electronic support equipment for electronic navigational, radar, sonar, and other communications systems are classified in industry 3662.

3829 **Measuring and Controlling Devices, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing measuring and controlling devices, not elsewhere classified, including testing instruments to determine the physical properties of materials, nuclear instruments, aircraft engine instruments, and liquid-in-glass and bimetal thermometers.

383 OPTICAL INSTRUMENTS AND LENSES

3832 **Optical Instruments and Lenses.**—Establishments primarily engaged in manufacturing instruments that measure an optical property; apparatus, except photographic, that projects or magnifies, such as binoculars, prisms, and lenses; optical sighting and fire control equipment; and related analytical instruments. Establishments primarily engaged in manufacturing eyeglass lenses, frames, or fittings are classified in industry 3851; separate computers in industry 3573; and electronic tracking and fire control systems in industry 3662.

384 SURGICAL, MEDICAL, AND DENTAL INSTRUMENTS AND SUPPLIES

3841 **Surgical and Medical Instruments and Apparatus.**—Establishments primarily engaged in manufacturing medical, surgical, ophthalmic, and veterinary instruments and apparatus. Establishments primarily engaged in manufacturing surgical and orthopedic appliances are classified in industry 3842; and electrotherapeutic, electromedical, and X-ray apparatus in industry 3693.

3842 **Orthopedic, Prosthetic, and Surgical Appliances and Supplies.**—Establishments primarily engaged in manufacturing orthopedic, prosthetic, and surgical appliances and supplies, arch supports, and other foot appliances; fracture appliances, elastic hosiery, abdominal supporters, braces, and trusses; bandages; surgical gauze and dressings; sutures; adhesive tapes and medicated plasters; and personal safety appliances and equipment. Establishments primarily engaged in manufacturing surgical and medical instruments are classified in industry 3841. Establishments primarily engaged in manufacturing appliances and in the personal fitting to the individual prescription of a physician are classified in trade industries.

3843 **Dental Equipment and Supplies.**—Establishments primarily engaged in manufacturing artificial teeth, dental metals, alloys and amalgams, and a wide variety of equipment, instruments, and supplies used by dentists, dental laboratories, and dental colleges. Dental laboratories constructing artificial dentures, bridges, inlays, and other dental restorations on specifications from dentists are classified in industry 8072.

385 OPHTHALMIC GOODS

3851 **Ophthalmic Goods.**—Establishments primarily engaged in manufacturing opthalmic frames, lenses, and sunglass lenses. Establishments primarily engaged in manufacturing slit lamps are classified in industry 3841, and molded glass blanks in industry 3229. Establishments primarily engaged in grinding lenses and fitting glasses to prescription are classified in trade.

386 PHOTOGRAPHIC EQUIPMENT AND SUPPLIES

3861 **Photographic Equipment and Supplies.**—Establishments primarily engaged in manufacturing (1) photographic apparatus, equipment, parts, attachments, and accessories, such as still and motion

picture cameras and projection apparatus; photocopy and microfilm equipment; blueprinting and diazotype (white printing) apparatus and equipment; and other photographic equipment; and (2) sensitized film, paper, cloth, plates, and prepared photographic chemicals for use therewith. Establishments primarily engaged in manufacturing photographic paper stock (unsensitized), and paper mats, mounts, easels, and folders for photographic use are classified in SIC Major Group 26; photographic lenses in industry 3832; photographic glass in SIC Major Group 32; chemicals for technical purposes, not specifically prepared and packaged for use in photography, in SIC Major Group 28; and photographic flash, flood enlarger, and projection lamps in industry 3641.

387 WATCHES, CLOCKS, CLOCKWORK OPERATED DEVICES, AND PARTS

3873 Watches, Clocks, Clockwork Operated Devices, and Parts.—Establishments primarily engaged in manufacturing clocks (including electric), watches, watchcases, mechanisms for clockwork operated devices, and clock and watch parts. This industry includes establishments primarily engaged in assembling clocks and watches from purchased movements and cases. Establishments primarily engaged in manufacturing time clocks are classified in industry 3579, glass crystals in industry 3231, and unbreakable crystals in industry 3079.

39 MISCELLANEOUS MANUFACTURING INDUSTRIES

This major group includes establishments primarily engaged in manufacturing products not classified in any other manufacturing group. Industries in this group fall into the following categories: Jewelry, silverware and plated ware; musical instruments; toys, sporting and athletic goods; pens, pencils, and other office and artists' materials; buttons, costume novelties, miscellaneous notions; brooms and brushes; caskets; and other miscellaneous manufacturing industries.

391 JEWELRY, SILVERWARE, AND PLATED WARE

3911 Jewelry, Precious Metal.—Establishments primarily engaged in manufacturing jewelry and other articles worn on or carried about the person, made of precious metals with or without stones (including the setting of stones where used), including cigarette cases and lighters, vanity cases and compacts; trimmings for umbrellas and canes; and jewel settings and mountings. Establishments primarily engaged in manufacturing costume jewelry from nonprecious metals and other materials are classified in industry 3961.

3914 Silverware, Plated Ware, and Stainless Steel Ware.—Establishments primarily engaged in manufacturing flatware (including knives, forks, and spoons), hollowware, toiletware, ecclesiastical ware, and related products made of sterling silver; of metal plated with silver, gold, or other metal; of nickel silver; of pewter; or of stainless steel.

3915 Jewelers' Findings and Materials and Lapidary Work.—Establishments primarily engaged in manufacturing unassembled jewelry parts, and stock shop products such as sheet, wire, and tubing; and establishments of lapidaries primarily engaged in cutting, slabbing, tumbling, carving, engraving, polishing, or faceting stones from natural or manmade precious or semiprecious gem raw materials, either for sale or on a contract basis for the trade; in recutting, repolishing, and setting gem stones; or in cutting, drilling, and otherwise preparing jewels for instruments, dies, watches, chronometers, and other industrial uses. This industry includes the drilling, sawing, and peeling of real or cultured pearls, but does not include the manufacture of artificial pearls (industry 3961).

393 MUSICAL INSTRUMENTS

3931 Musical Instruments.—Establishments primarily engaged in manufacturing pianos, with or without player attachments; organs; other musical instruments; and parts and accessories for musical instruments.

394 TOYS AND AMUSEMENT, SPORTING, AND ATHLETIC GOODS

3942 Dolls.—Establishments primarily engaged in manufacturing dolls, doll parts, and doll clothing. Establishments primarily engaged in manufacturing stuffed toy animals are also included in this industry.

3944 Games, Toys, and Children's Vehicles; Except Dolls and Bicycles.—Establishments primarily engaged in manufacturing games and game sets for adults and children, and mechanical and nonmechanical toys. Important products of this industry include games such as chess, checkers, dominoes, puzzles, and other indoor games; and toys, such as toy furniture, doll carriages and carts, construction sets, mechanical trains, toy guns and air rifles, and other mechanical games and toys; baby carriages and strollers; children's velocipedes and tricycles, coaster wagons, play cars, sleds, and other children's outdoor wheel goods and vehicles, except bicycles (industry 3751). Establishments primarily engaged in manufacturing dolls are classified in industry 3942; and sporting and athletic goods for children and adults in industry 3949.

3949 Sporting and Athletic Goods, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing sporting and athletic goods, not elsewhere classified, such as fishing tackle; golf and tennis goods; baseball, football, basketball, and boxing equipment; roller skates and ice skates; gymnasium and playground equipment; billiard and pool tables; and bowling alleys and equipment. Establishments primarily engaged in manufacturing athletic apparel are classified in SIC Major Group 23, small arms ammunition in industry 3482, and firearms in industry 3484.

395 PENS, PENCILS, AND OTHER OFFICE AND ARTISTS' MATERIALS

3951 Pens, Mechanical Pencils, and Parts.—Establishments primarily engaged in manufacturing pens, pen points, fountain pens, ballpoint pens, refill cartridges, porous-tipped felt tip markers, and parts.

3952 Lead Pencils, Crayons, and Artists' Materials.—Establishments primarily engaged in manufacturing lead pencils, pencil leads, and crayons; and materials and equipment for artwork, such as airbrushes, drawing tables and boards, palettes, sketch boxes, pantographs, artists' colors and waxes, pyrography goods, drawing inks, and drafting materials. Establishments primarily engaged in manufacturing mechanical pencils are classified in industry 3951, and drafting instruments in industry 3811.

3953 Marking Devices.—Establishments primarily engaged in manufacturing rubber and metal hand stamps, dies, and seals; steel letters and figures; and stencils for use in painting or marking. Establishments primarily engaged in manufacturing felt tip markers are classified in industry 3951.

3955 Carbon Paper and Inked Ribbons.—Establishments primarily engaged in manufacturing carbon paper for business machines, sales books, etc.; spirit or gelatin process and other stencil paper; and inked or carbon ribbons for business machines.

396 COSTUME JEWELRY, COSTUME NOVELTIES, BUTTONS, AND MISCELLANEOUS NOTIONS, EXCEPT PRECIOUS METAL

3961 Costume Jewelry and Costume Novelties, Except Precious Metal.—Establishments primarily engaged in manufacturing costume jewelry, costume novelties, and ornaments made of all materials, except precious metal, precious or semiprecious stones, and rolled gold plate and gold filled materials (industry 3911).

3962 Feathers, Plumes, and Artificial Trees and Flowers.—Establishments primarily engaged in manufacturing artificial trees (including Christmas trees), flowers, fruits, and foliage made from all materials except glass; in producing fancy feathers, plumes, and articles made principally of feathers and plumes. Establishments primarily engaged in manufacturing artificial flowers, fruits, and foliage from glass are classified in industry 3231.

3963 Buttons.—Establishments primarily engaged in manufacturing buttons, button parts, and button blanks and molds, of all materials except precious metal and precious or semiprecious stones (industry 3911).

3964 Needles, Pins, Hooks and Eyes, and Similar Notions.—Establishments primarily engaged in manufacturing notions, such as machine and hand needles, pins, hooks and eyes, eyelets, buckles, and slide and snap fasteners.

399 MISCELLANEOUS MANUFACTURING INDUSTRIES

3991 Brooms and Brushes.—Establishments primarily engaged in manufacturing household, industrial, and street sweeping brooms; and brushes, such as paintbrushes, toothbrushes, toilet brushes, and household and industrial brushes.

3993 **Signs and Advertising Displays.**—Establishments primarily engaged in manufacturing electrical, mechanical, cutout, or plate signs and advertising displays, including neon signs and advertising novelties. Sign painting shops doing business on a custom basis are classified in industry 7399. Establishments primarily engaged in manufacturing electric signal equipment are classified in industry 3662, and commercial lighting fixtures in industry 3646.

3995 **Burial Caskets.**—Establishments primarily engaged in manufacturing burial caskets and cases including shipping cases of wood or other material except concrete. Establishments primarily engaged in producing other goods for use by morticians are classified on the basis of the product, such as burial garments in SIC Major Group 23.

3996 **Linoleum, Asphalted-Felt-Base, and Other Hard-Surface Floor Coverings, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing linoleum, asphalted-felt-base, and other hard-surface floor coverings not elsewhere classified. Establishments primarily engaged in manufacturing rubber floor coverings are classified in industry 3069, and cork floor and wall tile in industry 2499.

3999 **Manufacturing Industries, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing miscellaneous fabricated products, including beauty shop and barbershop equipment; hairwork; tobacco pipes and cigarette holders; coin-operated amusement machines; matches; candles; lampshades; dressed and dyed furs; umbrellas; parasols and canes; and other articles not elsewhere classified.

APPENDIX D. Reporting Forms

This appendix contains reproductions of a representative selection of reporting forms used in the 1977 economic censuses, with emphasis on the census of manufactures.

These forms are described in section 7 of the Introduction.

DUE DATE: February 15, 1978

Form Approved: O.M.B. No. 41-R2751

FORM NC-X1 (Items 1–4)
(4-27-77)

U.S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

1977 ECONOMIC CENSUSES

REPORT OF ORGANIZATION

NOTICE – Response to this inquiry is **required by law (title 13, U.S. Code).** By the same law, your report to the Census Bureau is **confidential.** It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are **immune from legal process.**

Item 5B – YOUR LISTING OF ADDITIONAL ESTABLISHMENTS AND SUBSIDIARIES

- **Column (a)** – List separately any establishments of your company and its subsidiaries located in the U.S. or any of its territories which are not accounted for on other report forms in this mailing package.
- **Instructions for questions (e) and (f)** – Answer question (e) for acquired establishments. Complete question (f) entering the date the establishment opened. If not yet in operation, enter the expected opening date and the expected employment.
- **Column (b)** – Complete this column for each listed establishment.
- **Column (c)** – Mark (X) the box which best describes the activity of each establishment. *See box codes*
- **Column (d)** – Describe major activity or list principal products or services.
- **NOTE:** Additional copies of **Item 5B** are available upon request to Bureau of the Census, 1201 East Tenth Street, Jeffersonville, Indiana 47132. If you prefer, you may use your own paper to list additional establishments; in such instances, however, please **follow the same format** as shown on the report form. Be sure to **enter** the item number, your company's name and address, and the Census File Number in the upper right-hand corner of each additional sheet.

DESCRIPTION AND CODES FOR COLUMN (c)

1 – Agricultural production
2 – Agricultural services
3 – Mining
4 – Construction
5 – Merchant wholesalers
6 – Commission agent/broker
7 – Communications
8 – Manufacturers' sales branches, manufacturers' sales offices
9 – Manufacturing
10 – Retail
11 – Retail concessions/departments in retail stores
12 – Transportation and public utilities
13 – Finance, insurance, or real estate
14 – Services
15 – Medical, legal, or educational
16 – Auxiliary establishments primarily providing service to your own or affiliated company rather than customers or clients such as storage warehouses and research laboratories
17 – Central Administrative Office: accounting, purchasing, legal activities for your own company
18 – Other – *Specify major activity in column (d) below*

Line No.	(a) Employer Identification (EI) Number, establishment name, your store or plant number, if any, and address of physical location (including ZIP code)	(b) 1977 establishment data *Report number of employees and payroll for each establishment (including part-year operations)*	(c) Kind of business activity in 1977 – Major activity *Mark (X) one box from the above descriptions*	(d) Description of major activity or principal products or services

NOTICE – Response to this inquiry is **required by law (title 13, U.S. Code).** By the same law, your report to the Census Bureau is **confidential.** It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are **immune from legal process.**

In correspondence pertaining to this report, please refer to this Census File Number → NC-X3

Employer Identification Number →

Please complete this form and RETURN TO → BUREAU OF THE CENSUS, 1201 East Tenth Street, Jeffersonville, Indiana 47132

Census use only	Unit No.	Item code	Unit No.	Item code	Unit No.	Item code

KEEP THIS COPY FOR YOUR FILES

PLEASE COMPLETE AND RETURN THE FORM WHICH SHOWS YOUR NAME AND ADDRESS

Please correct errors in name, address and ZIP code. ENTER street and number if not shown.

Important–Please read

The data reported on this form should cover only the establishment shown on the address label. However, if more than one establishment (location) was operated under the same Employer Identification Number in 1977, consolidate data for all such locations in items 5 and 6. In item 1 enter the location of the MAIN establishment. In item 12c provide information separately for each location, INCLUDING the main establishment.

Item 1 – PHYSICAL LOCATION OF ESTABLISHMENT – In order to assign this establishment to the correct geographic area, the Bureau of the Census must know the actual location **which may differ from the mailing address.** *Complete items a through g.*

a. Address number and street name of physical location – *If not known, enter building name, shopping center name, or other physical location description. Do not enter P.O. box or rural route.*
Mark (X) for a, b, c, and d if same as mailing label; if different show corrections.
Same as mailing label ☐ OR ▶

b. Name of city, town, village, borough, etc. of physical location
Same as mailing label ☐ OR ▶

c. State
Same as mailing label ☐ OR ▶

d. ZIP code
Same as mailing label ☐ OR ▶

e. Type of municipality indicated in 1b — *Mark (X) one*
1 ☐ City 2 ☐ Town 3 ☐ Village 4 ☐ Borough 5 ☐ Township 6 ☐ Unincorporated 7 ☐ Other – *Specify* _____ 8 ☐ Don't know

f. **Is this establishment located inside the legal boundaries of the city, town, village, etc., indicated in 1b?**
1 ☐ Yes 2 ☐ No 3 ☐ No legal boundaries 4 ☐ Don't know
NOTE – The area served by a post office generally does not coincide with the legal boundaries of the municipality from which the post office takes its name.

g. Name of county (Louisiana parish) of physical location

Item 2 – EMPLOYER IDENTIFICATION NUMBER
Is the Employer Identification (EI) Number printed in the upper right of the address box the SAME as that used for this establishment on its latest 1977 Employer's Quarterly Federal Tax Return, Treasury Form 941?
☐ YES
☐ NO – *Enter current EI number* → ☐☐–☐☐☐☐☐☐☐ *(9 digits)*

Item 3 – OPERATIONAL STATUS
a. Mark (X) the **ONE** box which best describes this establishment at the end of 1977.
001 1 ☐ In operation
2 ☐ Temporarily or seasonally inactive
3 ☐ Ceased operation – *Give date* →
4 ☐ Sold or leased to another operator – *Give date AND name, etc.* →

Figures only

Month	Day	Year

Name of new owner or operator
Number and street
City | State | ZIP code

b. **How many months during 1977 did your firm or organization actively operate this establishment?** — Number of months: 002

Item 4 – ORGANIZATIONAL STATUS
a. Mark (X) the **ONE** box which best describes this establishment during 1977.
003 1 ☐ Individual proprietorship
2 ☐ Partnership
8 ☐ Cooperative association
5 ☐ Governmental – *Specify* _____
0 ☐ Corporation (other than specified above)
9 ☐ Other – *Specify* _____

b. **Was all or part of the income of this establishment or organization exempt from Federal income taxes under Section 501 or 521 of the Internal Revenue Code?** 004 1 ☐ YES 2 ☐ NO

Important–Please read

Dollar figures should be reported as illustrated. Please be careful to enter the figures in the **correct columns.** See example below:

EXAMPLE: If figure is **$1,125,628.28** →

	Millions (000)	Thousands (000)	Dollars (000)
• **PREFERRED method**	1	125	
Acceptable method	1	125	628

Item 5 – DOLLAR VOLUME

	Mil.	Thou.	Dol.
a. Sales of merchandise and other operating receipts or total revenue in 1977 **EXCLUDING** sales (or other) taxes collected	010		
b. Were sales (or other) taxes collected from customers and forwarded to taxing authorities? 011 1 ☐ YES 2 ☐ NO			
If "YES," report the amount of such taxes (*DO NOT include taxes in 5a above*)	012		
c. **TOTAL DOLLAR VOLUME** including sales (or other) taxes (Sum of 5a and 5b above) →	013		
d. Expenses in 1977	040		

Item 6 – PAYROLL AND EMPLOYMENT

	Mil.	Thou.	Dol.
a. Payroll			
(1) Total **ANNUAL** payroll in 1977 before deductions	030		
(2) Payroll for the **FIRST QUARTER** of 1977	031		

b. **Employment** – Number of paid employees for the pay period including the 12th of the month (Include both full- and part-time employees)

032 MAR	033 MAY	034 AUG	035 NOV

Item 7 – SOURCE OF SALES, RECEIPTS, OR REVENUE – List below the principal lines of merchandise sold, kinds of construction work done, products produced, or services provided and indicate the approximate percentage each was of the total receipts or revenue in 1977.

Source	Percentage of receipts or revenue	Source	Percentage of receipts or revenue
	%		%
	%		%
	%		%
	%		%

Make sure all items on this page have been completed and continue to **NEXT PAGE**

Page 2

Item 8 – BUSINESS OR ACTIVITY – Mark (X) the **ONE** box which best describes the principal activity during the past year. 070

Census use only

- ☐ **AGRICULTURAL PRODUCTION**
- ☐ **MINERALS EXTRACTION OR ORE PROCESSING**
- ☐ **MANUFACTURING**
- ☐ **MOTOR CARRIER (ICC REGULATED)**
- ☐ **MOTOR CARRIER (EXCEPT ICC REGULATED)**

CONSTRUCTION

- ☐ Building construction – General contractor
- ☐ Other construction – General contractor
- ☐ Special trade contractor (electricians, carpenters, painters, etc.)
- ☐ Land developer and subdivider
- ☐ Real estate – *Specify activity* _____

WHOLESALE TRADE

- ☐ Merchant wholesaler
- ☐ Agent or broker
- ☐ Other type of wholesaler – *Specify* _____

RETAIL TRADE

- ☐ Selling at this establishment
- ☐ Mail order (catalog selling)
- ☐ House-to-house (direct selling)
- ☐ Operating merchandise vending machines
- ☐ Other type of retailer – *Specify* _____
- ☐ **Other – *Specify activity*** _____

Item 9 – If "Manufacturing" is marked in item 8, list the primary materials consumed in producing the manufactured products.

Item 10 – CLASS OF CUSTOMER

To whom do you sell most of your products or provide your services?

- ☐ Retail or wholesale establishments
- ☐ Construction contractors
- ☐ General public (household consumers and individuals)
- ☐ Institutional, industrial, commercial, professional, government, and farm users
- ☐ Other – *Specify* _____

Item 11 – OWNERSHIP OR CONTROL

Enter the company name and address (street name and number, city, State, ZIP code) and EI Number. If more space is needed to list companies, attach a separate sheet.

a. Is this company owned or controlled by another company? 1 ☐ YES → 2 ☐ NO

Owning or controlling company — EI No. *(9 digits)* ☐☐☐–☐☐☐☐☐☐

b. Does this company own or control any other company or companies? 1 ☐ YES → 2 ☐ NO

Owned or controlled company — EI No. *(9 digits)* ☐☐☐–☐☐☐☐☐☐

Item 12 – LOCATIONS OF OPERATION

a. Were the operations under the EI Number shown in the mailing label (or as corrected in item 2) conducted at more than one location during 1977? (Including all selling or service locations and any other facilities such as warehouses, administrative offices, etc.)

1 ☐ YES – *Answer (b) and (c)*
2 ☐ NO – *SKIP to item 13*

b. At how many separate locations were these operations conducted during 1977? — Number of locations

c. List each location – including main location. If more space is needed, attach a separate sheet providing the same information required below.

Census use only	Physical location of each operation *Name, address and ZIP code* (a)				1977 sales and receipts and annual and 1st quarter payrolls *Totals should equal items 5a and 6a(1) and (2)* (b)				Number of paid employees for the pay period including the 12th of each month *Totals should equal corresponding entries in item 6b* (c)		Primary kind of business or activity of each location *Describe* (d)
						Mil.	Thou.	Dol.			
080	Name				Sales and receipts 081				084 MAR	085 MAY	
	Number and street of physical location				Total annual payroll 082				086 AUG	087 NOV	
	City	State	ZIP code		1st quarter payroll 083						088 Census use only
080	Name				Sales and receipts 081				084 MAR	085 MAY	
	Number and street of physical location				Total annual payroll 082				086 AUG	087 NOV	
	City	State	ZIP code		1st quarter payroll 083						088 Census use only
080	Name				Sales and receipts 081				084 MAR	085 MAY	
	Number and street of physical location				Total annual payroll 082				086 AUG	087 NOV	
	City	State	ZIP code		1st quarter payroll 083						088 Census use only
080	Name				Sales and receipts 081				084 MAR	085 MAY	
	Number and street of physical location				Total annual payroll 082				086 AUG	087 NOV	
	City	State	ZIP code		1st quarter payroll 083						088 Census use only
080	Name				Sales and receipts 081				084 MAR	085 MAY	
	Number and street of physical location				Total annual payroll 082				086 AUG	087 NOV

a. Did this establishment have billings to retail stores of this company during 1977? 1 [ ] YES – *Go to b* 2 [ ] NO – *SKIP to item 10*

	Mil.	Thou.	Dol.
b. Total billings by this establishment in 1977 to retail stores of this company. → 091			

EXAMPLE FOR REPORTING PERCENTS — If figure is **38.76%** of total sales:

	Whole percent
• Report whole percents →	39%
Not acceptable →	38.76%

Item 10 – SALES TO CUSTOMERS OUTSIDE THIS COMPANY 100

a. Did this establishment have sales to customers outside this company during 1977? 1 YES – *Go to b* 2 NO – *SKIP to item 11*

	Mil.	Thou.	Dol.
b. (1) Sales and other operating receipts (exclude sales or other taxes collected) 101			
(2) Were sales (or other) taxes collected from customers and forwarded to taxing authorities? 102 1 YES 2 NO			
If "YES," report amount of taxes *(DO NOT include in 10b(1))* → 103			
(3) TOTAL sales and other operating receipts (including sales or other taxes collected) (Sum of lines (1) and (2)) → 104			

	Whole percent
c. Of the value of sales and other operating receipts reported in item 10b(1), report the approximate percentage of these receipts to –	
(1) General public (households, consumers and individuals) 105	%
(2) Other, include retailers; wholesalers; institutional, industrial, commercial, professional, and farm users (for use in farm production); and government 106	

d. List the **principal** products sold or services rendered by this establishment to customers outside this company, and their approximate percent of 1977 sales and receipts as reported in item 10b(1) above.

Principal products sold or services rendered	Percent of sales and receipts in 1977
(1)	%
(2)	%

Item 11 – CAPITAL EXPENDITURES (EXCLUDE LAND AND MINERAL RIGHTS) 110

a. Did this establishment make capital expenditures during 1977? 1 YES – *Go to b* 2 NO – *SKIP to item 12*

	Mil.	Thou.	Dol.
b. Type of capital expenditures			
(1) New structures and additions to plant 111			
(2) New automobiles, trucks, trailers, etc., for highway use 112			
(3) New computers and peripheral data processing equipment 113			
(4) All other expenditures for new machinery and equipment 114			
(5) Used plant and used equipment acquired from others 115			
(6) TOTAL capital expenditures (Sum of lines (1) through (5)) → 116			

Item 12 – GROSS VALUE OF DEPRECIABLE ASSETS (EXCLUDE LAND) 120

a. Did this establishment maintain depreciable assets during 1977? 1 YES – *Go to b* 2 NO – *SKIP to item 13*

	Mil.	Thou.	Dol.
b. Gross value of depreciable assets, end of 1976			
(1) Buildings and structures 121			
(2) Machinery and equipment 122			
(3) TOTAL (Sum of lines (1) and (2)) → 123			
c. Gross value of depreciable assets, end of 1977			
(1) Buildings and structures 124			
(2) Machinery and equipment 125			
(3) TOTAL (Sum of lines (1) and (2)) → 126			

Item 13 – DEPRECIATION CHARGES 130

a. Did this establishment maintain depreciation accounts during 1977? 1 YES – *Go to b* 2 NO – *SKIP to item 14*

	Mil.	Thou.	Dol.
b. TOTAL depreciation charges against assets during 1977 → 131			

Item 14 – SELECTED OPERATING EXPENSES

(1) Cost of purchased electricity 140			
(2) Cost of fuels consumed 141			
(3) Cost of purchased communication services 142			
(4) Cost of purchased repair services for buildings and structures 143			
(5) Cost of purchased repair services for machinery and equipment 144			

Item 15 – RENTAL PAYMENTS (EXCLUDE LAND) 150

a. Did this establishment make rental payments during 1977? 1 YES – *Go to b* 2 NO – *SKIP to item 16*

	Mil.	Thou.	Dol.
b. Rental payments made for this establishment			
(1) For use of buildings and structures 151			
(2) For use of machinery and equipment 152			
(3) TOTAL rental payments (Sum of lines (1) and (2)) → 153			

Item 16 – COST OF RESEARCH AND DEVELOPMENT 160

a. Did this establishment perform research and development during 1977? 1 YES – *Go to b* 2 NO – *SKIP to item 17*

	Mil.	Thou.	Dol.
b. Type of research and development performed			
(1) Federal contracts and subcontracts 161			
(2) With own funds and nonfederal sources 162			
(3) TOTAL cost of research and development (Sum of lines (1) and (2)) → 163			

Item 17 – INVENTORIES AND METHOD OF VALUATION 170

a. Did this establishment have inventories during 1977? 1 YES – *Go to b* 2 NO – *SKIP to item 18*

	Mil.	Thou.	Dol.
b. Value of inventories of this establishment			
(1) End of 1976 171			
(2) End of 1977 172			

	Inventories end of 1977
	Whole percent
c. If the dollar value of inventories at the end of 1977 exceeds $25(000), report the method of valuation below –	
(1) Cost	
(a) First-in, First-out (FIFO) 180	%
(b) Last-in, First-out (LIFO) 181	%
(c) Average cost 182	%
(d) Specific or actual cost 183	%
(e) Standard cost 184	%
(f) Other – *Specify* 185	%
(2) Market 186	
(a) Market used because lower than cost	%
(b) Market always used 187	%
(3) Other – *Specify* 188	%
(4) TOTAL (Sum of lines (1) through (3)) →	100%

Item 18 – CONSISTENCY CHECK 190

a. Were any of the above data (items 6–17) also reported in any other 1977 Census establishment report form of this company, i.e., in the Census Forms MA-, MC-, CB-, or CC- series? 1 YES – *Go to b* 2 NO – *SKIP to item 19*

b. Please give the 10-digit CENSUS FILE NUMBER of that report 191 CFN

Remarks *This space may be used for any explanation that may be essential in understanding your reported data.*

Important *– Please read instructions before completing report*

Report the following items on a consolidated basis for the domestic activities of your enterprise. An enterprise is a business organization (i.e., company, service organization, membership organization, association, etc.) consisting of one or more establishments under common ownership or control. Furthermore, if an enterprise owns or controls other entities, all establishments of its subsidiaries are to be included as part of the owning or controlling enterprise. For purposes of this report, "domestic" activities include all 50 States and the District of Columbia. Do not include foreign activities, if any, except for reporting foreign assets in item 9. Consolidate all domestic activities, whether or not covered in the 1977 Economic Censuses by individual report forms.

If book records are not available, enter your best estimate. **Before completing these items, please read the detailed instructions.**

g. **Total capital expenditures** *(Sum of lines a through f)*	066			
Item 7 – GROSS VALUE OF DEPRECIABLE ASSETS	070			
a. Gross depreciable assets, end of **1976**				
(1) For machinery and equipment	071			
(2) For buildings and structures	072			
(3) **Total** *(Sum of lines (1) and (2))*	073			
b. Total capital expenditures during 1977 (should equal line 6g)	074			
c. Other acquisitions by your company during 1977	075			
d. Deductions from depreciable assets during 1977	076			
e. Gross depreciable assets, end of **1977**				
(1) For machinery and equipment	077			
(2) For buildings and structures	078			
(3) **Total** *(Sum of lines (1) and (2))*				
Item 8 – CHANGES IN DEPRECIATION RESERVES	080			
a. Accumulated depreciation as of end of **1976**				
b. Depreciation charged against assets during 1977	081			
c. Additions charged to other accounts during 1977	082			
d. Deductions from reserves for retirements, renewals, and replacements during 1977	083			
e. Accumulated depreciation as of end of **1977** *(Sum of lines a through c minus line d)*	084			
Item 9 – TOTAL ASSETS, AS OF END OF 1977	090			
a. Net value of depreciable assets (should equal line 7e(3) minus line 8e)	091			
b. All other domestic assets, including inventories	092			
c. Net foreign assets	093			
d. **Total assets, as of end of 1977** *(Sum of lines a through c)*				

Item 10 – INVENTORIES AND METHOD OF VALUATION		Millions	Thousands	Dollars
		000	000	000
a. All inventories, as of end of **1976**	100			
b. All inventories, as of end of **1977**	101			

c. **METHOD OF INVENTORY VALUATION**

EXAMPLE FOR REPORTING PERCENTS	If figure is **38.76%** of total receipts:	Percent
	Report whole percents →	39%
	Not acceptable →	38.76%

Method of inventory		Whole percents: End of 1977	Whole percents: End of 1976
(1) **Cost**	(a) First-in, First-out (FIFO)	102	114
	(b) Last-in, First-out (LIFO)	103	115
	(c) Average cost	104	116
	(d) Specific or actual cost	105	117
	(e) Standard cost	106	118
	(f) Other – *Specify*	107	119
(2) **Market**	(a) Market used because lower than cost	108	120
	(b) Market always used	109	121
(3) **Retail method**	(a) Approximating lower of cost or market	110	122
	(b) Approximating cost	111	123
	(c) LIFO retail	112	124
(4) Other – *Specify*		113	125
(5) **TOTAL**		100%	100%

Item 11 – SELECTED OPERATING EXPENSES		Millions	Thousands	Dollars
		000	000	000
a. Did this enterprise make royalty payments for the use of intangible property rights during 1977?	126 1 ☐ YES – *Report value of payments* → 2 ☐ NO – *GO to b*	127		
b. Did this enterprise purchase advertising services during 1977?	128 1 ☐ YES – *Report cost of purchased services* → 2 ☐ NO – *GO to c*	129		
c. Did this enterprise make rental payments during during 1977?	130 1 ☐ YES – *GO to d* 2 ☐ NO – *SKIP to item 12*			
d. Rental payments, excluding land		131		
(1) For use of buildings and structures		132		
(2) For machinery and equipment		133		
(3) Total rental payments *(Sum of lines (1) and (2))*				

Item 12 – CONSISTENCY CHECK

Is the gross value of depreciable assets at the end of the year minus total capital expenditures during the year within 5% of the gross value of depreciable assets at the beginning of the year? 140 1 ☐ YES 2 ☐ NO – *Explain in Remarks*

REMARKS – *Please use this space for any explanation that may be essential in understanding your reported data.*

FORM NC-K1 (5-25-77)

PENALTY FOR FAILURE TO REPORT **DUE DATE: FEBRUARY 15, 1978** Form Approved: O.M.B. No. 41-S77035

FORM MC-36B (Rev.) U.S. DEPARTMENT OF COMMERCE BUREAU OF THE CENSUS

1977 CENSUS OF MANUFACTURES

SWITCHGEAR AND SWITCHBOARD APPARATUS AND INDUSTRIAL CONTROLS

Please complete this form and RETURN TO: BUREAU OF THE CENSUS, 1201 East Tenth Street, Jeffersonville, Indiana 47132

NOTICE – Response to this inquiry is **required by law (title 13, U.S. Code).** By the same law, your report to the Census Bureau is **confidential.** It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are **immune from legal process.**

In correspondence pertaining to this report, please refer to this Census File Number

Employer Identification Number

Please read ...

A separate census report must be filed for each manufacturing establishment which your company operated in 1977. A manufacturing establishment is defined as a single physical location where products are manufactured, processed, or assembled.

Please read the instructions for each item before completing it. If book figures are not available, carefully prepared estimates are acceptable.

If filing by due date causes an undue burden, a time extension request should be sent to the above address. Please enter your 11-digit Census File Number on each page of this report and on any correspondence with us regarding this report.

Please correct errors in name, address and ZIP code. ENTER street and number if not shown.

110 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | | 111 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |

ITEM 1A Physical location of establishment

In order to assign this establishment to the correct geographic area, the Bureau of the Census must know the actual location **which may differ from the mailing address.** *Complete items a through g.*

a. Address number and street name of physical location – *If not known, enter building name, shopping center name, or other physical location description. Do not enter P.O. box or rural route.*
Mark (X) for a, b, c, and d if same as mailing label; if different enter corrections.
Same as mailing label ☐ OR ▶

b. Name of city, town, village, borough, etc. of physical location
Same as mailing label ☐ OR ▶

c. State
Same as mailing label ☐ OR ▶

d. ZIP code
Same as mailing label ☐ OR ▶

e. Type of municipality indicated in 1Ab: 1 ☐ City 2 ☐ Town 3 ☐ Village 4 ☐ Borough 5 ☐ Township 6 ☐ Unincorporated 7 ☐ Other – *Specify* _____ 8 ☐ Don't know

f. Is this establishment located inside the legal boundaries of the city, town, village, etc., indicated in 1Ab? 1 ☐ Yes 2 ☐ No 3 ☐ No legal boundaries 4 ☐ Don't know

NOTE – The area served by a post office generally does not coincide with the legal boundaries of the municipality from which it takes its name.

g. Name of county (Louisiana parish) of physical location

ITEM 1B Employer identification number(s)

Is the Employer Identification (EI) Number printed in the upper right of the address box the SAME as that used for this establishment on its latest 1977 Employer's Quarterly Federal Tax Return, Treasury Form 941? 108

☐ YES ☐ NO – *Enter current EI number* → ___ – _____ *(9-digits)*

ITEM 1C Organizational status

Mark (X) the **ONE** box which best describes this establishment during 1977 109
1 ☐ Individual proprietorship 2 ☐ Partnership 0 ☐ Corporation (Do not mark if any form of cooperative association) 8 ☐ Cooperative association, corporate or non-corporate 9 ☐ Other – *Specify* _____

Important – Please read

Dollars, hours worked, and kilowatt-hour figures should be reported in thousands. If you wish, you may report to the nearest unit. Please be careful to enter your figures in the **correct columns.**

EXAMPLE: If figure is $1,125,628.28 → • **PREFERRED method** 1 | 126 | — ; **Acceptable method** 1 | 125 | 628

REFER TO SPECIAL INSTRUCTIONS ON REVERSE SIDE FOR ITEMS 2–8

• Complete each item and enter "0" when appropriate.

ITEM 2 Number of employees

Number of production workers during pay period including the 12th of month	Key	Number
a. March	301	
b. May	302	
c. August	303	
d. November	304	
e. Sum of lines a–d	305	
f. Average number (divide line e by 4, omit fractions)	306	
g. All other employees (pay period including March 12th)	307	
h. TOTAL EMPLOYMENT (Sum of lines f and g, item 2) ▶	308	

ITEM 3A Annual payrolls

	Key	Mil.	Thou.	Dol.
a. Production workers' wages (for employees reported in item 2f)	309	$		
b. All other salaries and wages (for employees reported in item 2g)	310			
c. TOTAL PAYROLL (item 3A) ▶	311	$		

ITEM 3B – Not applicable to this form

ITEM 3C First quarter payroll

	Key	Mil.	Thou.	Dol.
TOTAL PAYROLL FOR THE FIRST QUARTER (JANUARY–MARCH) ▶	315	$		

ITEM 4 Plant hours worked by production workers by quarter

	Key	Mil.	Thou.	Hrs.
a. January through March	316			
b. April through June	317			
c. July through September	318			
d. October through December	319			
e. TOTAL HOURS WORKED (Item 4) ▶	320			

ITEM 5 Cost of materials, resales, fuels, electricity, and contract work

	Key	Mil.	Thou.	Dol.
a. Cost of materials, parts, supplies, containers, etc., which were put into production, used as operating supplies, or used in repair and maintenance	321	$		
b. Cost of products bought and sold without further manufacture or assembly (Resales)	322			
c. Cost of fuels consumed during the year for heat and power	323			
d. Cost of purchased electricity	324			
e. Cost of contract work done for you by others on your materials	325			
f. TOTAL COST (item 5) ▶	326	$		

ITEM 6 – Not applicable to this form

ITEM 7 Inventories of this establishment

	END OF 1976 Key	Mil.	Thou.	Dol.	END OF 1977 Key	Mil.	Thou.	Dol.
a. Finished products	331	$			335	$		
b. Work-in-process	332				336			
c. Materials, supplies, fuels, etc.	333				337			
d. TOTAL INVENTORIES (item 7) ▶	334	$			338	$		

ITEM 8 Capital expenditures during year

	Key	Mil.	Thou.	Dol.
a. New structures and new additions to this plant (Exclude land)	342	$		
b. New machinery and equipment including replacements and capitalized repairs	343			
c. Used buildings and equipment	347			
d. TOTAL CAPITAL EXPENDITURES (item 8) ▶	350	$		

ITEMS 9–15 – Not applicable to this form

CENSUS USE

CONTINUE ON PAGE 2 →

Form MC-36B (Rev.) Page 2

ITEM 16A — Operational status

a. Mark (X) **ONE** box — *Be sure to indicate the date of any change*

Enter figures only — Mo. | Day | Year

112

1 ☐ No change in operator or operations

2 ☐ Reorganized — *Complete report for full year and describe type of change in remarks*

3 ☐ Started new business (newly constructed or completely equipped when started)

4 ☐ Establishment closed (no new owner or operator), dismantled, abandoned, or destroyed

5 ☐ Establishment idle or inactive but still owned

6 ☐ Establishment was acquired or leased from another company

Mark (X) **ONE** box and give name and address if —

☐ Building only acquired

☐ Complete plant acquired (building, machinery, and equipment)

Name of former operator — *Enter current EI number (9 digits)*

Number and street, city, State, ZIP code

7 ☐ Establishment was sold or leased to another company — Mo. | Day | Year

Mark (X) **ONE** box and give name and address if —

☐ Building only sold

☐ Complete plant sold (building, machinery, and equipment)

Name of new operator — *Enter current EI number (9 digits)*

Number and street, city, State, ZIP code

b. Is the FIRST DIGIT of your Census File Number (imprinted in the address box) a Zero "0"? ☐ YES — *Complete item 16B, a through d* ☐ NO — *SKIP to Item 16C*

ITEM 16B — Ownership and control

113

a. Is this company owned or controlled by another company? 1 ☐ YES → 2 ☐ NO

Enter the company name and address *(Number and street, city, State, ZIP code)* and EI number. If more space is needed to list companies, use remarks section.

603 Name and address of owning or controlling company — *Enter current EI number (9 digits)*

114

b. Does this company own or control any other company or companies? 1 ☐ YES → 2 ☐ NO

604 Name and address of owned or controlled company — *Enter current EI number (9 digits)*

c. Did this company have any manufacturing plants under construction but not in operation at the end of the year? 1 ☐ YES 2 ☐ NO

d. Did this company operate at more than one location during the survey year? If more space is needed, attach separate sheet. 1 ☐ YES — *List additional locations below* 2 ☐ NO — *SKIP to Item 16C*

Physical address of business location *(Number and street, city, State, ZIP code)* (1)	Employer Identification Number (2)	Kind of business at this location (3)	Sales and receipts (4) Mil.	Thou.	Dol.	Annual payroll (5) Mil.	Thou.	Dol.	Number of employees (6)	Are these figures included on the front of this report? (7)
605	606 *(9 digits)*	607	608			609			610	☐ YES ☐ NO
605	606 *(9 digits)*	607	608			609			610	☐ YES ☐ NO

ITEM 16C — CHECKS to assure a complete and accurate report

The Bureau of the Census reviews this report for omissions, inconsistencies, and unusual ratios. To save you future correspondence about these problems, please make the following checks before returning this report.

- Review the report carefully to see that no items are omitted for the year being covered.
- Calculate and enter figures for the four "reasonableness" checks below, and review the results.
- Correct your report for any errors you find and explain unusual figures in remarks.

For most manufacturing establishments, the figures computed usually fall within the ranges indicated.

"Reasonableness" checks	Calculation required for each check	Figures for survey year	Usual range
a. Average hourly wages per production worker	Item 3Aa (Production workers' wages) ÷ item 4e (Total hours worked)	$/hr.	$2 – $10
b. Hours worked per year per production worker	Item 4e (Total hours worked) ÷ item 2f (Average number of production workers)	hrs./yr.	1000 – 3000
c. Salaries and wages per dollar of shipments	Item 3Ac (Total payroll) ÷ item 18 (Total value of shipments)	¢	05¢ – 95¢
d. Materials cost per dollar of shipments	Item 5f (Total materials cost) ÷ item 18 (Total value of shipments)	¢	05¢ – 95¢

e. Is the total for Value of Shipments (item 18) greater than the sum for payroll (item 3Ac) plus total Cost of Materials, etc. (item 5f)? ☐ YES ☐ NO — *Explain in remarks*

Remarks — *Please use this space for any explanations that may be essential in understanding your reported data.*

SPECIAL INSTRUCTIONS FOR ITEMS 2–8

▶ **Item 2 — Number of employees** — Report all employees at this establishment who received pay for part of the pay period including the 12th of the specified months. Include officers at this establishment, if a corporation; if an unincorporated concern exclude proprietor or partners.

▶ **Items 2a–2d — Number of production workers** — Report workers (up through the working foreman level) engaged in fabricating, processing, assembling, inspecting,and other manufacturing.

▶ **Item 2g — All other employees** — Report nonproduction personnel, including those engaged in supervision (above the working foreman level), installation and servicing of own product, sales, delivery, professional, technical, administrative, etc.

▶ **Item 3a — Annual payrolls** — Report gross earnings prior to deductions paid in the calendar year to those employees reported in item 2. Include commissions, dismissal pay, bonuses, and vacation pay.

▶ **Item 4 — Plant hours worked by production workers by quarter** — Include all production hours worked, including overtime hours,but excluding paid vacations, etc. These should be reported as actual hours worked, not straight-time equivalent hours.

▶ **Item 5 — Cost of materials, etc.** — Report total delivered cost after discounts and including freight of the materials actually consumed or put in production during the year. Include purchases, interplant transfers, and withdrawal from inventories.

If there are no records of consumption, purchases may be reported instead for minor items. This can also be done for major items if purchases do not differ significantly from the amounts actually used. Where consumption of major items differs significantly from purchases, consumption may be estimated by adding beginning inventories to the amount purchased and subtracting ending inventories.

▶ **Item 5a — Cost of materials, parts, supplies, containers, etc., consumed** — The delivered cost figures should cover all raw materials, containers, scrap, supplies, etc., which were: (1) put into production, (2) used as operating supplies, (3) used in repair and maintenance. Item 5a should be consistent with the data in item 17B.

▶ **Item 5b — Cost of products bought and sold** — Report the cost of all products bought and sold in the same condition as when purchased, and not made part of another product manufactured by this establishment. (Total sales value of all products sold is to be reported in item 18 on the line for resales.)

▶ **Item 5c — Cost of fuels consumed** — Report the total cost of all fuels consumed for heat, power, transportation, or the generation of electricity. Do not include the estimated cost of fuels, such as sawdust or blast furnace gas, produced as a by-product of your manufacturing activities. Include anthracite and bituminous coal, coke, natural and manufactured gas, fuel oil, liquefied petroleum gas, gasoline, and all other fuels including purchased steam.

▶ **Item 5d — Cost of purchased electricity** — Report the total cost of electric energy purchased from other companies or received from other establishments of your company. Exclude the value of electricity generated and used at this establishment.

▶ **Item 5e — Cost of contract work done for you by others on your materials** — If any contract work was done by others on materials furnished by your establishment, report the total payments made during the year for such work, including freight out and in. Exclude the cost of materials worked on, which should be included in item 5a.

▶ **Item 8 — Capital expenditures during year (Exclude expenditures for land)** — Include all costs actually incurred during 1977 chargeable to the fixed assets accounts and of the type for which depreciation or amortization accounts are ordinarily maintained. This should include construction and repair work performed by your own forces.

FORM MC-36B (Rev.) U.S. DEPARTMENT OF COMMERCE BUREAU OF THE CENSUS

1977 CENSUS OF MANUFACTURES

SWITCHGEAR AND SWITCHBOARD APPARATUS AND INDUSTRIAL CONTROLS – Continued

PLEASE ENTER THIS ESTABLISHMENT'S 11-DIGIT CENSUS FILE NUMBER

Name of establishment (Same as address box)

Item 17A WATER USE DURING 1977

348

1. What was the total quantity of water intake for this establishment for use in the production process and auxiliary operations (such as cooling and condensing, sanitary services, and boiler feed) during the calendar year 1977?

Mark (X) one box only

1 ☐ Under 1 million gallons
2 ☐ 1–9 million gallons
3 ☐ 10–19 million gallons
4 ☐ 20–49 million gallons
5 ☐ 50–99 million gallons
6 ☐ 100 million gallons or over

349

2. Did you recirculate any water during the calendar year 1977? . . . . . 1 ☐ YES 2 ☐ NO

Item 17B CONSUMPTION OF SELECTED MATERIALS DURING 1977

Instructions - Please read

1. **GENERAL** – The materials, parts, and supplies listed below are those commonly consumed in the manufacture, processing, or assembly of the products listed in item 18. Please review the entire list and **report separately** for each item consumed. The materials, parts, and supplies consumed at this establishment which are not prelisted should be described and reported in the "All other materials, etc." line at the end of this section. If your consumption of a listed material is valued at less than $10,000, enter an (X) in column (E) and include the value with "All other materials, etc." Census material code 970099 8.

   If your book records do not contain information as requested, **reasonable estimates are acceptable.**

2. **VALUATION OF MATERIALS CONSUMED** – The value of the materials, etc., consumed should be based on the delivered cost, i.e., the amount paid or payable after discounts and including freight and other direct charges incurred in acquiring the materials. This includes purchases, transfers from other establishments of your company, and withdrawals from inventories. Materials transferred to you from other plants within your company should be assigned their full economic value, as assigned by the shipping plant, plus cost of freight and handling charges.

3. **CONTRACT WORK** – Materials purchased for use by others making products for you on a contract basis should be included. Amounts paid to other companies for such contract work should be reported in item 5e, and should include freight in and out. Materials owned by others but used at this establishment in making products for others under contract or on commission should be excluded.

4. **MATERIALS PRODUCED AND CONSUMED** – Materials, parts, and supplies which are produced and consumed in the same establishment in the manufacture of products should be reported in column (C-1). Please report only the quantities of these materials produced and consumed. If the specific input materials used to produce these items are listed, the quantity and value should be reported in columns (C-2) and (D). If not, the cost should be included in the "All other materials, etc." line, Census material code 970099 8.

Line number	Materials, parts, and supplies (A)			Census material code 571 (B-1)	Unit of measure for quantities (B-2)	Quantities produced and consumed 572 (C-1)	Materials purchased and consumed: Quantity 573 (C-2)	Materials purchased and consumed: Cost, including delivery cost (freight-in) (D) 574 Millions 000	Thousands 000	Dollars 000	If you consumed less than $10,000 of the item enter (X) 575 (E)
1	MILL SHAPES AND FORMS (EXCEPT CASTINGS)	Carbon steel	Bars and bar shapes	331011 7	Short tons			$			
2			Sheet and strip	331012 5

Form MC-36B (Rev.) Page 4

Item 18 PRODUCTS AND SERVICES OF THIS ESTABLISHMENT DURING 1977

Instructions - Please read

1. **GENERAL** — The products and services listed below are those that are generally made in your industry. Please review the entire list before completing the inquiry. If you produce products that are not prelisted, they should be described and reported in the "All other products" section at the end of item 18. **Please do not combine product lines.**

   Products for which quantity data are requested should be reported in the unit of measure specified.

   If your book records do not contain information as requested, **reasonable estimates are acceptable.**

2. **VALUATION OF PRODUCTS** — The value of the products shipped and services performed should be based on the **net selling value, f.o.b. plant,** after discounts and allowances, and exclusive of freight charges and excise taxes.

   When transferring products to other establishments within your company, the shipping plant should assign the full economic value to the transferred products, i.e., include all direct costs of production and a reasonable proportion of all other costs and profits.

3. **PRODUCTS BOUGHT AND SOLD WITHOUT FURTHER MANUFACTURE** — Products which you purchase and sell as originally purchased (not used in the further manufacturing, processing or assembling of products made in this establishment) should be reported as "Resales," Census product code 99989 00 6.

4. **CONTRACT WORK**

   a. **Products made by others for you from your materials:** Report such products on the specific lines of this section as if they were made in this establishment.

   b. **Products that you made from materials owned by others:** Report the amount that you received for "commission or contract receipts" on line 29, Census product code 93000 00 8. Do not report on the specific product lines for these products.

5. **DETAILED DATA REPORTED ELSEWHERE** — This report requires totals for groups of products covered in more detailed Current Industrial Reports (CIR). If you report on the CIR forms the value of shipments for items designated by an asterisk should equal the sum of the detail reported on the CIR's.

Line number	5 Products and services * *Item corresponds to products reported on Current Industrial Reports* (A)	Census product code 581 (B-1)	Unit of measure for quantities (B-2)	Corresponds to the sum of products for 1977 reported on – Census form (B-3)	Code (B-4)	Products shipped and other receipts: Quantity 583 (D)	Value, f.o.b. plant (E): 584 Millions 000	Thousands 000	Dollars 000
1	Switchgear, except ducts and relays (36131)*	36131 00 1		MA-36A	3613109–3613193		$		
2	Power circuit breakers, all voltages (36132)*	36132 00 9			3613215–3613230				
3	Low voltage panelboards and distribution boards and other switching and interrupting devices, 750 volts and under (36133)*	36133 00 7			3613311–3613398				
4	Fuses and fuse equipment under 2300 volts, except power distribution cut-outs (36134)*	36134 00 5			3613431–3613493				
5	Molded case circuit breakers, 750 volts and under (36135)*	36135 00 2			3613511–3613595				
6	Duct, including plug-in units and accessories, 750 volts and under (36136)*	36136 00 0			3613611–3613631				
7	Relays, control circuit (36137)*	36137 00 8			3613701–3613704				
8	General industry power circuit devices, controls, and parts (36220)*	36220 00 2			3622012–3622099

FORM MC-37EX
(RAILROAD SHOPS)

U.S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

1977 CENSUS OF MANUFACTURES

LOCOMOTIVES AND CARS BUILT AND REBUILT IN SHOPS OF OPERATING RAILROADS

Please complete and return this form as soon as possible after receipt to

BUREAU OF THE CENSUS
Industry Division
Washington, D.C. 20233

NOTICE – Response to this inquiry is **required by law (title 13, U.S. Code).** By the same law, your report to the Census Bureau is **confidential.** It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are **immune from legal process.**

In correspondence pertaining to this report, please refer to this Census File Number

Employer Identification Number

Please correct errors in name, address and ZIP code. ENTER street and number if not shown.

Instructions - Please read

Please return one copy of this report to the Bureau of the Census, Industry Division, Washington, D.C., 20233, WITHIN 30 DAYS. A separate report should be completed for each shop of your company at which any locomotives or railroad cars were built or rebuilt during 1977.

Include as "rebuilt" locomotives and railroad cars those for which the cost of their dismantling, improvement, and modernization is more than 50 percent of the replacement cost of a new unit of the same class and kind at the time of rebuilding. Do not include as "rebuilt" any conversions or reclassifications, nor units which were reconditioned by replacing defective parts. The values reported for "rebuilt" locomotives and cars should represent the additional value written into the property account.

Item A – NAME OF ESTABLISHMENT COVERED BY THIS REPORT	
Item B – LOCATION OF ESTABLISHMENT	Number and street
	City / State / ZIP code
Item C – NATURE OF ACTIVITY	Describe briefly the kind of activity of this establishment
Item D – MAN-HOURS OF PRODUCTION WORKERS	Were more than 50 percent of the total production worker man-hours worked at this shop during 1977 devoted to building or rebuilding locomotives, passenger cars, or freight cars? . . . . . ☐ Yes ☐ No

PLEASE CONTINUE ON PAGE 2

Form MC-37EX

Page 2

Item E PRODUCTS MADE IN RAILROAD SHOP DURING 1977

Instructions - Please read

Columns (D) and (E) — Total built and rebuilt — Locomotives and cars built and rebuilt by railroads in their shops for their own use should be reported when they are transferred from the shop to the operating part of the company. The value of new locomotives and cars built by railroads for their own use should represent the amount at which they were written into the property accounts. The value reported for locomotives and cars "rebuilt" by railroad companies should represent the additional value written into the property account.

Report separately each product listed; do not combine product lines.

Lines 1–4, 21, and 22 — Include under "rebuilt," locomotives and railroad cars for which the cost of their dismantling, improvement, and modernization is more than 50 percent of the replacement cost of a new unit of the same class and kind at the time of rebuilding. Do not include as rebuilt any units which were reconditioned by replacing defective parts. Do not include conversions or reclassifications.

Column (F) — Weight of items reported in column (D) — Report the weight of locomotives and cars as the empty light weight or "tare" weight.

Line number	Product (A)				Census product code 581 (B)	Total built and rebuilt: Quantity (NUMBER OF UNITS) 583 (D)	Total built and rebuilt: Value f.o.b. plant (THOUSANDS OF DOLLARS) 584 (E)	Weight of items reported in column (D) (SHORT TONS) 585 (F)
1	LOCOMOTIVES, BOTH NEW AND REBUILT, AND PARTS FOR LOCOMOTIVES SOLD SEPARATELY (37431)	Locomotives	Diesel-electric (except mining type)	Rail service type	37431 11 1		$	
2				Other types	37431 15 2			
3			Other (except mining type)	Rail service type	37431 21 0

205 CCS

(Please correct any error in name and address including ZIP code)

ITEM 1A Physical Location — *Complete a, b, and c.*

a. Is this establishment located in the State, county, and place shown below? *(If blank or incomplete, please complete (1) through (4).)* 650 — 1 ☐ YES – *SKIP to part b* 2 ☐ NO – *Correct or complete lines (1) through (4)*

(1) Number and street

(2) City, village, or other place | State | ZIP code

(3) County | (4) If you corrected lines 1, 2, 3, give year moved to new location 19__

b. Type of municipality indicated in 1Aa(2): 1 ☐ City 2 ☐ Town 3 ☐ Village 4 ☐ Borough 5 ☐ Township 6 ☐ Unincorporated 7 ☐ Other – *Specify* 8 ☐ Don't know

c. Is this establishment located inside the legal boundaries of the city, town, village, etc., indicated in 1Aa(2)? 1 ☐ Yes 2 ☐ No 3 ☐ No legal boundaries 4 ☐ Don't know

NOTE – The area served by a post office generally does not coincide with the legal boundaries of the municipality from which it takes its name.

ITEM 1B Employer Identification Number(s) — Is the Employer Identification (EI) Number printed in the upper right of the address box the SAME as that used for this establishment on its latest 1977 Employer's Quarterly Federal Tax Return, Treasury Form 941?

☐ YES ☐ NO – *Enter current EI number* → (9-digits) 108 | | | – | | | | | | | | |

ITEM 1C Organizational status — Mark (X) the **ONE** box which best describes this establishment during 1977 — 109

1 ☐ Individual proprietorship 2 ☐ Partnership 0 ☐ Corporation (Do not mark if any form of cooperative association) 8 ☐ Cooperative association (corporate or non-corporate) 9 ☐ Other – *Specify*

NOTE ➧ Figures for dollars, man-hours, KWH should be rounded to thousands. However, you may enter figures to nearest dollars. Carefully enter your figures in the correct columns, e.g., if payroll is $1,125,628, report either ..... | Mil. | Thou. | Dols. | OR | Mil. | Thou. | Dols.
$ 1 | 126 | | OR | $ 1 | 125 | 628

Complete each item, enter "0" when appropriate.	Key	1977 Number	1976 Number
ITEM 2 – Number of employees			
Number of production workers during pay period including the 12th of month — a. March	301		
b. May	302		
c. August	303		
d. November	304		
e. Sum of lines a–d	305		
f. Average number *(Divide line e by 4)*	306		
g. All other employees (pay period of March 12)	307		
h. TOTAL f and g (Item 2) →	308		

ITEM 3A – Annual payrolls	Key	1977 Mil.	1977 Thou.	1977 Dols.	1976 Mil.	1976 Thou.	1976 Dols.
a. Production workers' wages	309						
b. All other salaries and wages	310						
c. TOTAL (Item 3A) →	311						

ITEM 3B – Employer's cost for fringe benefits (supplemental labor costs) *(Exclude from Items 3A and 3C)*	Key	1977 Mil.	1977 Thou.	1977 Dols.	1976 Mil.	1976 Thou.	1976 Dols.
a. Legally required including Social Security	312						
b. Payments for voluntary programs	313						
c. TOTAL (Item 3B) →	314						
ITEM 3C – First quarter payroll							
Total payroll for the first quarter (Jan.–March)	315				XXX	XXX	XXX

ITEM 4 – Plant hours worked by production workers	Key	1977 Mil.	1977 Thou.	1977 Hours	1976 Mil.	1976 Thou.	1976 Hours
a. January through March	316						
b. April through June	317						
c. July through September	318						
d. October through December	319						
e. TOTAL (Item 4) →	320						

Complete each item, enter "0" when appropriate.	Key	1977 Mil.	1977 Thou.	1977 Dols.	1976 Mil.	1976 Thou.	1976 Dols.
ITEM 5 – Cost of materials and services used							
a. Cost of materials, parts, components, containers, etc., used	321						
b. Cost of products bought and sold as such	322						
c. Cost of fuels consumed for heat or power *(See item 12)*	323						
d. Cost of purchased electricity *(See item 6)*	324						
e. Cost of contract work done for you by others	325						
f. TOTAL (Item 5) →	326						

ITEM 6 – Quantity of electricity	Key	1977 Kilowatt hours Mil.	1977 Thou.	1977 Units	1976 Kilowatt hours Mil.	1976 Thou.	1976 Units
a. Purchased electricity (quantity comparable to cost as reported in item 5d)	327						
b. Generated electricity (gross less generating station use)	328						
c. Electricity sold or transferred to other establishments	329						

ITEM 7 – Inventories of this establishment at end of year *(Report both years)*	Key	1977 Mil.	1977 Thou.	1977 Dols.	Key	1976 Mil.	1976 Thou.	1976 Dols.
a. Finished products	335				331			
b. Work-in-process	336				332			
c. Materials, supplies, fuels, etc.	337				333			
d. TOTAL (Item 7) →	338				334			

ITEM 8 – Depreciable assets, capital expenditures, and retirements

Refer to the instruction manual for detailed instructions.

(a)	Key	1977 Total (b) Mil.	Thou.	Dols.	Key	Buildings and other structures (exclude land) (c) Mil.	Thou.	Dols.	Key	Machinery and equipment (d) Mil.	Thou.	Dols.	1976 Total (e) Mil.	Thou.	Dols.
a. Gross value of depreciable assets (usually original cost) at beginning of year	341				339				340						
b. Capital expenditures for new buildings and machinery	344				342				343						
c. Capital expenditures for used buildings and machinery	347				345				346						
d. Retirements and disposition of depreciable assets (i.e., gross value of assets sold, retired, scrapped, destroyed, etc.)	353				351				352				XXX	XXX	XXX
e. Gross value of depreciable assets at end of year (should equal lines 8a+8b+8c–8d)	356				354				355						
ITEM 9 – Depreciation charges for the year	359				357				358				XXX	XXX	XXX
ITEM 10 – Rental payments	362				360				361						

		Key	1977 Value (a) Mil.	Thou.	Dols.	1976 Value (b) Mil.	Thou.	Dols.
ITEM 11A Total value of products shipped and other receipts	For 1977 report the total value of products shipped and other receipts as entered in **Item 18.** This value should be completely comparable to the total reported for 1976. If the two figures are not comparable, please explain the reasons why in the remarks section. (Reporting by product class is not required for 1977.) →	330						
ITEM 11B Value of products exported (also included in item 11A)	Report the value of products shipped for EXPORT. Include direct exports and products shipped to exporters or others for export. Do not include products shipped for further manufacture, assembly, or fabrication in the United States. 370 — 1 ☐ $0–24,999 2 ☐ $25,000 or more – *Report the value of exports* →	371						
ITEM 11C Unfilled orders *(See instruction manual)*	a. Does this establishment primarily produce for stock and fill orders from inventory? 372 — 1 ☐ Yes 2 ☐ No							
	b. What is the number of months normally required to fill an order? 373 — 1 ☐ Less than one month 2 ☐ 1 or 2 months 3 ☐ 3 months or more							
	NOTE – If there are any qualifications regarding the unfilled orders data, please explain in the remarks section on the reverse side and complete all parts of this item.							
	c. Report the value of unfilled orders on your books as of the end of the year →	374

ITEM 12 — Purchased fuels used for heat, power, and generating electricity in 1977

Kind of fuel (a)	5 Code 561 (b)	Unit of measure for quantities (c)	1977 Quantity 563 (d)	1977 Cost, including delivery cost (freight-in) 564 (e) Mil.	Thou.	Dols.	Unit cost calculation: Calculated unit cost (f)	Usual range of unit costs (Please explain unusual figures in remarks) (g)
1. Coal	121005 3	Short ton					$ per ton	$10–$90 per ton
2. Coke (including breeze)	331210 5	Short ton					per ton	40–150 per ton
3. Distillate fuel oil (#'s 1, 2, 4, and light diesel)	291141 0	Bbl. (42 gal.)					per bbl.	5–25 per bbl.
4. Residual fuel oil (#'s 5, 6 and heavy diesel)	291151 9	Bbl. (42 gal.)					per bbl.	5–25 per bbl.
5. Natural gas	131157 0	1,000 cu. ft.					per MCF	0.25–4.00 per MCF
6. Other fuels — *Specify kind*	960011 5							
7. **TOTAL COST OF FUELS** *(Should equal cost shown in item 5c, page 1)* →								

ITEM 13 — Method of valuation for inventories reported for 1977 in item 7

Using the inventory total reported for this establishment in item 7d for 1977, please indicate the breakdown of that total according to the inventory valuation methods shown.

- **Cost method** — Report amounts on lines 1a–f.
- **Market basis always used** — Report amounts on line 2b.
- **Lower of cost or market** — Report amounts valued at cost on lines 1a–f according to the applicable methods and the amount at market on line 2a.

Method of valuation (a)		Key	Amount at end of 1977 (b) Mil.	Thou.	Dols.
1. Cost	a. First-in, First-out (FIFO)	381			
	b. Last-in, First-out (LIFO)	382			
	c. Average cost	383			
	d. Specific or actual cost	384			
	e. Standard cost	385			
	f. Other — *Specify*	386			
2. Market	a. Market used for valuation because market lower than cost	387			
	b. Market always used for valuation	388			
TOTAL *(Equals the total reported in item 7d for 1977)* →		389			

During the calendar year 1977 did you change the method of valuating the inventories that you reported for this establishment? 397

1 ☐ YES — *Indicate the nature of the changes in remarks.*

2 ☐ NO

ITEM 14 — Cost of purchased services *(See Instruction Manual)*

	Key	1977 Mil.	Thou.	Dols.
1. Repair of buildings and other structures	390			
2. Repair of machinery	391			
3. Cost of purchased communication services (telephone, telegraph, etc.)	392			

ITEM 15 — Breakdown of machinery and equipment expenditures by type reported in item 8b, col. d *(See instruction manual)*

	Key	1977 Mil.	Thou.	Dols.
1. Automobiles, trucks, etc., for highway use	393			
2. Computers and peripheral data processing equipment	394			
3. All other expenditures for new machinery and equipment	395			
TOTAL *(Should be the same as item 8b, column d)* →				

ITEM 16A — Status of this establishment during 1977 *(Be sure to indicate the date of any change.)*

112 *MARK (X) ONE BOX*

	Enter figures only Mo.	Day	Year
1 ☐ No change in operator or operations			
2 ☐ Reorganized — Complete report for full year and describe type of change in remarks.			
3 ☐ Started new business (newly constructed or completely equipped when started)			
6 ☐ Establishment was acquired or leased from another company			
☐ Building only acquired			
☐ Complete plant acquired (building, machinery, and equipment)			
Name of former operator — EI Number *(9 digits)*			
Number and street, city, State, ZIP code			
4 ☐ Establishment closed (no new owner or operator), dismantled, abandoned, or destroyed on			
5 ☐ Establishment idle or inactive but still owned			
7 ☐ Establishment was sold or leased to another company			
☐ Building only sold			
☐ Complete plant sold (building, machinery, and equipment)			
Name of new operator — EI Number *(9 digits)*			
Number and street, city, State, ZIP code			

ITEM 16B — Company organization

113 **a. Is this company owned or controlled by another company?** 1 ☐ YES → 2 ☐ NO

Enter the company name and address *(Number and street, city, State, ZIP code)* and EI number. *If more space is needed to list companies, use remarks section.*

603 Name and address of owning or controlling company — EI Number *(9 digits)*

114 **b. Does this company own or control any other company or companies?** 1 ☐ YES → 2 ☐ NO

604 Name and address of owned or controlled company — EI Number *(9 digits)*

c. Did this company have any manufacturing plants under construction but not in operation at the end of the year? 1 ☐ YES 2 ☐ NO

d. Did you operate at more than one location during the survey year? *If more space is needed, attach separate sheet.* 1 ☐ YES — *List additional locations below* 2 ☐ NO — *SKIP to item 16C below*

Physical address of business location *(Number and street, city, State, ZIP code)* (a)	Employer Identification Number (b)	Kind of business at this location (c)	Sales and receipts (d) Mil.	Thou.	Dols.	Annual payroll (e) Mil.	Thou.	Dols.	Number of employees (f)	Are these figures included on the front of this report? (g)
605	606	607	608			609			610	☐ YES ☐ NO
605	606	607	608			609			610	☐ YES ☐ NO

ITEM 16C — CHECKS to assure a complete and accurate report

The Bureau of the Census reviews your report for omissions, inconsistencies, and unusual ratios. To save you future correspondence about these problems, please make the following checks before returning your report.

(1) Review the report carefully to see that no items are omitted for the year being covered.
(2) Calculate and enter figures for the four "reasonableness" checks below, and review the results.
(3) Correct your report for any errors you find and explain unusual figures in remarks.

For most manufacturing establishments, the figures computed usually fall within the ranges indicated.

"Reasonableness" checks	Calculation required for each check	Figures for survey year	Usual range
a. Average hourly wages per production worker	Item 3Aa (Production workers' wages) ÷ item 4e (Total hours worked)	$ hr.	$2 – $10
b. Hours worked per year per production worker	Item 4e (Total hours worked) ÷ item 2f (Average number of production workers)	hrs. yr.	1000 – 3000
c. Salaries and wages per dollar of shipments	Item 3Ac (Total payroll) ÷ item 11A (Total value of shipments)	¢	05¢ – 95¢
d. Materials cost per dollar of shipments	Item 5f (Total materials cost) ÷ item 11A (Total value of shipments)	¢	05¢ – 95¢

e. Is the total for Value of Shipments (item 11A) greater than the sum for payroll (item 3Ac) plus total Cost of Materials, etc. (item 5f)? ☐ YES ☐ NO — *Explain in remarks*

Remarks — *Please use this space for any explanations that may be essential in understanding your reported data.*

FORM MA-100 (SU) (5-77)

PENALTY FOR FAILURE TO REPORT
DUE DATE: FEBRUARY 15, 1978

Form Approved: O.M.B. No. 41-S77001

FORM CB-50F (5006)

U.S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

1977 CENSUS OF DISTRIBUTIVE TRADES

ELECTRICAL GOODS

Important *— PLEASE READ ALL ACCOMPANYING INSTRUCTIONS*

NOTICE – Response to this inquiry is **required by law (title 13, U.S. Code).** By the same law, your report to the Census Bureau is **confidential.** It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are **immune from legal process.**

In correspondence pertaining to this report, please refer to this Census File Number

CB-50F (5006)

Employer Identification Number

Please complete this form and RETURN TO

BUREAU OF THE CENSUS
1201 East Tenth Street
Jeffersonville, Indiana 47132

Census use only	Unit No.	Item code	Unit No.	Item code	Unit No.	Item code

KEEP THIS COPY FOR YOUR FILES

. PLEASE COMPLETE AND RETURN THE FORM WHICH SHOWS YOUR NAME AND ADDRESS

Please correct errors in name, address and ZIP code. ENTER street and number if not shown.

Item 1 – PHYSICAL LOCATION OF ESTABLISHMENT – In order to assign this establishment to the correct geographic area, the Bureau of the Census must know the actual location **which may differ from the mailing address.** *Complete items a through g.*

a. Address number and street name of physical location – *If not known, enter building name, shopping center name, or other physical location description. Do not enter P.O. box or rural route.*

Mark (X) for a, b, c, and d if same as mailing label; if different show corrections.

Same as mailing label [ ] OR ▶

b. Name of city, town, village, borough, etc., of physical location

Same as mailing label [ ] OR ▶

c. State — Same as mailing label [ ] OR ▶

d. ZIP code — Same as mailing label [ ] OR ▶

e. Type of municipality indicated in 1b (*Mark (X) one*): 1 [ ] City; 2 [ ] Town; 3 [ ] Village; 4 [ ] Borough; 5 [ ] Township; 6 [ ] Unincorporated; 7 [ ] Other – *Specify* _____; 8 [ ] Don't know

f. Is this establishment located inside the legal boundaries of the city, town, village, etc., indicated in 1b? 1 [ ] Yes; 2 [ ] No; 3 [ ] No legal boundaries; 4 [ ] Don't know

NOTE – The area served by a post office generally does not coincide with the legal boundaries of the municipality from which the post office takes its name.

g. Name of county (Louisiana parish) of physical location

Item 2 – EMPLOYER IDENTIFICATION NUMBER

Is the Employer Identification (EI) Number printed in the upper right of the address box the SAME as that used for this establishment on its latest 1977 Employer's Quarterly Federal Tax Return, Treasury Form 941?

YES

NO – *Enter current EI number* ▶ _____ (9 digits)

Item 3 – OPERATIONAL STATUS

a. Mark (X) the **ONE** box which best describes this establishment at the end of 1977.

001 1 [ ] In operation
2 [ ] Temporarily or seasonally inactive
3 [ ] Ceased operation – *Give date* ▶
4 [ ] Sold or leased to another operator } *Give date AND name, etc.* ▶

Figures only

Month	Day	Year

Name of new owner or operator

Number and street

City | State | ZIP code

b. How many months during 1977 did this firm or organization actively operate this establishment?

Number of months: 002

Item 4 – ORGANIZATIONAL STATUS

a. Mark (X) the **ONE** box which best describes this establishment during 1977.

003
1 [ ] Individual proprietorship
2 [ ] Partnership
8 [ ] Cooperative association
5 [ ] Governmental – *Specify* _____
0 [ ] Corporation (other than specified above)
9 [ ] Other – *Specify* _____

b. Was all or part of the income of this establishment or organization exempt from Federal income taxes under Section 501 or 521 of the Internal Revenue Code?

004 1 YES 2 NO

Important – Please read

Dollar figures should be reported as illustrated. Please be careful to enter the figures in the **correct columns.** See example below:

EXAMPLE: If figure is **$1,125,628.28** ▶

	Millions (000)	Thousands (000)	Dollars (000)
●**PREFERRED method**	1	125	
Acceptable method	1	125	628

Item 5 – DOLLAR VOLUME OF BUSINESS IN 1977

		Mil.	Thou.	Dol.
a. Sales and other operating receipts **EXCLUDING** sales (or other) taxes collected	010			
b. Were sales (or other) taxes collected from customers and forwarded to taxing authorities?	011 1 YES 2 NO			
If "YES," report the amount of such taxes (***DO NOT*** *include taxes in 5a above*)	012			
c. TOTAL SALES and other operating receipts including sales (or other) taxes (Sum of 5a and 5b above) ▶	014			
d. Did this establishment sell merchandise on a commission basis? *If "YES," go to 5e, if "NO," SKIP to 5g*	100 1 YES 2 NO			
e. Gross selling value of business conducted for the account of others (Include in 5a)	101			
f. Dollar volume of commissions or brokerage received on transactions negotiated for others	102			
g. Did your company (including firms under common ownership and control) manufacture or mine, in the United States or its possessions, 50% or more of the products sold by this establishment?	103 1 YES 2 NO			
h. Did this establishment have transfers (billings) to other establishments within your company? *If "YES," go to 5i; if "NO," SKIP to item 5j.*	104 1 YES 2 NO			
i. Dollar volume of transfers (billings) to other establishments within your company (***DO NOT*** *include in 5a*)	105			
j. Did construction receipts represent 50% or more of the total sales (as reported in 5a) of this establishment?	106 1 YES 2 NO			

Item 6 – PAYROLL AND EMPLOYMENT

		Mil.	Thou.	Dol.
a. Payroll				
(1) **Total ANNUAL** payroll in 1977 before deductions	030			
(2) Payroll for the **FIRST QUARTER** of 1977	031			

b. Employment – Number of paid employees for the pay period including the 12th of the month (include both full- and part-time employees)

032 (1) MAR	033 (2) MAY	034 (3) AUG	035 (4) NOV

Item 7 – OPERATING EXPENSES AND INVENTORIES

		Mil.	Thou.	Dol.
a. Total 1977 operating expenses, including payroll ▶	040			

b. Did you have merchandise inventories during 1977? 045 1 YES – *Go to 7c* 2 NO – *SKIP to item 8*

c. Indicate the value of merchandise inventories on hand at the end of the year specified according to the valuation methods shown.

- **Cost method** – Report amounts on lines (1)(a) through (e)
- **Market basis always used** – Report amounts on line (2)(b)
- **Lower of cost or market** – Report amounts valued at cost on lines (1)(a) through (e) according to the applicable methods and the amount at market on line (2)(a)

Method of inventory valuation		Key	Amount at end of 1977 Mil.	Thou.	Dol.	Key	Amount at end of 1976 Mil.	Thou.	Dol.
(1) Cost	(a) First-in, First-out (FIFO)	110				120			
	(b) Last-in, First-out (LIFO)	111				121			
	(c) Average cost	112				122			
	(d) Specific or actual cost	113				123			
	(e) Other – *Specify*	114				124			
(2) Market	(a) Market used for valuation because market lower than cost	115				125			
	(b) Market always used for valuation	116				126			
(3)	**TOTAL INVENTORIES** (Sum of lines (1)(a) through (e) and lines (2)(a) and (b)) ▶	046				047			

Please continue on page 2 ▶

Page 2

Item 8 – TYPE OF OPERATION – Mark (X) the **ONE** item that is best suited to your business – the basis on which the major portion of your operation was conducted in 1977.

a. Merchant (buying and selling on own account) – An establishment primarily engaged in buying and selling merchandise produced by other firms on its own account.

- **Importer** – Source of purchase is primarily foreign.
- **Exporter** – Purchasing goods in the United States for delivery to customers outside the United States.
- **Wholesale merchant, jobber, distributor** – Buying and selling merchandise in the United States for delivery in the United States.

b. Manufacturers' sales branch or sales office – An establishment primarily engaged in selling goods mined or manufactured in the United States and its possessions or Puerto Rico by your company, your parent company, or companies corporately affiliated with your company.

- **Sales branch** – Manufacturers' sales outlet which carries stock.
- **Sales office** – Manufacturers' sales outlet which does not carry stock.

c. Broker, agent, commission merchant – An establishment primarily engaged in selling (or buying) merchandise on an agency basis for others, but not dealing primarily on own account.

- **Auction company** – Selling merchandise for others at wholesale from a permanent location by the auction method.
- **Broker** – Selling (or buying) merchandise on a brokerage basis for others in the United States market, but not receiving goods on consignment.
- **Commission merchant** – Receiving goods on consignment and selling them in the United States market.
- **Import agent** – Representing, on an agency basis, firms outside the United States selling goods in the domestic market.
- **Export agent** – Representing, on an agency basis, domestic firms selling merchandise for delivery outside the United States or its possessions.
- **Manufacturers' agent** – Selling for a limited number of manufacturers on a continuing agency basis.

d. Other type of operation – If none of the above types apply, describe your method of operation.

060

- **a. Merchant (buying and selling on own account)**
  - (1) Importer ☐ 12
  - (2) Exporter ☐ 13
  - (3) Wholesale merchant, jobber, distributor ☐ 11
- **b. Manufacturers' sales branch or sales office**
  - (1) Sales branch (with stock) ☐ 21
  - (2) Sales office (without stock) ☐ 22
- **c. Broker, agent, commission merchant**
  - (1) Auction company ☐ 41
  - (2) Broker (representing buyers or sellers) ☐ 42
  - (3) Commission merchant ☐ 43
  - (4) Import agent ☐ 44
  - (5) Export agent ☐ 45
  - (6) Manufacturers' agent ☐ 46
- **d. Other type of operation** – *Specify* .....

Item 9 – KIND OF BUSINESS – Mark (X) the **ONE** item that best describes the **principal** kind of business of this establishment in 1977. If none applies, mark the last item and enter the description by which your business is known to the trade or public.

070

- **a. Electrical goods**
  - (1) Electrical apparatus and equipment, wiring supplies, and construction materials ☐ 506300
  - (2) Electrical appliances, television and radio sets ☐ 506400
  - (3) Electronic parts and equipment ☐ 506500
- **b. Other kind of business** – *Specify* .....

Item 10 – SALES BY COMMODITY LINES

Report the volume of sales of each of the listed commodity lines which account for at least 1% of this establishment's sales. If any commodities sold are not prelisted but account for 1% or more of total sales, write in the description and volume of sales in the space provided.

Sales may be reported either in dollar figures (see example on page 1), or as a percent (in whole percents) of the total (see example).

The sum of reported commodity lines should equal the total sales as reported in item 5a if dollars are reported; if percents are used, the sum should equal 100.

EXAMPLE FOR REPORTING PERCENTS	If figure is 38.76% of total sales:	Mil.	Thou.	Dol.	Percent
	• Report whole percents →				39%
	Not acceptable →				38.76%

Description	Census use only	Estimated sales during 1977 Mil.	Thou.	Dol.	Percent
Electrical goods	170	171			172
1. Electrical apparatus and equipment					
a. Power and distribution transformers	1311				
b. Switchgear and switchboard apparatus	1312				
c. Motors and generators	1313				
d. Industrial controls (power circuit devices and controls)	1314				
e. Electric lamps and bulbs	1316				
f. Interior wiring (Report conduit on line i)	1317				
g. Lighting fixtures (residential and commercial)	1318				
h. Communication equipment	1319				
i. Other electrical apparatus and equipment (Include conduits, transmission hardware, lightning rods, etc.)	1321				
j. **Total** (Sum of lines 1a through 1i) →	1300				
2. Electrical appliances, household	170	171			172
a. Radio and TV sets	1411				
b. Electrical household ranges and ovens	1412				
c. Refrigerators and freezers, household	1413				
d. Household laundry equipment	1414				
e. Vacuum cleaners and sewing machines, household	1415				
f. Room air conditioners	1416				
g. Other electric household appliances (Include fans, dishwashers, etc.)	1417				
h. **Total** (Sum of lines 2a through 2g) →	1400				
3. Electronic parts and equipment					
a. Electron tubes, receiving and transmitting (Include cathode ray TV picture tubes)	1511				
b. Intercommunication equipment	1512				
c. Public address equipment	1513				
d. Semiconductors, transistors, diodes, rectifiers, and other semiconductor devices (solar cells, zener diodes, etc.)	1514				
e. Other electronic parts and equipment	1515				
	170	171			172
f. **Total** (Sum of lines 3a through 3e) →	1500				

Description	Census use only	Estimated sales during 1977 Mil.	Thou.	Dol.	Percent
Other commodity lines	170	171			172
4. Automotive parts and supplies	0200				
5. Household and lawn furniture	0400				
6. Household china, glassware, and crockery	0500				
7. Linens, domestics, draperies, and shades	0520				
8. Floor coverings	0540				
9. Other home furnishings	0560				
10. Plywood, millwork	0650				
11. Sporting and recreational goods and supplies	0800				
12. Toys, hobby goods and supplies	0900				
13. Photographic equipment and supplies	1000				
14. Hardware (Include power hand tools)	1600				
15. Plumbing and heating equipment and supplies	1700				
16. Warm air heating and air conditioning equipment and supplies	1800				
17. Refrigeration equipment and supplies	1900				
18. Restaurant and hotel equipment and supplies	2020				
19. Farm machinery and equipment	2200				
20. Garden, lawn machinery and equipment	2250				
21. Jewelry, watches, diamonds, and other precious stones (Include silverware)	170 / 2900	171			172
22. Other durable goods (Include phonograph records and pre-recorded tapes)	3030				
23. Art goods (Include gifts, novelties, and souvenirs)	5910				
24. Miscellaneous commodities – *Specify*					
a.	9800				
b.	9800				
c.	9800				
25. Rental receipts – *Specify*	9940				
26. Service receipts and labor charges (Include installed parts)					
a. Labor charges	9711				
b. Parts installed and repair work	9712				
c. Other service receipts	9713				
d. **Total** (Sum of lines 26a through 26c) →	9700				
27. TOTAL SALES IN 1977 (Sum of lines 1 through 26 should equal the entry in item 5a) →	170 / 9990	171			172 / 100%

FORM CB-50F (5006)

U.S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

1977 CENSUS OF DISTRIBUTIVE TRADES
ELECTRICAL GOODS

Please enter the 11-digit CENSUS FILE NUMBER as shown on this report *(See label on page 1)*

Item 11 – SALES BY CUSTOMER CLASSES

Report the approximate percentage of your 1977 sales (item 5a) to each of the customer classes listed.

Line a – Sales to laboratories, manufacturers of all types, service business, and other business concerns that normally buy for business use rather than for resale of the goods in the form purchased.

Line b – Sales to farmers for use in agricultural production.

Line c – Sales to builders and contractors for construction purposes, not for resale.

Line d – Sales to the Federal government (including the military, post exchanges, GSA, GPO, and similar Federal agencies) and to State and local governments. Include here only sales made by this establishment DIRECT to governmental agencies.

Line e – Sales to retailers of all types (retail chain organizations, independent stores, department stores, etc.) who normally buy for resale to home consumers. Sales to repair shops of all types.

Line f – Sales to organizations that normally purchase for resale at wholesale. Sales to suppliers of plumbing, electrical, farm, and office machinery and supplies. Sales through agents and brokers selling on your account.

Line h – Include sales made direct to buyers in foreign countries, or through their agents in this country. Include transfers, if any, to your own foreign branches. United States possessions should not be considered as foreign countries.

		Whole percents
a.	To institutional, industrial, commercial, and professional users *Report sales to repair shops on line e.*	141
b.	To farmers (for farm use)	142
c.	To builders	143
d.	To governmental bodies (Federal, State, and local governments)	144
e.	To retailers and repair shops	145
f.	To wholesale establishments	146
g.	To household consumers and individual users	147
h.	Export sales	148
i.	**TOTAL (Sum of lines a through h should add to 100)** →	100%

Item 12 – EMPLOYMENT BY PRINCIPAL ACTIVITY

Report the approximate number of employees at this establishment according to their principal activity during the pay period including March 12, 1977 (total should equal item 6b(1)).

Line a – Include employees primarily engaged in selling services and merchandise from this establishment.

Line b – Include traveling salesmen, truck salesmen, etc.

Line c – Include employees primarily engaged in office and clerical work for this establishment. (See instruction for line e.)

Line d – Include employees primarily engaged in warehousing activities for this establishment. (See instruction for line e.)

Line e – Central administrative – Employees primarily engaged in various management, accounting, clerical, warehousing, etc., services for other establishments of your company. Include corporate officers unless primarily engaged in sales activities.

		Number of employees
a.	Inside selling	130
b.	Outside selling	131
c.	Office and clerical	132
d.	Warehousing	133
e.	Administrative	134
f.	Manufacturing	135
g.	Other – *Specify*	136
h.	**TOTAL (Sum of lines a through g should equal entry in item 6b(1))** →	137

Item 13 – WAREHOUSE, STOCKROOM, AND OTHER INVENTORY STORAGE SPACE, DECEMBER 31,1977

Report occupiable floor space excluding space occupied by interior walls, permanent aisles, elevator shafts, stairways, offices, receiving and shipping platforms, etc.

149 a. **Did you have warehouse, stockroom, or other inventory storage space on December 31, 1977?** 1 – YES – *Go to 13b* 2 – NO – *SKIP to item 15*

		Square feet		
		Mil.	Thou.	000
b.	Occupiable floor space (under-roof) – occupied and unoccupied – of this establishment	150		

Item 14 – Not applicable to this form

Item 15 – CREDIT SALES, RECEIVABLES, AND BAD DEBT LOSSES

155 a. **Did you have credit sales, receivables, or bad debt losses in 1977?** 1 – YES – *Go to 15b* 2 – NO – *SKIP to item 16*

b.	Approximately what percent of your 1977 sales were made on credit?	156		%
		Mil.	Thou.	Dol.
c.	Accounts and notes receivable, outstanding as of December 31, 1977	157		
d.	Bad debt losses, 1977	158		

Item 16 – TRUCKS, TRUCK TRACTORS, AND TRUCK TRAILERS OPERATED, MID-DECEMBER 1977

160 a. **Did this establishment operate any trucks, truck tractors, or truck trailers mid-December 1977?** 1 – YES – *Go to 16b* 2 – NO – *SKIP to item 17*

b. Number and type of vehicles operated mid-December 1977	TOTAL	Owned	Rented or leased (without drivers)
(1) Trucks (except tractor 'trailer)	161	162	163
(2) Truck tractors	164	165	166
(3) Semi-trailers and full-trailers	167	168	169

Remarks – *Please use this space for any explanation that may be essential in understanding your reported data.*

O.M.B. No. 41-R2349: Approval Expires November 30, 1978

FORM MA-171 (11-28-77) U.S. DEPARTMENT OF COMMERCE BUREAU OF THE CENSUS

DEPARTMENT OF DEFENSE-OWNED AND OPERATED ESTABLISHMENTS PRIMARILY ENGAGED IN MANUFACTURING AND ASSEMBLY, AND/OR RESEARCH AND DEVELOPMENT – 1977

(Includes shipyards)

(Supplement to the Annual Survey of Manufactures, Census Form MA-100)

INSTRUCTIONS – This report is to be prepared by those Department of Defense establishments whose primary activities are manufacture and assembly and/or research and development. All shipyards are included.

The information requested is based upon reports now regularly prepared by most such establishments.

NOTICE – Response to this inquiry is required by law (title 13, U.S. Code). By the same law, your report to the Census Bureau is confidential. It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are immune from legal process.

(Please correct if any error in name and address, including ZIP code)

PLEASE RETURN THIS COPY

ITEM 1 – NAME AND PHYSICAL LOCATION OF ESTABLISHMENT ON DECEMBER 31, 1977

a. Name of establishment

Your answers to parts b, c, d, e, and f of this item should relate to the ACTUAL PHYSICAL LOCATION of this establishment which may be different from the mailing address.

b. Street and number of establishment location*

*If establishment location cannot be described by street and number, give name and number, if any, of road or highway and sufficient information to locate establishment, e.g., Rt. 25, 3 miles south of Charlesville.

c. Type and name of place in which located – *Mark (X) first applicable type and enter name of place.*

Type	Name of place
☐ City	
☐ Village or borough	
☐ Town	
☐ Township	
☐ Other – Specify	

d. Is this establishment physically located within the legal boundaries of the place named in "c"?

☐ Yes ☐ No

e. County in which located

f. State **ZIP code**

g. Telephone number of establishment *(Include area code)*

ITEM 2 – NATURE OF ACTIVITY

Describe briefly the kind of activity of this establishment. If a manufacturing plant, list the three most important products.

ITEM 3 EMPLOYMENT PAYROLLS IN CALENDAR YEAR 1977 (Civilian employees only)

Class of employee	Item code	Number of civilian employees in 1977 — At end of quarter (As reported on Civil Service Form SF-113-A**) March (A)	June (B)	September (C)	December (D)	Sum of columns A, B, C, and D (E)	Average number of employees (Col. E divided by 4) (F)	Total wages and salaries of civilian employees (Thousands of dollars) (G)
a. Wage Board employees	41							$
b. All others	42							$
c. **TOTAL CIVILIAN EMPLOYEES** → *(Sum of lines a and b)*	49							$

** The number of Wage Board employees (line a) should be the same as reported on line 5 of SF-113-A. The total (line c) should be the same as reported on line 1 of SF-113-A.

ITEM 4 MAN-DAYS OF WAGE BOARD EMPLOYEES BY CALENDAR QUARTER 1977

Enter the total number of man-days of Wage Board employees for each calendar quarter of 1977. Do not include days paid for vacations, holidays, or sick leave.

Item code	1977 Quarterly period	Man-days (Thousands) (A)	Estimated number of man-hours*** (Thousands) (B)
51	a. January through March		
52	b. April through June		
53	c. July through September		
54	d. October through December		
59	e. **TOTAL, 1977** → *(Sum of lines a, b, c, and d)*		

*** Obtain figure for column (B) by multiplying column (A) by average number of hours per day per Wage Board employee in this establishment.

Please continue on page 2

ITEM 5 BILLINGS BY THIS ESTABLISHMENT DURING CALENDAR YEAR 1977

Enter below the specified classes of billings of this establishment for calendar year 1977

Billings for products and services (including progress billings)	Item code	Value (Thousands of dollars)
Manufacture and assembly	61	$
Construction and conversion	62	
Overhaul, repair, and renovation	63	
Alteration and modification	64	
Research and development	65	
Other billings	66	
Total billings for products and services	67	
Increase or decrease in unbilled costs of work in progress	68	
TOTAL EARNED REVENUE →	69	

ITEM 6 COSTS DURING CALENDAR YEAR 1977

Types of costs incurred	Item code	Cost (Thousands of dollars)
Materials, supplies, and parts used	71	$
Wages and salaries (same as item 3, code 49, col. G)	72	
Contractual services and other costs	73	
TOTAL COSTS INCURRED →	79	
VALUE ADDED (Census use only)	81	

ITEM 7 CHECKS TO ASSURE A COMPLETE AND ACCURATE REPORT

(Please complete this item after you have answered all items on this report.)

The Census Bureau reviews your report for omissions, inconsistencies, and unusual ratios. To save you future correspondence about these problems, please make the following checks before returning your report:

a. Review this report carefully to see that no items are omitted.
b. Calculate and enter the four "reasonableness" checks (described below), then review the resulting figures.
c. Correct your report for any errors you find; explain unusual figures in "Remarks" section.

"Reasonableness" checks	Calculation required for each check	Resulting figures for 1977
(1) Average hourly wages per Wage Board employee	Item code 41, column G (Wages paid Wage Board employees) ÷ item code 59, column B (Total estimated work-hours)	$
(2) Work days per year per Wage Board employee	Item code 59, column A (Wage Board work-days in thousands) × 1,000 ÷ item code 41, column F (Average number of Wage Board employees)	_____ Work-days
(3) Wages and salaries per dollar of earned revenue	Item code 72, (Wages and salaries of civilian employees) ÷ item code 69 (Total earned revenue)	$

(4) Is the total earned revenue (item code 69, total) greater than total costs incurred (item code 79, total)? . . . . . ☐ Yes ☐ No – *If "No," please explain in "Remarks" section.*

ITEM 8 REMARKS PERTAINING TO THIS REPORT

APPENDIX E. Authority for Census: Title 13, United States Code

COLLECTION AND PUBLICATION: Five-year periods (131)

The Secretary shall take, compile, and publish censuses of manufactures, of mineral industries, and of other businesses . . . in the year 1964, then in the year 1968, and every fifth year thereafter, and each such census shall relate to the year immediately preceding the taking thereof.

Geographic scope of censuses (191a)

(a) Each of the censuses authorized by this chapter shall include each State, the District of Columbia, the Virgin Islands, Guam, the Commonwealth of the Northern Mariana Islands, and the Commonwealth of Puerto Rico, and as may be determined by the Secretary, such other possessions and areas over which the United States exercises jurisdiction, control, or sovereignty. Inclusion of the other areas over which the United States exercises jurisdiction or control shall be subject to the concurrence of the Secretary of State.

Wrongful Disclosure of Information (214)

Whoever, being or having been an employee or staff member referred to in subchapter II of chapter I of this title, having taken and subscribed the oath of office, or having sworn to observe the limitations imposed by section 9 of this title, publishes or communicates any information, the disclosure of which is prohibited under the provisions of section 9 of this title, and which comes into his possession by reason of his being employed (or otherwise providing services) under the provisions of this title, shall be fined not more than $5,000 or imprisoned not more than 5 years, or both.

FAILURE TO ANSWER QUESTIONS AFFECTING COMPANIES, BUSINESSES, RELIGIOUS BODIES, AND OTHER ORGANIZATIONS: FALSE ANSWERS (224)

Whoever, being the owner, official, agent, person in charge, or assistant to the person in charge, of any company, business, institution, establishment, religious body, or organization of any nature whatsoever, neglects or refuses, when requested by the Secretary or other authorized officer or employee of the Department of Commerce or bureau or agency thereof, to answer completely and correctly to the best of his knowledge all questions relating to his company, business, institution, establishment, religious body, or other organization, or to records or statistics in his official custody, contained on any census or other schedule or questionnaire prepared and submitted to him under the authority of this title, shall be fined not more than $500; and if he willfully gives a false answer to any such question, he shall be fined not more than $10,000.

APPENDIX F. Standard Consolidated Statistical Areas and Standard Metropolitan Statistical Areas

(Titles and definitions of the SCSA's and the SMSA's in the United States established by the Department of Commerce, Office of Federal Statistical Policy and Standards, as of December 1977)

Standard Consolidated Statistical Areas

Boston-Lawrence-Lowell, Mass.-N.H.	Consists of Boston, Mass., SMSA; Lawrence-Haverhill, Mass.-N.H., SMSA; Lowell, Mass.-N.H., SMSA; and Brockton, Mass., SMSA
Chicago-Gary, Ill.-Ind.[1]	Consists of Chicago, Ill., SMSA, and Gary-Hammond-East Chicago, Ind., SMSA
Cincinnati-Hamilton, Ohio-Ky.-Ind.	Consists of Cincinnati, Ohio-Ky.-Ind., SMSA, and Hamilton-Middletown, Ohio, SMSA
Cleveland-Akron-Lorain, Ohio	Consists of Cleveland, Ohio, SMSA; Akron, Ohio, SMSA; and Lorain-Elyria, Ohio, SMSA
Detroit-Ann Arbor, Mich.	Consists of Detroit, Mich., SMSA, and Ann Arbor, Mich., SMSA
Houston-Galveston, Tex.	Consists of Houston, Tex., SMSA, and Galveston-Texas City, Tex., SMSA
Los Angeles-Long Beach-Anaheim, Calif	Consists of Los Angeles-Long Beach, Calif., SMSA; Anaheim-Santa Ana-Garden Grove, Calif., SMSA; Riverside-San Bernardino-Ontario, Calif., SMSA; and Oxnard-Simi Valley-Ventura, Calif., SMSA
Miami-Fort Lauderdale, Fla.	Consists of Miami, Fla., SMSA, and Fort Lauderdale-Hollywood, Fla., SMSA
Milwaukee-Racine, Wis.	Consists of Milwaukee, Wis., SMSA, and Racine, Wis., SMSA
New York-Newark-Jersey City, N.Y.-N.J.-Conn.[2]	Consists of New York, N.Y.-N.J., SMSA; Nassau-Suffolk, N.Y., SMSA; Newark, N.J., SMSA; Jersey City, N.J., SMSA; New Brunswick-Perth Amboy-Sayreville, N.J., SMSA; Paterson-Clifton-Passaic, N.J., SMSA; Long Branch-Asbury Park, N.J., SMSA; Stamford, Conn., SMSA; and Norwalk, Conn., SMSA
Philadelphia-Wilmington-Trenton, Pa.-Del.-N.J.-Md.	Consists of Philadelphia, Pa.-N.J., SMSA; Wilmington, Del.-N.J.-Md., SMSA, and Trenton, N.J., SMSA
San Francisco-Oakland-San Jose, Calif.	Consists of San Francisco-Oakland, Calif., SMSA; San Jose, Calif., SMSA, and Vallejo-Fairfield-Napa, Calif., SMSA
Seattle-Tacoma, Wash.	Consists of Seattle-Everett, Wash., SMSA, and Tacoma, Wash., SMSA

Standard Metropolitan Statistical Areas

Abilene, Tex.	Consists of Callahan, Jones, and Taylor Counties, Tex.
Akron, Ohio	Consists of Portage and Summit Counties, Ohio
Albany, Ga.	Consists of Dougherty and Lee Counties, Ga.
Albany-Schenectady-Troy, N.Y.	Consists of Albany, Montgomery, Rensselaer, Saratoga, and Schenectady Counties, N.Y.
Albuquerque, N. Mex.	Consists of Bernalillo and Sandoval Counties, N. Mex.
Alexandria, La.	Consists of Grant and Rapides Parishes, La.
Allentown-Bethlehem-Easton, Pa.-N.J.	Consists of Carbon, Lehigh, and Northampton Counties, Pa.; and Warren County, N.J.
Altoona, Pa.	Coextensive with Blair County, Pa.
Amarillo, Tex.	Consists of Potter and Randall Counties, Tex.
Anaheim-Santa Ana-Garden Grove, Calif.	Coextensive with Orange County, Calif.
Anchorage, Alaska	Coextensive with Anchorage Division, Alaska
Anderson, Ind.	Coextensive with Madison County, Ind.
Ann Arbor, Mich.	Coextensive with Washtenaw County, Mich.
Anniston, Ala.[3]	Coextensive with Calhoun County, Ala.
Appleton-Oshkosh, Wis.	Consists of Calumet, Outagamie, and Winnebago Counties, Wis.
Asheville, N.C.	Consists of Buncombe and Madison Counties, N.C.
Atlanta, Ga.	Consists of Butts, Cherokee, Clayton, Cobb, De Kalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Newton, Paulding, Rockdale, and Walton Counties, Ga.

See footnotes at end of appendix.

SMSA'S—Con.

Atlantic City, N.J.	Coextensive with Atlantic County, N.J.
Augusta, Ga.-S.C.	Consists of Columbia and Richmond Counties, Ga., and Aiken County, S.C.
Austin, Tex.[4]	Consists of Hays, Travis, and Williamson Counties, Tex.
Bakersfield, Calif.	Coextensive with Kern County, Calif.
Baltimore, Md.	Consists of Baltimore[5] city and Anne Arundel, Baltimore, Carroll, Harford, and Howard Counties, Md.
Baton Rouge, La.	Consists of Ascension, East Baton Rouge, Livingston, and West Baton Rouge Parishes, La.
Battle Creek, Mich.	Consists of Barry and Calhoun Counties, Mich.
Bay City, Mich.	Coextensive with Bay County, Mich.
Beaumont-Port Arthur-Orange, Tex.	Consists of Hardin, Jefferson, and Orange Counties, Tex.
Billings, Mont.	Coextensive with Yellowstone County, Mont.
Biloxi-Gulfport, Miss.	Consists of Hancock, Harrison, and Stone Counties, Miss.
Binghamton, N.Y.-Pa.	Consists of Broome and Tioga Counties, N.Y., and Susquehanna County, Pa.
Birmingham, Ala.	Consists of Jefferson, St. Clair, Shelby, and Walker Counties, Ala.
Bloomington, Ind.[3]	Coextensive with Monroe County, Ind.
Bloomington-Normal, Ill.	Coextensive with McLean County, Ill.
Boise City, Idaho	Coextensive with Ada County, Idaho
Boston, Mass.	Consists of Beverly, Lynn, Peabody, and Salem cities, and Boxford, Danvers, Hamilton, Lynnfield, Manchester, Marblehead, Middleton, Nahant, Saugus, Swampscott, Topsfield, and Wenham towns in Essex County; Cambridge, Everett, Malden, Medford, Melrose, Newton, Somerville, Waltham, and Woburn cities, and Acton, Arlington, Ashland, Bedford, Belmont, Boxborough; Burlington, Carlisle, Concord, Framingham, Holliston, Lexington, Lincoln, Natick, North Reading, Reading, Sherborn, Stoneham, Sudbury, Wakefield, Watertown, Wayland, Weston, Wilmington, and Winchester towns in Middlesex County; Quincy city, and Bellingham, Braintree, Brookline, Canton, Cohasset, Dedham, Dover, Foxborough, Franklin, Holbrook, Medfield, Medway, Millis, Milton, Needham, Norfolk, Norwood, Randolph, Sharon, Stoughton, Walpole, Wellesley, Westwood, Weymouth, and Wrentham towns in Norfolk County; Abington, Duxbury, Hanover, Hanson, Hingham, Hull, Kingston, Marshfield, Norwell, Pembroke, Rockland, Scituate towns in Plymouth County; and Boston, Chelsea, and Revere cities, and Winthrop town in Suffolk County, Mass.
Bradenton, Fla.[3]	Coextensive with Manatee County, Fla.
